

Introduction

Pursuant to Mississippi Code Annotated (MCA), §71-3-15(3)(Rev. 2000), the following Fee Schedule, including Cost Containment and Utilization Management rules and guidelines, is hereby established in order to implement a medical cost containment program. This Fee Schedule, and accompanying rules and guidelines, applies to medical services rendered after the effective date of November 1, 2016, and, in the case of inpatient treatment, to services where the discharge date is on or after November 1, 2016. This Fee Schedule establishes the maximum level of medical and surgical reimbursement for the treatment of work-related injuries and/or illnesses, which the Mississippi Workers' Compensation Commission deems to be fair and reasonable.

Updates and changes before the periodic update can be found by checking the State of Mississippi Workers' Compensation Commission website <http://www.mwcc.state.ms.us/#/home> or the Optum360 website <https://www.optum360coding.com/ProductUpdates/>. Subscribers should regularly check these sites for changes

This Fee Schedule shall be used by the Workers' Compensation Commission, insurance payers, and self-insurers for approving and paying medical charges of physicians, surgeons, and other qualified health care professionals for services rendered under the Mississippi Workers' Compensation Law. This Fee Schedule applies to all medical services provided to injured workers by physicians, and also covers other medical services arranged for by a physician. In practical terms, this means professional services provided by hospital-employed physicians and other qualified health care professionals, as well as those practicing independently, are reimbursed under this Fee Schedule.

The Commission will require the use of the most current CPT®, CDT, and HCPCS codes and modifiers in effect at the time services are rendered. All coding, billing and other issues, including disputes, associated with a claim, shall be determined in accordance with the CPT rules and guidelines in effect at the time service is rendered, unless otherwise provided in this Fee Schedule or by the Commission.

As used in this Fee Schedule, CPT refers to the American Medical Association's Current Procedural Terminology codes and nomenclature. CPT is a registered trademark of the American Medical Association. CDT refers to the American Dental Association's Current Dental Terminology (CDT) codes. HCPCS is an acronym for the Centers for Medicare and Medicaid Services' (CMS) Healthcare Common Procedure Coding System. HCPCS is divided into two subsets. HCPCS Level I codes are the CPT codes developed and maintained by the AMA. HCPCS Level II codes are developed and maintained by CMS and include codes for procedures, equipment, and supplies not found in the CPT book and are referred to in this fee schedule as HCPCS codes.

The inclusion of a service, product, or supply identified by a CPT, CDT, or HCPCS code does not necessarily imply coverage, reimbursement or endorsement.

I. FORMAT

This Fee Schedule is comprised of the following sections: Introduction; General Rules; Billing and Reimbursement Rules; Medical Records Rules; Dispute Resolution Rules; Utilization Review Rules; Rules for Modifiers and Code Exceptions; Pharmacy Rules; Other Qualified Health Care Professional Rules; Home Health Rules; Skilled Nursing Facility Rules; Evaluation and Management; Anesthesia; Pain Management; Surgery; Radiology; Pathology and Laboratory; Medicine Services; Therapeutic Services; Dental; Durable Medical Equipment (DME), Orthotics, Prosthetics and Other HCPCS Codes; Inpatient Hospital and Outpatient Facility Payment Schedule and Rules; and Forms. Each section listed above has specific instructions (rules/guidelines). The Fee Schedule is divided into these sections for structural purposes only. Providers are to use the specific section(s) that contains the procedure(s) they perform or the service(s) they render. **In the event a rule/guideline contained in one of the specific service sections conflicts with a general rule/guideline, the specific section rule/guideline will supersede, unless otherwise provided elsewhere in this Fee Schedule.**

This Fee Schedule utilizes procedure codes under copyright agreement. The descriptions included are full procedure descriptions. A complete list of modifiers is included in a separate section for easy reference.

II. SCOPE

The *Mississippi Workers' Compensation Medical Fee Schedule* does the following:

- A. Establishes rules/guidelines by which the employer shall furnish, or cause to be furnished, to an employee who suffers a bodily injury or occupational disease covered by the Mississippi Workers' Compensation Law, reasonable and necessary medical, surgical, and hospital services and medicines, supplies or other attendance or treatment as necessary. The employer shall provide to the injured employee such medical or dental surgery, crutches, artificial limbs, eyes, teeth, eyeglasses, hearing apparatus, and other appliances which are reasonable and necessary to treat,

cure, and/or relieve the employee from the effects of the injury/illness, in accordance with MCA §71-3-15 (Rev. 2000), as amended.

- B. Establishes a schedule of maximum reimbursement allowances (MRA) for such treatment, attendance, service, device, apparatus, or medicine.
- C. Establishes rules/guidelines by which a health care provider shall be paid the lesser of (a) the provider's total billed charge, or (b) the maximum reimbursement allowance (MRA) established under this Fee Schedule.
- D. Establishes rules for cost containment to include utilization review of health care and health care services, and provides for the acquisition by an employer/payer, other interested parties, and the Mississippi Workers' Compensation Commission, of the necessary records, medical bills, and other information concerning any health care or health care service under review.
- E. Establishes rules for the evaluation of the appropriateness of both the level and quality of health care and health care services provided to injured employees, based upon medically accepted standards.
- F. Authorizes employers/payers to withhold payment from, or recover payment from, health facilities or health care providers that have made excessive charges or which have provided unjustified and/or unnecessary treatment, hospitalization, or visits.
- G. Provides for the review by the employer/payer or Commission of any health facility or health care provider records and/or medical bills that have been determined not to be in compliance with the schedule of charges established herein.
- H. Establishes that a health care provider or facility may be required by the employer/payer to explain in writing the medical necessity of health care or health care service that is not usually associated with, is longer and/or more frequent than, the health care or health care service usually accompanying the diagnosis or condition for which the patient is being treated.
- I. Provides for medical cost containment review and decision responsibility. The rules and definitions hereunder are not intended to supersede or modify the Workers' Compensation Act, the administrative rules of the Commission, or court decisions interpreting the Act or the Commission's administrative rules.
- J. Provides for the monitoring of employers/payers to determine their compliance with the criteria and standards established by this Fee Schedule.
- K. Establishes deposition/witness fees.
- L. Establishes fees for medical reports.
- M. Provides for uniformity in billing of provider services.
- N. Establishes rules/guidelines for billing.
- O. Establishes rules/guidelines for reporting medical claims for service.
- P. Establishes rules/guidelines for obtaining medical services by out-of-state providers.
- Q. Establishes rules/guidelines for Utilization Review to include pre-certification, concurrent review, discharge planning and retrospective review.
- R. Establishes rules for dispute resolution which includes an appeal process for determining disputes which arise under this Fee Schedule.
- S. Establishes a peer review system for determining medical necessity. Peer review is conducted by professional practitioners of the same specialty as the treating medical provider on a particular case.
- T. Establishes the list of health care professionals who are considered authorized providers to treat employees under the Mississippi Workers' Compensation Law; and who, by reference in this rule, will be subject to the rules, guidelines and maximum reimbursement limits in this Fee Schedule.
- U. Establishes financial and other administrative penalties to be levied against payers or providers who fail to comply with the provisions of the Fee Schedule, including but not limited to interest charges for late billing or payment, percentage penalties for late billing or payment, and additional civil penalties for practices deemed unreasonable by the Commission.

III. MEDICAL NECESSITY

The concept of medical necessity is the foundation of all treatment and reimbursement made under the provision of §71-3-15, Mississippi Code of 1972, as amended. For reimbursement to be made, services and supplies must meet the

definition of “medically necessary.” The sole use of extraneous guidelines, including but not limited to the Official Disability Guidelines (“ODG”), to determine the appropriateness or extent of treatment or reimbursement is prohibited. Continuation of treatment shall be based on the concept of medical necessity and predicated on objective or appropriate subjective improvements in the patient’s clinical status. Arbitrary limits on treatment or reimbursement based solely on diagnosis or guidelines outside this Fee Schedule are not permitted.

- A. For the purpose of the Workers’ Compensation Program, any reasonable medical service or supply used to identify or treat a work-related injury/illness which is appropriate to the patient’s diagnosis, is based upon accepted standards of the health care specialty involved, represents an appropriate level of care given the location of service, the nature and seriousness of the condition, and the frequency and duration of services, is not experimental or investigational, and is consistent with or comparable to the treatment of like or similar non-work related injuries, is considered “medically necessary.” The service must be widely accepted by the practicing peer group, based on scientific criteria, and determined to be reasonably safe. It must not be experimental, investigational, or research in nature except in those instances in which prior approval of the payer has been obtained. For purposes of this provision, “peer group” is defined as similarly situated physicians of the same specialty, licensed in the State of Mississippi, and qualified to provide the services in question.
- B. Services for which reimbursement is due under this Fee Schedule are those services meeting the definition of “medically necessary” above and includes such testing or other procedures reasonably necessary and required to determine or diagnose whether a work-related injury or illness has been sustained, or which are required for the remedial treatment or diagnosis of an on-the-job injury, a work-related illness, a pre-existing condition affected by the injury or illness, or a complication resulting from the injury or illness, and which are provided for such period as the nature of the injury or process of recovery may require.
- C. Treatment of conditions unrelated to the injuries sustained in an industrial accident may be denied as unauthorized if the treatment is directed toward the non-industrial condition or if the treatment is not deemed medically necessary for the patient’s rehabilitation from the industrial injury.
- D. Services that are experimental or investigational, including but not limited to CPT Category II and Category III codes, are not reimbursable for this Fee Schedule. Please refer to the MWCC website (www.mwcc.ms.gov) for a list of some of these procedures.

IV. DEFINITIONS

Act means Mississippi Workers’ Compensation Law, Mississippi Code Annotated (MCA), §71-3-1 et seq (Rev. 2000 as amended).

Adjust means that a payer or a payer’s agent reduces or otherwise alters a health care provider’s request for payment.

APC means ambulatory payment classification and guidelines as developed by the Centers for Medicare and Medicaid Services (CMS) and adopted in this Fee Schedule.

Appropriate care means health care that is suitable for a particular patient, condition, occasion, or place.

ASA RVG means the American Society of Anesthesiologists (ASA) Relative Value Guide® (RVG), a listing of the anesthesia codes and modifiers and base units used for reporting anesthesia services.

AWP means Average Wholesale Price; a price generally twenty percent (20%) greater than a manufacturer sells to distributors and large customers and is based on data obtained from manufacturers, distributors, and other suppliers.

Bill means a claim submitted by a provider to a payer for payment of health care services provided in connection with a covered injury or illness.

Bill adjustment means a reduction of a fee on a provider’s bill, or other alteration of a provider’s bill.

By report (BR) means that the procedure is new, or is not assigned a maximum fee, and requires a written description included on or attached to the bill. “By report” (BR) procedures require a complete listing/description of the service, the dates of service, the procedure code, and the payment requested. The report is included in the reimbursement for the procedure.

Carrier means any stock company, mutual company, or reciprocal or inter-insurance exchange authorized to write or carry on the business of Workers’ Compensation Insurance in this State, or self-insured group, or third-party payer, or self-insured employer, or uninsured employer.

Case means a covered injury or illness occurring on a specific date and identified by the worker’s name and date of injury or illness.

CCI (See National Correct Coding Initiative.)

CDT means Current Dental Terminology, a medical code set maintained and copyrighted by the American Dental Association used for reporting dental services.

CMS-1500 means the CMS-1500 form and instructions that are used by non-institutional providers and suppliers to bill for outpatient services. Use of the most current CMS-1500 form is required.

Commission means the Mississippi Workers' Compensation Commission (MWCC).

Consultation means a service provided by a physician whose opinion or advice regarding evaluation and/or management of a specific problem is requested by another physician or other appropriate source. If a consultant, subsequent to the first encounter, assumes responsibility for management of the patient's condition, that physician becomes a treating physician. The first encounter is a consultation and shall be billed and reimbursed as such. A consultant shall provide a written report of his/her findings. *A second opinion is considered a consultation.*

Controverted claim is a workers' compensation claim which is pending before the Commission and in which the patient or patient's legal representative has filed a Petition to Controvert.

Covered injury or illness means an injury or illness for which treatment is mandated under the Act.

Critical care means care rendered in a variety of medical emergencies that requires the constant attention of the practitioner, such as cardiac arrest, shock, bleeding, respiratory failure, postoperative complications, and is usually provided in a critical care unit or an emergency department.

CPT (Current Procedural Terminology) means a set of codes, descriptions, and guidelines developed by the American Medical Association, intended to describe procedures and services performed by physicians and other health care professionals. The CPT code set is also used by other entities to report outpatient services. Each procedure or service is identified with a five-digit code. CPT codes may also be referred to as HCPCS Level I codes.

Day means a continuous 24-hour period.

Diagnostic procedure means a service that helps determine the nature and causes of a disease or injury.

Durable medical equipment (DME) means specialized equipment designed to stand repeated use, appropriate for home use, and used solely for medical purposes.

Employer Medical Evaluation (EME) means a second opinion evaluation available to the Employer or Carrier pursuant to MCA §71-3-15(1) (Rev. 2000) for the purpose of evaluating temporary or permanent disability, or the medical treatment being rendered to the injured worker.

Expendable medical supply means a disposable article that is needed in quantity on a daily or monthly basis.

Follow-up care means the care which is related to the recovery from a specific procedure and which is considered part of the procedure's maximum reimbursement allowance, but does not include complications.

Follow-up days (FUD) are the days of care following a surgical procedure which are included in the procedure's maximum reimbursement allowance amount, but which do not include complications. The follow-up day period begins on the day of the surgical procedure(s).

HCPCS means Healthcare Common Procedure Coding System, an alpha-numeric medical code set maintained by the Centers for Medicare and Medicaid Services used for reporting services, durable medical equipment, and supplies. HCPCS codes may also be referred to as HCPCS Level II codes.

Health care review means the review of a health care case, bill, or both by the payer or the payer's agent.

Incident-to means that services and supplies are commonly furnished as an integral part of the primary service or procedure and not reimbursed separately.

Incidental surgery means surgery performed through the same incision, on the same day, by the same doctor, not increasing the difficulty or follow-up of the main procedure, or not related to the diagnosis.

Independent medical examination (IME) means a consultation provided by a physician to evaluate a patient at the request of the Commission. This evaluation may include an extensive record review and physical examination of the patient and requires a written report.

Independent procedure means a procedure that may be carried out by itself, completely separate and apart from the total service that usually accompanies it.

Inpatient services means services rendered to a person who is admitted as an inpatient to a hospital.

Maximum reimbursement allowance (MRA) means the maximum amount allowed for medical services as set forth in this Fee Schedule.

Medical only case means a case that does not involve more than five (5) days of disability or lost work time and for which only medical treatment is required.

Medically accepted standard means a measure set by a competent authority as the rule for evaluating quality or quantity of health care or health care services and which may be defined in relation to any of the following:

- Professional performance
- Professional credentials
- The actual or predicted effects of care
- The range of variation from the norm

Medically necessary means any reasonable medical service or supply used to identify or treat a work-related injury/illness which is appropriate to the patient's diagnosis, is based upon accepted standards of the health care specialty involved, represents an appropriate level of care given the location of service, the nature and seriousness of the condition, and the frequency and duration of services, is not experimental or investigational, and is consistent with or comparable to the treatment of like or similar non-work related injuries. Utilization management or review decisions shall not be based on application of clinical guidelines, but must include review of clinical information submitted by the provider and represent an individualized determination based on the worker's current condition and the concept of medical necessity predicated on objective or appropriate subjective improvements in the patient's clinical status.

Medical record means a record in which the medical service provider records the subjective findings, objective findings, diagnosis, treatment rendered, treatment plan, and return to work status and/or goals and impairment rating as applicable.

Medical supply means either a piece of durable medical equipment or an expendable medical supply.

National Correct Coding Initiative means the official list of codes from the Centers for Medicare and Medicaid Services' (CMS) National Correct Coding Policy Manual that identifies services considered an integral part of a comprehensive code.

NCCI (See National Correct Coding Initiative.)

Observation services means services rendered to a person who is designated or admitted to a hospital or facility as observation status.

Operative report means the practitioner's written description of the surgery and includes all of the following:

- A preoperative diagnosis;
- A postoperative diagnosis;
- A step-by-step description of the surgery;
- A description of any problems that occurred in surgery; and
- The condition of the patient upon leaving the operating room.

Optometrist means an individual licensed to practice optometry.

Orthotic equipment means an orthopedic apparatus designed to support, align, prevent, or correct deformities, or improve the function of a moveable body part.

Orthotist means a person skilled in the construction and application of orthotic equipment.

Outpatient service means services provided to patients at a time when they are not hospitalized as inpatients.

Payer means the employer or self-insured group, carrier, or third-party administrator (TPA) who pays the provider billings.

Pharmacy means the place where the science, art, and practice of preparing, preserving, compounding, dispensing, and giving appropriate instruction in the use of drugs is practiced.

Practitioner means a person licensed, registered, or certified as an acupuncturist, audiologist, doctor of chiropractic, doctor of dental surgery, doctor of medicine, doctor of osteopathy, doctor of podiatry, doctor of optometry, massage therapist, nurse, nurse anesthetist, nurse practitioner, occupational therapist, orthotist, pharmacist, physical therapist, physician assistant, prosthetist, psychologist, or other person licensed, registered, or certified as a health care professional or provider.

Primary procedure means the therapeutic procedure most closely related to the principal diagnosis, and in billing, the code with the highest unit that is neither an add-on code nor a code exempt from modifier 51 shall be considered the primary procedure. Reimbursement for the primary procedure is not dependent on the ordering or re-ordering of codes.

Procedure means a unit of health service.

Procedure code means a five-digit numerical sequence or a sequence containing an alpha character and preceded or followed by four digits, which identifies the service performed and billed.

Properly submitted bill means a request by a provider for payment of health care services submitted to a payer on the appropriate forms with appropriate documentation and within the time frame established under the guidelines of the Fee Schedule.

Prosthesis means an artificial substitute for a missing body part.

Prosthetist means a person skilled in the construction and application of prostheses.

Provider means a facility, health care organization, or a practitioner who provides medical care or services.

Resequenced code means a code that is printed in the CPT book out of numeric sequence but is printed in this Fee Schedule in the numeric order.

Secondary procedure means a surgical procedure performed during the same operative session as the primary surgery but considered an independent procedure that may not be performed as part of the primary surgery.

Special report means a report requested by the payer to explain or substantiate a service or clarify a diagnosis or treatment plan.

Specialist means a board-certified practitioner, board-eligible practitioner, or a practitioner otherwise considered an expert in a particular field of health care service by virtue of education, training, and experience generally accepted by practitioners in that particular field of health care service.

Usual and customary means that when a payment is designated herein as “usual and customary,” the amount of the payment equates to the charge value reported by FAIR Health, Inc. in its FH RV Benchmarks (or other FAIR Health, Inc. Benchmark product available on the date of service) products at the 40th percentile for the applicable geographic area in Mississippi.

V. HOW TO INTERPRET THE FEE SCHEDULE

For each procedure, the Fee Schedule table includes the following columns and details (if applicable):

Code Icons

Add-on Codes

+ denotes procedure codes that are considered “add-on” codes as defined in the CPT book.

Modifier 51 Exempt

⊙ denotes procedure codes that are exempt from the use of modifier 51 and are not designated as add-on procedures/services as defined in the CPT book. Modifier 51 exempt services and procedures can be found in Appendix E of *CPT 2016*.

Ⓢ denotes additional codes that should not be subject to modifier 51 as identified by Optum360 based upon CPT guidelines.

Moderate (Conscious) Sedation

⦿ denotes procedure codes that include conscious sedation as an inherent part of providing the procedure.

Resequenced Codes

denotes procedure codes that are in numeric order but are considered resequenced and display in a different order within the 2016 CPT book.

APC J Status

J1 applicable to APC payments. See the Inpatient Hospital and Outpatient Facility Payment Schedule and Rules section for more information.

Code

This Fee Schedule uses 2016 CPT, CDT, and HCPCS codes.

Modifiers

In the HCPCS section modifiers that affect payment are listed in this column. See the HCPCS section for more information regarding the modifiers.

Description

This Fee Schedule uses 2016 full descriptions.

Amount

This column lists the total maximum allowable as a monetary amount. Procedures with a \$0.00 in the Amount column are not covered or are not reimbursed.

PC Amount

Where there is an identifiable professional and technical component to a procedure, the portion considered to be the maximum allowable for the professional component is listed in the PC Amount column. Procedures with a \$0.00 in the PC Amount column are considered one hundred percent (100%) technical. See Rules for Modifiers and Code Exceptions for additional information.

TC Amount

Where there is an identifiable professional and technical component to a procedure, the portion considered to be the maximum allowable for the technical component is listed in the TC Amount column. Procedures with a \$0.00 in the TC Amount column or where the TC column Amount column is blank are considered one hundred percent (100%) professional. See Rules for Modifiers and Code Exceptions for additional information.

FUD

Follow-up days (FUD) included in a surgical procedure's global charge are listed in this column.

Postoperative periods of 0, 10, and 90 days are designated in the Fee Schedule as 000, 010, and 090 respectively. The following special circumstances are also listed in the postoperative period:

- MMM Designates services furnished in uncomplicated maternity care. This includes antepartum, delivery, and postpartum care.
- XXX Designates services where the global concept does not apply.
- YYY Designates services where the payer must assign a follow-up period based on documentation submitted with the claim. Procedures designated as YYY in the fee schedule include unlisted procedure codes.
- ZZZ Designates services that are add-on procedures and as such have a global period that is determined by the primary procedure.

Assist Surg

The assistant surgeon column identifies procedures that are approved for an assistant to the primary surgeon whether a physician, physician assistant (PA), registered nurse first assistant (RNFA, RA), or other individual qualified for reimbursement as an assistant under the Fee Schedule.

APC Amount

Ambulatory Payment Classification (APC) is a payment method for facility outpatient services. The APC system as developed by the Centers for Medicare and Medicaid Services (CMS) includes many of the supplies that have previously been separately billed. These supplies will now be bundled into the APC Amount consistent with CMS guidelines. The APC Amount shall constitute the reimbursement amount for both hospital based and freestanding outpatient facilities.

VI. AUTHORIZED PROVIDERS

The following health care providers are recognized by the Mississippi Workers' Compensation Commission as acceptable to provide treatment to injured workers under the terms of the Act, and must comply with the rules, guidelines, billing and reimbursement policies, and maximum reimbursement allowance (MRA) contained in this Fee Schedule when providing treatment or service under the terms of the Act:

Acupuncturist (L.A.C.)
Audiologist
Certified Registered Nurse Anesthetist (C.R.N.A.)
Doctor of Chiropractic (D.C.)
Doctor of Dental Surgery (D.D.S.)/Doctor of Dental Medicine (D.D.M.)
Doctor of Osteopathy (D.O.)
Licensed Clinical Social Worker (L.C.S.W.)
Licensed Nursing Assistant
Licensed Practical Nurse (L.P.N.)
Massage Therapist
Medical Doctor (M.D.)
Nurse Practitioner (N.P.)
Occupational Therapist (O.T.)
Optometrist (O.D.)
Oral Surgeon (M.D., D.O., D.M.D., D.D.S.)
Pharmacist (R.Ph.)
Physical Therapist (P.T.)
Physical or Occupational Therapist Assistant (P.T.A., O.T.A.)
Physician Assistant (P.A.)
Podiatrist (D.P.M.)
Prosthetist or Orthotist
Psychologist (Ph.D.)
Registered Nurse (R.N.)
Registered Nurse First Assistant (R.N.F.A., R.A.)
Speech Therapist

All health care providers, as listed herein, are subject to the rules, limitations, exclusions, and maximum reimbursement allowances of this Fee Schedule. Medical treatment under the terms of the Act may be provided by any other person licensed, registered, or certified as a health care professional if approved by the payer or Commission, and in such case, said provider and payer shall be subject to the rules and guidelines, including maximum reimbursement amounts, provided herein.

VII. INFORMATION PROGRAM

The Mississippi Workers' Compensation Commission shall provide ongoing information regarding this Fee Schedule for providers, payers, their representatives and any other interested persons or parties. This information shall be provided primarily through informational sessions and seminar presentations at the Mississippi Workers' Compensation Educational Association Conference as well as the distribution of appropriate information materials via the Commission's website (www.mwcc.ms.gov), and by other means as needed. Updates to this Fee Schedule will also be posted to the Optum360 website <https://www.optum360coding.com/ProductUpdates/>.

General Rules

I. CONFIRMATORY CONSULTATION

As provided in §71-3-15(1) of the Act, and in MWCC General Rule 9, a payer/employer may request a second opinion examination or evaluation for the purpose of evaluating temporary or permanent disability or medical treatment being rendered. This examination is considered a confirmatory consultation. The confirmatory consultation is billed using the appropriate level and site-specific consultation code with modifier 32 appended to indicate a mandated service and paid in accordance with the Fee Schedule.

II. CODING STANDARD

- A. The most current version of the American Medical Association's *Current Procedural Terminology* (CPT®) or the American Dental Association's *CDT 2016: Dental Procedure Codes* in effect at the time service is rendered or provided shall be the authoritative coding guide, unless otherwise specified in this Fee Schedule.
- B. The most current version of HCPCS codes developed by CMS in effect at the time service is rendered or provided shall be the authoritative coding guide for durable medical equipment, prosthetics, orthotics, and other medical supplies (DMEPOS), unless otherwise specified in this Fee Schedule.
- C. Services will be coded according to the appropriate code edits. For the purpose of this Fee Schedule, the National Correct Coding Initiative (NCCI) edits are used, and apply to all sections unless an exception is addressed in a particular section.

III. DEPOSITION/WITNESS FEES; MEDICAL RECORDS AFFIDAVIT

- A. Any health care provider who gives a deposition or is otherwise subpoenaed to appear in proceedings pending before the Commission shall be paid a witness fee as provided by MWCC Procedural Rule 18(h) in the amount of \$25.00 per day plus mileage reimbursement at the rate authorized by MWCC General Rule 14. Procedure code 99075 must be used to bill for a deposition.
- B. In addition to the above fee and mileage reimbursement, any health care provider who gives testimony by deposition or who appears in person to testify at a hearing before the Commission shall be paid \$500.00 for the first hour and \$125.00 per quarter hour thereafter. This fee includes necessary preparation time. In the event a deposition is cancelled through no fault of the provider, the provider shall be entitled to a payment of \$250.00 unless notice of said cancellation is given to the provider at least 72 hours in advance. In the event a deposition is cancelled through no fault of the provider within 24 hours of the scheduled time, then, in that event, the provider shall be paid the rate due for the first hour of a deposition. Nothing stated herein shall prohibit a medical provider and a party seeking to take the medical provider's deposition from entering into a separate contract which provides for reimbursement other than as above provided.
- C. Pursuant to Mississippi Workers' Compensation Commission Procedural Rule 9, an examining or treating physician may execute an affidavit in lieu of direct testimony. The Physician's Medical Record Custodian is allowed to sign the affidavit in lieu of the physician's signature. Such charge for execution of the affidavit is limited to a maximum reimbursement of \$25.00. Reimbursement for copies of medical records that are attached to affidavits shall be made as outlined elsewhere in the Fee Schedule.
- D. Any health care provider who gives a deposition or is otherwise subpoenaed to provide information, documents, or other records of any kind may be entitled to make an entry of appearance as a party in the underlying workers' compensation claim for the limited purpose of contesting the subpoena and/or the scope of the requested information or deposition. No part of this section shall be construed to create any additional liability on the part of the health care provider beyond that set forth in Mississippi Code Annotated (MCA) §71-3-59(2) or otherwise set forth in the Mississippi Workers' Compensation Law and/or the Fee Schedule. Pursuant to MCA §71-3-59(2), the Commission may award attorney's fees and expenses to the health care provider in the event the Commission finds the scope of the subpoena, deposition, or other information requested from the health care provider is an institution, continuance, or delay of proceedings without reasonable grounds by the party seeking the information from the health care provider and/or the attorney advising such party. Pursuant to MCA §71-3-59(2), the Commission may also impose a civil penalty not to exceed ten thousand dollars (\$10,000.00) against the party and/or the attorney advising such party seeking the information from the health care provider for each violation. Similarly, the Commission may also award attorney's fees, expenses, and/or the civil penalty against the health care provider and/or their attorney in the event the

Commission finds that the health care provider's challenge to the subpoena, deposition, or other requested information is an institution, continuance, or delay of proceedings without reasonable grounds.

IV. IMPAIRMENT RATING

- A. In determining the extent of permanent impairment attributable to a compensable injury, the provider shall base this determination on the most current edition of the *Guides to the Evaluation of Permanent Impairment*, as published and copyrighted by the American Medical Association which is in effect at the time the service is rendered. Only a medical doctor is entitled under these rules to reimbursement for conducting an impairment rating evaluation.
- B. A provider is entitled to reimbursement for conducting an impairment rating evaluation and determining the extent of permanent impairment, and should bill for such services using CPT code 99455. The maximum reimbursement for CPT code 99455 shall be \$250.00.

V. INDEPENDENT MEDICAL EXAMINATION (IME)

- A. An independent medical examination (IME) may be ordered by the Mississippi Workers' Compensation Commission or its Administrative Judges. A practitioner other than the treating practitioner must do the medical examination, and the Commission or Judge shall designate the examiner.
- B. An independent medical examination (IME) shall include a study of previous history and medical care information, diagnostic studies, diagnostic x-rays, and laboratory studies, as well as an examination and evaluation. An IME can only be ordered by the Workers' Compensation Commission or one of its Administrative Judges. A copy of the report must be sent to the patient, or his attorney if represented, the payer, and the Mississippi Workers' Compensation Commission.
- C. The fee for the IME may be set by the Commission or Judge, or negotiated by the payer and provider prior to setting the appointment, and in such cases, reimbursement shall be made according to the order of the Commission or Judge, or according to the mutual agreement of the parties. In the absence of an agreement or order regarding reimbursement for an IME, the provider shall bill for the IME using the appropriate level and site-specific consultation code appended with modifier 32 to indicate a mandated service, and shall be reimbursed according to the Fee Schedule.

VI. EMPLOYER'S MEDICAL EXAMINATION (EME)

- A. An examination of the claimant by a physician of the employer's/carrier's choosing. If the claimant refuses these services, the claimant's benefits may be suspended. The employer/carrier may not unilaterally suspend benefits based upon the claimant's failure to attend an EME. The statute authorizes only the Commission to suspend benefits for failure to comply with medical treatment.

VII. MAXIMUM MEDICAL IMPROVEMENT

- A. When an employee has reached maximum medical improvement (MMI) for the work related injury and/or illness, the physician should promptly, and at least within fourteen (14) days, submit a report to the payer showing the date of maximum medical improvement (MWCC Form B9,27).
- B. Maximum medical improvement is reached at such time as the patient reaches the maximum benefit from medical treatment or is as far restored as the permanent character of his injuries will permit and/or the current limits of medical science will permit. Maximum medical improvement may be found even though the employee will require further treatment or care.

VIII. OUT-OF-STATE MEDICAL TREATMENT

- A. Each employer shall furnish all reasonable and necessary drugs, supplies, hospital care and services, and medical and surgical treatment for the work-related injury or illness. All such care, services, and treatment shall be performed at facilities within the state when available.
- B. When billing for out-of-state services, supporting documentation is necessary to show that the service being provided cannot be performed within the state, the same quality of care cannot be provided within the state, or more cost-effective care can be provided out-of-state. In determining whether out-of-state treatment is more cost effective, this question must be viewed from both the payer and patient's perspective. Treatment should be provided in an area reasonably convenient to the place of the injury or the residence of the injured employee, in addition to being reasonably suited to the nature of the injury.

- C. Reimbursement for out-of-state services shall be based on one of the following, in order of preference: (1) the workers' compensation fee schedule for the state in which services are rendered; or (2) in cases where there is no applicable fee schedule for the state in which services are rendered, or the fee schedule in said state excludes or otherwise does not provide reimbursement allowances for the services rendered, reimbursement should be paid at the usual and customary rate for the geographical area in which the services are rendered; or (3) reimbursement for out-of-state services may be based on the mutual agreement of the parties. The *Mississippi Workers' Compensation Medical Fee Schedule* coding and billing rules apply whenever an injured employee is receiving workers' compensation benefits under Mississippi law or would be entitled to receive benefits under Mississippi law, whether the treatment is in Mississippi or any other state in order for out-of-state providers to obtain reimbursement.
- D. Prior authorization must be obtained from the payer for referral to out-of-state providers. The documentation must include the following:
 - 1. Name and location of the out-of-state provider,
 - 2. Justification for an out-of-state provider, including qualifications of the provider and description of services being requested.

IX. AUTHORIZATION FOR TREATMENT

- A. **Prior Authorization.** Providers must request authorization from the payer before service is rendered for the services and supplies listed below:
 - 1. Non-emergency elective inpatient hospitalization
 - 2. Non-emergency elective inpatient surgery
 - 3. Non-emergency elective outpatient surgery
 - 4. Physical medicine treatments after 15 visits or 30 days, whichever comes first
 - 5. Rental or purchase of supplies or equipment over the amount of \$300.00 per item
 - 6. Rental or purchase of TENS
 - 7. Home health services
 - 8. Pain clinic/therapy programs, including interdisciplinary pain rehabilitation programs
 - 9. External spinal stimulators
 - 10. Pain control programs
 - 11. Work hardening programs, functional capacity testing, ISO kinetic testing
 - 12. Referral for orthotics or prosthetics
 - 13. Referral for acupuncture
 - 14. Referral for biofeedback
 - 15. Referral to psychological testing/counseling
 - 16. Referral to substance abuse program
 - 17. Referral to weight reduction program
 - 18. Referral to any non-emergency medical service outside the State of Mississippi
 - 19. Repeat MRI (more than one per injury)
 - 20. Repeat CT Scan (more than one per injury)
 - 21. Intraoperative neurophysiologic monitoring (e.g., SSEP, VEP, DEP, BAEP, MEP)
- B. **Response Time.** The payer must respond within two (2) business days to a request of prior authorization for non-emergency services.
- C. **Federal Facilities.** Treatment provided in federal facilities requires authorization from the payer. However, federal facilities are exempt from the billing requirements and reimbursement policies in this manual.
- D. **Pre-certification for Non-emergency Surgery.** Providers must pre-certify all non-emergency surgery. However, certain catastrophic cases require frequent returns to the operating room (O.R.) (e.g., burns may require daily surgical debridement). In such cases, it is appropriate for the provider to obtain certification of the treatment plan to include multiple surgical procedures. The provider's treatment plan must be specific and agreement must be mutual between the provider and the payer regarding the number and frequency of procedures certified.

- E. **Retrospective Review.** Failure to obtain pre-certification as required by this Fee Schedule shall not, in and of itself, result in a denial of payment for the services provided. Instead, the payer, if requested to do so by the provider within one (1) year of the date of service or discharge, shall conduct a retrospective review of the services, and if the payer determines that the services provided would have been pre-certified, in whole or in part, if pre-certification had been timely sought by the provider, then the payer shall reimburse the provider for the approved services according to the Fee Schedule, or, if applicable, according to the separate fee agreement between the payer and provider, less a ten percent (10%) penalty for the provider's failure to obtain pre-certification as required by this Fee Schedule. This penalty shall be computed as ten percent (10%) of the total allowed reimbursement. If, upon retrospective review, the payer determines that pre-certification would not have been given, or would not have been given as to part of the requested services, then the payer shall dispute the bill and proceed in accordance with the Billing and Reimbursement Rules as hereafter provided.
- F. **Authorization Provided by Employer or Payer.** When authorization for treatment is sought and obtained from the employer, or payer, whether verbally or in writing, and medical treatment is rendered in good faith reliance on this authorization, the provider is entitled to payment from the employer or payer for the initial visit or evaluation, or in emergency cases, for treatment which is medically necessary to stabilize the patient. Reimbursement is not dependent on, and payment is due regardless of, the outcome of medically necessary services which are provided in good faith reliance upon authorization given by the employer or payer.

X. RETURN TO WORK

If an employee is capable of some form of gainful employment, it is advisable for the physician to release the employee to light work and make a specific report to the payer as to the date of such release and setting out any restrictions on such light work. It can be to the employee's economic advantage to be released to light or alternative work, since he/she can receive compensation based on sixty-six and two-thirds percent (66 2/3%) of the difference between the employee's earnings in such work and the employee's pre-injury average weekly wage. The physician's judgment in such matters is extremely important, particularly as to whether the patient is medically capable of returning to work in some capacity. Return to work decisions should be based on objective findings, and the physician's return to work assessment should identify, if possible, any alternative duty employment to which the patient may return if return to full duty is not medically advisable.

XI. SELECTION OF PROVIDERS

The selection of appropriate providers for diagnostic testing or analysis, including but not limited to surgical/procedure facilities, CAT scans, MRI, x-ray, laboratory, physical or occupational therapy, including work hardening, functional capacity evaluations, chronic pain programs, or massage therapy shall be at the direction of the treating or prescribing physician. In the absence of specific direction from the treating or prescribing physician, the selection shall be made by the payer, in consultation with the treating or prescribing physician.

Referral for an electromyogram and/or a nerve conduction study shall be at the discretion and direction of the physician in charge of care, and neither the payer nor the payer's agent may unilaterally or arbitrarily redirect the patient to another provider for these tests. The payer or the payer's agent may, however, discuss with the physician in charge of care appropriate providers for the conduct of these tests in an effort to reach an agreement with the physician in charge as to who will conduct an electromyogram and/or nerve conduction study in any given case.

The selection of providers for the purchase or rental of durable medical equipment shall be at the direction of the payer.

The selection of providers for medical treatment or service, other than as above provided, shall be in accordance with the provisions of MCA §71-3-15.

XII. DRUG SCREENING (MCA §71-3-121)

Only one (1) drug screen or drug test result shall be eligible for reimbursement for each drug test conducted on the same patient on the same day, except and unless the initial screening results are deemed by the prescribing provider to be inconsistent or inherently unreliable. In that event, a confirmation screening may be ordered by the prescribing provider and paid for by the payer. In addition, treatment may not be discontinued based on the results of a drug test absent a confirmation test, which shall be reimbursed in addition to the initial screening test. Merely duplicate screenings or tests which are rerun to confirm initial results are not otherwise eligible for reimbursement.

XIII. MILEAGE REIMBURSEMENT (MCA §71-3-15; MISS. WORK COMP. COM. GENERAL RULE 14)

The payer shall reimburse each claimant for all travel to obtain medical treatment which is being obtained under the provisions of the Mississippi Workers' Compensation Law, including travel to a pharmacy to obtain medication or supplies necessary for treatment of a compensable injury, regardless of the number of miles traveled. There is no minimum distance of travel required for reimbursement, and reimbursement shall be made for each mile of round trip travel necessitated by the

compensable injury, at the rate adopted by the Commission and in effect at the time of the travel. Only reasonable and necessary miles traveled are subject to reimbursement.

The payer shall notify the claimant in writing of his/her right to receive mileage reimbursement for travel to obtain medical treatment, including travel to a pharmacy to obtain medication or supplies necessary for treatment of a compensable injury, regardless of the number of miles traveled, as stated in the paragraph above. Mileage must be paid promptly to the claimant without unreasonable delay. In the absence of good cause shown, any failure to pay a claimant's mileage within 14 days after receipt of a request for mileage reimbursement from the claimant may be considered by the Commission to be unreasonable delay and subject the payer to attorney's fees, expenses, and a penalty of up to ten thousand dollars (\$10,000.00) pursuant to Miss. Code Ann. Section 71-3-59. Nothing about this provision shall be construed to diminish the payer's obligation to pre-pay mileage where otherwise applicable under the Mississippi Workers' Compensation Act and/or the Commission's General or Procedural Rules.

XIV. SETTLEMENTS WITH MEDICARE SET-ASIDES

Pursuant to Miss. Code Ann. Section 71-3-15(3), "Any employee receiving treatment or service under the provisions of this chapter may not be held responsible for any charge for such treatment or service, and no doctor, hospital or other recognized medical provider shall attempt to bill, charge or otherwise collect from the employee any amount greater than or in excess of the amount paid by the employer, if self-insured, or its workers' compensation carrier." Therefore, in the event a claimant settles his/her workers' compensation claim and the terms of the settlement include a Medicare Set-Aside (MSA), the fees, charges, and/or amounts for reimbursement set forth in the Medical Fee Schedule shall remain applicable to all medical treatment, services, and supplies, and any and all other aspects of medical treatment provided for the workers' compensation injury to the claimant after the settlement in the exact same manner as if the claim had not been settled.

XV. SALES TAX

All Amounts in the *Mississippi Workers' Compensation Fee Schedule* include any sales tax/shipping charges, etc. Therefore, no additional amount is reimbursed for these items.

XVI. PATIENT'S RIGHT TO HEARING

Nothing provided in this Fee Schedule shall estop or prevent the patient from obtaining legal counsel and/or seeking relief in the form of a request to compel medical treatment before an Administrative Judge.

XVII. INVESTIGATIONAL PROCEDURES

The following procedures are considered investigational, and, therefore, do not presently qualify for reimbursement under the *Mississippi Workers' Compensation Medical Fee Schedule*:

- A. Intradiscal electrothermal therapy (IDET) (22526, 22527) and intradiscal annuloplasty by other method (22899).
- B. Intraventricular administration of morphine.
- C. Pulse radiofrequency, regardless of procedure involved or indication (e.g., medial branch radiofrequency, dorsal root radiofrequency, etc.). If pulsed radiofrequency is used, but not specifically recorded as such in the medical records, the payer may retroactively deny payment for the service and request for reimbursement from the provider.
- D. Intradiscal therapies used in discography, such as percutaneous disc decompression (Dekompressor), fluoroscopic, laser, radiofrequency, and thermal disc therapies.
- E. Percutaneous disc nucleoplasty.
- F. Epidural adhesiolysis, also known as Racz procedure or lysis of epidural adhesions.
- G. X-STOP fusion devices.
- H. MILD (minimally invasive lumbar decompression) procedures.
- I. Non-invasive pain procedure (NIP procedure or NIPP).
- J. Alpha-stim unit.
- K. ReBuilder and low laser treatment.
- L. Botox for the use of musculoskeletal pain.

- M. Ketamine infusion therapy.
- N. Plasma rich protein (PRP) injections

Billing and Reimbursement Rules

I. GENERAL PROVISIONS

- A. **Maximum Reimbursement Allowance (MRA).** Unless the payer and provider have a separate fee contract which provides for a different level of reimbursement, the maximum reimbursement allowance for health care services shall be the lesser of (a) the provider's total billed charge, or (b) the maximum specific fee established by the Fee Schedule. Items or services or procedures which do not have a maximum specific fee established by this Fee Schedule shall be reimbursed at the usual and customary fee as defined in this Fee Schedule, and in such cases, the maximum reimbursement allowance shall be the lesser of (1) the provider's total billed charge, or (2) the usual and customary fee as defined by this Fee Schedule.

If this Fee Schedule does not establish a maximum specific fee for a particular service or procedure, and a usual and customary rate cannot be determined because the FH RV Benchmarks products do not contain a fee for same, then the maximum reimbursement allowance shall be equal to the national Medicare allowance plus thirty percent (30%). In the absence of an established Medicare value, and assuming none of the above provisions apply, the maximum reimbursement allowance shall be eighty percent (80%) of the provider's total billed charge. Any new codes will be assigned values and posted on the MWCC website annually, or as needed.

- B. **Separate Fee Contract.** An employer/payer may enter into a separate contractual agreement with a medical provider regarding reimbursement for services provided under the provisions of the Mississippi Workers' Compensation Law, and if an employer/payer has such a contractual agreement with a provider designed to reduce the cost of workers' compensation health care services, the contractual agreement shall control as to the amount of reimbursement and shall not be subject to the maximum reimbursement allowance otherwise established by the Fee Schedule. However, all other rules, guidelines and policies as provided in this Fee Schedule shall apply and shall be considered to be automatically incorporated into such agreement.
1. **Repricing Agreements.** Payers and providers may voluntarily enter into repricing agreements designed to contain the cost of workers' compensation health care after the medical care or service has been provided, and in such case, the reimbursement voluntarily agreed to by the parties shall control to the exclusion of the Fee Schedule. However, the time spent by the payer and provider attempting to negotiate a post-care repricing agreement does not extend the time elsewhere provided in this Fee Schedule for billing claims, paying claims, requesting correction of an incorrect payment, requesting reconsideration, seeking dispute resolution, or reviewing and responding to requests for correction or reconsideration or dispute resolution. In addition, applicable interest and penalties related to late billing and/or late payment shall continue to accrue as otherwise provided. Efforts to negotiate a post-care repricing agreement do not justify late billing or payment, and either party may seek further relief in accordance with the rules provided herein should billing or payment not be made within the time otherwise due under these rules. No party shall be obligated to negotiate or enter into a repricing agreement of any kind whatsoever.
- No party, in attempting to negotiate a repricing or other post treatment price reduction agreement, shall state or imply that consent to such an agreement is mandatory, or that the failure to enter into any such agreement may result in audit, delay of payment, or other adverse consequence. If the Commission determines that any party, or other person in privity therewith, has made such false or misleading statements in an effort to coerce another party's consent to a repricing or other price reduction agreement outside the Fee Schedule, the Commission may refer the matter to the appropriate authorities to consider whether such conduct warrants criminal prosecution under §71-3-69 of the Law. This statute declares that any false or misleading statement or representation made for the purpose of wrongfully withholding any benefit or payment otherwise due under the terms of the Workers' Compensation Law shall be considered a felony. In addition, the Commission may levy a civil penalty in an amount not to exceed ten thousand dollars (\$10,000.00) if it finds that payment of a just claim has been delayed without reasonable grounds, as provided in §71-3-59(2) of the Law.
- C. **Billing Forms.** Billing for provider services shall be standardized and submitted on the following forms: Providers must bill outpatient professional services on the most recently authorized paper form, CMS-1500, or electronic version, 837p, regardless of the site of service. Health care facilities must bill on the most recently authorized uniform billing form. The electronic version, 837i, or the paper form UB-04 (CMS-1450) is required. Billing must be submitted using the most current paper or electronic forms which are authorized by CMS.
- D. **Identification Number.** All professional reimbursement submissions by Covered Healthcare Providers as defined under CMS rules for the implementation of the National Provider Identifier (NPI) must include the National Provider Identifier (NPI) field so as to enable the specific identification of individual providers without the need for other unique provider identification numbers. Providers who do not yet have an NPI should use the CMS default identifier until such time as an NPI is obtained. Providers are required to obtain an NPI within the dates specified by CMS in its implementation rules.

- E. **Physician Specialty.** The rules and reimbursement allowances in the *Mississippi Workers' Compensation Medical Fee Schedule* do not address physician specialization within a specialty. Payment is not based on the fact that a physician has elected to treat patients with a particular/specific problem. Reimbursement to qualified physicians is the same amount regardless of specialty.
- F. **"No Show" Appointments.** When an appointment is made for a physician visit by the employer or payer, and the claimant/patient does not show, the provider is entitled to payment at the rate allowed for a minimal office visit.
- G. **"After Hours" and Other Adjunct Service Codes.** When an office service occurs after a provider's normal business hours, procedure code 99050 may be billed. Other adjunct service codes (99051–99060) may be billed as appropriate. Typically, only a single adjunct service code is reported per encounter. However, there may be circumstances in which reporting multiple adjunct codes per patient encounter may be appropriate.
- H. **Portable Services.** When procedures are performed using portable equipment, bill the appropriate procedure code. The charge for the procedure includes the cost of the portable equipment.
- I. **Injections.**
 - 1. Reimbursement for injections includes charges for the administration of the drug and the cost of the supplies to administer the drug. Medications are charged separately.
 - 2. The description must include the name of the medication, strength, and dose injected.
 - 3. When multiple drugs are administered from the same syringe, reimbursement will be for a single injection.
 - 4. Reimbursement for anesthetic agents such as Xylocaine and Carbocaine, when used for infiltration, is included in the reimbursement for the procedure performed and will not be separately reimbursed.
 - 5. Reimbursement for intra-articular and intra-bursal injection medications (steroids and anesthetic agents) may be separately billed. The description must include the name of the medication, strength, and volume given.
- J. **Supplies.** Use CPT® code 99070 or specific HCPCS codes to report supplies over and above those usually included with the office visit or service rendered. Do not bill for supplies that are currently included in surgical packages, such as gauze, sponges, and Steri-Strips®. Supplies and materials provided by the physician over and above those usually included with the office visit (drugs, splints, sutures, etc.) may be charged separately and reimbursed at a reasonable rate.

II. INSTRUCTIONS TO PROVIDERS

- A. All bills for service must be coded with the appropriate CPT, CDT, or HCPCS code.
- B. The medical provider must file the appropriate billing form and necessary documentation within thirty (30) days of rendering services on a newly diagnosed work-related injury or illness. Subsequent billings must be submitted at least every thirty (30) days, or within thirty (30) days of each treatment or visit, whichever last occurs, with the appropriate medical records to substantiate the medical necessity for continued services. Late billings will be subject to discounts, not to exceed one and one-half percent (1.5%) per month of the bill or part thereof which was not timely billed, from the date the billing or part thereof is first due until received by the payer. Any bill or part thereof not submitted to the payer within sixty (60) days after the due date under this rule shall be subject to an additional discount penalty equal to ten percent (10%) of the total bill or part thereof. Any bill for services rendered which is not submitted to the payer within one (1) year after the date of service, or date of discharge for inpatient care, will not be eligible or considered for reimbursement under this Fee Schedule, unless otherwise ordered by the Commission or its Cost Containment Division.
- C. Fees in excess of the maximum reimbursement allowance (MRA) must not be billed to the employee, employer, or payer. The provider cannot collect any non-allowed amount (MCA §71-3-15(3) (Rev. 2000)).
- D. If it is medically necessary to exceed the Fee Schedule limitations and/or exclusions, substantiating documentation must be submitted by the provider to the payer with the claim form.
- E. If a provider believes an incorrect payment was made for services rendered, or disagrees for any reason with the payment and explanation of review tendered by the payer, then the provider may request reconsideration pursuant to the rules set forth herein.
- F. If, after the resolution of a reconsideration request or a formal dispute resolution request, or otherwise, the provider is determined to owe a refund to the payer, the amount refunded shall bear interest at the rate of one and one-half percent (1.5%) per month from the date the refunded amount was first received by the provider, until refunded to the payer.

III. INSTRUCTIONS TO PAYERS

- A. An employer's/payer's payment shall reflect any adjustments in the bill made through the employer's/payer's bill review program. The employer/payer must provide an explanation of review (EOR) to a health care provider whenever reimbursement differs from the amount billed by the provider. This must be done individually for each bill.
- B. In a case where documentation does not indicate the service was performed, the charge for the service may be denied. The EOR must clearly and specifically indicate the reason for the denial.
- C. (1) When a billed service is documented, but the code selected by the provider is not, in the payer's/reviewer's estimation, the most accurate code available to describe the service, the reviewer must not deny payment, but shall reimburse based on the revised code. The EOR must clearly and specifically detail the reason(s) for recoding the service or otherwise altering the claim. No claim shall be recoded or otherwise revised or altered without the payer having actually reviewed the medical records associated with the claim which document the service(s) provided.

(2) As an alternative to recoding or altering a claim, the payer may treat the matter under rule E(1) and (2) below by paying any undisputed portion of the bill, and notifying the provider by EOR that the remaining parts of the bill are denied or disputed.

(3) Recoding cannot be used solely for cost containment. Recoding may only be used for the correction of miscoded services. Whenever there is any dispute concerning coding, the provider must be notified immediately and given the opportunity to furnish additional information, although nothing herein suspends the time periods for making payment or giving notice of dispute. Any recoding or so-called "down coding," which is found by the Commission or its Cost Containment Division to be solely for the purpose of cost containment, will subject the party engaging in such conduct to additional penalties as allowed by law.
- D. Properly submitted bills must be paid within thirty (30) days of receipt by the payer. Properly submitted bills not fully paid within thirty (30) days of receipt by the payer shall automatically include interest on the unpaid balance at the rate of one and one-half percent (1.5%) per month from the due date of any unpaid remaining balance until such time as the claim is fully paid and satisfied. Properly submitted bills not fully paid within sixty (60) days of receipt will be subject to an additional penalty equal to ten percent (10%) of the unpaid remaining balance, including interest as herein provided.
- E. (1) When an employer/payer disputes or otherwise adjusts a bill or portion thereof, the employer/payer shall pay the undisputed or unadjusted portion of the bill within thirty (30) days of receipt of the bill. Failure to pay the undisputed portion when due shall subject the payer to interest and penalty as above provided on the undisputed portion of the bill. If the dispute is ultimately resolved in the provider's favor, interest and penalty on the disputed amounts will apply from the original due date of the bill until paid.

(2) When a payer disputes a bill or portion thereof, the payer shall notify the provider within thirty (30) days of the receipt of the bill of the reasons for disputing the bill or portion thereof, and shall notify the provider of its right to provide additional information and to request reconsideration of the payer's action. The payer shall set forth the clear and specific reasons for disputing a bill or portion thereof on the EOR, and shall provide additional documentation if necessary to provide an adequate explanation of the dispute.
- F. Reimbursement determinations shall be based on medical necessity of services to either establish a diagnosis or treat an injury/illness. Thus, where service is provided in good faith reliance on authorization given by the employer or payer, reimbursement shall not be dependent on the outcome of medically necessary diagnostic services or treatment.

IV. FACILITY FEE RULES

Please refer to the Pain Management section for the state-specific facility reimbursement rules to be used for outpatient pain management procedures.

Please refer to the Inpatient Hospital and Outpatient Facility Payment Schedule and Rules section for the state-specific facility reimbursement rules to be used for ambulatory surgery center (ASC) procedures and hospital based outpatient departments.

- A. **Prepayment Review for Facilities.** The payer must perform a prepayment review on inpatient hospital bills and outpatient surgery bills in order to verify the charges submitted.
 - 1. At a minimum, the pre-payment review should:
 - a. Validate that prior authorization was approved according to Fee Schedule guidelines;
 - b. Validate that the length of stay and the level of service was appropriate for the diagnosis;
 - c. Review the bill for possible overcharges or billing errors;
 - d. Determine if an on-site audit is appropriate;
 - e. Identify over utilization of services;

- f. Identify those bills and case records that shall be subject to professional review by a physician or appropriate peer.
 2. The payer must reimburse the hospital within thirty (30) days of receipt of a valid claim form if prepayment review criteria are met. An exception to the thirty (30) day payment time will be made if additional documentation is requested for prepayment review, and in such cases, payment should be made within thirty (30) days following receipt of this additional documentation if prepayment review criteria are met. If a full audit is scheduled, fifty percent (50%) of the total bill must be paid prior to the audit, and in such event, the payer shall not be liable for interest and penalty as above provided on any additional sums which may be due following completion of the audit. Failure to pay fifty percent (50%) of the total bill prior to the audit shall result in interest and penalty as above provided being added to the total amount determined to be due, from the original due date until paid.
 3. If the hospital does not forward copies of requested medical records to the payer after two (2) consecutive written requests following the initial request, or if it fails to submit necessary or adequate documentation to support the hospital services rendered, the payer should perform a charge audit.
- B. Charge Audit.** All charge audits must be performed on-site unless otherwise agreed to by the provider and payer.
1. The following information must be provided to the hospital by the payer/auditor when scheduling an audit:
 - a. Patient name
 - b. Account number
 - c. Date(s) of service
 - d. Diagnosis(es)
 - e. Total amount of bill
 - f. Insurance company
 - g. Name of audit requester
 - h. Telephone number and address of requester
 2. A hospital must schedule a charge audit within thirty (30) days of a request by a payer/auditor.
 3. Hospitals shall be reimbursed an audit fee of fifty dollars (\$50.00) for associated audit costs.
 4. When a charge audit is necessary, the auditor must identify additional charges for medically necessary hospital services that were ordered by the authorized physician and were provided, but were not included, on the initial bill.
 5. The auditor must review and verify the audit findings with a hospital representative at the conclusion of the audit. The hospital may waive its right to the exit conference.
 6. The auditor must provide written explanation of the final reimbursement determination based on the audit findings, whether or not an exit conference is held with the hospital. This written explanation must be provided within thirty (30) days following the conclusion of the audit.
- C.** When any hospital bill that has been prescreened and found to be correct, or when corrections have been made to the bill as required, or when a hospital bill has been audited and verified as correct, it must be paid within thirty (30) days thereafter.
- D.** Any hospital bill not paid when due under these rules shall automatically include interest at the rate of one and one-half percent (1.5%) per month from the due date of such bill until paid. Any such bill not paid within sixty (60) days after it is due under these rules will be subject to an additional penalty equal to ten percent (10%) of the total amount due, including interest as herein provided.
- E. Implantables.** An implantable is an item that is implanted into the body for the purpose of permanent placement, and remains in the body as a fixture. Absorbable items, temporary items, or other items used to help place the implant, are not within the definition of "implantable" and are not reimbursed as such.

Implantables are included in the applicable MS-DRG reimbursement for inpatient treatment, and, therefore, the provider of inpatient services is not required to furnish the payer with an invoice for implantables. For implantables used in the outpatient setting, reimbursement is likewise included in the APC Amount paid to the facility. No separate billing or payment for implants shall be made in either the inpatient or outpatient setting.

V. EXPLANATION OF REVIEW (EOR)

- A. Payers must provide an explanation of review (EOR) to health care providers for each bill whenever the payer's reimbursement differs from the amount billed by the provider, or when an original claim is altered or adjusted by the payer. The EOR must be provided within thirty (30) days of receipt of the bill, and must accompany any payment that is being made.
- B. A payer may use the listed EOR codes and descriptors or may develop codes of their own to explain why a provider's charge has been reduced or disallowed, or why a claim has been altered or adjusted in some other way. In all cases,

the payer must clearly and specifically detail the reasons for adjusting or altering a bill, including references to the applicable provisions of the Fee Schedule or CPT book, or other source(s) used as the basis for the EOR. Should the EOR include an alteration in the codes submitted on the original claim, it must be based on a review of the medical records documenting the service.

- C. The EOR must contain appropriate identifying information to enable the provider to relate a specific reimbursement to the applicable claimant, the procedure billed, and the date of service.
- D. Acceptable EORs may include manually produced or computerized forms that contain the EOR codes, written explanations, and the appropriate identifying information.
- E. The following EOR codes may be used by the payer to explain to the provider why a procedure or service is not reimbursed as billed, provided clear and specific detail is included, along with references to the applicable provisions of the Fee Schedule or CPT book, or other source(s) used as the basis for the EOR:
 - 001 These services are not reimbursable under the Workers' Compensation Law for the following reason(s): [Provide specific reason(s) why services are not reimbursable under the Workers' Compensation Law]
 - 002 Charges exceed maximum reimbursement allowance [Specify]
 - 003 Charge is included in the basic surgical allowance [Specify]
 - 004 Surgical assistant is not routinely allowed for this procedure. Documentation of medical necessity required [Specify]
 - 005 This procedure is included in the basic allowance of another procedure [Specify the other procedure]
 - 006 This procedure is not appropriate to the diagnosis [Specify]
 - 007 This procedure is not within the scope of the license of the billing provider [Specify]
 - 008 Equipment or services are not prescribed by a physician [Specify]
 - 009 This service exceeds reimbursement limitations [Specify]
 - 010 This service is not reimbursable unless billed by a physician [Specify]
 - 011 Incorrect billing form [Specify]
 - 012 Incorrect or incomplete identification number of billing provider [Specify]
 - 013 Medical report required for payment [Specify]
 - 014 Documentation does not justify level of service billed [Specify]
 - 015 Place of service is inconsistent with procedure billed [Specify]
 - 016 Invalid procedure code [Specify]
 - 017 Prior authorization was not obtained [Specify]

VI. REQUEST FOR RECONSIDERATION

- A. When, after examination of the explanation of review (EOR) and other documentation, a health care provider is dissatisfied with a payer's payment or dispute of a bill for medical services, reconsideration may be requested by the provider. Any other matter in dispute between the provider and payer may be subject to reconsideration as herein provided at the request of either party, including, but not limited to, a request by the payer for refund of an alleged over-payment. Alleged over-payments should be addressed through the dispute resolution process, if necessary, and not by way of unilateral recoupment initiated by the payer on subsequent billings.
- B. A provider or payer must make a written request for reconsideration within thirty (30) days from the receipt of the explanation of review (EOR) or other written documentation evidencing the basis for the dispute. A request for reconsideration must be accompanied by a copy of the bill in question, the payers' explanation of review (EOR), and/or any additional documentation to support the request for reconsideration.
- C. The payer or provider, upon receipt of a request for reconsideration, must review and re-evaluate the original bill and accompanying documentation, and, must notify the requesting party thirty (30) days thereafter of the results of the reconsideration. The response must adequately explain the reason(s) for the decision, and cite the specific basis upon which the final determination was made. If the payer finds the provider's request for reconsideration is meritorious, and that additional payment(s) should be made, or if the provider finds the payer's request for refund or other payment is meritorious, the additional payment should be made within the above thirty (30) day period. Any additional payment(s) made in response to a provider's or payer's request for reconsideration shall include interest from the original due date of the bill or payment, and an additional ten percent (10%) penalty if applicable.

- D. If the dispute is not resolved within the above time after a proper request for reconsideration has been served by the provider or payer, then either party may request further review by the Commission pursuant to the Dispute Resolution Rules set forth hereafter.
- E. Failure to seek reconsideration within the time above provided shall bar and prohibit any further reconsideration or review of the bill or other issue in question unless, for good cause shown, the Commission or its representative extends the time for seeking reconsideration or review under these rules. In no event shall the time for seeking reconsideration hereunder be extended by more than an additional thirty (30) days, and any such request for additional time in which to seek reconsideration or further review must be made in writing to the Commission within the initial thirty (30) day period set forth in paragraph B. above.
- F. Requests by either provider or payer for refunds, or for additional payment, or other requests related to the billing or payment of a claim, must be sought in accordance with the specific rules set forth herein. No retrospective audits or dispute requests shall be allowed beyond the time otherwise provided herein for seeking reconsideration and/or review.

Medical Records Rules

I. MEDICAL RECORDS

- A. The medical record, which documents the patient's course of treatment, is the responsibility of the provider and is the basis for determining medical necessity and for substantiating the service(s) rendered; therefore, failure to submit necessary or adequate documentation to support the services rendered may result in the services being disallowed.
- B. A medical provider may not charge any fee for completing a medical report or form required by the Workers' Compensation Commission which is part of the required supporting documentation which accompanies a request for payment. The supporting documentation that is required to substantiate the medical treatment is included in the fee for service and does not warrant a separate fee as it is incidental to providing medical care. CPT® code 99080 is appropriate for billing special reports beyond those required by this Fee Schedule and requested by the payer or their representatives.
- C. Medical records must be legible and include, as applicable:
 - 1. Initial office visit notes which document a history, physical examination, assessment and plan appropriate to the level of service indicated by the presenting injury/illness or treatment of the ongoing injury/illness;
 - 2. Progress notes which reflect patient complaints, objective findings, assessment of the problem, and plan of care or treatment;
 - 3. Copies of lab, x-ray, or other diagnostic tests that reflect current progress of the patient and/or response to therapy or treatment;
 - 4. Physical medicine/occupational therapy progress notes that reflect the patient's response to treatment/therapy;
 - 5. Operative reports, consultation notes with report, and/or dictated report; and
 - 6. Impairment rating (projected and actual) and anticipated maximum medical improvement (MMI) date.
- D. A plan of care should be included in the medical record and should address, as applicable, the following:
 - 1. The disability;
 - 2. Degree of restoration anticipated;
 - 3. Measurable goals;
 - 4. Specific therapies to be used;
 - 5. Frequency and duration of treatments to be provided;
 - 6. Anticipated return to work date;
 - 7. Projected impairment.
- E. Health care providers must submit copies of records and reports to payers upon request. Providers can facilitate the timely processing of claims and payment for services by submitting appropriate documentation to the payer when requested. Only those records for a specific date of injury are considered non-privileged as it relates to a workers' compensation injury. The employer/payer is not privileged to non-work related medical information.
- F. Providers must submit documentation for the following:
 - 1. The initial office visit;
 - 2. A progress report if still treating after thirty (30) days;
 - 3. Evaluation for therapy services/treatment (P.T., O.T., C.M.T., O.M.T.);
 - 4. A progress report every thirty (30) days for therapy services/treatment (P.T., O.T., C.M.T., O.M.T.);
 - 5. An operative report or office note (if done in the office) for a surgical procedure;
 - 6. A consultation;
 - 7. The anesthesia record for anesthesia services;
 - 8. A functional capacity or work hardening evaluation;

9. When billing "By Report" (BR), a description of the service is required; this description should include an adequate definition or description of the nature, extent, and need for the procedure and the time, effort, and equipment necessary to provide the service;
 10. Whenever a modifier is used to describe an unusual circumstance;
 11. Whenever the procedure code descriptors include a written report.
- G. Hospitals and other inpatient facilities must submit required documentation with the appropriate billing forms as follows:
1. Admission history and physical;
 2. Discharge summary;
 3. Operative reports;
 4. Pathology reports;
 5. Radiology reports;
 6. Consultations;
 7. Other dictated reports;
 8. Emergency room records.
- H. The Health Insurance Portability & Accountability Act (HIPAA) makes important exceptions concerning the disclosure of protected health information for workers' compensation purposes. For additional information, refer to the MWCC website (mwcc.ms.gov), or consult an attorney and/or the HIPAA resource site maintained by the U. S. Department of Health and Human Services (<http://www.hhs.gov/ocr/privacy/>).

II. COPIES OF RECORDS

- A. **Outpatient Records.** The payer may request additional records or reports from the provider concerning service or treatment provided to a patient other than on an inpatient basis. These additional records and reports will be reimbursed as follows:

\$20.00 for first 20 pages

\$1.00 per page for pages 21-100

\$0.50 per page for everything thereafter

This applies to copies of microfiche and other electronic media or storage systems.

As provided by MCA §11-1-52(1) (Supp. 2006), as amended, the provider may add ten percent (10%) of the total charge to cover the cost of postage and handling, and may charge an additional fifteen dollars (\$15.00) for retrieving records stored off the premises where the provider's facility or office is located.

- B. **Inpatient Records.** The payer may request additional records or reports from a facility concerning inpatient service or treatment provided to a patient. Such reports or records requested by the payer will be reimbursed as follows:

\$20.00 for first 20 pages

\$1.00 per page for pages 21-100

\$0.50 per page for everything thereafter

This applies to copies of microfiche and other electronic media or storage systems.

There is a maximum reimbursement allowance of one hundred dollars (\$100.00) for a particular inpatient medical record, exclusive of postage, handling and retrieval charges as set forth below. This is per admission.

As provided by MCA §11-1-52(1) (Supp. 2006), as amended, the provider may add ten percent (10%) of the total charge to cover the cost of postage and handling, and may charge an additional fifteen dollars (\$15.00) for retrieving records stored off the premises where the provider's facility or office is located.

- C. Copies of records requested by the patient and/or the patient's attorney or legal representative will be reimbursed by the requesting party according to the provisions of this section on additional reports and records.
- D. Documentation submitted by the provider which has not been specifically requested will not be subject to reimbursement.
- E. Health care providers may charge up to ten dollars (\$10.00) per image for copying x-rays or for providing copies of x-rays via electronic or other magnetic media. (Copies of film do not have to be returned to the provider.)

- F. Payers, their representatives, and other parties requesting records and reports must be specific in their requests so as not to place undue demands on provider time for copying records.
- G. Providers should respond promptly (within fourteen (14) working days) to requests for additional records and reports.
- H. Records requested by the Mississippi Workers' Compensation Commission will be furnished by the provider without charge to the Commission.
- I. Any additional reimbursement, including copy service vendors, other than specifically set forth above, is not required, and providers or their vendors will not be paid any additional amounts.

III. HEALTH INSURANCE PORTABILITY & ACCOUNTABILITY ACT (HIPAA) AND WORKERS' COMPENSATION

HIPAA makes important exceptions concerning the disclosure of protected health information (PHI) for workers' compensation purposes. The United States Department of Health and Human Services, through its Office for Civil Rights, enforces the HIPAA Law and maintains an informative website with information on HIPAA and its application to workers' compensation claims. See, for example: <http://www.hhs.gov/ocr/privacy/>.

Dispute Resolution Rules

I. GENERAL PROVISIONS

- A. Unresolved disputes over the amount charged for services rendered under the provisions of the Fee Schedule or over the amount of reimbursement for services rendered under the Fee Schedule may be appealed to and resolved by the Mississippi Workers' Compensation Commission. Regardless of the date of service, all changes to the dispute resolution procedures found in this edition of this section of the Fee Schedule shall be applied retroactively to all Requests for Resolution of Dispute or other documents filed on or after the effective date of this Fee Schedule.
- B. Reconsideration must be sought by the provider or payer prior to a request for resolution of a dispute being sent to the Commission. This provides the payer and provider an opportunity to resolve most concerns in a timely manner.
- C. All communication between parties in dispute will be handled by the Mississippi Workers' Compensation Commission, Cost Containment Division. In addition, there will be no communication between the parties in dispute and any Peer Reviewer who might be called upon to assist the Commission in the resolution of a dispute.
- D. As stated in Miss. Code Ann. Section 71-3-63(3), "Representation of one other than himself or herself before the commission shall be considered the practice of law, and all statutes applying to and regulating the practice in all other courts of law in this state shall likewise apply to practice before the commission, insofar as the qualifications of those practicing before the commission are concerned." Therefore, Requests for Resolution of Dispute, Responses to such Requests, and all other filings made in Resolution of Dispute before the Cost Containment Division of the Commission must be filed by attorneys authorized to practice law in MS or attorneys properly admitted pro hac vice pursuant to the Mississippi Rules of Appellate Procedure. See Miss. Code Ann. Section 73-3-55. In other words, payers and providers shall be represented by attorneys in all aspects of Dispute Resolution before the Cost Containment Division of the Commission, as well as the Commission itself in the event of an appeal. The only exception to this rule is if the payer or provider is a patient/claimant or sole proprietor representing himself or herself in that capacity only. See *Brandon Allen Dillard v. Roy Rodriguez and Jim Grieshaber*, 2012 WL 3792047 at 2 (Miss. Work. Comp. Com. August 9, 2012).
Further, the Commission shall not allow any discovery between the parties in Dispute Resolution unless such discovery is specifically requested, accompanied by a detailed explanation regarding the information sought and the specific reason why such discovery is relevant and necessary for resolution of the dispute. Such requests for discovery shall be granted or denied at the sole discretion of the Cost Containment Division and/or the Commission. Otherwise, the Commission's incorporation of deposition and other discovery procedures as provided by Miss. Work. Comp. Com. Procedural Rule 9 and/or subpoena procedures provided by Miss. Work. Comp. Com. Procedural Rule 18 does not extend or apply to Requests for Resolution of Dispute under the Fee Schedule.
- E. In the absence of any agreement between the parties submitted to the Commission in writing, Requests for Resolution of Dispute shall not be ruled upon in claims for which the compensability of the underlying injury is currently disputed or denied by the payer. In the event the parties submit such an agreement, it shall be subject to the review and approval of the Cost Containment Division, and such agreement shall be recognized or denied in the sole discretion of the Cost Containment Division and/or the Commission. Otherwise, Cost Containment Decisions for Requests for Resolution of Dispute may be held in abeyance pending a final adjudication and/or admission of compensability by the payer for the underlying injury in the dispute.

II. FORMS AND DOCUMENTATION

- A. Valid requests for resolution of a dispute must be submitted on the "Request for Resolution of Dispute" form (see the Forms section or <http://www.mwcc.ms.gov/#/medicalFeeSchedule>) along with the following:
 - 1. Copies of the original and resubmitted bills in dispute that include dates of service, procedure codes, charges for services rendered and any payment received, and an explanation of any unusual services or circumstances;
 - 2. EOR including the specific reimbursement;
 - 3. Supporting documentation and correspondence;
 - 4. Specific information regarding contact with the payer; and
 - 5. Any other information deemed relevant by the applicant for dispute resolution.

B. A Request for Resolution of Dispute must be submitted to:

Mississippi Workers' Compensation Commission
Cost Containment Division
1428 Lakeland Drive
P.O. Box 5300
Jackson, MS 39296-5300

- C. A party, whether payer, provider, or patient, shall certify that a copy of the Request for Resolution of Dispute and/or the Response to such Request, and any supporting documentation, being filed with the Commission has been provided to the other interested parties or their representatives by certified mail simultaneously with the filing to the Commission. This requirement shall also apply when a party files a request seeking review of a dispute by the Commission.

III. TIME FOR FILING

A Request for Resolution of Dispute must be filed with the Commission within thirty (30) days following the payer's or provider's response to a request for reconsideration of any matter in dispute, or, in cases where the payer or provider fails to respond to a request for reconsideration, within thirty (30) days of the expiration of the time in which said response should have been provided. Failure to file a Request for Resolution of Dispute within this time shall bar any further action on the disputed issue(s) unless, for good cause shown, the Commission or its Cost Containment Director extends the time for filing said request. In no event will a Request for Resolution of Dispute be considered by the Cost Containment Division if submitted more than one (1) year after the date of service. The decision to extend the time for filing a Request for Resolution of Dispute based on "good cause" shall be entirely at the discretion of the Commission or its Cost Containment Director. Mere neglect will not constitute "good cause."

IV. PROCEDURE BY COST CONTAINMENT DIVISION

- A. Requests for dispute resolution will be reviewed and decided by the Cost Containment Division of the Commission after all required and requested information has been received. Additional time may be required to accommodate a Peer Review. The payer and/or provider may be contacted by telephone or other means for additional information if necessary; however, both parties to a dispute may submit in writing any information or argument they deem relevant to the issue in dispute, if not already submitted with the request for dispute resolution, and this information shall be considered by the Cost Containment Division when rendering a decision. Any written information or argument submitted for consideration by a party to a dispute, without a request from the Commission, must be received by the Cost Containment Division within twenty-three (23) days after filing the Request for Resolution of Dispute in order to merit consideration. Unlike the Request for Resolution of Dispute Form, there is no specific prescribed form for a Response to such Request.
- B. Every effort should be made by the parties to resolve disputes between themselves by telephone or in writing even after the filing of a Request for Resolution of Dispute. The payer and provider may be requested to attend an informal hearing conducted by a Commission representative. Failure to appear at an informal hearing may result in dismissal of the Request for Resolution of Dispute. However, no formal hearing or oral argument shall be allowed unless requested by the Cost Containment Division and/or the Commission. Otherwise, Requests for Resolution of Dispute shall be heard and considered solely on the record provided by the parties in the documentation they have submitted to the Cost Containment Division and any arguments they have made therein, without any oral argument or formal hearing.
- C. Following review of all documentation submitted for dispute resolution and/or following contact with the payer and/or provider for additional information and/or negotiation, the Cost Containment Division shall render an administrative decision on the request for dispute resolution and forward it to the involved parties.
- D. Cases involving medical care determination may be referred for peer review, but only on request of the Commission. The peer review consultant will render an opinion and submit same to the Commission representative within the time set by the Cost Containment Division. The Commission representative will notify the parties in dispute if a Peer Review has been requested, and of the peer review consultant's determination.

V. COMMISSION REVIEW OF A DISPUTE

- A. Any party aggrieved by the decision of the Cost Containment Division shall have twenty (20) days from the date of said decision to request review by the Commission. Failure to file a written request for review with the Commission within this twenty (20) day period shall bar any further review or action with regard to the issue(s) presented. A decision of the Cost Containment Division that is not timely appealed shall constitute a final decision of the Full Commission, with all findings and determinations of the Cost Containment Director, including the award of penalties, interest, and attorney's fees and/or expenses, to be considered as having been awarded by the Full Commission itself, including any penalty under Miss. Code Ann. Section 71-3-59. No extension of time within which to file for Commission review of a dispute under these Rules shall be allowed. In the event a request for review is not filed with the Commission within twenty (20) days, the parties to the dispute shall have fourteen (14) days thereafter in which to comply with the final decision of the Cost Containment Division.

A party to a dispute may, when a written request for review has not been timely filed with the Commission, seek enforcement of payment of that decision pursuant to the terms and time period set forth in Miss. Code Ann. Section 71-3-49. A Final Decision of the Cost Containment Division and/or the Commission shall be considered sufficient to allow the payer and/or provider to pursue any and all remedies available to it for enforcement of payment in default pursuant to Miss. Code Ann. Section 71-3-49. No further action to enforce payment shall be made by the Commission, nor shall any other document be issued regarding the dispute unless the Commission finds the issuance of such document to be necessary. The payer and/or provider shall be solely responsible for calculating the interest and penalty owed to it pursuant to the terms of the Fee Schedule, and any dispute regarding enforcement of payment in default and/or the amount of interest or penalty due shall be determined by the Court wherein the payer or provider has sought enforcement pursuant to Miss. Code Ann. Section 71-3-49. The same procedure for enforcement above shall also be applicable to all final decisions of the Commission in the event the decision of the Cost Containment Division was timely appealed to the Commission and a final decision of the Commission has been issued.

- B. The request for review by the Commission shall be filed with the Cost Containment Division of the Mississippi Workers' Compensation Commission, shall be in writing, and shall state the grounds on which the requesting party relies. All documentation submitted to and considered by the Cost Containment Division, including the Request for Resolution of Dispute form, along with a copy of the decision of the Cost Containment Division, shall be attached to the request for review which is filed with the Commission. The party seeking relief hereunder shall certify that a copy of the request for review and any supporting documentation being filed with the Commission has been provided to the other interested parties or their representatives by certified mail simultaneously with the filing to the Commission. Unlike the Request for Resolution of Dispute Form, there is no specific prescribed form for a Request for Commission Review.
- C. The Commission shall review the issue(s) solely on the basis of the documentation submitted to the Cost Containment Division. No additional documentation not presented to and considered by the Cost Containment Division shall be considered by the Commission on review, unless specifically requested by the Commission, and no hearing or oral argument shall be allowed, unless specifically requested by the Commission.
- D. The Commission shall consider the request for review and issue a decision.
- E. Following the decision of the Commission, or following the conclusion of the dispute resolution process at any stage without an appeal to the Commission, no further audit, adjustment, refund, review, consideration, reconsideration or appeal with respect to the claim in question by the Commission may be sought by either party.
- F. The costs incurred in seeking Commission review, or in seeking compliance with an Administrative Decision rendered by the Cost Containment Director, including reasonable attorney fees, if any, may be assessed to the party who requested review if that party's position is not sustained by the Commission and to the party who has failed to comply with a prior decision if compliance therewith is ordered by the Commission. Otherwise, each party shall bear their own costs, including attorney's fees.
- G. If Cost Containment Director and/or the Commission determines that a dispute is based on or arises from a billing error, a payment adjustment or error, including but not limited to improper bundling of service codes, unbundling, downcoding, code shifting, or other action by either party to the dispute, or if the Commission determines that a provider or payer has unreasonably refused to comply with the Law, the Rules of the Commission, including this Fee Schedule, or with any decision of the Commission or its representatives, and that this causes proceedings with respect to the billing and/or payment for covered medical services to be instituted or continued or delayed without reasonable grounds, then the Commission may require the responsible party or parties, and/or the attorney advising such party or parties, to pay the reasonable expenses, including attorney's fees, if any, to the opposing party; and, in addition, the Commission may levy against the responsible party or parties a civil penalty not to exceed the sum of ten thousand dollars (\$10,000.00), payable to the Commission, as provided in §71-3-59(2) of the Law. The award of costs and penalties as herein provided shall be in addition to interest and penalty charges which may apply under other provisions of this Fee Schedule.

Utilization Review Rules

The Mississippi Workers' Compensation Commission (MWCC) requires mandatory utilization review of certain medical services associated with the provision of medical treatment covered under the Act and subject to the Fee Schedule. "Utilization review" refers to a system for reviewing proposed medical services to make sure that such procedures are medically necessary and represent the most efficient and appropriate use of medical resources given the nature of the injury to the patient and the process of his or her recovery, and that such services are properly and timely reimbursed. These rules are set forth to encourage efficient and timely communication between payers and providers (including agents of either) in order to make sure that medically necessary services are provided and timely reimbursed, and to curtail the use of unnecessary or unreasonable treatment. The provisions herein set forth regarding utilization review are in addition to the requirements of Mississippi Code Annotated (MCA) §41-83-1 et seq. (Rev. 2005), as amended, and any regulations adopted pursuant thereto by the State Department of Health or the State Board of Medical Licensure. In the event of conflict between this Fee Schedule and the above statutes, and any implementing regulations adopted by the Health Department or Board of Medical Licensure, the provisions in this Fee Schedule or other applicable rules of the MWCC shall control.

A payer may provide for utilization review by using personnel or units in-house, by contracting with a third party utilization review agent properly licensed by the MS Department of Health, or by contracting with a Nurse Case Manager or similar person to monitor the care being provided in person working with the patient and provider. An injured worker and/or his or her attorney and any case manager assigned by the payer shall strive to cooperate with one another for the purpose of ensuring the injured worker receives all of the medically necessary care needed for the treatment of the injury and the process of recovery. A payer also may exercise their statutory right to an Employer Medical Evaluation (EME) as provided for in MCA §71-3-15(1) (Rev. 2000) in conjunction with, or in lieu of, ongoing utilization review.

NO DECISION OR DETERMINATION ADVERSE TO A PATIENT OR HEALTH CARE PROVIDER WHICH MAY RESULT IN THE DENIAL OF PAYMENT, OR IN THE DENIAL OF PRE-CERTIFICATION FOR TREATMENT IN THIS STATE, SHALL BE MADE WITHOUT THE PRIOR EVALUATION AND CONCURRENCE IN THE ADVERSE DETERMINATION BY A PHYSICIAN CURRENTLY LICENSED TO PRACTICE MEDICINE IN THE STATE OF MISSISSIPPI, AND PROPERLY TRAINED IN THE SAME SPECIALTY OR SUB-SPECIALTY AS THE REQUESTING PROVIDER WHO IS SEEKING APPROVAL FOR TREATMENT OR SERVICES.

THIS ADVERSE DETERMINATION MUST BE PROVIDED WITHIN TWO (2) BUSINESS DAYS EITHER BY TELEPHONE OR FACSIMILE OR EMAIL, AND IN WRITING WITHIN ONE (1) BUSINESS DAY THEREAFTER, TO THE REQUESTING PROVIDER. ANY SUCH ADVERSE DETERMINATION MUST INCLUDE WRITTEN DOCUMENTATION CONTAINING THE SPECIFIC EVALUATION, FINDINGS AND CONCURRENCE OF THE MISSISSIPPI LICENSED PHYSICIAN TRAINED IN THE RELEVANT SPECIALTY OR SUB-SPECIALTY, AND MUST REFERENCE ANY SPECIFIC PROVISIONS OF THE MISSISSIPPI WORKERS' COMPENSATION MEDICAL FEE SCHEDULE WHICH ALLEGEDLY JUSTIFIES THE ADVERSE DETERMINATION.

ANY ADVERSE DETERMINATION WHICH DOES NOT COMPLY WITH THIS PROVISION SHALL HAVE NO FORCE OR EFFECT AND SHALL NOT PREVENT THE PROVIDER FROM PROCEEDING WITH THE PROPOSED TREATMENT AND ULTIMATELY BEING REIMBURSED AS THOUGH THE PROPOSED TREATMENT OR SERVICE HAD BEEN TIMELY APPROVED IN ADVANCE.

IF A PAYER ELECTS TO SEEK AN EME IN LIEU OF A UTILIZATION REVIEW, THE INJURED WORKER AND THE PROVIDER MUST BE NOTIFIED OF THIS ELECTION WITHIN THE SAME TWO (2) DAY PERIOD APPLICABLE TO ADVERSE DETERMINATIONS STATED ABOVE.

I. SERVICES REQUIRING UTILIZATION REVIEW

Mandatory utilization review is required for the following:

- A. All admissions to inpatient facilities of any type.
- B. All surgical procedures, inpatient and outpatient. (All surgical or other invasive procedures which are administered in the context of pain management treatment shall be regulated by the specific guidelines set forth in the Pain Management section of the Fee Schedule. Only in the event a surgically invasive pain management procedure is not specifically addressed in the Pain Management guidelines shall the provisions in this section control.)
- C. Repeat MRI scans, repeat CT Scans, repeat EMG/NCS studies, and repeat myelograms (meaning more than one such diagnostic procedure which is being prescribed for the same injury) are subject to mandatory utilization review, except that where surgery has been performed following proper approval, the treating physician is entitled to obtain one repeat of the aforementioned diagnostic procedures post-surgery without having to obtain separate approval for each such procedure. In other words, surgical cases merit two diagnostic procedures of the kind listed herein without

the necessity of pre-certification provided one procedure occurs prior to surgical treatment and one procedure occurs post-surgical treatment. The two diagnostic procedures selected by the treating provider hereunder may be the same two diagnostic procedures, or any two of the aforementioned procedures.

- D. Work hardening programs, pain management programs, massage therapy, acupuncture, and biofeedback. Biofeedback therapy shall not exceed ten (10) visits or sessions, unless otherwise agreed to by the payer and provider. Back schools are no longer covered under this Fee Schedule. Pain management programs include but are not limited to a "chronic pain inter-disciplinary pain rehabilitation program" for which specific guidelines are set forth in the Therapeutic Services section.

1. Work Hardening Program Guidelines

- a. Work hardening is an interdisciplinary, individualized, job or goal-specific program of activity with the goal of returning an injured patient to work. Work hardening programs use real or simulated work tasks and progressively graded conditioning exercises that are based on the individual's measured tolerances. Work hardening provides a transition between acute care and successful return to work and is designed to improve the bio-mechanical, neuromuscular, and cardiovascular functioning of the worker. Approval or certification must be based on whether the proposed work hardening program appears reasonably tailored to accomplish the stated goals.
- (1) A work hardening program must, at a minimum, have the following components:
- Development of strength and endurance of the individual in relation to the return to work goal;
 - Equipment and methods that quantify and measure strength and conditioning levels, i.e., ergometers, dynamometers, treadmills, measured walking tolerances;
 - Commercial strength and exercise devices, free weights, circuit training. Goals for each worker are dependent on the demands of their respective jobs;
 - Simulation of the critical work demands, the tasks and the environment of the job to which the worker will return. Job simulation tasks that provide for progression in frequency, load, and duration are essential. They must be related to the work goal and include a variety of work stations that offer opportunities to practice work related positions and motions, i.e., clerical, plumbing, electrical;
 - Education that stresses body mechanics, work pacing, safety and injury prevention and that promotes worker responsibility and self-management. The education component requires direct therapist and worker interaction;
 - Assessment of the need for job modifications. Focus on whether the worker can return to the stated job goal but only with changes, i.e., added equipment, changes in work position or ergonomics, changes at the work site;
 - An individualized written plan that identifies observable and measurable goals, the methodology being used to reach these goals, the projected time necessary to accomplish the goal, and the expected outcomes. This plan must be signed by both the provider and the patient;
 - This plan needs to be based on a functional capacity (baseline) evaluation and must be completed within the first two (2) days of the program and compared to the critical demands as stated on the job analysis. A comparative analysis (re-evaluation) is done prior to discharge to determine job readiness;
 - A reporting system that includes:
 - Documentation of the initial plan;
 - Documentation of progress or lack of progress and future goals;
 - A discharge summary that includes an assessment of the functional capacity level and the achievement of the individual's program goals;
 - A record of the worker's daily attendance including number of days and number of hours per day in the program.
- b. Criteria for admission:
- (1) The worker must have reached a point in his or her recovery where no further active or invasive treatment intervention is being anticipated;
 - (2) Physical recovery sufficient to allow participation for a minimum of 4 hours a day for three to five days a week;
 - (3) Worker's current levels of functioning interfere with his/her ability to carry out specific tasks required in the work place;
 - (4) A defined return to work goal which includes:
 - A documented specific job to which the patient can return, along with a specific job analysis; and
 - A return to work goal agreed to by the employer and the patient/employee;

- The facts must show how the worker must be able to benefit from the program;
 - The facts must show the worker is motivated to return to work. A worker whose primary limitation is psychological or clouded by significant illness behavior (i.e., significant self-imitation on F.C.E.) is typically not going to be motivated and will not likely benefit.
- c. Criteria for discharge from a work hardening program:
- The worker has reached the goal stated in the plan;
 - The worker has not progressed according to the program plan;
 - The worker has not reached interim goals and is not benefitting from the program, or;
 - Number of absences exceeds those allowed by the program (a maximum of two (2) absences is recommended);
 - Worker does not adhere to the schedule;
 - Completion of the program (the program should take 2 to 4 weeks to complete);
 - The previously identified job is no longer available.
2. Massage therapy requires prior authorization of the payer before treatment can be rendered. Medical necessity must be established prior to approval. Reimbursement must be arranged between the payer and provider.
- E. External spinal stimulators.
- F. Therapeutic treatments, exclusive of chiropractic treatments, after fifteen (15) visits or thirty (30) days, whichever comes first. If, however, the patient undergoes properly approved surgical intervention, he or she shall be entitled to one round of pre-surgical therapeutic treatment up to fifteen (15) treatments or thirty (30) days, whichever first occurs, as provided immediately above; and, in the discretion of the treating physician, to one additional round of therapeutic treatment following surgery for an additional period of fifteen (15) visits or thirty (30) days, whichever first occurs, both of which treatment rounds may be administered without the necessity for seeking pre-certification or pre-approval. The authorization contained herein for a first and second round of limited therapy treatment following surgery shall apply to all reasonable physical and/or occupational therapy treatments, but does not include chiropractic manipulative treatment which is addressed separately below.
- G. Chiropractic manipulative treatments are allowed for up to fifteen (15) visits or thirty (30) days, whichever first occurs, without any need to seek pre-certification or authorization. However, chiropractic manipulative treatments which are proposed beyond the first fifteen (15) visits or thirty (30) days, under any circumstances, must be pre-certified or pre-approved.
- Like any other service, a spinal manipulation includes pre-evaluation and post-evaluation that would make it inappropriate to bill with an E/M service. However, if the patient's condition has deteriorated or an injury to another site has occurred, reimbursement can be made for an E/M service if documentation substantiates the additional service. Modifier 25 is added to an E/M service when a significant, separately identifiable E/M service is provided and documented as medically necessary.
- H. Psychiatric treatment, whether inpatient or outpatient treatment.
- I. Retrospective review of services after they have been provided when properly requested by the patient, patient representative, or provider.
- J. Any proposed treatment, procedure or service which is more specifically addressed in another section of this Fee Schedule, such as certain pain management procedures, shall be regulated first by the specific guidelines in place in those sections. These utilization review rules apply only where no other, more specific guidelines are set forth in the individual treatment sections of the Fee Schedule; or, where possible, to supplement more specific treatment guidelines spelled out elsewhere in the Fee Schedule.

II. DEFINITIONS

Case Management. The clinical and administrative process in which timely, individualized, and cost effective medical rehabilitation services are implemented, coordinated, and evaluated, by a nurse, other case manager, or other utilization reviewer employed by the payer, on an ongoing basis for patients who have sustained an injury or illness. Use of case management is optional in Mississippi. Use Mississippi-specific code 9936M for a conference with workers' compensation medical case manager/claims manager.

Certification. A determination by a payer and/or its utilization review organization or agent that an admission, extension of stay, or other health care service has been reviewed and, based on the information provided, meets the standard of medical necessity as defined elsewhere in this Fee Schedule.

Clinical Peer. A health professional that holds an unrestricted medical or equivalent license and is qualified to practice in the same or similar specialty as would typically manage the medical condition, procedures, or treatment under review.

Generally, as a peer in a similar specialty, the individual must be in the same profession (i.e., the same licensure category as the ordering provider).

Clinical Rationale. A statement or other documentation that taken together provides additional clarification of the clinical basis for a non-certification determination. The clinical rationale should relate the non-certification determination to the worker's condition or treatment plan, and must include a detailed basis for denial or non-certification of the proposed treatment so as to give the provider or patient a sufficient basis for a decision to pursue an appeal. Clinical rationale must include specific reference to any applicable provisions of the *Mississippi Workers' Compensation Medical Fee Schedule* which allegedly support the determination of the reviewer, or a statement attesting to the fact that no such provision(s) exists in the Fee Schedule.

Concurrent Review. Utilization management or review which is conducted during a worker's hospital stay or course of treatment, sometimes called continued stay review.

Discharge Planning. The process of assessing a patient's need for medically appropriate treatment after hospitalization including plans for an appropriate and timely discharge.

Expedited Appeal. An expedited appeal is a request to reconsider a prior determination not to certify imminent or ongoing services, an admission, an extension of stay, or other medical services of an emergency, imminent, or ongoing nature. Also sometimes referred to as a reconsideration request.

First Level Clinical Review. Review conducted by a registered nurse, nurse case manager, or other appropriate licensed or certified health professional. First level clinical review staff may approve requests for admissions, procedures, and services that meet the standard of medical necessity as defined elsewhere in the Fee Schedule, but must refer requests that do not meet this medical necessity standard, in their opinion, to second level clinical peer reviewers for approval or denial.

Notification. Correspondence transmitted by mail, telephone, facsimile, email, and/or other reliable electronic means.

Pre-certification. The review and assessment of proposed medical treatment or services before they occur to determine if such treatment or services meet the definition of medical necessity as set forth elsewhere in this Fee Schedule. The appropriateness of the site or level of care is assessed along with the duration and timing of the proposed services.

Provider. A licensed health care facility, program, agency, or health professional that delivers health care services.

Retrospective Review. Utilization review conducted after services have been provided to the worker.

Second Level Clinical Review. Peer review conducted by appropriate clinical peers when the First Level Clinical Reviewer is unable to determine whether a request for an admission, procedure, or service satisfies the standard of medical necessity as defined elsewhere in this Fee Schedule. A decision to deny, or not certify, proposed treatment or services, must be supported by the express written evaluation, findings and concurrence of a physician licensed to practice medicine in the State of Mississippi and properly trained in the same specialty or sub-specialty as the requesting provider.

Standard Appeal. A request by or on behalf of the patient or provider to reconsider a prior decision by the payer or its utilization review agent to deny proposed medical treatment or service, including but not limited to, a determination not to certify an admission, extension of stay, or other health care service.

Third Level Clinical Review. Medical necessity review conducted by appropriate clinical peers who were not involved in the first or second level review when a decision not to certify a requested admission, procedure, or service has been appealed. The third level peer reviewer must be in the same or like specialty as the requesting provider. A decision to deny, or not certify, proposed treatment or services, must be supported by the express written evaluation, findings and concurrence of a physician licensed to practice medicine in the State of Mississippi and properly trained in the same specialty or sub-specialty as the requesting provider.

Utilization Review. Evaluation of the medical necessity and appropriateness of proposed health care services. It includes both prospective and concurrent review, and shall include retrospective review under certain circumstances.

Utilization Reviewer. An entity, organization, or representative thereof, or other person performing utilization review activities or services on behalf of an employer, payer or third-party claims administrator.

Variance. A deviation from a specific standard.

III. STANDARDS

Payers and their utilization review organizations or programs or agents are required to meet the following standards:

- A. The payer's utilization reviewer or agent must comply with the licensing and certification requirements of MCA §41-83-1 et seq. (Rev. 2005), as amended, and any regulations adopted pursuant thereto by the State Department of Health or the State Board of Medical Licensure, and shall have utilization review personnel, agents or representatives who are properly qualified, trained, supervised, and supported by explicit clinical review criteria and review procedures.

In no event shall proposed treatment or services be denied except in accordance with the express provisions stated elsewhere in these Rules and in accordance with MCA §41-83-31 (Rev. 2009).

- B. The first level review is performed if the claims adjuster or manager has not already approved the treatment in question, and is performed by individuals who are health care professionals, who possess a current and valid professional license, and who have been trained in the principles and procedures of utilization review.
- C. The first level reviewers are required to be supported by a doctor of medicine who has an unrestricted license to practice medicine, and in cases where treatment is being denied or withheld by a utilization reviewer, this determination must be supported in writing by a physician licensed in Mississippi and trained in the relevant specialty or sub-specialty, as previously set forth in these Rules.
- D. The second and third level review is performed by clinical peers who hold a current, unrestricted Mississippi license to practice in the same or like specialty as the treating physician whose recommendation is under review, and are oriented in the principles and procedures of utilization review. The second level review shall be conducted for all cases where a clinical determination to certify has not already been made by the payer or payer's agent, and the determination of medical necessity cannot be made by first level clinical reviewers. Second and third level clinical reviewers shall be available within one (1) business day by telephone or other electronic means to discuss the determination with the attending physicians or other ordering providers. In the event more information is required before a determination can be rendered by a second or third level reviewer, the attending/ordering provider must be notified immediately of the delay and given a specific time frame for determination, and a specific explanation of the additional information needed. A requesting provider shall not be required to participate in further discussions where the payer or its agents have unilaterally scheduled such a conference. Further, a request for treatment or service may not be denied solely on grounds the requesting provider fails to participate in a conference which has been unilaterally scheduled by the payer or their agent. Follow-up conferences must be arranged by joint agreement.
- E. The payer's utilization reviewer shall maintain all licensing applications, certificates, and other supporting information, including any and all reports, data, studies, etc., along with written policies and procedures for the effective management of its utilization review activities, which shall be made available to the provider, or the Commission, upon request.
- F. The payer maintains the responsibility for the oversight of the delegated functions if the payer delegates utilization review responsibility to a vendor. The vendor or organization to which the function is being delegated must be currently certified by the Mississippi Board of Health, Division of Licensure and Certification to perform utilization management in the State of Mississippi. A copy of the license or certification held by the utilization review agent shall be furnished to the provider, or to the Commission, upon request. The payer who has another entity perform utilization review functions or activities on its behalf maintains full responsibility for compliance with the rules.
- G. The payer's utilization reviewer shall maintain a telephone review service that provides access to its review staff at a toll free number from at least 9:00 a.m. to 5:00 p.m. CST each normal business day. There should be an established procedure for receiving or redirecting calls after hours or receiving faxed requests. Reviews should be conducted during hospitals' and health professionals' reasonable and normal business hours.
- H. The payer's utilization reviewer shall collect only the information necessary to certify the admission procedure or treatment, length of stay, frequency, and duration of services. The utilization reviewer should have a process to share all clinical and demographic information on individual workers among its various clinical and administrative departments to avoid duplicate requests to providers. (Providers may use the Mississippi Workers' Compensation Commission Utilization Review Request Form.)

IV. PROCEDURES FOR REVIEW DETERMINATIONS

The following procedures are required for effective review determination.

- A. Initial review determinations must be made within two (2) business days of receipt of the necessary information on a proposed non-emergency admission or service requiring a review determination. Receipt of the necessary information may necessitate a discussion with the attending physician or may involve a completed second level clinical review. (For further information, see 15 Mississippi Administrative Code, Pt. 16, Sub. Pt. 1, Ch. 82, Sub. Ch. 7, R. 82.7.5(2); see also the Commission's "Notice Regarding Utilization Review Rules" dated August 13, 2015, which is hereby incorporated by reference and applicable to this edition of the Fee Schedule as well.) The Mississippi Workers' Compensation Utilization Review Request Form may be used to request pre-certification.
- B. When an initial determination is made to certify, notification shall be provided promptly, at least within one (1) business day or before the service is scheduled, whichever first occurs, either by telephone or by written or electronic notification to the provider or facility rendering the service. If an initial determination to certify is provided by telephone, a written notification of the determination shall be provided within two (2) business days thereafter. The written notification shall include the number of days approved, the new total number of days or services approved, and the date of admission or onset of services.

- C. When a determination is made not to certify, notification to the attending or ordering provider or facility must be provided by telephone or electronic means within one (1) business day followed by a written notification within one (1) business day thereafter. The written notification must include the principal reason/clinical rationale for the determination not to certify, including specific reference to any provision of this Fee Schedule relied upon by the reviewer, and instructions for initiating an appeal and/or reconsideration request.
- D. The payer or its review agent shall inform the attending physician and/or other ordering provider of their right to initiate an expedited appeal in cases involving emergency or imminent care or admission, or a standard appeal, as the case may permit, of a determination not to certify, and the procedure to do so.
 - 1. Expedited appeal—When an initial determination not to certify a health care service is made prior to or during an ongoing service requiring imminent or expedited review, and the attending physician believes that the determination warrants immediate appeal, the attending physician shall have an opportunity to appeal that determination over the telephone or by electronic mail or facsimile on an expedited basis within one (1) business day.
 - a. Each private review agent shall provide for prompt and expeditious access to its consulting physician(s) for such appeals.
 - b. Both providers of care and private review agents should attempt to share the maximum information by phone, fax, or otherwise to resolve the expedited appeal (sometimes called a reconsideration request) satisfactorily.
 - c. Expedited appeals, which do not resolve a difference of opinion, may be resubmitted through the standard appeal process, or submitted directly to the Commission's Medical Cost Containment Division as a Request for Resolution of Dispute. A disagreement warranting expedited review or reconsideration does not have to be resubmitted to the payer or utilization review agent through the standard appeal process unless the requesting provider so wishes.
 - 2. Standard appeal—A standard appeal will be considered as a request for reconsideration, and notification of the appeal decision given to the provider, not later than twenty (20) calendar days after receiving the required documentation for the appeal.
 - a. An attending physician who has been unsuccessful in an attempt to reverse a determination not to certify treatment or services must be provided the clinical rationale for the determination along with the notification of the appeal decision.
 - 3. Retrospective review—For retrospective review, the review determination shall be based on the medical information available to the attending or ordering provider at the time the medical care was provided, and on any other relevant information regardless of whether the information was available to or considered by the provider at the time the care or service was provided. Retrospective review is not optional or conducted solely at the discretion of the review agent. A request for review and approval of services already provided must be handled by the payer or its utilization reviewer in the same manner any other request for approval of services is handled.
 - a. When there is retrospective determination not to certify an admission, stay, or other service, the attending physician or other ordering provider and hospital or facility shall receive written notification, or notification by facsimile or electronic mail, within twenty (20) calendar days after receiving the request for retrospective review and all necessary and supporting documentation.
 - b. Notification should include the principal reasons for the determination and a statement of the procedure for standard appeal if the determination is adverse to the patient.
 - 4. Emergency admissions or surgical procedures—Emergency admissions or surgical procedures must be reported to the payer by the end of the next business day. Post review activities will be performed following emergency admissions, and a continued stay review may be initiated.
 - a. If a licensed physician certifies in writing to the payer or its agent or representative within seventy-two (72) hours of an admission that the injured worker admitted was in need of emergency admission to hospital care, such shall constitute a prima facie case for the medical necessity of the admission. An admission qualifies as an emergency admission if it results from a sudden onset of illness or injury which is manifested by acute symptoms of sufficient severity that the failure to admit to hospital care could reasonably result in (1) serious impairment of bodily function(s), (2) serious or permanent dysfunction of any bodily organ or part or system, (3) permanently placing the person's health in jeopardy, or (4) other serious medical consequence.
 - b. To overcome a prima facie case for emergency admission as established above, the utilization reviewer must demonstrate by clear and convincing evidence that the patient was not in need of an emergency admission.
- E. Failure of the health care provider to provide necessary information for review, after being specifically requested to do so by the payer or its review agent in detail, may result in denial of certification and/or reimbursement.
- F. When a payer and provider have completed the utilization review appeals process and cannot agree on a resolution to a dispute, either party, or the patient, can appeal to the Cost Containment Division of the Mississippi Workers' Compensation Commission, and should submit this request on the Request for Dispute Resolution Form adopted by the Commission. A request for resolution of a utilization review dispute should be filed with the Commission within twenty (20) calendar days following the conclusion of the underlying appeal process provided by the payer or its

utilization reviewer. The Commission shall consider and decide a request for resolution of a utilization review dispute in accordance with the Dispute Resolution Rules provided elsewhere in this Fee Schedule.

- G. Failure of a payer or its utilization review agent to timely notify the provider of a decision whether to certify or approve an admission, procedure, service or other treatment shall be deemed to constitute approval by the payer of the requested treatment, and shall obligate the payer to reimburse the provider in accordance with other applicable provisions of this Fee Schedule should the provider elect to proceed with the proposed treatment or service. Timely notification means notification by mail, facsimile, electronic mail, or telephone, followed by written notification, to the provider, within the applicable time periods set forth in these Utilization Review Rules.
- H. Upon request of the provider, or the Commission, a payer and/or the review agent must furnish a copy of the license or certification obtained from the State Department of Health, along with all supporting documentation, reports, data, studies, etc., which authorizes the reviewer to engage in utilization review activities in the State of Mississippi. The Commission may, likewise, obtain this information unilaterally from the Mississippi Department of Health pursuant to an agreement with that Agency.
- I. Upon a finding by the Commission or an Administrative Judge that a payer, and/or their review agent, has unreasonably delayed a claim without reasonable grounds within the meaning of §71-3-59 of the Law, penalties pursuant to MCA §71-3-59 (Rev. 2000) may be assessed against the payer.

Any payer electing to obtain an Employer Medical Evaluation (EME) pursuant to MCA §71-3-15(1) must do so without unreasonable delay. With respect to an EME sought after the filing of a motion to compel medical treatment by a claimant, failure by the payer to obtain and submit the EME report to the claimant and the Commission within 45 days of the claimant's filing of a motion to compel may be deemed an unreasonable delay. Counsel for both parties may agree to extend the forty-five-day (45-day) limitation, or the Administrative Judge may extend the forty-five-day (45-day) limitation at his or her discretion. The forty-five-day (45-day) limitation does not apply to experts selected by the agreement of both parties to render a second opinion. If an Administrative Judge or the Commission finds that a payer has demonstrated unreasonable delay in seeking or obtaining an EME, regardless of whether a motion to compel medical treatment has been filed, such a finding may result in the imposition of penalties and/or attorney's fees or expenses pursuant to MCA §71-3-59 and/or waiver of the payer's right to an EME.

- J. Regardless of the outcome of a dispute arising hereunder regarding certification or approval of a proposed treatment or service, in no event shall the injured worker/patient be held liable for the payment of any portion of a bill related thereto. As provided in §71-3-15(1) of the Law, any dispute over the amount due a medical provider for any reason shall be resolved between the payer and provider, with each holding the claimant harmless from payment of same, regardless of whether the treatment has been provided inside or outside the State of Mississippi.
- K. Nothing provided herein shall estop or prevent the patient from obtaining legal counsel and/or seeking relief in the form of a request to compel medical treatment before an Administrative Judge.

Rules for Modifiers and Code Exceptions

Please see the modifier rules in each section of the *Mississippi Workers' Compensation Medical Fee Schedule* for a complete listing of appropriate modifiers for each area.

- A. Modifiers must be used by providers to identify procedures or services that are modified due to specific circumstances.
- B. When modifier 22 is used to report an increased service, a report explaining the medical necessity of the situation must be submitted with the claim to the payer. It is not appropriate to use modifier 22 for routine billing. When appropriate, the *Mississippi Workers' Compensation Medical Fee Schedule* reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.
- C. The use of modifiers does not imply or guarantee that a provider will receive reimbursement as billed. Reimbursement for a modified service or procedure is based on documentation of medical necessity and determined on a case-by-case basis.
- D. Modifiers allow health care providers to indicate that a service was altered in some way from the stated description without actually changing the definition of the service.

I. MODIFIERS FOR CPT® CODES

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow.

This section contains a list of modifiers used with CPT codes. Also consult each practice-area section of the Fee Schedule for applicable modifiers.

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

23 Unusual Anesthesia

Occasionally, a procedure, which usually requires either no anesthesia or local anesthesia, because of unusual circumstances must be done under general anesthesia. This circumstance may be reported by adding modifier 23 to the procedure code of the basic service.

24 Unrelated Evaluation and Management Services by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period

The physician or other qualified health care professional may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E/M service.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately

identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPCS Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is listed in the TC Amount column of the Fee Schedule.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

47 Anesthesia by Surgeon

Regional or general anesthesia provided by the surgeon may be reported by adding modifier 47 to the basic service. (This does not include local anesthesia.) **Note:** Modifier 47 would not be used as a modifier for the anesthesia procedures.

Mississippi guideline: Reimbursement is made for base units only.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same session, should be identified by adding modifier 50 to the appropriate 5 digit code.

Mississippi guideline: This modifier is reimbursed at fifty percent (50%) of the allowed amount.

51 Multiple Procedures

When multiple procedures, other than E/M Services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated “modifier 51 exempt” codes as specified in the Fee Schedule. Services with modifier 51 are reimbursed at fifty percent (50%) of the allowed amount.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well being of the patient, it may be

necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

54 Surgical Care Only

When 1 physician or other qualified health care professional performs a surgical procedure and another provides preoperative and/or postoperative management, surgical services may be identified by adding modifier 54 to the usual procedure number.

55 Postoperative Management Only

When 1 physician or other qualified health care professional performed the postoperative management and another performed the surgical procedure, the postoperative component may be identified by adding modifier 55 to the usual procedure number.

56 Preoperative Management Only

When 1 physician or other qualified health care professional performed the preoperative care and evaluation and another performed the surgical procedure, the preoperative component may be identified by adding modifier 56 to the usual procedure number.

57 Decision for Surgery

An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: (a) planned or anticipated (staged); (b) more extensive than the original procedure; or (c) for therapy following a surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For treatment of a problem that requires a return to the operating/procedure room, (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25. See also Level II (HCPCS/National) Modifiers listing.

62 Two Surgeons

When two surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated add-on code(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. If additional procedure(s) (including add-on procedure(s)) are performed during the same surgical session, separate code(s) may also be reported with modifier 62 added. **Note:** If a co-surgeon acts as an assistant in the performance of additional procedure(s), other than those reported with the modifier 62, during the same surgical session, those services may be reported using separate procedure code(s) with modifier 80 or modifier 82 added, as appropriate.

Mississippi guideline: This modifier is reimbursed at one hundred fifty percent (150%) of the allowed amount divided equally between the two co-surgeons.

66 Surgical Team

Under some circumstances, highly complex procedures (requiring the concomitant services of several physicians or other qualified health care professionals, often of different specialties, plus other highly skilled, specially trained personnel, various types of complex equipment) are carried out under the “surgical team” concept. Such circumstances may be identified by each participating individual with the addition of modifier 66 to the basic procedure number used for reporting services.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

80 Assistant Surgeon

Surgical assistant services may be identified by adding modifier 80 to the usual procedure number(s).

Mississippi guideline: Reimbursement is twenty percent (20%) of the maximum reimbursement allowance.

81 Minimum Assistant Surgeon

Minimum surgical assistant services are identified by adding modifier 81 to the usual procedure number.

Mississippi guideline: Physician reimbursement is ten percent (10%) of the maximum reimbursement allowance.

82 Assistant Surgeon (when qualified resident surgeon not available)

The unavailability of a qualified resident surgeon is a prerequisite for use of modifier 82 appended to the usual procedure code number(s).

90 Reference (Outside) Laboratory

When laboratory procedures are performed by a party other than the treating or reporting physician or other qualified health care professional, the procedure may be identified by adding modifier 90 to the usual procedure number.

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time,

reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results (eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

92 Alternative Laboratory Platform Testing

When laboratory testing is being performed using a kit or transportable instrument that wholly or in part consists of a single use, disposable analytical chamber, the service may be identified by adding modifier 92 to the usual laboratory procedure code (HIV testing 86701–86703, and 87389). The test does not require permanent dedicated space; hence by its design may be hand carried or transported to the vicinity of the patient for immediate testing at that site, although location of the testing is not in itself determinative of the use of this modifier.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

AA Anesthesia Services Performed Personally by Anesthesiologist (HCPCS Modifier)

Report modifier AA when the anesthesia services are personally performed by an anesthesiologist.

AD Medical Supervision by a Physician: More Than 4 Concurrent Anesthesia Procedures (HCPCS Modifier)

Report modifier AD when the anesthesiologist supervises more than 4 concurrent anesthesia procedures.

AS Physician Assistant, Nurse Practitioner, or Clinical Nurse Specialist Services for Assistant at Surgery (HCPCS Modifier)

Assistant at surgery services provided by another qualified individual (e.g., physician assistant, nurse practitioner, clinical nurse specialist, registered nurse first assistant) and not another physician are identified by adding modifier AS to the listed applicable surgical procedures. Modifier AS may be appended to any code identified as appropriate for surgical assistance in this Fee Schedule.

Mississippi guideline: AS reimbursement is ten percent (10%) of the maximum reimbursement allowance. For assistant at surgery services provided by a physician, see modifiers 80, 81, and 82.

M1 Nurse Practitioner (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by a nurse practitioner.

M2 Physician Assistant (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by a physician assistant.

M3 Physical or Occupational Therapist Assistant (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by either a physical therapist assistant or an occupational therapist assistant.

M4 CARF Accredited (Mississippi Modifier)

This modifier should be used in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered by a CARF accredited provider as part of a pre-approved interdisciplinary pain rehabilitation program.

M5 Chronic Pain Treatment (Mississippi Modifier)

This modifier should be used only in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered as part of a pre-approved interdisciplinary pain rehabilitation program.

QK Medical Direction of 2, 3, or 4 Concurrent Anesthesia Procedures Involving Qualified Individuals (HCPCS Modifier)

Report modifier QK when the anesthesiologist supervises 2, 3, or 4 concurrent anesthesia procedures involving qualified individuals.

QX Qualified Non-Physician Anesthetist with Medical Direction by a Physician (HCPCS Modifier)

Regional or general anesthesia provided by a qualified non-physician anesthetist with medical direction by a physician may be reported by adding modifier QX.

QY Medical Direction of One Qualified Non-Physician Anesthetist by an Anesthesiologist (HCPCS Modifier)

Report modifier QY when the anesthesiologist supervises one qualified non-physician anesthetist.

QZ CRNA Service without Medical Direction by a Physician (HCPCS Modifier)

Regional or general anesthesia provided by the CRNA (certified registered nurse anesthetist) or AA (anesthesiologist assistant) without medical direction by a physician may be reported by adding modifier QZ.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

II. MODIFIERS APPROVED FOR AMBULATORY SURGERY CENTER (ASC) HOSPITAL OUTPATIENT USE

This section contains a list of modifiers used with ambulatory surgery center and hospital-based outpatient services. Also consult each practice-area section of the Fee Schedule for additional modifiers.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

27 Multiple Outpatient Hospital E/M Encounters on the Same Date

For hospital outpatient reporting purposes, utilization of hospital resources related to separate and distinct E/M encounters performed in multiple outpatient hospital settings on the same date may be reported by adding modifier 27 to each appropriate level outpatient and/or emergency department E/M code(s). This modifier provides a means of reporting circumstances involving evaluation and management services provided by physician(s) in more than one (multiple) outpatient hospital setting(s) (eg, hospital emergency department, clinic). **Note:** This modifier is not to be used for physician reporting of multiple E/M services performed by the same physician on the same date. For physician reporting of all

outpatient evaluation and management services provided by the same physician on the same date and performed in multiple outpatient setting(s) (eg, hospital emergency department, clinic), see **Evaluation and Management, Emergency Department, or Preventive Medicine Services** codes.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same session, should be identified by adding modifier 50 to the appropriate five-digit code.

Mississippi guideline: This modifier is reimbursed at fifty percent (50%) of the allowed amount.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: (a) planned or anticipated (staged); (b) more extensive than the original procedure; or (c) for therapy following a diagnostic surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For treatment of a problem that requires a return to the operating/procedure room (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25. See also Level II (HCPCS/National) Modifiers listing.

73 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure Prior to the Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well being of the patient, the physician may cancel a surgical or diagnostic procedure subsequent to the patient's surgical preparation (including sedation when provided, and being taken to the room where the procedure is to be performed), but prior to the administration of anesthesia (local, regional block(s) or general). Under these circumstances, the intended service that is prepared for but cancelled can be reported by its usual procedure number and the addition of modifier 73. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

74 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure After Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well-being of the patient, the physician may terminate a surgical or diagnostic procedure after the administration of anesthesia (local, regional block(s), general) or after the procedure was started (incision made, intubation started, scope inserted, etc). Under these circumstances, the procedure started but terminated can be reported by its usual procedure number and the addition of modifier 74. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time, reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results (eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

III. MODIFIERS FOR HCPCS CODES

This section contains a list of commonly used modifiers with HCPCS DME codes. Other HCPCS modifiers, including those which can be used with CPT codes, are acceptable modifiers.

AU Item Furnished in Conjunction with a Urological, Ostomy, or Tracheostomy Supply

AV Item Furnished in Conjunction with a Prosthetic Device, Prosthetic, or Orthotic

AW Item Furnished in Conjunction with a Surgical Dressing

KC Replacement of Special Power Wheelchair Interface

NU New Equipment

RR Rental (use the RR modifier when DME is to be rented)

Mississippi guideline: Listed amount is the per month allowance, except codes E0935, E0936, and E0675 which are per-day allowances.

UE Used Durable Medical Equipment

Mississippi guideline: Used to report the purchase of used durable medical equipment.

IV. CODE EXCEPTIONS

A. **Unlisted Procedure Codes.** If a procedure is performed that is not listed in the Fee Schedule, the provider must bill with the appropriate "Unlisted Procedure" code and submit a narrative report to the payer explaining why it was medically necessary to use an unlisted procedure code.

The CPT book contains codes for unlisted procedures. Use these codes only when there is no procedure code that accurately describes the service rendered. A report is required as these services are reimbursed by report (see below).

- B. **By Report (BR) Codes.** By report (BR) codes are used by payers to determine the reimbursement for a service or procedure performed by the provider that does not have an established maximum reimbursement allowance (MRA).
1. Reimbursement for procedure codes listed as “BR” must be determined by the payer based on documentation submitted by the provider in a special report attached to the claim form. The required documentation to substantiate the medical necessity of a procedure does not warrant a separate fee. Information in this report must include, as appropriate:
 - a. A complete description of the actual procedure or service performed;
 - b. The amount of time necessary to complete the procedure or service performed;
 - c. Accompanying documentation that describes the expertise and/or equipment required to complete the service or procedure.
 2. Reimbursement of “BR” procedures should be based on the usual and customary rate.
- C. **Category II Codes.** This Fee Schedule does not include Category II codes as published in the CPT book. Category II codes are supplemental tracking codes that can be used for performance measurements. These codes describe clinical components that are typically included and reimbursed in other services such as evaluation and management (E/M) or laboratory services. These codes do not have an associated fee.
- D. **Category III Codes.** This Fee Schedule does not include Category III codes published in the CPT book. If a provider bills a Category III code, payment may be denied.
- E. **Add-On Codes.** The CPT book identifies procedures that are always performed in addition to the primary procedure and designates them with a + symbol. Add-on codes are never reported for stand-alone services but are reported secondarily in addition to the primary procedure. Specific language is used to identify add-on procedures such as “each additional” or “(List separately in addition to primary procedure).”

The same physician or other qualified health care provider that performed the primary service/procedure must perform the add-on service/procedure. Add-on codes describe additional intra-service work associated with the primary service/procedure (e.g., additional digit(s), lesions(s), neurorrhaphy(s), vertebral segment(s), tendon(s), joint(s)).

Add-on codes are always performed in addition to the primary service/procedure, and must never be reported as a stand-alone code. All add-on codes found in the CPT book are exempt from the multiple procedure concept (see modifier 51 definition in this section). Add-on codes are reimbursed at one hundred percent (100%) of the maximum reimbursement allowance or the provider’s charge, whichever is less.

Refer to the most current version of the CPT book for a complete list of add-on codes.

- F. **Codes Exempt From Modifier 51.** This symbol  denotes procedure codes that are exempt from the use of modifier 51 and are not designated as add-on procedures/services as defined in the CPT book. Modifier 51 exempt services and procedures can be found in Appendix E of *CPT 2016*. Additional codes that should not be subject to modifier 51 have been identified by Optum360 based upon CPT guidelines and are included in this Fee Schedule using the  icon.

Codes exempt from modifier 51 are reimbursed at one hundred percent (100%) of the maximum reimbursement allowance or the provider’s charge, whichever is less.

- G. **Moderate (Conscious) Sedation.** To report moderate (conscious) sedation provided by the physician also performing the diagnostic or therapeutic service for which conscious sedation is being provided, see codes 99143–99145. It is not appropriate for the physician performing the sedation and the service for which the conscious sedation is being provided to report the sedation separately when the code is listed with the conscious sedation symbol . The conscious sedation symbol identifies services that include moderate (conscious) sedation. A list of codes for services that include moderate (conscious) sedation is also included in the most current CPT book.

For procedures listed with , when a second physician other than the health care professional performing the diagnostic or therapeutic services provides moderate (conscious) sedation in the facility setting (e.g., hospital, outpatient hospital/ambulatory surgery center, skilled nursing facility), the second physician reports the associated moderate sedation procedure/service using codes 99148–99150.

Moderate sedation codes are not used to report minimal sedation (anxiolysis), deep sedation, or monitored anesthesia care.

Pharmacy Rules

I. SCOPE

This section provides specific rules for the dispensing of and payment for medications and other pharmacy services prescribed to treat work-related injury/illness under the terms of the Act.

II. DEFINITIONS

- A. **Medications** are defined as drugs prescribed by a licensed health care provider and include name brand and generic drugs as well as patented or over-the-counter drugs, compound drugs and physician-dispensed or repackaged drugs.
- B. **Average Wholesale Price** means the AWP based on the most current edition of the *Drug Topics Red Book* in effect at the time the medication is dispensed.

III. RULES

- A. Generic Equivalent Drug Products. Unless otherwise specified by the ordering physician, all prescriptions will be filled under the generic name.

When the physician writes "brand medically necessary" on the prescription, the pharmacist will fill the order with the brand name. When taking telephone orders, the pharmacist will assume the generic brand is to be used unless "brand medically necessary" is specifically ordered by the treating physician. Without exception, the treating physician has the authority to order a brand name medication if he/she feels the trademark drug is substantially more effective.
- B. A payer or provider may not prohibit or limit any person from selecting a pharmacy or pharmacist of his/her choice, and may not require any person to purchase pharmacy services, including prescription drugs, exclusively through a mail-order pharmacy or program, or to obtain medication dispensed by the physician or in the physician's office, provided the pharmacy or pharmacist selected by the claimant has agreed to be bound by the terms of the Workers' Compensation Law and this Fee Schedule with regard to the provision of services and the billing and payment therefor.
- C. Dietary supplements, including but not limited to minerals, vitamins, and amino acids are not reimbursable unless a specific compensable dietary deficiency has been clinically established as related to the work injury.
- D. Not more than one dispensing fee shall be paid per drug within a thirty (30) day period.

IV. REIMBURSEMENT

- A. Reimbursement for pharmaceuticals ordered for the treatment of work-related injury/illness is as follows:
 - 1. Brand/Trade Name Medications: Average Wholesale Price (AWP) plus a five dollar (\$5.00) dispensing fee.
 - 2. Generic Medications: Average Wholesale Price (AWP) plus a five dollar (\$5.00) dispensing fee.
 - 3. Over-the-counter medications are reimbursed at usual and customary rates.
 - 4. Dispensing fees are payable only if the prescription is filled under the direct supervision of a registered pharmacist. If a physician dispenses medications from his/her office, a dispensing fee is not allowed.
- B. Supplies and equipment used in conjunction with medication administration should be billed with the appropriate HCPCS codes and shall be reimbursed according to the Fee Schedule. Supplies and equipment not listed in the Fee Schedule will be reimbursed at the usual and customary rate.
- C. Mail-order pharmaceutical services are subject to the rules and reimbursement limitations of this Fee Schedule when supplying medications to Mississippi Workers' Compensation claimants. Shipping for mail-order pharmaceutical services is not separately reimbursed.

V. SPECIAL PRICING

- A. **Repackaged and/or Physician Dispensed Medication:** If the National Drug Code (NDC) for the drug product as dispensed is a repackaged drug, the maximum allowable fee shall be the lesser of AWP using a) the NDC for the underlying drug product from the original labeler, or b) the therapeutic equivalent drug product from the original labeler NDC.

For purposes of this provision, “therapeutically equivalent drugs” means drugs that have been assigned the same Therapeutic Equivalent Code starting with the letter “A” in the Food and Drug Administration’s publication “Approved Drug Products with Therapeutic Equivalence Evaluations” (Orange Book). The Orange Book may be accessed through the Food and Drug Administration website at: <http://www.accessdata.fda.gov/scripts/cder/ob/default.cfm>

National Drug Code “for the underlying drug product from the original labeler” means the NDC of the drug product actually utilized by the repackager in producing the repackaged product.

- B. **Compound Medications:** A compound medication is any customized formulation of medication prepared by a compounding pharmacist that is not commercially available. Compound drugs or medications shall be billed by listing each drug and its NDC number included in the compound and calculating the charge for each drug separately. Payment shall be based on the sum of the fee for each ingredient, plus a single dispensing fee of five dollars (\$5.00). If the NDC for any ingredient is a repackaged drug, reimbursement for the repackaged ingredient(s) shall be as above provided. Reimbursement for a compound cream medication is limited to a maximum total reimbursement of three hundred dollars (\$300.00) for one hundred twenty (120) grams per month. Any additional quantity over and above this one hundred twenty (120) gram limit requires further documentation and prior authorization (pre-certification).
- C. If information pertaining to the original labeler of the underlying drug product used in repackaged or compound medications is not provided or is otherwise unknown or unavailable, the payer shall reimburse using the lowest priced generic therapeutic equivalent drug product.
- D. **Other Special Pricing:**

The following medications have maximum reimbursement allowables as follows:

Lidopro patch	\$5.45 each patch
Lidopro cream	\$40.26 up to 4 oz
Terocin patch	\$5.45 each patch
Terocin lotion	\$40.26 up to 4 oz
Intraarticular joint kit	\$27.36

Please refer to the MWCC website

(<http://www.mwcc.state.ms.us/#/medicalFeeSchedule>) for any additions or changes to the special pricing list.

Other Qualified Health Care Professional Rules

I. ANY QUALIFIED HEALTH CARE PROFESSIONAL

Any qualified health care professional who is licensed in Mississippi, practices within state guidelines, and is listed within this Fee Schedule as an authorized provider is reimbursed for services based on this Fee Schedule.

II. NURSE PRACTITIONER

- A. Modifier M1 should be attached to the appropriate CPT® code when billing services rendered by the nurse practitioner. The nurse practitioner must use his/her unique identifier to bill for all services. Nurse practitioners must comply with the requirements for a National Provider Identifier (NPI) as specified in the Billing and Reimbursement Rules of this Fee Schedule.
- B. The nurse practitioner is reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure.
- C. There is only one fee allowed for each CPT code. It is the decision of the physician or the nurse practitioner as to who will bill for a service when both have shared in the provision of the service. Incorrect billing of the service may cause a delay or improper payment by the payer. The medical doctor (MD) must be on-site on the date of service and provide additional documentation and review of services in order for physician reimbursement to be applied.

III. PHYSICIAN ASSISTANT

- A. Mississippi-specific modifier M2 should be attached to the appropriate CPT code(s) when billing services rendered by the physician assistant.
- B. The physician assistant is reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure.
- C. The same rules as apply to the nurse practitioners with regard to billing and reimbursement, shall apply to the physician assistant.

IV. PHYSICAL THERAPIST ASSISTANT OR OCCUPATIONAL THERAPIST ASSISTANT

- A. Mississippi-specific modifier M3 should be attached to the appropriate CPT code(s) when billing services rendered by a physical therapist assistant or an occupational therapist assistant.
- B. The physical therapist assistant or occupational therapist assistant is reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure.

V. PSYCHOLOGY

When a provider other than a psychiatrist provides psychology services, the reimbursement amount for the CPT code is paid at eighty-five percent (85%) of the maximum reimbursement allowance. This applies to psychologists, social workers, counselors, etc.

Home Health Rules

I. SCOPE

This section of the Fee Schedule pertains to home health services provided to patients who have a work-related injury/illness.

- A. The determination that the injury/illness or condition is work related must be made by the payer and home health services shall be pre-certified as medically necessary by the payer's Utilization Management Program.
- B. All nursing services and personal care services shall have prior authorization by the payer.
- C. A description of needed nursing or other attendant care must accompany the request for authorization.

II. REIMBURSEMENT

- A. If a payer and provider have a mutually agreed upon contractual arrangement governing the payment for home health services to injured/ill employees, the payer shall reimburse under the contractual agreement and not according to the Fee Schedule.
- B. In the absence of a mutually agreed upon contractual arrangement governing payment for home health service, reimbursement shall be made as in other cases (see Billing and Reimbursement Rules) in an amount equal to billed charges, or the maximum reimbursement allowance (MRA), whichever is less. Billing for home health services is appropriate using the applicable billing form for other institutional providers or facilities.
- C. A visit made simultaneously by two or more workers from a home health agency to provide a single covered service for which one supervises or instructs the other shall be counted as one visit.
- D. A visit is defined as time up to and including the first two hours.
- E. The maximum reimbursement allowances (MRA) listed herein are inclusive of mileage and other incidental travel expenses, unless otherwise agreed to by the payer and provider.
- F. The hourly rates set forth in this section of the Fee Schedule apply to all hours worked. No additional reimbursement is allowed for overtime hours, unless otherwise agreed to by the parties in a separate fee contract.

III. RATES

- A. The following MRAs and codes apply to services provided by or through a home health agency:

Service	Fee Per Visit	Billing Code
RN Skilled Nursing	\$125.00	G0162
Physical Therapy	\$125.00	G0151
Speech Therapy	\$125.00	G0153
Occupational Therapy	\$125.00	G0152
Medical Social Services	\$125.00	G0155
Home Health Aide	\$55.00	G0156

For services that exceed two (2) hours, reimbursement for time in excess of the first two (2) hours shall be pro-rated and based on an hourly rate equal to fifty percent (50%) of the above visit fee. For home health services rendered in two (2) hours or less, reimbursement shall be made for a visit as above provided.

Note: In addition to the Skilled Nursing Care fees above, an additional sum of seven dollars and sixteen cents (\$7.16) per visit shall be added to cover the cost of medical supplies, provided the billing form adequately specifies what supplies were utilized.

B. The following Private Duty Rates shall apply:

Skilled Nursing Care – R.N.	\$44.00 per hour
Skilled Nursing Care – L.P.N.	\$37.00 per hour
Certified Nurse Assistant	\$20.00 per hour
Sitter/Attendant	\$15.00 per hour

- C. Any reimbursement to persons not working under a professional license, such as a spouse or relative, will be at the rate of eight dollars (\$8.00) per hour unless otherwise negotiated by the payer and caregiver or provider.
- D. Professional providers not assigned a MRA for home health services and who have not negotiated their rates with the payer prior to provision of home health care, shall be reimbursed at the usual and customary rate, or the total billed charge, whichever is less.

IV. PARENTERAL/ENTERAL/HOME INFUSION THERAPY IN THE HOME SETTING

- A. The MRA for this therapy provided in the home setting is a per diem amount and includes necessary supplies for the safe and effective administration of the prescribed therapy. Supplies include set(s), needles, syringes, saline, tubing, dressing kits, saline, heparin, alcohol pads, start kits, catheters, adapters, tape, gauges, pump, poles, and other supplies.

B. Per diem amounts are as follows:

Parenteral therapy/home infusion (with or without antibiotics)

Daily – \$165.00

Twice a day – \$ 190.00

Three times a day – \$ 215.00

Four times a day – \$ 265.00

Five or more times a day – \$ 335.00

Total Parental Nutrition (TPN):

1-1.6 Liters per day – \$280.00

1.7-2.4 Liters per day – \$350.00

More than 2.4 liters per day – \$385.00

LIPIDS:

10% – \$75.00

20% – \$95.00

Enteral Therapy:

\$24.00 per day

- C. Medications for Parenteral/Enteral Therapy are reimbursed at AWP.

V. HOSPICE

- A. Hospice reimbursement is a per diem amount that is all inclusive for services provided.

B. Daily Per Diem amounts are as follows:

Routine Home Care – \$373.68

Continuous Home Rate – \$1,889.58

Inpatient Care – \$1,440.22

Skilled Nursing Facility Rules

I. REIMBURSEMENT

The maximum reimbursement allowance for medical care provided within the confines of a freestanding skilled nursing facility, a hospital based skilled nursing facility, or a swing bed facility, shall be four hundred dollars (\$400.00) per day. This rate covers and includes all routine and ancillary health care services provided to a claimant during each day of a covered skilled nursing facility stay.

II. EXCLUDED SERVICES

The following services are excluded from the daily skilled nursing facility rate, and shall be reimbursed separately and in addition to the above daily rate:

- Cardiac catheterization
- Angiography
- Magnetic resonance imaging (MRI) and computerized axial tomography (CT) scans
- Radiation therapy and chemotherapy
- Emergency services, which are defined as an admission or services necessitated by a sudden onset of illness or injury which is manifested by acute symptoms of sufficient severity that the failure to provide services could reasonably result in:
 - serious impairment of bodily function(s)
 - serious or permanent dysfunction of any bodily organ or part or system
 - permanently placing the person's health in jeopardy, or
 - other serious medical consequence
- Outpatient services when provided in a hospital or other free standing outpatient facility separate from the skilled nursing facility
- Customized prosthetic services
- Ambulance transportation related to any of the above services
- Services provided independent of the facility by physicians, and other qualified health care professionals (e.g., NP, PA, CRNA, psychologist).

III. EXCLUSIONS

As in other cases, the above provisions shall not apply to any mutual agreement or contract entered into by the payer and provider which sets forth the terms for the provision of skilled nursing facility services and reimbursement therefor.

Evaluation and Management

This section contains rules and codes used to report evaluation and management (E/M) services. Rules and Guidelines follow the current CPT® Guidelines as stated.

Note: Rules used by all physicians in reporting their services are presented in the General Rules section.

I. DEFINITIONS AND RULES

Definitions and rules pertaining to E/M services are as follows:

- A. **Consultations.** The CPT book defines a consultation as “a type of evaluation and management service provided at the request of another physician or appropriate source to either recommend care for a specific condition or problem or to determine whether to accept responsibility for ongoing management of the patient's entire care or for the care of a specific condition or problem.” (This includes referrals for a second opinion.) Consultations are reimbursable only to physicians with the appropriate specialty for the services provided.

In order to qualify as a consultation the following criteria must be met:

- The verbal or written request for a consult must be documented in the patient's medical record;
- The consultant's opinion and any services ordered or performed must be documented by the consulting physician in the patient's medical record;
- The consulting physician must provide a written report to the requesting physician or other appropriate source.

A payer/employer may request a second opinion examination or evaluation for the purpose of evaluating temporary or permanent disability or medical treatment being rendered, as provided in MCA §71-3-15(1) (Rev. 2000). This examination is considered a confirmatory consultation. The confirmatory consultation is billed using the appropriate level and site-specific consultation codes 99241–99245 for office or other outpatient consultations and 99251–99255 for inpatient consultations, with modifier 32 appended to indicate a mandated service.

Evaluation and management consultation services will continue to be reported with CPT codes 99241–99245 for outpatient consultation services and codes 99251–99255 for inpatient consultation services. The rules and guidelines regarding the definition, documentation, and reporting of consultation services as contained in the CPT book will apply unless superseded by these guidelines. Consultation services will be reimbursed at the lesser of the Fee Schedule maximum reimbursable amount (MRA) or the billed amount.

- B. **Referral.** Subject to the definition of “consultation” provided in this Fee Schedule, a referral is the transfer of the total or specific care of a patient from one physician to another and does not constitute a consultation. (Initial evaluations and subsequent services are designated as listed in the Evaluation and Management section).
- C. **New and Established Patient Service.** Several code subcategories in the Evaluation and Management section are based on the patient's status as new or established. The new versus established patient guidelines also clarify the situation in which a physician is on call or covering for another physician. In this instance, classify the patient encounter the same as if it were for the physician who is unavailable.
- *New Patient.* A new patient is one who has not received any professional services from the physician, or another physician of the same specialty who belongs to the same group practice, for this same injury or within the past three years.
 - *Established Patient.* An established patient is a patient who has been treated for the same injury by any physician, of the same specialty, who belongs to the same group practice.
- D. **E/M Service Components.** The first three components of history, examination, and medical decision making are the keys to selecting the correct level of E/M codes, and all three components must be met or exceeded in the documentation of an initial evaluation or consultation. However, in established, subsequent, and follow-up categories, only two of the three must be met or exceeded for a given code.
1. The history component is categorized by four levels:
 - a. *Problem Focused.* Chief complaint; brief history of present illness or problem.
 - b. *Expanded Problem Focused.* Chief complaint; brief history of present illness; problem-pertinent system review.
 - c. *Detailed.* Chief complaint; extended history of present illness; problem-pertinent system review extended to include a review of a limited number of additional systems; pertinent past, family medical and/or social history directly related to the patient's problems.

- d. *Comprehensive*. Chief complaint; extended history of present illness; review of systems that is directly related to the problem(s) identified in the history of the present illness, plus a review of all additional body systems; **complete** past, family, and social history.
2. The physical exam component is similarly divided into four levels of complexity:
 - a. *Problem Focused*. A limited examination of the affected body area or organ system.
 - b. *Expanded Problem Focused*. A limited examination of the affected body area or organ system and other symptomatic or related organ system(s).
 - c. *Detailed*. An extended examination of the affected body area(s) and other symptomatic or related organ system(s).
 - d. *Comprehensive*. A general multi-system examination or a complete examination of a single organ system.

The CPT book identifies the following body areas:

- Head, including the face
- Neck
- Chest, including breasts and axilla
- Abdomen
- Genitalia, groin, buttocks
- Back
- Each extremity

The CPT book identifies the following organ systems:

- Eyes
- Ears, nose, mouth, and throat
- Cardiovascular
- Respiratory
- Gastrointestinal
- Genitourinary
- Musculoskeletal
- Skin
- Neurologic
- Psychiatric
- Hematologic/lymphatic/immunologic

3. Medical decision making is the final piece of the E/M coding process. Medical decision making refers to the complexity of establishing a diagnosis or selecting a management option that can be measured by the following:
 - a. The number of possible diagnoses and/or the number of management options that must be considered.
 - b. The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be obtained, reviewed, and analyzed.
 - c. The risk of significant complications, morbidity, mortality, as well as co-morbidities associated with the patient's presenting problem(s), the diagnostic procedure(s), and/or the possible management options.

E. **Contributory Components.**

1. Counseling, coordination of care, and the nature of the presenting problem are not major considerations in most encounters, so they generally provide contributory information to the code selection process. The exception arises when counseling or coordination of care dominates the encounter (more than fifty percent (50%) of the time spent). Document the exact amount of time spent to substantiate the selected code and what was clearly discussed during the encounter. Counseling is defined in the CPT book as a discussion with a patient and/or family concerning one or more of the following areas:
 - a. Diagnostic results, impressions, and/or recommended diagnostic studies;
 - b. Prognosis;
 - c. Risks and benefits of management (treatment) options;
 - d. Instructions for management (treatment) and/or follow-up;
 - e. Importance of compliance with chosen management (treatment) options;
 - f. Risk factor reduction;
 - g. Patient and family education.

2. E/M codes are designed to report actual work performed, not time spent. But when counseling or coordination of care dominates the encounter, time overrides the other factors and determines the proper code. For office encounters, count only the time spent face-to-face with the patient and/or family. For hospital or other inpatient encounters, count the time spent rendering services for that patient while on the patient's unit, on the patient's floor, or at the patient's bedside.

F. Interpretation of Diagnostic Studies in the Emergency Room

1. Only one fee for the interpretation of an x-ray or EKG procedure will be reimbursed per procedure.
2. The payer is to provide reimbursement to the provider that directly contributed to the diagnosis and treatment of the individual patient.
3. It is necessary to provide a signed report in order to bill the professional component of a diagnostic procedure. The payer may require the report before payment is rendered.
4. If more than one bill is received, physician specialty should not be the deciding factor in determining which physician to reimburse.

Example: In many emergency departments (EDs), an emergency room (ER) physician orders the x-ray on a particular patient. If the ER physician interprets the x-ray making a notation as to the findings in the chart and then treats the patient according to these radiological findings, the ER physician should be paid for the interpretation and report. There may be a radiologist on staff at the particular facility with quality control responsibilities at that particular facility. However, the fact that the radiologist reads all x-rays taken in the ED for quality control purposes is not sufficient to command a separate or additional reimbursement from the payer.

5. A review alone of an x-ray or EKG does not meet the conditions for separate payment of a service, as it is already included in the ED visit.

II. GENERAL GUIDELINES

The E/M section is divided into broad categories such as office visits, hospital visits, and consultations. Most of the categories are further divided into two or more subcategories of E/M services. Keep the following in mind when coding each service setting:

- A patient is considered an outpatient at a health care facility until formal inpatient admission occurs.
- All physicians use codes 99281–99285 for reporting emergency department services, regardless of hospital-based or non-hospital-based status.
- Admission to a hospital or nursing facility includes E/M services provided elsewhere on the same day.
- Not more than one hospital visit per day shall be payable except when documentation describes the medical necessity of more than one visit by a particular practitioner. Hospital visit codes shall be combined into the single code that best describes the service rendered.
- Only one provider is reimbursed for a patient visit, except where wound care evaluation is provided in an established wound care center.

III. OFFICE OR OTHER OUTPATIENT SERVICES (99201–99215)

Use the Office or Other Outpatient Services codes to report evaluation and management services provided in the office or in an outpatient or other ambulatory facility. A patient is considered an outpatient until inpatient admission to a health care facility occurs.

IV. HOSPITAL OBSERVATION SERVICES (99217–99226)

CPT codes 99217 through 99226 report E/M services provided to patients designated/admitted as “observation status” in a hospital. It is not necessary that the patient be located in an observation area designated by the hospital.

V. OBSERVATION CARE DISCHARGE SERVICES (99217)

- A. CPT code 99217 is used only if discharge from observation status occurs on a date other than the initial date of observation. The code includes final examination of the patient, discussion of the hospital stay, instructions for continuing care, and preparation of discharge records.
- B. If a patient is admitted to and subsequently discharged from observation status on the same date, see codes 99234–99236 as appropriate.
- C. Do not report observation care discharge CPT code 99217 in conjunction with a hospital admission.

VI. HOSPITAL INPATIENT SERVICES (99221–99239)

Codes 99221–99239 are used to report evaluation and management services provided to hospital inpatients. Hospital inpatient services include those services provided to patients in a “partial hospital” setting. These codes are to be used to report these partial hospitalization services.

VII. CONSULTATIONS (99241–99255)

Consultations in *CPT 2016* fall under two subcategories: Office or Other Outpatient Consultations, and Inpatient Consultations. If counseling dominates the encounter, time determines the correct code.

Most requests for a consultation come from the attending physician, the employer, an attorney, or other appropriate source. Include the name of the requesting physician or other source on the claim form or electronic billing. Confirmatory consultations may be requested by the patient and/or family or may result from a second (or third) opinion. When requested by the patient and/or family the service is not reported with consultation codes, but may be reported using the office, home service, or domiciliary/rest home care codes. When required by the attending physician or other appropriate source, report the service with a consultation code for the appropriate site of service, 99241–99245 for office or other outpatient consultation or 99251–99255 for inpatient consultation.

The consultant may initiate diagnostic and/or therapeutic services, such as writing orders or prescriptions and initiating treatment plans.

The opinion rendered and services ordered or performed must be documented in the patient’s medical record and a report of this information communicated to the requesting entity.

Report separately any identifiable procedure or service performed on, or subsequent to, the date of the initial consultation.

When the consultant assumes responsibility for the management of any or all of the patient’s care subsequent to the consultation encounter, consult codes are no longer appropriate. Depending on the location, identify the correct subsequent or established patient codes.

VIII. EMERGENCY DEPARTMENT SERVICES (99281–99288)

Emergency department (ED) service codes do not differentiate between new and established patients and are used by hospital-based and non-hospital-based physicians. An emergency department is defined as “an organized hospital-based facility for the provision of unscheduled episodic services to patients who present for immediate medical attention. The facility must be available 24 hours a day.” This guideline indicates that care provided in the ED setting for convenience should not be coded as an ED service. Also note that more than one ED service can be reported per calendar day if medically necessary.

Codes 99281–99288 are used to report services provided in a medical emergency. If, however, the physician sees the patient in the emergency room out of convenience for either the patient or physician, the appropriate office visit code should be reported (99201–99215) and reimbursement will be made accordingly.

IX. CRITICAL CARE SERVICES (99291–99292)

Critical care is the direct delivery by a physician(s) of medical care for a critically ill or critically injured patient. A critical illness or injury acutely impairs one or more vital organ systems such that there is a high probability of imminent or life threatening deterioration in the patient’s condition. Critical care involves high complexity decision making to assess, manipulate, and support vital system function(s) to treat single or multiple vital organ system failure and/or to prevent further life threatening deterioration of the patient’s condition. Examples of vital organ system failure include, but are not limited to: central nervous system failure, circulatory failure, shock, renal, hepatic, metabolic, and/or respiratory failure. Although critical care typically requires interpretation of multiple physiologic parameters and/or application of advanced technology(s), critical care may be provided in life threatening situations when these elements are not present. Critical care may be provided on multiple days, even if no changes are made in the treatment rendered to the patient, provided that the patient’s condition continues to require the level of physician attention described above.

Providing medical care to a critically ill, injured, or postoperative patient qualifies as a critical care service only if both the illness or injury and the treatment being provided meet the above requirements. Critical care is usually, but not always, given in a critical care area, such as the coronary care unit, intensive care unit, pediatric intensive care unit, respiratory care unit, or the emergency care facility.

Services for a patient who is not critically ill but happens to be in a critical care unit are reported using other appropriate E/M codes.

Critical care and other E/M services may be provided to the same patient on the same date by the same individual.

The following services are included in reporting critical care when performed during the critical period by the physician(s) providing critical care: the interpretation of cardiac output measurements (93561, 93562), chest x-rays (71010, 71015, 71020), pulse oximetry (94760, 94761, 94762), blood gases, and information data stored in computers (e.g., ECGs, blood pressures, hematologic data (99090)); gastric intubation (43752, 43753); temporary transcutaneous pacing (92953); ventilatory management (94002–94004, 94660, 94662); and vascular access procedures (36000, 36410, 36415, 36591, 36600). Any services performed which are not listed above should be reported separately when performed in conjunction with critical services reported with code 99291–99292.

The critical care codes 99291 and 99292 are used to report the total duration of time spent in provision of critical care services to a critically ill or critically injured patient, even if the time spent providing care on that date is not continuous. For any given period of time spent providing critical care services, the individual must devote his or her full attention to the patient and, therefore, cannot provide services to any other patient during the same period of time.

X. NURSING FACILITY SERVICES (99304–99318)

Codes 99304–99318 are used to report evaluation and management services to patients in nursing facilities (skilled nursing facilities (SNFs)) intermediate care facilities (ICFs), or long-term care facilities (LTCFs).

These codes should also be used to report evaluation and management services provided to a patient in a psychiatric residential treatment center (a facility or a distinct part of a facility for psychiatric care, which provides a 24-hour therapeutically planned and professionally staffed group living and learning environment). If procedures such as a medical psychotherapy are provided in addition to evaluation and management services, these should be reported in addition to the evaluation and management services provided.

XI. DOMICILIARY, REST HOME (E.G., BOARDING HOME), OR CUSTODIAL CARE SERVICES (99324–99340)

The evaluation and management codes are used to report evaluation and management services in a facility that provides room, board, and other personal assistance services generally on a long-term basis. They also are used to report evaluation and management services in an assisted living facility.

XII. HOME SERVICES (99341–99350)

Services and care provided in a private residence are coded from this subcategory.

XIII. PROLONGED SERVICES (99354–99359, 99415–99416)

Codes 99354–99357 are used when a physician or other qualified health care professional provides prolonged service involving direct patient contact that is provided beyond the usual service in either the inpatient or outpatient setting. Codes 99358–99359 are used when a physician or other qualified health care professional provides prolonged service for patient management where face-to-face services have or will occur on another date of service.

Codes 99415–99416 are used when a physician or other qualified health care professional provides prolonged service involving direct patient contact that is provided beyond the usual service in either an office or outpatient setting.

XIV. PHYSICIAN STANDBY SERVICES (99360)

Code 99360 is used to report physician or other qualified health care professional standby service that is requested by another individual and that involves prolonged attendance without direct (face-to-face) patient contact. Care or services may not be provided to other patients during this period. This code is not used to report time spent proctoring another individual. It is also not used if the period of standby ends with the performance of a procedure subject to a “surgical” package by the individual who was on standby.

XV. CASE MANAGEMENT SERVICES (99363–99368)

Case management is a process in which a physician or other qualified health care professional is responsible for direct care of a patient, and, additionally, for coordinating, managing access to, initiating, and/or supervising other health care services needed by the patient.

Mississippi guideline: Use Mississippi-specific code 9936M for a conference with workers' compensation medical case manager/claims manager.

XVI. CARE PLAN OVERSIGHT SERVICES (99339–99340, 99374–99380)

Care plan oversight services are reported separately from codes for office/outpatient, hospital, home, nursing facility, domiciliary, or non-face-to-face services. The complexity and the approximate time of the care plan oversight services provided within a thirty (30) day period determine code selection.

Only one individual may report care plan oversight services for a given period of time, to reflect the sole or predominant supervisory role with a particular patient. These codes should not be used for supervision of patients in nursing facilities or under the care of home health agencies unless they require recurrent supervision of therapy.

XVII. SPECIAL EVALUATION AND MANAGEMENT SERVICES (99450–99456)

These codes are used to report evaluations performed to establish baseline information prior to life or disability insurance certificates being issued.

XVIII. OTHER EVALUATION AND MANAGEMENT SERVICES (99499)

This is an unlisted code to report E/M services not specifically defined in the CPT book.

XIX. PRACTICE OF TELEMEDICINE

- A. Telemedicine is the practice of medicine using electronic communication, information technology, or other means between a physician in one location and a patient in another location with or without intervening health care provider. This does not include the practice of medicine through postal or courier services.
- B. Teleemergency medicine is a unique combination of telemedicine and the collaborative/consultative role of a physician, board certified in emergency medicine and an appropriate skilled health professional.
- C. The practice of medicine is deemed to occur in the location of the patient. Therefore, only physicians holding a valid Mississippi license are allowed to practice telemedicine in Mississippi. However, a valid Mississippi license is not required where the evaluation, treatment, and/or medicine given to be rendered by a physician outside of Mississippi is requested by a physician duly licensed to practice medicine in Mississippi, and the physician who has requested such evaluation, treatment and/or medical opinion has already established a doctor/patient relationship with the patient to be evaluated and/or treated.

XX. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used with E/M procedures are as follows:

24 Unrelated Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period

The physician or other qualified health care professional may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E/M service.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

57 Decision for Surgery

An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

Anesthesia

I. INTRODUCTION

The 2016 American Society of Anesthesiologists' (ASA) *Relative Value Guide*® is recognized as an appropriate assessment of current relative values for specific anesthesiology procedures. It is the basis for the assigned base units for CPT® codes in the Anesthesia section of the Fee Schedule.

The conversion factor for anesthesia services only has been designated at \$50.00 per unit.

Total anesthesia value is defined in the following formula:

$$(\text{Base units} + \text{time units} + \text{modifying units}) \times \text{conversion factor} = \text{reimbursement}$$

II. BASE UNITS

Base units are listed for most procedures. This value is determined by the complexity of the service and includes all usual anesthesia services except the time actively spent in anesthesia care and the modifying factors. The base units include preoperative and postoperative visits, the administration of fluids and/or blood incident to the anesthesia care, and interpretation of non-invasive monitoring (ECG, temperature, blood pressure, oximetry, and other usual monitoring procedures). The basic anesthesia unit includes the routine follow-up care and observation (including recovery room observation and monitoring). When multiple surgical procedures are performed during the same period of anesthesia, only the highest base unit allowance of the various surgical procedures will be used.

III. TIME UNITS

Anesthesia time begins when the anesthesiologist starts the preparation of the patient for anesthesia in the preoperative area, the operating room or a similar area, and ends when the injured employee is placed under postoperative care, such as transfer to the recovery room.

The anesthesia time units will be calculated in 15-minute intervals, or portions thereof, equaling one (1) time unit. No additional time units are allowed for recovery room time and monitoring.

IV. SPECIAL CIRCUMSTANCES

- A. **Physical Status Modifiers.** Physical status modifiers are represented by the initial letter P followed by a single digit from one (1) to six (6) defined below:

Status	Description	Base Units
P1	A normal healthy patient	0
P2	A patient with mild systemic disease	0
P3	A patient with severe systemic disease	1
P4	A patient with severe systemic disease that is a constant threat to life	2
P5	A moribund patient who is not expected to survive without the operation	3
P6	A patient declared brain-dead whose organs are being removed for donor purposes	0

The above six levels are consistent with the American Society of Anesthesiologists' (ASA) ranking of patient physical status. Physical status is included in the CPT book to distinguish between various levels of complexity of the anesthesia service provided. Documentation submitted with the billing must include the indicators that justify physical status for P3, P4, and P5.

B. Qualifying Circumstances

1. Many anesthesia services are provided under particularly difficult circumstances, depending on factors such as extraordinary condition of patient, notable operative condition, and/or unusual risk factors. These procedures would not be reported alone but would be reported as additional procedure numbers qualifying an anesthesia procedure or service.

CPT	Description	Units
99100	Anesthesia for patient of extreme age, younger than 1 year and older than 70 (List separately in addition to code for primary anesthesia procedure)	1
99116	Anesthesia complicated by utilization of total body hypothermia (List separately in addition to code for primary anesthesia procedure)	5
99135	Anesthesia complicated by utilization of controlled hypotension (List separately in addition to code for primary anesthesia procedure) <i>Mississippi guideline: Documentation must include maintaining BP at 100 for one hour or more.</i>	5
99140	Anesthesia complicated by emergency conditions (specify) (List separately in addition to code for primary anesthesia procedure)	2

2. Payers must utilize their medical consultants when there is a question regarding modifiers and/or special circumstances for anesthesia charges.

V. MONITORED ANESTHESIA CARE

Monitored anesthesia care occurs when the attending physician requests that an anesthesiologist be present during a procedure. This may be to ensure compliance with accepted procedures of the facility. Monitored anesthesia care includes pre-anesthesia exam and evaluation of the patient. The anesthesiologist must participate or provide medical direction for the plan of care. The anesthesiologist, resident, or nurse anesthetist must be in continuous physical presence and provide diagnosis and treatment of emergencies. This will also include non-invasive monitoring of cardiocirculatory and respiratory systems with administration of oxygen and/or intravenous administration of medications. Reimbursement will be the same as if general anesthesia had been administered (time units + base units).

VI. REIMBURSEMENT FOR ANESTHESIA SERVICES

A. **Criteria for Reimbursement.** Anesthesia services may be billed for any one of the three following circumstances:

1. An anesthesiologist provides total and individual anesthesia service.
2. An anesthesiologist directs a Certified Registered Nurse Anesthetist (CRNA).
3. Anesthesia provided by a CRNA working independent of an anesthesiologist's supervision is covered under the following conditions:
 - a. The service falls within the CRNA's scope of practice and scope of license as defined by law.
 - b. The service is supervised by a licensed health care provider who has prescriptive authority in accordance with the clinical privileges individually granted by the hospital or other health care organization.

B. Reimbursement

1. The maximum reimbursement allowance (MRA) for anesthesia is calculated by adding the base unit value, the number of time units, any applicable modifier and/or unusual circumstances units, and multiplying the sum by a dollar amount (conversion factor) allowed per unit.

2. Reimbursement includes the usual pre- and postoperative visits, the care by the anesthesiologist during surgery, the administration of fluids and/or blood, and the usual monitoring services. Unusual forms of monitoring, such as central venous, intra-arterial, and Swan-Ganz monitoring, may be reimbursed separately.
3. When an unlisted service or procedure is provided, the value should be substantiated with a report. Unlisted services are identified in this Fee Schedule as by report (BR).
4. When it is necessary to have a second anesthesiologist, the necessity should be substantiated by report. The second anesthesiologist will receive five base units + time units (calculation of total anesthesia value).
5. Payment for covered anesthesia services is as follows:
 - a. When the anesthesiologist provides an anesthesia service directly, payment will be made in accordance with the Billing and Reimbursement Rules of this Fee Schedule.
 - b. When an anesthesiologist provides medical direction to the CRNA providing the anesthesia service, then the reimbursement will be divided between the two providers (anesthesiologist and CRNA) at fifty percent (50%).
 - c. When the CRNA provides the anesthesia service directly, then payment will be the lesser of the billed charge or eighty percent (80%) of the maximum allowable listed in the Fee Schedule for that procedure.
6. Anesthesiologists and CRNAs must bill their services with the appropriate modifiers to indicate which one provided the service. Bills NOT properly coded may cause a delay or error in reimbursement by the payer. Application of the appropriate modifier to the bill for service is the responsibility of the provider, regardless of the place of service. Modifiers are as follows:
 - AA Anesthesia services performed personally by anesthesiologist
 - AD Medical supervision by a physician: more than 4 concurrent anesthesia procedures
 - QK Medical direction of 2, 3, or 4 concurrent anesthesia procedures involving qualified individuals
 - QX Qualified non-physician anesthetist with medical direction by a physician
 - QY Medical direction of one qualified non-physician anesthetist by an anesthesiologist
 - QZ CRNA service without medical direction by a physician

VII. ANESTHESIA MODIFIERS

All anesthesia services are reported by using the anesthesia five-digit procedure codes. The basic value for most procedures may be modified under certain circumstances as listed below. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed in the appropriate field of the CMS-1500 or electronic format 837p. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in anesthesia are as follows:

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred and twenty percent (120%) of the maximum reimbursement allowance.

23 Unusual Anesthesia

Occasionally, a procedure, which usually requires either no anesthesia or local anesthesia, because of unusual circumstances must be done under general anesthesia. This circumstance may be reported by adding modifier 23 to the procedure code of the basic service.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

53 Discontinued Procedure

Under certain circumstances the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is

not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

59 Distinct Procedural Service

Under certain circumstances, the physician may need to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

AA Anesthesia Services Performed Personally by Anesthesiologist (HCPCS Modifier)

Report modifier AA when the anesthesia services are personally performed by an anesthesiologist.

AD Medical Supervision by a Physician: More Than 4 Concurrent Anesthesia Procedures (HCPCS Modifier)

Report modifier AD when the anesthesiologist supervises more than 4 concurrent anesthesia procedures.

QK Medical Direction of 2, 3, or 4 Concurrent Anesthesia Procedures Involving Qualified Individuals (HCPCS Modifier)

Report modifier QK when the anesthesiologist supervises 2, 3, or 4 concurrent anesthesia procedures involving qualified individuals.

QX Qualified Non-Physician Anesthetist with Medical Direction by a Physician (HCPCS Modifier)

Regional or general anesthesia provided by a qualified non-physician anesthetist with medical direction by a physician may be reported by adding modifier QX.

QY Medical Direction of One Qualified Non-Physician Anesthetist by an Anesthesiologist (HCPCS Modifier)

Report modifier QY when the anesthesiologist supervises one qualified non-physician anesthetist.

QZ CRNA Service without Medical Direction by a Physician (HCPCS Modifier)

Regional or general anesthesia provided by the CRNA (certified registered nurse anesthetist) or AA (anesthesiologist assistant) without medical direction by a physician may be reported by adding modifier QZ.

Pain Management

I. INTRODUCTION

In addition to the General Rules, this section provides specific rules for Pain Management services. NCCI edits or other bundle/unbundle edits do not apply to the CPT codes in the Pain Management section, other than the stated rules provided in this section.

1. Providers must restrict treatment to indications recognized by established medical practice and adequately supported by the relevant medical literature.
2. Providers must demonstrate more objectively the effectiveness of previously provided treatment in order to repeat or continue it. This includes the use of pain diagrams and numerical pain scores where appropriate.
3. Payers/URs must approve or deny treatment within the rules provided by the IPM portion of the Fee Schedule, and not involve extraneous outside guidelines.
4. Any UR personnel involved in the denial of care must cite the specific section of the IPM Fee Schedule used as a basis for that denial. Failure to do so will result in automatic adjudication in favor of the provider.

II. REIMBURSEMENT FOR PAIN MANAGEMENT SERVICES

- A. **Use of Fluoroscopy.** Reimbursement for the use of fluoroscopy (CPT® codes 77002 and 77003) is based on the Fee Schedule, regardless of the number of procedures performed, and may only be billed once per date of service.

CPT code 77002 is to be used for fluoroscopic guidance for needle placement for CPT code 64510 Cervical (stellate ganglion) sympathetic block, or CPT code 64520 Thoracic or lumbar blocks.

CPT code 77003 is to be used for fluoroscopic guidance and localization of needle or catheter tip for spine or paraspinal diagnostic or therapeutic injection procedures (e.g., cervical epidural or sacroiliac joint), and including facet nerve neurolytic agent destruction.

All procedures performed fluoroscopically **MUST** have stored images (hard copy or digital) showing final needle placement in at least two (2) views (typically PA, lateral or oblique) demonstrating final needle placement AND disbursement of contrast (when not contraindicated). These images must be available upon request (with appropriate HIPAA compliance) by payers, or reimbursement may be denied. As noted in the APC amount columns, there is no reimbursement to the facility for use of fluoroscopy. However, the provider may bill the fluoroscopy and be reimbursed for the service when reporting modifier 26 for the professional component.

B. Reimbursement for Injection/Destruction Procedures

1. Facet injections and medial branch blocks are reimbursed at a maximum of three (3) total anatomic joint levels. Additional level or bilateral modifiers may be used to allow up to a maximum of two (2) additional service levels (but not more) for facet or medial branch blocks in the cervical/thoracic (64491 and 64492) or lumbar (64494 and 64495) for a maximum of three (3) procedure levels reimbursed per treatment session or day. Additional injected site levels, beyond the first three (3), will not be reimbursed. These procedures are unilateral by definition. Bilateral modifiers may be used when nerves are treated bilaterally. Reimbursement of the bilateral modifier is fifty percent (50%) of the base amount for the second or contralateral side.
2. Nerve destructive procedures are only reimbursed for a maximum of two (2) anatomical levels. A higher number of diagnostic injections are allowed because some providers may want to block a larger anatomical level with the initial block to determine what, if any, response is noted to the initial diagnostic injection. This prevents adding further levels during additional diagnostic injections. The likelihood of true three (3) level involvement is exceedingly rare, such that further localization of the involved levels is expected prior to destructive lesioning.
3. Reimbursement for injection/destruction procedure codes is made on the basis of joint levels, not nerves treated (e.g., destruction by neurolytic agent of the L4–L5 facets counts as one (1) level/nerve and should be billed as 64622 (first level/nerve)). There are two nerves supplying each joint but reimbursement is based upon joint(s) treated, not the nerves treated. This applies to CPT codes 64622, 64623 (lumbar), and 64626, 64627 (cervical/thoracic). These procedures are unilateral by definition; therefore, bilateral modifiers may be used when nerves are treated bilaterally. Reimbursement of the bilateral modifier is fifty percent (50%) of the base amount for the second or contralateral side.

4. Multiple Epidural Injections in a Single Treatment Day/Session. In order to obtain reimbursement for more than one epidural injection in a single treatment day/session (either multiple levels or bilateral injections) there must be appropriate documentation in the medical records of a medical condition for which multiple injections would be appropriate. These conditions would include:

- Disc pathology (e.g., protrusion) at one level with a dermatomal pain distribution of an adjacent level (e.g., disc affects the traversing nerve root, such as an L4/5 disc herniation affecting the traversing L5 nerve root).
- Multiple dermatomal nerve root involvement.

A maximum of two (2) levels of transforaminal epidural steroid injections are reimbursable for a given date of service. This applies to codes 64479, 64480, 64483, and 64484.

Reimbursement is still limited to two epidural procedures (either two levels, or one level bilaterally) per date of service.

5. A maximum of one (1) interlaminar epidural steroid injection is reimbursable for a given date of service. This applies to codes 62310 and 62311.
6. A maximum of three (3) facet level procedures are reimbursable for a given date of service. This maximum applies to facet joint injections and nerve blocks, codes 64490–64495. Nerve destruction procedures, codes 64622–64627, are limited to two (2) facet levels (three (3) nerve branches), unilateral and bilateral, per given date of service.
7. If a patient with bilateral pain receives only unilateral treatment on a given date of service, any similar procedures (same CPT codes) performed on the contralateral side within ninety (90) days of the initial procedure will be subject to reimbursement reductions related to modifiers for bilateral treatment on the same date of service. For example, if a person undergoes a right sided medial branch block or neurotomy on a given date of service, any similar procedure on the left side will be subject to the reductions in reimbursement related to use of the bilateral modifier if this treatment is provided within ninety (90) days of the date of service of the right sided procedures. This rule will also apply to facility charges.

- C. **Multiple Procedure Reimbursement.** Only one (1) type of pain management procedure is reimbursable on a given date of service, unless otherwise approved by the payer. This rule does not include multiple level injections or bilateral procedures of the same type, with appropriate modifiers.

“Type” is defined as any procedure code involving an anatomically different structure (e.g., spinal nerve, facet joint, sacroiliac joint, trigger point, etc.). Joints and nerves in different anatomical regions (cervical, thoracic, lumbar, sacral) are considered to be different “types” and are limited to two (2) procedures per given day. Additional level or bilateral injections of a single procedure in the same area are not considered different “types,” and for the purpose of this rule, are considered to be the same “type.” However, the multiple level restrictions, as detailed herein, still apply. Diagnostic injections of more than one type in the same anatomic area on the same date of service are prohibited, and will not be reimbursed without prior authorization. Reimbursement of the multiple procedure modifier (51) is twenty-five percent (25%) of the base amount for the second or additional procedure.

- D. Repeat epidural injections would typically occur two to four (2-4) weeks after the initial treatment, contingent upon some degree of continuing radiating pain. Repeat injections cannot be performed within two (2) weeks of the previous epidural injection.
- E. Sacroiliac arthroscopy (CPT code 73542) assumes the use of a fluoroscope and is considered an integral part of the procedure(s). Therefore, an additional fee for the fluoroscopy (CPT code 77002) is not warranted and will not be reimbursed. This code may only be used once per twelve (12) month period.
- F. Epidurography (CPT code 72275) is no longer reimbursable under this Fee Schedule.
- G. CPT code 62318 includes needle placement, catheter infusion, and subsequent injections. Code 62318 should be used for multiple solutions injected by way of the same catheter, or multiple bolus injections during the initial procedure. The epidural needle or catheter placement is inherent to the procedure, and, therefore, no additional charge for needle or catheter placement is allowed.
- H. In order to be eligible for reimbursement under this Fee Schedule, pain management procedures or services which are specifically governed by the rules in this Pain Management section of the Fee Schedule must be performed by a licensed physician holding either an M.D. or D.O. degree. Pain management procedures specifically governed herein which are performed by any other person, such as a Certified Registered Nurse Anesthetist (CRNA), shall not be reimbursed under this Fee Schedule.
- I. The following procedures must be performed fluoroscopically in order to qualify for reimbursement:
1. Facet injections (64490–64495) (fluoroscopy is included in the procedure code).
 2. Sacroiliac (SI) injections (27096).
 3. Transforaminal epidural steroid injections (64479, 64480, 64483, 64484).
 4. Cervical translaminar/interlaminar epidural injections (62310).

- J. Any analgesia/sedation used in the performance of the procedures in this section is considered integral to the procedure, and will not be separately reimbursed. This rule applies whether or not the person administering the analgesia/sedation is the physician who is performing the pain management injection. Administration of analgesia/sedation by a different person from the physician performing the injection, including an RN, PA, CRNA, or MD/DO, does not allow for separate billing of analgesia/sedation.
- K. Anatomical descriptions of the procedures performed must accompany the bill for service in order for reimbursement to be made. These descriptions must include landmarks used in determining needle positioning, needles used, and the type and quantity of drugs injected. Unless there is a contraindication to contrast media (e.g., documented allergy) it is expected that contrast injection AND a written description of the contrast spread pattern be included in the procedure report. Generic descriptions such as "the procedure was performed in the usual fashion," "the needle was placed on (next to, by, etc.) the nerve/joint/target," "the needle was placed in the correct anatomical location," or similar wording, which was templated or otherwise lacking an actual detailed anatomical description of needle placement or contrast pattern (where appropriate), is inadequate and subsequent cause for denial of payment. Tolerance to the procedure, and side effects or lack thereof should be included in this documentation.
- L. **Radiographic Codes in Pain Management.**
 - Fluoroscopic imaging is reported with codes 77002 and 77003
 - Codes 72020–72220 which apply to radiographic examination of the spine are not reimbursed concurrent with the pain management procedures in this section or with fluoroscopy services
 - Code 27096 is not separately reimbursed with facet or sacroiliac joint injections
- M. When a joint injection is performed at the end of a surgical procedure for pain control, whether done by the surgeon or by anesthesia, reimbursement is allowed according to the Multiple Procedure rule. This rule applies to facility reimbursement as well as provider reimbursement.
- N. Reimbursement of the bilateral modifier is twenty-five percent (25%) of the base amount for the second or contralateral side.

III. REIMBURSEMENT FOR REFILL OF PAIN PUMPS

- A. **Code 95990.** This CPT code, which applies to refilling and maintenance of an implantable pump or reservoir for drug delivery spinal (intrathecal, epidural) or brain (intraventricular), is reimbursed at the specified MRA listed in the Medicine section of the Fee Schedule.
- B. **Evaluation and Management Services.** Refilling and maintenance of implantable pump or reservoir for pain management drug delivery is a global service. An evaluation and management service is not paid additionally unless significant additional or other cognitive services are provided and documented. To report a significant, separately identifiable evaluation and management service, append modifier 25 to the appropriate evaluation and management code. Documentation is required and payment will be allowed if supported by the documentation.
- C. **Drugs.** Those drugs used in the refill of the pain pump shall be reimbursed in accordance with the Pharmacy Rules contained in the Pharmacy Rules section of this Fee Schedule.
- D. **Compounding Fee.** If the drugs used in the refill of the pain pump must be compounded, the compounding service shall be reimbursed at \$157.44 per individual refill. Report the compounding service with code S9430, Pharmacy compounding and dispensing services.
- E. Non-FDA-approved drugs for intra-thecal use will NOT be reimbursed.
- F. **Intrathecal Drug Delivery.** This method of delivery is not generally recommended and requires prior authorization. Due to conflicting studies in this population and complication rate for long-term use, it may be considered only in very rare occasions when dystonia and spasticity are dominant features or when pain is not able to be managed using any other non-operative treatment. Specific brands of infusion systems have been FDA approved for the following: chronic intraspinal (epidural and intrathecal) infusion of preservative-free morphine sulfate sterile solution in the treatment of chronic intractable pain, chronic infusion of preservative-free ziconotide sterile solution for the management of severe chronic pain, and chronic intrathecal infusion of baclofen for the management of severe spasticity.
 1. Description: This mode of therapy delivers small doses of medications directly into the cerebrospinal fluid.
 2. Complications: Intrathecal delivery is associated with significant complications, such as infection, catheter disconnects, CSF leak, arachnoiditis, pump failure, nerve injury, and paralysis. Typical adverse events reported with opioids (i.e., respiratory depression, tolerance, and dependence), or spinal catheter-tip granulomas that might arise during intrathecal morphine or hydromorphone treatment have not currently been recorded for ziconotide.
 3. Indications: Clinical studies are conflicting, regarding long-term, effective pain relief in patients with non-malignant pain. The Division does not generally recommend the use of intrathecal drug delivery systems in injured workers with chronic pain. Due to the complication rate for long-term use, it may be considered only in very rare occasions

when dystonia and spasticity are dominant features or when pain is not able to be managed using any other non-operative treatment. This treatment must be prior authorized and have the recommendation of at least one physician experienced in chronic pain management in consultation with the primary treating physician. The procedure should be performed by physicians with documented experience. This small eligible sub-group of patients must meet all of the following indications:

- a. A diagnosis of a specific physical condition known to be chronically painful has been made on the basis of objective findings;
 - b. All reasonable surgical and non-surgical treatment has been exhausted including failure of conservative therapy including active and/or passive therapy, medication management, or therapeutic injections;
 - c. Pre-trial psychiatric or psychological evaluation has been performed (as for SCS) and has demonstrated motivation and long-term commitment without issues of secondary gain. Significant personality disorders must be taken into account when considering a patient for spinal cord stimulation and other major procedures;
 - d. There is no evidence of current addictive behavior. (Tolerance and dependence to opioid analgesics are not addictive behaviors and do not preclude implantation); and
 - e. A successful trial of continuous infusion by a percutaneous spinal infusion pump for a minimum of twenty-four (24) hours. A screening test is considered successful if the patient (a) experiences a fifty percent (50%) decrease in pain, which may be confirmed by VAS, and (b) demonstrates objective functional gains or decreased utilization of pain medications. Functional gains should be evaluated by an occupational therapist and/or physical therapist prior to and before discontinuation of the trial.
4. Contraindications: Infection, body size insufficient to support the size and weight of the implanted device. Patients with other implanted programmable devices should be given these pumps with caution since interference between devices may cause unintended changes in infusion rates.

IV. DIAGNOSTIC INJECTIONS AND PROCEDURES

- A. Valid diagnostic injections require an appropriately alert patient capable of adequately determining the amount or level of pain relieved or produced by the procedure. This requires judicious use of sedatives in the performance of such procedures. Additional analgesic medications such as intravenous narcotics are to be avoided during the procedure and evaluation phase of testing, as these medications can affect the validity of such diagnostic tests. The results of the tests and drugs used during the injection or procedure must be part of the medical records, and available for review by the payer. Failure to document the patient's response to a diagnostic procedure or injection, and the level of alertness following the procedure or injection, could result in denial of reimbursement. Affected diagnostic procedures include but are not limited to discography and medial branch blocks.
- B. Diagnostic injections with local anesthetics require documentation of analgesic response through any validated pain measurement test (e.g., numerical pain scale, visual analogue scale). This should be performed in the treatment facility after the procedure during the time that there would be an expected analgesic response (every thirty (30) minutes for at least one (1) hour). This must be documented and the documentation must be available to the payer for review. Subsequent pain scores must be documented at least hourly for two (2) additional hours after the procedure. If the patient's pre-procedure pain was determined by provocative exam tests or maneuvers, these should be repeated during the evaluation period following the procedure, to differentiate analgesia related to the procedure from positional analgesia, such as, that which may be provided by lying in a recovery bed.
- C. **Radiofrequency Medial Branch Neurotomy/Facet Rhizotomy.** This procedure is allowed one (1) time in twelve (12) months not to exceed three (3) levels. The patient should receive at least six months minimum improvement in order to qualify for repeat procedure with no more than two (2) in the first year and one (1) per year thereafter.
- D. Other injections with both therapeutic and potentially diagnostic benefit, such as selective nerve root or peripheral nerve blocks or therapeutic facet injections, would ideally be performed with minimal sedation and avoidance of intravenous narcotics. However, as these injections also have potential therapeutic benefit, this is not a requirement for reimbursement.

V. THERAPEUTIC SERVICES

In the pain management setting, no more than two (2) modalities and/or procedures may be used on a date of service (e.g., heat/cold, ultrasound, diathermy, iontophoresis, TENS, electrical stimulation, muscle stimulation, etc.). Multiple modalities should be performed sequentially. Only one (1) modality can be reported for concurrently performed procedures.

VI. GENERAL RULES

- A. **Epidural Injections.** This Fee Schedule does not recognize a "series" of epidural injections, regardless of number. A trial of epidural injections is permitted provided there is appropriate documentation of a recognized indication for this procedure. Only a single injection can be approved unless there is documentation of analgesic response consistent

with response to the injection. Further injections require a positive analgesic response in order to be repeated. For the first injection, the initial analgesic response may be temporary. However, after the second injection, there must be a residual and progressive analgesic benefit in order to perform a third injection. Documentation of a positive patient response will be required to continue epidural treatment. If there is no documented residual pain relief after two (2) injections, no further epidural injections will be considered medically necessary.

1. Repeat injections (up to two (2) additional injections, for a total of three (3) per twelve (12) month period), however, do NOT require prior approval as long as the appropriate responses are properly documented.
 2. Utilization management or review decisions shall not be based solely on the application of clinical guidelines, but must include review of clinical information submitted by the provider and represent an individualized determination based on the worker's current condition and the concept of medical necessity predicated on objective or appropriate subjective improvements in the patient's clinical status.
- B. Reimbursement will be limited to three (3) epidural pain injections in a twelve (12) month period unless the payer gives prior approval for more than three (3) such injections. Separate billing for the drug injected is not appropriate and will not be reimbursed.
- C. Interlaminar epidural injections are seldom used for diagnostic purposes because the generalized regional spread of local anesthetic with spinal injection makes it impractical if not impossible to selectively block a specific nerve.
1. To be reimbursed, both cervical and interlaminar epidural steroid injections must be performed fluoroscopically, typically with contrast injection, unless there is a documented contrast allergy. The fluoroscopic guidance requirement for lumbar interlaminar epidural injections represents a change from previous Fee Schedules, and is now required to reflect a growing national trend of use of fluoroscopy with all epidural injections. The technical failure rate of non-fluoroscopic ("blind") epidural injections is documented to be as high as twenty-five percent (25%), and considering the benefit of interlaminar epidural injections for radicular pain is suspect at best, there is now the requirement for fluoroscopy with all epidural steroid injections.

Epidural blood patches do not require fluoroscopic guidance, though this is preferred.

The specific cause of radiating pain may not always be obvious on imaging, such as MRI, CT or x-rays. Therefore, the indications for a trial of epidural steroid injections are based on the patient's clinical presentation, not imaging.

All nerve root pain or radiating pain is not caused by damage (nerve or axon loss) to the nerve or dorsal root ganglion. When there is only inflammation or irritation of the nerve, there may be radiating pain in the absence of physical exam findings of nerve damage such as altered or absent motor, sensory, or reflex function. In fact, actual nerve damage is not treated by steroid injections, as the latter does not accelerate the regeneration of new nerve (axon) regeneration. Therefore, EMG/NCV testing demonstrating nerve or axon loss is not necessary as an indication for a trial of epidural steroid injections.

A trial of epidural steroids injections may be indicated when there is radiating pain (extremity or buttock) with or without co-existing back pain.

In order to repeat an epidural injection, there must have been a positive analgesic response (pain improvement or functional improvement) to the previous injection. For the first injection, this relief may be temporary, but cannot be attributed solely to a local anesthetic effect or intra-procedural sedation (i.e., relief for the first few hours after injection). Additionally, in order to repeat an epidural injection, there must be continued radiating pain, and not only residual axial (back/neck) pain. After a second epidural injection, there must be some degree of *residual/durable* relief of the radiating component of pain that has persisted to the time of the patient's follow up visit.

2. **Initiation and Continuation of Epidural Injections.** It is necessary to obtain prior approval by the payer or appropriate utilization reviewer before initiating a trial of epidural injections. It is NOT necessary to obtain prior approval to repeat an injection as long as it is performed according to the rules outlined above. If the appropriate rules are followed, denial of reimbursement for repeated procedures will result in automatic adjudication favorable to the provider and may result in appropriate penalties and/or fines to the payer.

There will be a maximum of three (3) epidural injections per anatomical (cervical/thoracic/lumbar) area allowed within a given one (1) year time period. There may be times when additional injections are indicated (re-injury, intervening surgery, etc.), but this is subject to prior approval by the payer, who has the sole authority to allow more than three (3) injections per one (1) year period.

Repeat trials of epidural injections may be considered after one (1) year if the preceding trial provided several months of demonstrable benefit. In order to be considered effective, this benefit must include greater than thirty percent (30%) improvement in pain scores, and documentation of either 1) significant reduction of daily narcotic consumption, defined as a sustained reduction (several months) of at least thirty percent (30%) of the daily narcotic use prior to initiation of the trial of epidural injections, or 2) ability to work for a sustained period of time (several months) at least at sedentary work level or the work level as determined by a valid Functional Capacity Rating (FCE). Also, no patient can be considered for a repeat trial of epidural steroid injections, if after the preceding trial (in a similar anatomical area) they are unable to reduce narcotic consumption to less than 100 mg morphine equivalent per day.

If, after an initial trial of epidural injections, it is suspected that there is a new nerve injury involving a different anatomical nerve, a trial of epidural injections may be indicated independent of the response to the initial trial of epidural injections. However, as this would represent a separate nerve injury, causation would have to be established prior to initiation of further treatment related to a work injury.

3. **Documentation Requirements for Epidural Injections (Adopted and Adapted from CMS MLN Matters #SE1102 rev).** Documentation in the medical record must contain the initial evaluation including history and physical examination; diagnosis, pain, and disability of moderate to severe degree; site of injection with name and dosage of drug instilled; and the patient's response to the prior injections.
 - a. Documentation of conservative therapies that were tried and failed except in acute situations such as acute disc herniation with disabling and debilitating pain, reflex sympathetic dystrophy, postoperative and obstetric pain and intractable pain secondary to carcinoma.
 - b. All documentation must be maintained in the patient's medical record and available to the payer upon request.
 - c. The record must be legible and include appropriate patient identification information (e.g., complete name, dates of service(s)). The record must include the physician responsible for and providing the care of the patient.
 - d. The submitted medical record should support the use of the selected ICD-10-CM code(s). The submitted CPT/HCP/PCS code should describe the service performed.
 - e. The patient's record should document an appropriate history and physical examination by the provider or provider's representative specifying the medical indications requiring his/her presence when applicable. The indications should be recorded by the provider performing the injection in their respective notes.

- D. **Facet Injections.** Intra-articular joint injections (cervical, thoracic, lumbar), which can have both diagnostic and therapeutic indications, should always be considered primarily therapeutic.

The number of facet injections subject to reimbursement is limited to four (4) dates of service with a maximum of two (2) therapeutic and two (2) diagnostic injections for the initial twelve (12) month period of treatment per anatomical region. This allows for a total of four (4) dates of service, regardless of the number of levels treated, which levels are treated, or which side (left or right or bilateral) is treated, in the same anatomical region. If treatment for facet-related pain continues past twelve (12) months, further injections are limited to a total of two (2) dates of service per twelve (12) month period. Facet injections in different anatomical areas are not subject to the above limits, as each different anatomical area would be subject to its own separate limit as described above. Nerve-destructive procedures (e.g. radiofrequency facet nerve neurotomy, codes 64622, 64623, 64626, 64627) do not count as an additional therapeutic procedure for the purpose of this rule.

A "different anatomical area" refers to the lumbar, thoracic, and cervical areas. Injections within the lumbar spine, for example, are considered to be within the same anatomical area regardless of the actual lumbar joint/nerve level, or which side (right or left), is treated, and all limits would apply in this anatomical area. The same rule applies to the thoracic and cervical anatomical areas, regardless of the level or laterality treated within the same anatomical area.

In order to be a "successful" ("positive") diagnostic facet procedure (either intra-articular or medial branch block(s)), the patient must experience at least seventy-five percent (75%) relief of the index pain (pain being treated by the procedure). Additionally, this index pain must be at least fifty percent (50%) of the patient's total pain.

Facet nerve (medial branch ablation) for cervical, thoracic or lumbar nerves will only be reimbursed once per seven (7) month period. Repeat (medial branch) ablation is contingent upon documentation of at least six (6) month's measurable (greater than thirty percent (30%) improvement in pain scores, and documentation of either 1) reduction of daily narcotic consumption of at least thirty percent (30%) from the daily use noted prior to the procedure, or 2) ability to work at least at a sedentary work level or work level as determined by a valid Functional Capacity Evaluation (FCE). Also, no patient can be considered for a repeat neuroablative procedure (e.g., neurotomy) if after the preceding neuroablative procedure (at similar anatomical levels) they are unable to reduce narcotic consumption to less than 100 mg morphine equivalent per day.

In order to perform a repeat therapeutic facet joint injection (cervical, thoracic, or lumbar; codes 64490–64495), there must be documentation of a significant analgesic response that persists for at least four (4) weeks. This relief must be at least fifty percent (50%) of the pain in the specific anatomical area targeted by the injection, and there must be documentation of a durable (also four (4) weeks) measurable improvement in the range of motion, or documentation of normal motion, of the involved joint area being treated.

- E. **Trigger Point Injections.** Trigger point injection is considered one (1) procedure and is reimbursed as such regardless of the number of injection sites. Billing for multiple injections, and multiple regions, falls under the same one-procedure rule. Two codes are available for reporting trigger point injections: use 20552 for injection(s) of single or multiple trigger point(s) in one or two muscles, or 20553 when three or more muscles are involved. When billing for multiple injections, and multiple regions, only code 20552 OR 20553 is allowed per date of service.

The goal is to treat the cause of pain, not just the symptoms. With this intent, in order to be repeated in the same muscle group, there must be at least a fifty percent (50%) persistent benefit from the previous injection. For patients

not in therapy, trigger point injections can be performed monthly, as long as there is a documented fifty percent (50%) residual benefit, and progressive relief (pain intensity and duration of relief) with the preceding injection. After six months, if similar pain persists, the patient should be re-evaluated regarding the etiology of the complaint, and the available treatment options reconsidered. The payer may consider payment for additional trigger point injections upon review.

- F. **Soft Tissue Injections.** “Myofascial, myoneural, and trigger point injections” are synonymous and are to be reimbursed with code 20552 or 20553. Modifiers for additional injections are not allowed with these codes. Reimbursement will be made for 20552 or 20553 but not both on the same date.

Codes 20550 and 20551 are used for the injections of tendon origins and are not to be used for “myofascial, myoneural or trigger point” injections. Failure to observe this rule could result in denial of service on retrospective review and/or request for reimbursement.

Code 20612 is to be used for the aspirations/injection of a ganglion cyst and not for “myofascial, myoneural, or trigger point” injections. Failure to observe this rule could result in denial of service on retrospective review and/or request for reimbursement.

- G. **Investigational Procedures.** Refer to the General Rules section.

- H. **Sacroiliac (SI) Joint.** Injections of the sacroiliac joint may be used to diagnose the cause of or to treat low back pain.

SI joint injection can be done diagnostically or therapeutically.

Both therapeutic and diagnostic sacroiliac joint injections require the use of image guidance. Injections performed without the use of image guidance, should be billed, and will be reimbursed, as a trigger point injection. CPT code 27096 requires the use of imaging confirmation of intra-articular needle positioning.

Sacroiliac joint injections (code 27096) require documentation of at least a four (4) week durable analgesic benefit of at least fifty percent (50%) pain relief in the anatomical area being targeted by the injection. A maximum of two (2) therapeutic sacroiliac joint injections is allowed per twelve (12) month period. This rule is limited only to the joint injected, and not the contralateral joint (i.e., right or left sided joint).

- I. **Discography.** Discography is a diagnostic test to identify (or rule out) painful intervertebral discs. Discography is appropriate only in patients for whom no other treatment options remain except for possible surgical stabilization (spinal fusion). Discography is then used on these patients to determine which discs, if any, are painful and abnormal, so that a surgical correction (fusion) can be performed. If a patient is not considered to be a candidate for surgery (fusion), then a discogram is not considered medically necessary. Investigational intradiscal therapies such as percutaneous disc decompression (Dekompressor), fluoroscopic, laser, radiofrequency, plasma rich protein (PRP), stem cells and all other therapeutic disc injections or thermal disc therapies are considered investigational and are not reimbursable.

The radiographic interpretation codes 72285 and 72295 can only be used ONCE per treatment session and additional level modifiers are not allowed.

When reporting the radiological supervision and interpretation professional components for discography (72285, 72295), the anatomical localization for needle placement is inclusive with the procedure and code 77003 should not be additionally reported.

Radiographic interpretation codes 72285 and 72295 must include a thorough description of radiographic findings available in a separate report with hard copy radiographs or other media, such as digital, that will allow review of images (AP and lateral at a minimum).

- J. **BOTOX.** BOTOX is not indicated for the relief of musculoskeletal pain, and its use as such is not covered by the Fee Schedule. An exception is made when BOTOX treatment is indicated for spasticity or other indications and requires prior approval.

- K. **Implantation of Spinal Cord Stimulators.**

1. The following conditions must be met for consideration of spinal cord stimulators.

- Patient must have a medical condition for which spinal cord stimulation (SCS) is a recognized and accepted form of treatment.
- There must be a trial stimulation that includes a minimum seven (7) day home trial with the temporary stimulating electrode.
- During the trial stimulation, the patient must report functional improvement, decreased use of medications, and at least fifty percent (50%) pain reduction and some functional gains during the last four (4) days of the stimulation trial.
- Psychological screening must be used to determine if the patient is free from:

- Substance abuse issues
 - Untreated psychiatric conditions
 - Major psychiatric illness that could impair the patient's ability to respond appropriately to the trial stimulation
2. Reimbursement for implantation is limited to a maximum of two (2) leads and a maximum of sixteen (16) electrodes, regardless of the number used.
 3. Neurostimulation
 - a. Description: As of the time of this guideline writing, spinal cord stimulation devices have been FDA approved as an aid in the management of chronic intractable pain of the trunk and/or limbs, including unilateral and bilateral pain associated with the following: failed back surgery syndrome, intractable low back pain and leg pain. There is limited evidence that supports its use for spinal axial pain. SCS may be most effective in patients with CRPS I or II who have not achieved relief with oral medications, rehabilitation therapy, or therapeutic nerve blocks, and in whom the pain has persisted for longer than six (6) months. Surgical procedures should be performed by surgeons, usually with a neurosurgical or spinal background.
 - b. Surgical Indications: Patients with established CRPS I or II or a failed spinal surgery with persistent functionally limiting radicular pain greater than axial pain who have failed conservative therapy including active and/or passive therapy, pre-stimulator trial psychiatric evaluation and treatment, medication management, and therapeutic injections. SCS is not recommended for patients with the major limiting factor of persistent axial spine pain. SCS may be indicated in a subset of patients who have a clear neuropathic radicular pain (radiculitis). The extremity pain should account for at least fifty percent (50%) or greater of the overall back and leg pain experienced by the patient. Prior authorization is required. Patients with severe psychiatric disorders, and issues of secondary gain are not candidates for the procedure.
 - c. A comprehensive psychiatric or psychological evaluation prior to the stimulator trial has been performed. This evaluation should include a standardized detailed personality inventory with validity scales (such as MMPI-2, MMPI-2-RF, or PAI) pain inventory with validity measures (for example, BHI 2, MBMD); clinical interview and complete review of the medical records. Before proceeding to a spinal stimulator trial the evaluation should find the following:
 - No indication of falsifying information, or of invalid response on testing;
 - No primary psychiatric risk factors or "red flags" (e.g., psychosis, active suicidality, severe depression, or addiction). (Note that tolerance and dependence to opioid analgesics are not addictive behaviors and do not preclude implantation);
 - A level of secondary risk factors or "yellow flags" (e.g., moderate depression, job dissatisfaction, dysfunctional pain conditions) judged to be below the threshold for compromising the patient's ability to benefit from neurostimulation;
 - The patient is cognitively capable of understanding and operating the neurostimulation control device;
 - The patient is cognitively capable of understanding and appreciating the risks and benefits of the procedure
 - The patient has demonstrated a history of motivation in and adherence to prescribed treatments.
 - d. The psychologist or psychiatrist performing these evaluations should not be an employee of the physician performing the implantation. This evaluation must be completed, with favorable findings, before the screening trial is scheduled. Significant personality disorders must be taken into account when considering a patient for spinal cord stimulation and other major procedures.
 - e. All reasonable surgical and non-surgical treatment has been exhausted.
 - f. The topography of pain and its underlying pathophysiology are amenable to stimulation coverage (the entire painful extremity area has been covered).
 - g. Successful neurostimulation screening test: For a spinal cord neurostimulation screening test, a temporary lead is implanted at the level of pain and attached to an external source to validate therapy effectiveness. A screening test is considered successful if the patient meets both of the following criteria:
 - Experiences a fifty percent (50%) decrease radicular or CRPS in pain, which may be confirmed by visual analogue scale (VAS) or Numerical Rating Scale (NRS)
 - Demonstrates objective functional gains or decreased utilization of pain medications.
 Objective, measurable, functional gains should be evaluated by an occupational therapist and/or physical therapist and the primary treating physician prior to and before discontinuation of the trial.
 - h. Reimbursement of the bilateral modifier is twenty-five percent (25%) of the base amount for the second or contralateral side.
 - L. All Interventional Pain Management (IPM) procedures must be billed with the appropriate CPT codes and modifiers (where applicable) using accepted ICD-10-CM codes as the indications for the procedures. Providers MUST use acceptable codes in order to initiate or maintain treatment. Failure to do so is cause for denial of treatment until the proper appropriate codes are submitted.

Payers/URs must use the rules of this Fee Schedule to deny requested treatment. Failure to cite the specific section of the IPM portion of the *Mississippi Workers' Compensation Medical Fee Schedule* will result in automatic adjudication for the provider without appeal. "Specific" refers to citing the actual section, and appropriate subsections directly from the guidelines. Failure to have the Fee Schedule available during the review would obviously make such citation unachievable, resulting in automatic adjudication for the provider. **No outside guidelines can be used to deny IPM care requested in accordance with the Fee Schedule.**

M. Topical Drug Delivery

1. **Description:** Topical medications, such as lidocaine and capsaicin, may be an alternative treatment for neuropathic disorders and is an acceptable form of treatment in selected patients.
2. **Indications:** Neuropathic pain for most agents. Episodic use of NSAIDs and salicylates for joint pain. Patient selection must be rigorous to select those patients with the highest probability of compliance. Many patients do not tolerate the side effects for some medication or the need for frequent application.
3. **Dosing and Time to Therapeutic Effect:** All topical agents should be prescribed with strict instructions for application and maximum number of applications per day to obtain the desired benefit and avoid potential toxicity. There is no evidence that topical agents are more or less effective than oral medications. For most patients, the effects of long-term use are unknown and thus may be better used episodically.
4. **Side Effects:** Localized skin reactions may occur, depending on the medication agent used vs. Topical Agents.
 - a. **Capsaicin.** At the time of this guideline writing, formulations of capsaicin have been FDA approved for management of pain associated with post-herpetic neuralgia. Capsaicin offers a safe and effective alternative to systemic NSAID therapy. There is also good evidence that a high dose (8%) capsaicin patch applied for 60 minutes can decrease post herpetic neuralgic pain for three (3) months.
 - b. **Ketamine and Tricyclics.** Topical medications, such as the combination of ketamine and amitriptyline have been proposed as an alternative treatment for neuropathic disorders including CRPS. However, at the time of this guideline writing, neither tricyclic nor ketamine topicals are FDA approved for topical use in neuropathic pain. Continued use of these agents beyond the initial prescription requires documentation of effectiveness, including functional improvement, and/or decreased use of other medications, particularly decreased use of opiates or other habituating medications.
 - c. **Lidocaine.** At the time of this guideline writing, formulations of lidocaine (patch form) have been FDA approved for pain associated with post-herpetic neuralgia.
 - d. **Topical Salicylates and Non-salicylates.** These have been shown to be effective in relieving pain in acute musculoskeletal conditions and single joint osteoarthritis. Topical salicylate and non-salicylates achieve tissue levels that are potentially therapeutic, at least with regard to Cyclooxygenase (COX) inhibition. There is good evidence that diclofenac gel reduces pain and improves function in mild-to-moderate hand osteoarthritis. Diclofenac gel has been FDA approved for acute pain due to minor strains, pains, and contusions; and for relief of pain due to osteoarthritis of the joints amenable to topical treatment, such as those of the knees and hands.
 - e. **Other Compounded Topical Agents.** At the time this guideline was written, no studies identified evidence for the effectiveness of compounded topical agents other than those recommended above. Therefore, other compounded topical agents are not recommended.
5. Prior authorization is required for all agents that have not been recommended above. Continued use requires documentation of effectiveness including functional improvement and/or decrease in other medications.

VII. USE OF CONTROLLED SUBSTANCES

Use of Opioids or Other Controlled Substances for Management of Chronic (Non-Terminal) Pain. It is recognized that optimal or effective treatment for chronic pain may require the use of opioids or other controlled substances. The proper and effective use of opioids or other controlled substances has been specifically addressed by the Mississippi Board of Medical Licensure. Unless otherwise directed by the Commission, reimbursement for prescriptions for opioids or other controlled substances used for the management or treatment of chronic, non-terminal pain shall not be provided under this Fee Schedule unless treatment is sufficiently documented and complies with the Rules and Regulations, as promulgated by the Mississippi State Board of Medical Licensure, and supplemented by the Commission accordingly.

In addition to the specific Rules and Regulations promulgated by the Mississippi State Board of Medical Licensure incorporated herein, the payer may, as in other cases, obtain a second opinion from an appropriate and qualified physician to determine the appropriateness of the treatment being rendered, including but not limited to the appropriateness of the continuing use of opioids or other controlled substances for treatment of the patient's chronic pain. However, any such second opinion shall not be used as the basis for abrupt withdrawal of medication or payment thereof. Nothing in this paragraph shall prohibit a physician from administering narcotic drugs to a person for the purpose of relieving acute withdrawal symptoms when necessary while arrangements are being made for referral or discontinuance of treatment, and the payer shall provide reimbursement in accordance with this Fee Schedule, as follows: not more than one (1) day's medication may be administered to the person or for the person's use at one time. Such emergency treatment may be

carried out for not more than three (3) days. Discontinuance of treatment or reimbursement of prescriptions based on a second opinion obtained hereunder shall be subject to review by the Commission pursuant to the Dispute Resolution Rules set forth in the Dispute Resolution Rules section in this Fee Schedule.

VIII. MODIFIERS

Please see the appropriate section (e.g., Surgery, Radiology) for applicable modifiers.

Surgery

I. GENERAL GUIDELINES

- A. **Global Reimbursement.** The reimbursement allowances for surgical procedures are based on a global reimbursement concept that covers performing the basic service and the normal range of care required after surgery. The State of Mississippi follows the surgical package definition from *CPT®2016*.

- B. **Normal, Uncomplicated Follow-Up (FU) Care.** Normal, uncomplicated follow-up (FU) care for the time periods indicated in the follow-up days (FUD) column for each procedure code. The number in that column establishes the days during which no additional reimbursement is allowed for the usual care provided following surgery, absent complications or unusual circumstances.

The maximum reimbursement allowance (MRA) covers all normal postoperative care, including the removal of sutures by the surgeon or associate. Follow-up days are specified by procedure. Follow-up days listed are for 0, 10, or 90 days and are listed in the Fee Schedule as 000, 010, or 090. Follow-up days may also be listed as:

MMM	indicating that services are for uncomplicated maternity care,
XXX	indicating that the global surgery concept does not apply,
YYY	indicating that the follow-up period is to be set by the payer (used primarily with BR procedures), or
ZZZ	indicating that the code is related to another service and is treated in the global period of the other procedure (used primarily with add-on and exempt from modifier 51 codes).

The day of surgery is day one when counting follow-up days. Hospital discharge day management is considered to be normal, uncomplicated follow-up care.

- C. **Follow-up for Diagnostic Procedures.** When a procedure is done for diagnostic purposes, the follow-up does not include care of the condition itself, only recovery/recovery care for the procedure itself.
- D. **Follow-up Care for Therapeutic Surgical Procedures.** When a procedure is therapeutic in nature, the follow-up care includes routine post-op care and recovery. Any care needed for complications, care needed that is not part of routine post-op recovery, or any care that is not due to the procedure itself, may warrant additional charges.
- E. **Separate Procedures.** Separate procedures are commonly carried out as an integral part of another procedure. They should not be billed in conjunction with the related procedure. These procedures may be billed when performed independently by adding modifier 59 or X{EPSU} to the specific "separate procedure" code.
- F. **Additional Surgical Procedure(s).** When an additional surgical procedure(s) is carried out within the listed period of follow-up care for a previous surgery, the follow-up periods will continue concurrently to their normal terminations.
- G. **Microsurgery, Operating Microscope, and Use of Code 69990.** When an operating microscope is used during an operative procedure, it should be billed with code 69990. Modifier 51 is not reported with this code. This code is not reimbursed for use of corrective vision apparatus or magnifying devices. CPT code 69990 should not be billed with the following codes that include the use of the operating microscope: 15756–15758, 15842, 19364, 19368, 20955–20962, 20969–20973, 22551, 22552, 22856–22861, 26551–26554, 26556, 31526, 31531, 31536, 31541, 31545, 31546, 31561, 31571, 43116, 43180, 43496, 46601, 46607, 49906, 61548, 63075–63078, 64727, 64820–64823, 65091–68850. For purposes of clarification, if microsurgery technique is employed and the primary procedure code is not contained in the aforementioned list, it is appropriate to report 69990 with the primary procedure performed and reimbursement is required for said services. (For example, code 63030 is not included in the aforementioned list and, as such, it is appropriate for providers to report 69990 along with 63030 to describe microsurgical technique.) Reimbursement for 69990 is required provided operative documentation affirms microsurgical technique and not just visualization with magnifying loupes or corrected vision.
- H. **Unique Techniques.** A surgeon is not entitled to an extra fee for a unique technique. It is inappropriate to use modifier 22 unless the procedure is significantly more difficult than indicated by the description of the code.
- I. **Surgical Destruction.** Surgical destruction is part of a surgical procedure, and different methods of destruction (e.g., laser surgery) are not ordinarily listed separately unless the technique substantially alters the standard management of a problem or condition. Exceptions under special circumstances are provided for by separate code numbers.

- J. **Incidental Procedure(s).** An additional charge for an incidental procedure (e.g., incidental appendectomy, incidental scar excisions, puncture of ovarian cysts, simple lysis of adhesions, simple repair of hiatal hernia, etc.) is not customary and does not warrant additional reimbursement.
- K. **Endoscopic Procedures.** When multiple endoscopic procedures are performed by the same practitioner at a single encounter, the major procedure is reimbursed at one hundred percent (100%). If a secondary procedure is performed through the same opening/orifice, fifty percent (50%) is allowable as a multiple procedure. However, diagnostic procedures during the same session and entry site are incidental to the major procedure.
- L. **Biopsy Procedures.** A biopsy of the skin and another surgical procedure performed on the same lesion on the same day must be billed as one procedure.
- M. **Repair of Nerves, Blood Vessels, and Tendons with Wound Repairs.** The repair of nerves, blood vessels, and tendons is usually reported under the appropriate system. Normal wound repair is considered part of the nerve, blood vessel and/or tendon repair. Additional reimbursement for wound repair is only warranted if it is a complex wound, and modifier 59 or X{EPSU} should be used to identify such.
- N. **Suture Removal.** Billing for suture removal by the operating surgeon is not appropriate as this is considered part of the global fee.
- O. **Joint Manipulation Under Anesthesia.** There is no charge for manipulation of a joint under anesthesia when it is preceded or followed by a surgical procedure on that same day by that surgeon. However, when manipulation of a joint is the scheduled procedure and it indicates additional procedures are necessary and appropriate, the lesser of the billed amount or fifty percent (50%) of the MRA for manipulation may be allowed.
- P. **Supplies and Materials.** Supplies and materials provided by the physician (e.g., sterile trays/drugs) over and above those usually included with the office visit may be listed separately using CPT code 99070 or specific HCPCS codes.
- Q. **Aspirations and Injections**
 - 1. Puncture of a cavity or joint for aspiration followed by injection of a therapeutic agent is one procedure and should be billed as such.
 - 2. When joint injections/trigger point injections are performed, ultrasound and/or Doppler guidance is considered integral to the procedure and will not be separately reimbursed.
 - 3. When a joint injection is performed at the end of a surgical procedure for pain control, whether done by the surgeon or by anesthesia, reimbursement is allowed according to the Multiple Procedure Billing rule. This rule applies to facility reimbursement as well as provider reimbursement.
- R. **Surgical Assistant**
 - 1. Physician Surgical Assistant — For the purpose of reimbursement, a physician who assists at surgery is reimbursed as a surgical assistant. Assistant surgeons should use modifier 80 and are allowed the lesser of the billed amount or twenty percent (20%) of the maximum reimbursement allowance (MRA) for the procedure(s).
 - 2. Registered Nurse Surgical Assistant or Physician Assistant
 - a. A physician assistant, or registered nurse who has completed an approved first assistant training course, may be allowed a fee when assisting a surgeon in the operating room (O.R.).
 - b. The maximum reimbursement allowance for the physician assistant or the registered nurse first assistant (RNFA) is ten percent (10%) of the surgeon's fee for the procedure(s) performed.
 - c. Under no circumstances will a fee be allowed for an assistant surgeon and a physician assistant or RNFA at the same surgical encounter.
 - d. Registered nurses on staff in the O.R. of a hospital, clinic, or outpatient surgery center do not qualify for reimbursement as an RNFA.
 - e. CPT codes with modifier AS or modifier 81 should be used to bill for physician assistant or RNFA services on a CMS-1500 form or electronic claim and should be submitted with the charge for the surgeon's services.
 - 3. The Fee Schedule includes a column indicating which procedures are approved for assistant services with Y (yes) or N (no). If a surgical procedure is approved/precertified for a code with a Y in the "Assist Surg" column, the assistant is implied and does not require separate approval/precertification for reimbursement.
- S. **Operative Reports.** An operative report must be submitted to the payer before reimbursement can be made for the surgeon's or assistant surgeon's services, and should document the use of assistant services.
- T. **Needle Procedures.** Needle procedures (lumbar puncture, thoracentesis, jugular or femoral taps, etc.) should be billed in addition to the medical care on the same day.

- U. **Therapeutic Procedures.** Therapeutic procedures (injecting into cavities, nerve blocks, etc.) (CPT codes 20526–20610, 64400–64450) may be billed in addition to the medical care for a new patient. (Use appropriate level of service plus injection.)

In follow-up cases for additional therapeutic injections and/or aspirations, an office visit is only indicated if it is necessary to re-evaluate the patient. In this case, a minimal visit may be listed in addition to the injection. Documentation supporting the office visit charge must be submitted with the bill to the payer. Reimbursement for therapeutic injections will be made according to the multiple procedure rules.

Trigger point injection is considered one procedure and reimbursed as such regardless of the number of injection sites. Two codes are available for reporting trigger point injections. Use 20552 for injection(s) of single or multiple trigger point(s) in one or two muscles or 20553 when three or more muscles are involved.

- V. **Anesthesia by Surgeon.** In certain circumstances it may be appropriate for the attending surgeon to provide regional or general anesthesia. Anesthesia by the surgeon is considered to be more than local or digital anesthesia. Identify this service by adding modifier 47 to the surgical code. Only base anesthesia units are allowed. See the Anesthesia section.
- W. **Therapeutic/Diagnostic Injections.** Injections are considered incidental to the procedure when performed with a related invasive procedure.
- X. **Intervertebral Biomechanical Device(s) and Use of Code 22851.** Code 22851 describes the application of an intervertebral biomechanical device to a vertebral defect or interspace. Code 22851 should be listed in conjunction with a primary procedure without the use of modifier 51. The use of 22851 is limited to one instance per single interspace or single vertebral defect regardless of the number of devices applied and infers additional qualifying training, experience, sizing, and/or use of special surgical appliances to insert the biomechanical device. Qualifying devices include manufactured synthetic or allograft biomechanical devices, or methyl methacrylate constructs, and are not dependent on a specific manufacturer, shape, or material of which it is constructed. Qualifying devices are machine cut to specific dimensions for precise application to an intervertebral defect. (For example, the use of code 22851 would be appropriate during a cervical arthrodesis (22554) when applying a synthetic alloy cage, a threaded bone dowel, or a machine cut hexahedron cortical, cancellous, or corticocancellous allograft biomechanical device. Surgeons utilizing generic non-machined bony allografts or autografts are referred to code sets 20930–20931, 20936–20938 respectively.)
- Y. **Intra-operative Neurophysiologic Monitoring (e.g., SSEP, MEP, BAEP, TES, DEP, VEP).** All intra-operative neurophysiologic monitoring requires pre-authorization. This service does not require separate precertification when it meets these guidelines. Reimbursement for intra-operative neurophysiologic monitoring will not be allowed in the following cases, unless mutually agreed to by the payer and the provider:
1. Neuromuscular junction testing of each nerve during intraoperative monitoring;
 2. Intraoperative monitoring during peripheral nerve entrapment releases, such as carpal release, ulnar nerve transposition at the elbow, and tarsal tunnel release;
 3. During decompression of cervical nerve roots without myelopathy;
 4. During placement of cervical instrumentation absent evidence of myelopathy;
 5. During lumbar discectomy for radiculopathy; or
 6. During lumbar decompression for treatment of stenosis without the need for instrumentation.

II. MULTIPLE PROCEDURES

- A. **Multiple Procedure Reimbursement Rule.** Multiple procedures performed during the same operative session at the same operative site are reimbursed as follows:
- One hundred percent (100%) of the allowable fee for the primary procedure
 - Fifty percent (50%) of the allowable fee for the second and subsequent procedures
- B. **Bilateral Procedure Reimbursement Rule.** Physicians and staff are sometimes confused by the definition of bilateral. Bilateral procedures are identical procedures (i.e., use the same CPT code) performed on the same anatomic site but on opposite sides of the body. Furthermore, each procedure should be performed through its own separate incision to qualify as bilateral. For example, open reductions of bilateral fractures of the mandible treated through a common incision would not qualify under the definition of bilateral and would be reimbursed according to the multiple procedure rule. Medicare's accepted method of billing bilateral services is to list the procedure once and add modifier 50. Mississippi is adopting this same policy. Refer to the example below:

69300 50 Otoplasty, protruding ear, with or without size reduction

Place a “2” in the UNITS column of the CMS-1500 claim form so that payers are aware that two procedures were performed. List the charge as one hundred fifty percent (150%) of your normal charge. Reimbursement shall be at one hundred fifty percent (150%) of the amount allowed for a unilateral procedure(s). For example, if the allowable for a unilateral surgery is one hundred dollars (\$100.00) and it is performed bilaterally, reimbursement shall be one hundred fifty dollars (\$150.00). However, if the procedure description states “bilateral,” reimbursement shall be as listed in the Fee Schedule since the fee was calculated for provision of the procedure bilaterally.

- C. **Multiple Procedures—Different Areas Rule.** When multiple surgical procedures are performed in different areas of the body during the same operative sessions and the procedures are unrelated (e.g., abdominal hernia repair and a knee arthroscopy), the multiple procedure reimbursement rule will apply independently to each area. Modifier 51 must be added.
- D. **Multiple Procedure Billing Rules**
 - 1. The primary procedure, which is defined as the procedure with the highest RVU, must be billed with the applicable CPT code.
 - 2. The second or lesser or additional procedure(s) must be billed by adding modifier 51 to the codes, unless the procedure(s) is exempt from modifier 51 or qualifies as an add-on code.

III. REPAIR OF WOUNDS

- A. Wound classifications of simple, intermediate, or complex are expected to be consistent with current CPT descriptions/definitions/guidelines.
- B. **Reporting**
 - 1. The use of appropriate codes should be consistent with the current CPT guidelines.
 - 2. Wound exploration codes should not be billed with codes that specifically describe a repair to major structure or major vessel. The specific repair code supersedes the use of a wound exploration code.

IV. MUSCULOSKELETAL SYSTEM

- A. **Casting and Strapping.** This applies to severe muscle sprains or strains that require casting or strapping.
 - 1. Initial (new patient) treatment for soft tissue injuries must be billed under the appropriate office visit code.
 - 2. When a cast or strapping is applied during an initial visit, supplies and materials (e.g., stockinet, plaster, fiberglass, ace bandages) may be itemized and billed separately using the appropriate HCPCS code.
 - 3. When initial casting and/or strapping is applied for the first time during an established patient visit, reimbursement may be made for the itemized supplies and materials in addition to the appropriate established patient visit.
 - 4. Replacement casts or strapping provided during a follow-up visit (established patient) include reimbursement for the replacement service as well as the removal of casts, splints, or strapping. Follow-up visit charges may be reimbursed in addition to replacement casting and strapping only when additional significantly identifiable medical services are provided. Office notes should substantiate medical necessity of the visit. Cast supplies may be billed using the appropriate HCPCS code and reimbursed separately.
- B. **Fracture Care**
 - 1. Fracture care is a global service. It includes the examination, restoration or stabilization of the fracture, application of the first cast, and cast removal. Casting material is not considered part of the global package and may be reimbursed separately. It is inappropriate to bill an office visit since the reason for the encounter is for fracture care. However, if the patient requires surgical intervention, additional reimbursement can be made for the appropriate E/M code to properly evaluate the patient for surgery. Use modifier 57 with the E/M code.
 - 2. Reimbursement for fracture care includes the application and removal of the first cast or traction device only. Replacement casting during the period of follow-up care is reimbursed separately.
 - 3. The phrase “with manipulation” describes reduction of a fracture.
 - 4. Re-reduction of a fracture performed by the primary physician may be identified by the addition of modifier 76 to the usual procedure code to indicate “repeat procedure” by the same physician.
 - 5. The term “complicated” appears in some musculoskeletal code descriptions. It implies an infection occurred or the surgery took longer than usual. Be sure the medical record documentation supports the “complicated” descriptor to justify reimbursement.

C. Bone, Cartilage, and Fascia Grafts

1. Reimbursement for obtaining autogenous bone, cartilage or fascia grafts, or other tissue through separate incisions is made only when the graft is not described as part of the basic procedure.
2. Tissue obtained from a cadaver for grafting must be billed using code 99070 and accompanied by a report in order to ensure an equitable reimbursement by the payer.

D. Arthroscopy

Note: Diagnostic arthroscopy is considered to be included in a surgical arthroscopy. Only in the most unusual case is an increased fee justified because of increased complexity of the intra-articular surgery performed.

1. Diagnostic arthroscopy should be billed at fifty percent (50%) when followed by open surgery.
2. Diagnostic arthroscopy is not billed when followed by arthroscopic surgery.
3. If there are only minor findings that do not confirm a significant preoperative diagnosis, the procedure should be billed as a diagnostic arthroscopy.

E. Arthrodesis Procedures. Many revisions have occurred in CPT coding for arthrodesis procedures. References to bone grafting and fixation are now procedures which are listed and reimbursed separately from the arthrodesis codes.

To help alleviate any misunderstanding about when to code a discectomy in addition to an arthrodesis, the statement "including minimal discectomy" to prepare interspace has been added to the anterior interbody technique. If the disk is removed for decompression of the spinal cord, the decompression should be coded and reimbursed separately.

F. External Spinal Stimulators Post Fusion

1. The following criteria are established for the medically accepted standard of care when determining applicability for the use of an external spinal stimulator. However, the medical necessity should be determined on a case-by-case basis.
 - a. Patient has had a previously failed spinal fusion, and/or
 - b. Patient is scheduled for revision or repair of pseudoarthrosis, and/or
 - c. The patient smokes greater than a pack of cigarettes per day and is scheduled for spinal fusion
2. The external spinal stimulator is not approved by the Mississippi Workers' Compensation Commission for use in primary spinal fusions.
3. The external spinal stimulator will be reimbursed according to the allowables in the Fee Schedule.
4. Precertification is required for use of the external spinal stimulator.

G. Carpal Tunnel Release. The following intraoperative services are included in the global service package for carpal tunnel release and should not be reported separately and do not warrant additional reimbursement:

- Surgical approach
- Isolation of neurovascular structures
- Video imaging
- Stimulation of nerves for identification
- Application of dressing, splint, or cast
- Tenolysis of flexor tendons
- Flexor tenosynovectomy
- Excision of lipoma of carpal canal
- Exploration of incidental release of ulnar nerve
- Division of transverse carpal ligament
- Use of endoscopic equipment
- Placement and removal of surgical drains or suction device
- Closure of wound

V. BURNS, LOCAL TREATMENT

A. Degree of Burns

1. Code 16000 must be used when billing for treatment of first degree burns when no more than local treatment of burned surfaces is required.
2. Codes 16020–16030 must be used when billing for treatment of partial-thickness burns only.
3. The claim form must be accompanied by a report substantiating the services performed.

4. Major debridement of foreign bodies, grease, epidermis, or necrotic tissue may be billed separately under codes 11000–11001. Modifier 51 does not apply.

B. Percentage of Total Body Surface (TBS) Area. The following definitions apply to codes 16020–16030:

1. “Small” means a burn that encompasses five percent (5%) of TBS area or less.
2. “Medium” means a burn that encompasses five percent to ten percent (5%–10%) of TBS or that involves the whole face, or a whole extremity.
3. “Large” means a burn that encompasses greater than ten percent (10%) TBS area.

C. Reimbursement

1. To identify accurately the proper procedure code and substantiate the descriptor for billing, the exact percentage of the body surface involved and the degree of the burn must be specified on the claim form submitted or by attaching a special report. Claims submitted without this specification will be returned to the physician for this additional information.
2. Hospital visits, emergency room visits, or critical care visits provided by the same physician on the same day as the application of burn dressings will be reimbursed as a single procedure at the highest level of service.

VI. NERVE BLOCKS

A. Diagnostic or Therapeutic

1. Please refer to the Pain Management section for guidelines and reimbursement of nerve blocks.
2. Medications such as steroids, pain medication, etc., may be separately billed using the appropriate HCPCS code.
 - a. The name of the medication(s), dosage, and volume must be identified.
 - b. Medication will be reimbursed according to fees listed in the HCPCS section. If not listed in HCPCS, reimbursement will be according to the Pharmacy section in the General Guidelines.

B. Anesthetic. When a nerve block for anesthesia is provided by the operating room surgeon, the procedure codes listed in the Anesthesia section must be followed.

VII. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in surgery are as follows:

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPCS Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is listed in the TC Amount column of the Fee Schedule.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

47 Anesthesia by Surgeon

Regional or general anesthesia provided by the surgeon may be reported by adding modifier 47 to the basic service. (This does not include local anesthesia.) **Note:** Modifier 47 would not be used as a modifier for the anesthesia procedures.

Mississippi guideline: Reimbursement is made for base units only.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed during the same operative session should be identified by adding modifier 50 to the appropriate five-digit code.

51 Multiple Procedures

When multiple procedures, other than E/M services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated “modifier 51 exempt” codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances, the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient’s anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

54 Surgical Care Only

When 1 physician or other qualified health care professional performs a surgical procedure and another provides preoperative and/or postoperative management, surgical services may be identified by adding modifier 54 to the usual procedure number.

55 Postoperative Management Only

When 1 physician or other qualified health care professional performed the postoperative management and another performed the surgical procedure, the postoperative component may be identified by adding modifier 55 to the usual procedure number.

56 Preoperative Management Only

When 1 physician or other qualified health care professional performed the preoperative care and evaluation and another performed the surgical procedure, the preoperative component may be identified by adding modifier 56 to the usual procedure number.

57 Decision for Surgery

An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: (a) planned or anticipated (staged); (b) more extensive than the original procedure; or (c) for therapy following a surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For treatment of a problem that requires a return to the operating/procedure room (eg, an unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures or services other than E/M services, that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25. See also Level II (HCPCS/National) Modifiers listing.

62 Two Surgeons

When two surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated add-on code(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. If an additional procedure(s) (including an add-on procedure(s)) are performed during the same surgical session, separate code(s) may also be reported with modifier 62 added. **Note:** If a co-surgeon acts as an assistant in the performance of an additional procedure(s), other than those reported with the modifier 62, during the same surgical session, those services may be reported using separate procedure code(s) with modifier 80 or modifier 82 added, as appropriate.

Mississippi guideline: This modifier is reimbursed at one hundred fifty percent (150%) of the allowed amount divided equally between the two co-surgeons.

66 Surgical Team

Under some circumstances, highly complex procedures (requiring the concomitant services of several physicians or other qualified health care professional, often of different specialties, plus other highly skilled, specially trained personnel, various types of complex equipment) are carried out under the "surgical team" concept. Such circumstances may be identified by each participating individual with the addition of modifier 66 to the basic procedure number used for reporting services.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first and requires the use

of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

80 Assistant Surgeon

Surgical assistant services may be identified by adding modifier 80 to the usual procedure number(s).

Mississippi guideline: Reimbursement is twenty percent (20%) of the maximum reimbursement allowance.

81 Minimum Assistant Surgeon

Minimum surgical assistant services are identified by adding modifier 81 to the usual procedure number.

Mississippi guideline: Physician reimbursement is ten percent (10%) of the maximum reimbursement allowance.

82 Assistant Surgeon (when qualified resident surgeon not available)

The unavailability of a qualified resident surgeon is prerequisite for use of modifier 82 appended to the unusual procedure code number(s).

90 Reference (Outside) Laboratory

When laboratory procedures are performed by a party other than the treating or reporting physician or other qualified health care professional, the procedure may be identified by adding modifier 90 to the usual procedure number.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

AS Physician Assistant, Nurse Practitioner, or Clinical Nurse Specialist Services for Assistant at Surgery (HCPCS Modifier)

Assistant at surgery services provided by another qualified individual (e.g., physician assistant, nurse practitioner, clinical nurse specialist, registered nurse first assistant) and not another physician are identified by adding modifier AS to the listed applicable surgical procedures. Modifier AS may be appended to any code identified as appropriate for surgical assistance in this Fee Schedule.

Mississippi guideline: Modifier AS reimbursement is ten percent (10%) of the maximum reimbursement allowance. For assistant at surgery services provided by a physician, see modifiers 80, 81, and 82.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Radiology

I. SCOPE

The following guidelines apply to radiology services provided in offices, clinics, and under some circumstances in hospital x-ray departments. This section also contains guidelines that include nuclear medicine and diagnostic ultrasound.

II. GUIDELINES

- A. **Total Fee.** A total fee includes both the professional component for the radiologist and the technical component needed to accomplish the procedure. Explanations of the professional component and the technical component are listed below. The values as listed in the Amount column represent the total reimbursement.
- B. **Professional Component.** The professional component represents the reimbursement allowance of the professional radiological services of the physician and is identified by the use of modifier 26. This includes examination of the patient when indicated, performance or supervision of the procedure, interpretation and written report of the examination, and consultation with the referring physician. In the majority of hospital radiology departments, the radiologist submits a separate statement to the patient for professional services rendered, which are listed as the professional component. Values in the PC Amount column are intended for the services of a radiologist for the professional component only and do not include any other charges. To identify a charge for a professional component only, use the five-digit code followed by modifier 26.
- C. **Technical Component.** The technical component includes charges made by the institution or clinic to cover the services of technologists and other staff members, the film, contrast media, chemicals and other materials, and the use of the space and facilities of the x-ray department. To identify a charge for a technical component only, use the five-digit code followed by HCPCS modifier TC. The technical component amount is listed in the TC Amount column of the Fee Schedule.
- D. **Review of X-rays.** Billing code 76140 is not appropriate in the following circumstances because review of the x-rays is inherent to the evaluation and management code:
- The physician, during the course of an office visit or consultation, reviews an x-ray made elsewhere.
 - The treating or consulting physician reviews x-rays at an emergency room or hospital visit.
 - CPT® code 76140 Consultation on x-ray examination made elsewhere, written report, will only be paid when there is a documented need for the service and when performed by a radiologist or physician certified to perform radiological services.
 - This provision is for payment of a second interpretation under unusual circumstances such as a questionable finding for which the physician performing the initial interpretation requests the expertise of another physician (i.e., expertise of a radiologist). CPT code 76140 is to be used when a second opinion is required for a radiological procedure. Reimbursement is limited to the PC Amount listed in the Fee Schedule for the radiological procedure.
- E. **Additional X-rays.** No payment shall be made for additional x-rays when recent x-rays are available except when supported by adequate information regarding the need to retake x-rays. The use of photographic or digital media and/or imaging is not reported separately, but is considered to be a component of the basic procedure and shall not merit any additional payment.
- F. **Comparison X-rays.** Comparison x-rays are reimbursable when appropriate. Any repeat comparison x-ray requires prior approval and will not be reimbursed without prior approval.
- G. **Contrast Material**
1. Complete procedures, interventional radiological procedures, or diagnostic studies involving injection of contrast media include all usual pre-injection and post-injection services (e.g., necessary local anesthesia, placement of needle catheter, injection of contrast media, supervision of the study, and interpretation of results).
 2. Low osmolar contrast material and paramagnetic contrast materials shall only be billed when not included in the descriptor of the procedure. When appropriately billed, the contrast media is reimbursed according to the lesser of the billed charges or the maximum reimbursement allowance (MRA) listed in the HCPCS section of the Fee Schedule. Supplies are considered incidental to the administration of the contrast and are not separately reimbursable.
 3. When contrast can be administered orally (upper G.I.) or rectally (barium enema), the administration is included as part of the procedure.

4. When an intravenous line is placed simply for access in the event of a problem with a procedure or for administration of contrast, it is considered part of the procedure and does not command a separate fee.
- H. **Urologic Procedures.** In the case of urologic procedures (e.g., CPT codes 74400–74485), insertion of a urethral catheter is part of the procedure and is not separately billed.
- I. **Separate or Multiple Procedures**
 1. When multiple procedures are performed on the same day or at the same session, it is appropriate to designate them by separate entries. Surgical procedures performed in conjunction with a radiology procedure will be subject to the rules and regulations of the Surgery section.
 2. When x-rays of multiple sections of a body area are billed separately, the total reimbursement must not exceed the maximum reimbursement allowance of the complete body area.
- J. **Outpatient CT Scans and MRIs.** CT scans and MRIs, when performed on an outpatient basis, are subject to the limitations of the Fee Schedule, regardless of site of service.
- K. **Unlisted Service or Procedure.** A service or procedure may be provided that is not listed in the most recent edition of the CPT book. When reporting such a service, the appropriate unlisted procedure code may be used to indicate the service, identifying it by special report. Unlisted procedure codes are listed in the CPT book.
- L. **Special Report.** Any test/service that is not provided routinely should be reported with the appropriate code designating the service and the billing for that test/service should include a description of the procedure, the process used, and a full report of the findings. Additional information provided should include an acceptable definition or description of the extent and nature of the procedure, as well as information regarding the need for the procedure. Also essential is data regarding the equipment necessary to perform the service, as well as the time and effort required. Special reports to justify the necessity of a service do not warrant a separate fee.
- M. **By Report (BR).** “BR” in the Amount column indicates services that are too new, unusual, or variable in the nature of their performance to permit the assignment of a definable fee. Such services should be substantiated by documentation submitted with the bill. Sufficient information should be included to permit proper identification and a sound evaluation. If the service is justified by the report, the actual charge shall be paid in full, unless the payer has evidence that the actual charge exceeds the usual and customary charge for such service.
- N. **Radiology Supervision and Interpretation Procedures.** There are times when a single physician may perform the procedure and supervise the imaging and interpretation. On other occasions, one physician may perform the procedure, and the imaging supervision with interpretation may be performed by another physician. The appropriate radiology codes are to be used for supervision and interpretation of the imaging. The appropriate surgical codes are to be used for the procedure, including necessary local anesthesia, placement of needle or catheters, injection of contrast media, etc. The surgical codes are subject to the rules and regulations of the Surgery section, and the radiology codes are subject to this section of radiology rules and regulations.
- O. **Written Report(s).** A written report, signed by the interpreting physician, should be considered an integral part of a radiological procedure or interpretation and must be submitted with the billing.
- P. **Facility Fee.** The Facility Fee for outpatient services is the APC Amount.

III. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in radiology (including nuclear medicine and diagnostic ultrasound) are as follows:

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

TC Technical Component (HCPCS Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is listed in the TC Amount column of the Fee Schedule.

32 Mandated Service

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same session, should be identified by adding modifier 50 to the appropriate 5 digit code.

51 Multiple Procedures

When multiple procedures, other than E/M services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated “modifier 51 exempt” codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

Pathology and Laboratory

I. GUIDELINES

- A. **Pathology Services.** Pathology and Laboratory services are provided for evaluating the nature of disease or a change in body tissue and organs due to injury and/or caused by a disease.
- B. **Separate or Multiple Procedures.** When multiple procedures are performed on the same date or at the same session, it is appropriate to designate them by separate entries.
- C. **Unlisted Service or Procedures.** Unlisted codes are used for laboratory/pathology services which do not currently have a CPT® code. All unlisted codes require an explanation and report. A list of unlisted codes may be found in the CPT book. The report must accompany the bill.
- D. **Special Report.** Any test/service that is not provided routinely should be reported with the appropriate code designating the service and the billing for that test/service should include a description of the procedure, the process used and a full report of the findings. Special reports to justify the necessity of a service do not warrant a separate fee.
- E. **By Report (BR).** “BR” in the Amount column indicates services that are too new, unusual, or variable in the nature of their performance to permit the assignment of a definable fee. Such services should be substantiated by documentation submitted with the bill. Sufficient information should be included to permit proper identification and a sound evaluation. If the service is justified by the report, the actual charge shall be paid in full, unless the payer has evidence that the actual charge exceeds the maximum allowable amount for such service.
- F. **Facility Fee.** The Facility Fee for outpatient services is the APC Amount.

II. GENERAL INFORMATION AND INSTRUCTIONS

- A. **Panel Tests.** The billing for panel tests must include documentation listing the tests in the panel. When billing for panel tests (80047–80081), use the code number corresponding to the appropriate panel test. These tests will not be reimbursed separately.

The panel components do not preclude the performance of other tests not listed in the panel. If other laboratory tests are performed in conjunction with a particular panel, the additional tests may be reported separately in addition to the panel.

B. Handling and Collection Process

- 1. In collecting a specimen, the cost for collection is covered by the technical component when the lab test is conducted at that site. No separate collection or handling fee for this purpose will be reimbursed.
- 2. When a specimen must be sent to a reference laboratory, the cost of specimen collection is covered in a collection fee. This charge is only allowed when a reference laboratory is used, and modifier 90 must be used.

- C. **Global, Professional, and Technical Components.** Some procedures in the Pathology and Laboratory section are considered global fees (Amount) and do not qualify for a separate technical (TC) or professional (PC) component. Procedures that do qualify for separate components have separate Fee Schedule amounts for modifiers 26 and TC.

Whereas these guidelines are written to be all-inclusive, there are instances when the reviewer must make an informed decision regarding the PC/TC reimbursements. Request for PC reimbursement will only be considered if:

- The physician performs the procedure or reviews the results
- A written report, not a computer generated report, is submitted with the request for payment

D. Occupational Blood Exposure Testing/Treatment

- 1. Work related Blood Exposures should minimally meet the appropriate CDC Guidelines for Management of Occupational Blood Exposures.
- 2. The CDC Guidelines are updated at intervals and the most current guidelines should be used.
- 3. Current information can be obtained at www.cdc.gov.

E. Drug Screens

1. Post-Accident Drug Screens should comply with MCA §71-7-1 and other state and federal regulations with which the employer must comply. Reimbursement will either be made by the payer/carrier or the employer. Reimbursement shall not be dependent on the outcome of the testing results.
2. Other drug screens: The only code reimbursed by workers' compensation for drug screens other than Post-Accident is 0431M (Mississippi-specific code), with a maximum reimbursement allowable of \$290.38.
3. Testing validity is considered part of the screen and is not separately reimbursed.
4. Reimbursement shall not be dependent on the outcome of the test results.

F. Pharmacogenetic Testing

1. Pharmacogenetics is the testing of a person's DNA for genetic programming for specific enzymes. It is the science of genetic differences between individuals which can affect individual responses to drugs, both in terms of therapeutic effect as well as adverse effect.
2. Testing is covered for the following medications: Alfentanil, Amitriptyline, Bupropion, Carisoprodol, Celecoxib, Citalopram, Clomipramine, Codeine, Cyclobenzaprine, Desipramine, Desvenlafaxine, Doxepin, Duloxetine, Escitalopram, Fentanyl, Fluoxetine, Fluvoxamine, Hydrocodone, Hydromorphone, Ibuprofen, Imipramine, Lidocaine, Maprotiline, Methadone, Mianserin, Mirtazapine, Morphine, Naproxen, Nefazodone, Nortriptyline, Oxycodone, Oxymorphone, Paroxetine, Reboxetine, Ropivacaine, Sertraline, Tizanidine, Tramadol, Trazadone, Trimipramine, Venlafaxine, Vilazodone, Zolmitriptan.
3. Pharmacogenetic testing is limited to once for an individual claimant.
4. Pharmacogenetic testing is limited to a maximum reimbursement of \$500.00 per claim.

III. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in pathology and laboratory are as follows:

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPCS Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is listed in the TC Amount column of the Fee Schedule.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances, the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

90 Reference (Outside) Laboratory

When laboratory procedures are performed by a party other than the treating or reporting physician or other qualified health care professional, the procedure may be identified by adding modifier 90 to the usual procedure number.

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time, reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results (eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

92 Alternative Laboratory Platform Testing

When laboratory testing is being performed using a kit or transportable instrument that wholly or in part consists of a single use, disposable analytical chamber, the service may be identified by adding modifier 92 to the usual laboratory procedure code (HIV testing 86701–86703, and 87389). The test does not require permanent dedicated space; hence by its design may be hand carried or transported to the vicinity of the patient for immediate testing at that site, although location of the testing is not in itself determinative of the use of this modifier.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Medicine Services

In addition to the general rules, this section applies unique guidelines for medicine specialties. Therapeutic services and rehabilitation guidelines, as well as chiropractic and osteopathic services, are listed in a separate section following Medicine Services.

I. GUIDELINES

- A. **Unlisted Services or Procedures.** Unlisted codes are used for medical services which do not currently have a CPT® code. All unlisted codes require an explanation and report. Unlisted codes are listed in the CPT book.
- B. **Multiple Procedures.** It is appropriate to designate multiple procedures rendered on the same date by separate entries.
- C. **Separate Procedures.** Separate procedures are commonly carried out as an integral component of another procedure. They should not be billed in conjunction with the related procedure. These procedures may be billed when performed independently by adding modifier 59 to the specific “separate procedure” code.
- D. **By Report (BR) Procedures.** By report (BR) means that the procedure is new, or is not assigned a maximum fee, and requires a written description included on or attached to the bill. “BR” procedures require a complete listing of the service, the dates of service, the procedure code, and the payment requested. The report is included in the reimbursement for the procedure.
- E. **Special Report.** Any test/service that is not provided routinely should be reported with the appropriate code designating the service and the billing for that test/service should include a description of the procedure, the process used, and a full report of the findings. Special reports to justify the necessity of a service do not warrant a separate fee.
- F. **Materials Supplied by Physician.** Supplies and materials usually included in an office visit are included in the reimbursement for the office visit. Other unusual supplies and materials should be identified with CPT code 99070 or specific HCPCS code. Reimbursement shall be limited to the lesser of the billed amount, or the Fee Schedule maximum reimbursement allowance (MRA) or the usual and customary rate for items not listed in this Fee Schedule.
- G. **Audiological Function Tests.** The audiometric tests (92551–92597) are reimbursed based on the AMA CPT Guidelines. All descriptors refer to testing of both ears.
- H. **Psychological Services**
 - 1. Payment for a psychiatric diagnostic interview/evaluation includes history and mental status determination, development of a treatment plan when necessary and the preparation of a written report that must be submitted with the required billing form. Use of an E/M code with a diagnostic interview/evaluation is not appropriate.
 - 2. Psychotherapy codes from the current CPT manual are used regardless of place of service. The CPT code most closely matching the length of the session must be billed.
 - 3. Use of an E/M code with a psychotherapy code should follow the guidelines from the CPT book and the American Psychiatric Association.
 - 4. A service level adjustment factor is used to determine payment for psychotherapy when a provider other than a psychiatrist provides the service. In those instances, the reimbursement amount for the CPT code is paid at eighty-five percent (85%) of the maximum reimbursement allowance. This applies to psychologists, social workers, and counselors, etc.
- I. **Electromyography (EMG).** Payment for EMG services includes the initial set of electrodes and all supplies necessary to perform the service. The physician may be paid for a consultation or new patient visit in addition to the EMG performed on the same day, with supporting documentation required as outlined in the Evaluation and Management section. When an EMG is performed on the same day as a follow up visit, payment may be made for the EMG only unless documentation supports the need for a medical service in addition to the EMG.
 - 1. Only a licensed physician certified in Neurology/PMR/Electrodiagnostic medicine is entitled to reimbursement for performing an electromyogram (EMG) and/or a nerve conduction study (NCS).
 - 2. Reimbursement is not allowed under this Fee Schedule for automated nerve conduction studies.
 - 3. Referral for an electromyogram and/or a nerve conduction study shall be at the discretion and direction of the physician in charge of care, and neither the payer nor the payer's agent may unilaterally or arbitrarily redirect the patient to another provider for these tests. The payer or the payer's agent may, however, discuss with the physician

in charge of care appropriate providers for the conduct of these tests in an effort to reach an agreement with the physician in charge as to who will conduct an electromyogram and/or nerve conduction study in any given case.

- J. **Manipulative Services.** Chiropractic and Osteopathic manipulative services, which are medicine services, will be discussed in the Therapeutic Services section.

II. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in Medicine Services are as follows:

22 Increased Procedure Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPCS Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is listed in the TC Amount column of the Fee Schedule.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

51 Multiple Procedures

When multiple procedures, other than E/M services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated "add-on" codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated "modifier 51 exempt" codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances, the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

54 Surgical Care Only

When 1 physician or other qualified health care professional performs a surgical procedure and another provides preoperative and/or postoperative management, surgical services may be identified by adding modifier 54 to the usual procedure number.

55 Postoperative Management Only

When 1 physician or other qualified health care professional performed the postoperative management and another performed the surgical procedure, the postoperative component may be identified by adding modifier 55 to the usual procedure number.

56 Preoperative Management Only

When 1 physician or other qualified health care professional performed the preoperative care and evaluation and another performed the surgical procedure, the preoperative component may be identified by adding modifier 56 to the usual procedure number.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: a) planned or anticipated (staged); b) more extensive than the original procedure; or c) for therapy following a surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For the treatment of a problem that requires a return to the operating/procedure room (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services, that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Therapeutic Services

I. SCOPE

- A. **Therapeutic Services.** Therapeutic services are an integral part of the healing process for a variety of injured workers. Recognizing this, the Fee Schedule includes codes for physical medicine, modalities, procedures, tests, and measurements in the Therapeutic Services section representing specific therapeutic procedures performed by licensed physicians, chiropractors, licensed physical therapists, licensed occupational therapists, and speech pathologists.
- B. **Selection of Providers.** Physical or occupational therapy, including work hardening, functional capacity evaluations, chronic pain programs, or massage therapy shall be provided upon referral from a physician. In the absence of specific direction from the treating or prescribing physician, the selection of a provider for these services shall be made by the payer in consultation with the treating or prescribing physician.

No party, in attempting to negotiate a repricing or other post treatment price reduction agreement, shall state or imply that consent to such an agreement is mandatory, or that the failure to enter into any such agreement may result in audit, delay of payment, or other adverse consequence. If the Commission determines that any party, or other person in privity therewith, has made such false or misleading statements in an effort to coerce another party's consent to a repricing or other price reduction agreement outside the Fee Schedule, the Commission may refer the matter to the appropriate authorities to consider whether such conduct warrants criminal prosecution under §71-3-69 of the Law.

C. Physical Medical Assessment

1. An assessment must be performed to determine if a patient will benefit from therapeutic services.
2. When a physician examines a patient and an assessment for therapeutic services is performed, the billing for the office visit includes the therapeutic assessment.
3. Procedure code 97001 is to be used for an initial assessment by physical therapists. Code 97002 is to be used for re-evaluation of a patient by physical therapists. Procedure code 97003 is to be used for an initial assessment by occupational therapists. Code 97004 is to be used for re-evaluation of a patient by occupational therapists. A procedure code from 92521–92523 is to be used for initial assessment by a speech pathologist.

D. Plan of Care

1. An initial plan of care must be developed and filed with the payer regardless of whether therapy is provided by a physician or practicing therapist. The content of the plan of care, at a minimum, should contain:
 - a. The specific therapies to be provided, including the frequency and duration of each
 - b. The estimated duration of the therapeutic regimen
 - c. The potential degree of restoration and measurable goals (e.g., potential restoration is good, poor, low, guarded)
2. The initial plan of care must be signed by the treating physician and submitted to the payer within fourteen (14) days of approval. Physicians are required to sign the plan of care for physical and/or occupational therapy. The physician's signature indicates approval of the therapy the patient is receiving and for the length of time established for the therapy.
3. The physician has the responsibility of providing documentation of medical necessity to the payer whenever there are questions regarding the extent of therapy being provided or the appropriateness of the therapy regimen.
4. A plan of care must be updated at least every thirty (30) days and submitted to the payer.
5. Preparation of a care plan does not warrant a separate fee.

E. Qualifications for Reimbursement

1. The patient's condition must have the potential for restoration of function.
2. The treatment must be prescribed by the authorized attending or treating physician.
3. The treatment must be specific to the injury and have the potential to improve the patient's condition.
4. The physician or therapist must be on-site during the provision of services.

II. REIMBURSEMENT

A. Guidelines

1. Visits for therapy may not exceed one visit per day without prior approval from the payer.
2. Therapy exceeding fifteen (15) visits or thirty (30) days, whichever comes first, must have prior authorization from the payer for continuing care. It must meet the following guidelines:
 - a. The treatment must be medically necessary.
 - b. Prior authorization may be made by telephone. Documentation should be made in the patient's medical record indicating the date and name of the payer representative giving authorization for the continued therapy.
3. Reimbursement is limited to no more than four (4) therapies concurrently at the same visit. In the event of multiple treatment areas, an additional four (4) therapies per treatment day may be allowed at the payer's discretion and with pre-authorization. In the event of multiple treatment areas, the second and subsequent areas are subject to the multiple procedure rule.
4. Payment for 97010, which reports application of hot or cold packs, is bundled into payment for other services. Separate reimbursement for hot and cold packs will **not** be allowed in the treatment of work-related injury/illness.
5. Only one (1) work hardening or work conditioning program is reimbursed per injury.
6. The Physical Therapist Assistant or Occupational Therapist Assistant shall be reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure. Mississippi modifier "M3" should be attached to the appropriate CPT® code(s) when billing services rendered by a Physical Therapist Assistant or an Occupational Therapist Assistant.
7. NCCI edits or other bundle/unbundle edits do not apply to the CPT codes in the Therapeutic Services section, other than the stated rules provided in this section.

B. Treatment Areas

1. Spinal areas are recognized as the following five distinct regions:
 - Cranial
 - Cervical
 - Thoracic
 - Lumbar
 - SacralTransitional areas of the spine are not recognized as distinctly different areas (e.g., cervicothoracic, lumbosacral).
2. Pelvis
3. Upper extremity (either left or right) is recognized as the following six distinct regions:
 - Shoulder
 - Upper arm
 - Elbow
 - Forearm
 - Wrist
 - Hand
4. Lower extremity (either left or right) is recognized as the following eight distinct regions:
 - Hip
 - Thigh
 - Knee
 - Calf
 - Ankle
 - Foot
5. Rib cage
6. Anterior trunk

C. Tests and Measurements

1. When two or more procedures from 95831 through 95852 are performed on the same day, reimbursement may not exceed the lesser of the billed amount or the maximum reimbursement allowance (MRA) for procedure code 95834 Total evaluation of body, including hands.

2. Functional capacity evaluation (FCE) must have pre-authorization from the payer before scheduling the tests.
3. Reimbursement for extremity testing, muscle testing, and range of motion measurements (95831, 95832, 95833, 95834, 95851, 95852) will not be made more than once in a thirty (30) day period for the same body area.

D. Fabrication of Orthotics

1. Procedure code 97760 must be billed for the professional services of a physician or therapist to fabricate orthotics.
2. Orthotics, prosthetics, and related supplies used may be billed under the appropriate HCPCS code. The maximum reimbursement allowance is listed in the Durable Medical Equipment (DME), Orthotics, Prosthetics and Other HCPCS Codes section of the Fee Schedule. For orthotics and supplies not listed in the DME section, use CPT code 99070. Reimbursement may not exceed a twenty percent (20%) mark-up of the provider's cost and an invoice may be required by the payer before reimbursement is made for items without an allowable amount in the Fee Schedule.

E. Re-evaluation of an Established Patient

A physician, physical therapist, occupational therapist, or speech therapist may charge and be reimbursed for a re-evaluation for therapeutic services only if new symptoms present the need for re-examination and evaluation as follows:

1. There is a definitive change in the patient's condition
2. The patient fails to respond to treatment and there is a need to change the treatment plan
3. The patient has completed the therapy regimen and is ready to receive discharge instructions

III. WORK HARDENING RULES

A. Work Hardening Program Guidelines

1. Work hardening is an interdisciplinary, individualized, job or goal-specific program of activity with the goal of returning an injured patient to work. Work hardening programs use real or simulated work tasks and progressively graded conditioning exercises that are based on the individual's measured tolerances. Work hardening provides a transition between acute care and successful return to work and is designed to improve the bio-mechanical, neuromuscular, and cardiovascular functioning of the worker. Approval or certification must be based on whether the proposed work hardening program appears reasonably tailored to accomplish the stated goals.
 - a. A work hardening program must, at a minimum, have the following components:
 - Development of strength and endurance of the individual in relation to the return to work goal;
 - Equipment and methods that quantify and measure strength and conditioning levels, i.e., ergometers, dynamometers, treadmills, measured walking tolerances;
 - Commercial strength and exercise devices, free weights, and circuit training. Goals for each worker are dependent on the demands of their respective jobs;
 - Simulation of the critical work demands, the tasks, and the environment of the job to which the worker will return. Job simulation tasks that provide for progression in frequency, load, and duration are essential. They must be related to the work goal and include a variety of work stations that offer opportunities to practice work related positions and motions, i.e., clerical, plumbing, electrical;
 - Education that stresses body mechanics, work pacing, safety and injury prevention, and that promotes worker responsibility and self-management. The education component requires direct therapist and worker interaction;
 - Assessment of the need for job modifications. Focus on whether the worker can return to the stated job goal but only with changes, i.e., added equipment, changes in work position or ergonomics, changes at the work site;
 - An individualized written plan that identifies observable and measurable goals, the methodology being used to reach these goals, the projected time necessary to accomplish the goal, and the expected outcomes. This plan must be signed by both the provider and the patient;
 - This plan needs to be based on a functional capacity (baseline) evaluation and must be completed within the first two (2) days of the program and compared to the critical demands as stated on the job analysis. A comparative analysis (re-evaluation) is done prior to discharge to determine job readiness;
 - A reporting system that includes:
 - Documentation of the initial plan;
 - Documentation of progress or lack of progress and future goals;
 - A discharge summary that includes an assessment of the functional capacity level and the achievement of the individual's program goals;

- A record of the worker's daily attendance including number of days and number of hours per day in the program.
- 2. Criteria for admission:
 - a. The worker must have reached a point in his or her recovery where no further active or invasive treatment intervention is being anticipated;
 - b. Physical recovery sufficient to allow participation for a minimum of four (4) hours a day for three to five days a week;
 - c. Worker's current levels of functioning interfere with his/her ability to carry out specific tasks required in the work place;
 - d. A defined return to work goal which includes:
 - A documented specific job to which the patient can return, along with a specific job analysis; and
 - A return to work goal agreed to by the employer and the patient/employee;
 - The facts must show how the worker must be able to benefit from the program;
 - The facts must show the worker is motivated to return to work. A worker whose primary limitation is psychological or clouded by significant illness behavior (i.e., significant self-imitation on F.C.E.) is typically not going to be motivated and will not likely benefit.
- 3. Criteria for discharge from a work hardening program:
 - The worker has reached the goal stated in the plan;
 - The worker has not progressed according to the program plan;
 - The worker has not reached interim goals and is not benefitting from the program; or,
 - Number of absences exceeds those allowed by the program (a maximum of two (2) absences is recommended);
 - Worker does not adhere to the schedule;
 - Completion of the program (the program should take two (2) to four (4) weeks to complete);
 - The previously identified job is no longer available.
- B. Massage therapy requires prior authorization of the payer before treatment can be rendered. Medical necessity must be established prior to approval. Reimbursement must be arranged between the payer and provider.
- C. Fees:
 - 1. In all cases, for both voluntary and non-voluntary discharge, payment is for the actual duration of treatment provided.
 - 2. CPT code 97545 (initial two (2) hours) and code 97546 (each additional hour) are to be used to bill work hardening. CPT code 97545 is to be billed for the initial two (2) hours of the work hardening program. This is a one-time charge. CPT code 97546 is to be used for billing each additional hour of the work hardening program after the initial two (2) hours (indicated by code 97545).

IV. FUNCTIONAL CAPACITY EVALUATIONS

- A. The functional capacity evaluation (FCE) is utilized for the following purposes:
 - 1. To determine the highest level of safe functionality and of maximal medical improvement.
 - 2. To provide a pre-vocational baseline of functional capabilities to assist in the vocational rehabilitation process.
 - 3. To objectively set restrictions and guidelines for return to work.
 - 4. To determine whether specific job tasks can be safely performed by modification of technique, equipment, or by further training.
 - 5. To determine whether additional treatment or referral to a work hardening program is indicated.
 - 6. To assess outcome at the conclusion of a work hardening program.
- B. **General Requirements**
 - 1. The FCE may be prescribed only by a licensed physician, or may be required by the payer when indicated.
 - 2. The FCE requires prior authorization by the payer.
- C. The FCE should be billed using code 97750 Physical performance test or measurement (e.g., musculoskeletal, functional capacity), with written report, each fifteen (15) minutes. Reimbursement of an FCE is limited to a maximum of twenty (20) units. Documentation must include start and stop times for testing.

V. TENS UNITS

- A. TENS (transcutaneous electrical nerve stimulation) must be provided under the attending or treating physician's prescription.
- B. Authorization from the payer must be sought before purchase or rental arrangements are made for a TENS unit. The payer has sole right of selection of vendors for rental or purchase of equipment, supplies, etc.

VI. SUPPLIES, EQUIPMENT, ORTHOTICS, AND PROSTHETICS

- A. Physicians and therapists must obtain authorization from the payer before purchase/rental of supplies, equipment, orthotics, and prosthetics costing more than three hundred dollars (\$300.00) per item for workers' compensation patients. When submitting bills, include the appropriate HCPCS code. If there is not an appropriate HCPCS code, use CPT code 99070.
- B. The payer has sole right of selection of vendors.

VII. OTHER INSTRUCTIONS

- A. Charges will not be reimbursed for publications, books, or digital media unless prior approval of the payer is obtained.
- B. All charges for services must be clearly itemized by CPT code, and the state professional license number must be on the bill.
- C. The treating physician must approve and sign all physical capability/restriction forms for the work-related injury/illness. This form must be submitted to the payer within fourteen (14) working days of the release to work.
- D. Documentation may be required by the payer to substantiate the necessity for treatment rendered. Documentation to substantiate charges and reports of tests and measurements are included in the fee for the service and do not warrant additional reimbursement.
- E. When patients do not show measurable progress, the payer may request the physician discontinue the treatment or provide documentation to substantiate medical necessity.
- F. When physical medicine therapies are provided to more than one body area, modifier 51 must be added to the procedure code or codes billed for the additional body area and will be reimbursed according to the multiple procedure rule.
- G. Non-surgical debridement should be billed as CPT code 97597, 97598, or 97602.

VIII. BACK SCHOOLS

Back schools are no longer covered services under this Fee Schedule.

IX. MASSAGE THERAPY

Massage therapy requires prior authorization of the payer before treatment can be rendered. Medical necessity must be established prior to approval. Reimbursement must be arranged between the payer and provider.

X. CHIROPRACTIC MANIPULATIVE TREATMENT

Chiropractic manipulative treatments are allowed for up to fifteen (15) visits or thirty (30) days, whichever first occurs, without any need to seek pre-certification or authorization. However, chiropractic manipulative treatments which are proposed beyond the first fifteen (15) visits or thirty (30) days, under any circumstance, must be pre-certified or pre-approved.

Like any other service, a spinal manipulation includes pre-evaluation and post-evaluation that would make it inappropriate to bill with an E/M service. However, if the patient's condition has deteriorated or an injury to another site has occurred, reimbursement can be made for an E/M service if documentation substantiates the additional service. Modifier 25 is added to an E/M service when a significant, separately identifiable E/M service is provided and documented as medically necessary.

XI. ELECTROMYOGRAM (EMG) AND NERVE CONDUCTION STUDY (NCS)

- A. Only a licensed physician certified in Neurology/PMR/Electrodiagnostic medicine is entitled to reimbursement for performing an electromyogram (EMG) and/or a nerve conduction study (NCS).

- B. Reimbursement is not allowed under this Fee Schedule for automated nerve conduction studies.
- C. Referral for an electromyogram and/or a nerve conduction study shall be at the discretion and direction of the physician in charge of care, and neither the payer nor the payer's agent may unilaterally or arbitrarily redirect the patient to another provider for these tests. The payer or the payer's agent may, however, discuss with the physician in charge of care appropriate providers for the conduct of these tests in an effort to reach an agreement with the physician in charge as to who will conduct an electromyogram and/or nerve conduction study in any given case.

XII. CHRONIC PAIN—INTER-DISCIPLINARY PAIN REHABILITATION PROGRAM

- A. The Inter-Disciplinary Pain Rehabilitation (IDPR) program is based on the bio-psychosocial approach to managing chronic pain, and uses both physical medicine treatments as well as psychological treatments and therapy to manage the chronic pain patient. A goal oriented, team approach is used in an effort to reduce pain, improve functioning, and decrease the dependence on the health care system of persons with chronic pain. This is an outpatient program.
- B. Pre-authorization is required in order to utilize an inter-disciplinary pain rehabilitation program to treat the chronic pain patient. A specific IDPR program plan must be submitted to the payer as part of the pre-authorization process.
- C. The following guidelines shall be used to assist in pre-authorization, and concurrent review:
 - 1. Persons considered suitable candidates for an inter-disciplinary pain rehabilitation program are those:
 - a. Who are likely to benefit from the program design;
 - b. Whose symptoms are deemed by a pain management provider to constitute chronic pain syndrome; and
 - c. Whose medical, psychological, or other conditions do not prohibit participation in this program.
 - 2. Mental Health Evaluation: an initial evaluation to determine the injured worker's readiness or suitability for this type of treatment may be performed prior to initiation of treatment. This evaluation is not considered part of the IDPR program and shall be billed separately.
 - 3. Due to the nature of intensity of the program, both group and individual therapy may be part of the IDPR program. If the program plan for a particular patient includes individual psychotherapy, it shall be billed as part of the program, and not separately. If the program does not include psychotherapy services, such services may be billed separately, if used, subject to applicable pre-authorization requirements.
 - 4. Psychological treatments which are part of the IDPR program may be rendered by a psychiatrist, psychologist, licensed counselor, or licensed social worker.
 - 5. The IDPR program shall always include a component designed to reduce the patient's dependence on and/or addiction to pain medications.
 - 6. An individual plan of treatment shall be supervised by a medical doctor within a therapeutic environment. Although some time is spent with a doctor on a one-to-one basis, more than fifty percent (50%) of the time may be spent in direct care under the supervision of the physical therapist, occupational therapist, mental health provider, or other licensed member of the IDPR team.
 - 7. Program supervision shall be provided by a medical doctor who is trained and experienced in the treatment of patients with chronic pain syndrome. The program supervisor shall:
 - a. Provide direct, on-site supervision of the daily pain management activities;
 - b. Participate in the initial and final evaluation of the patient;
 - c. Write the treatment plan for the patient, and write changes to the plan based on the patient's documented response to the treatment and/or based on documented changes in the patient's condition;
 - d. Direct the members of the IDPR team and review the patient's progress on a regular and consistent basis, at least bi-weekly.
 - 8. Participation in an IDPR program requires a minimum attendance of four (4) hours per day during the first week. The program shall not exceed eight (8) hours per day, except that workers who actually have experience working in a job for more than eight (8) hours per day may be allowed to participate for up to ten (10) hours per day, at the discretion of the program supervisor
 - 9. Daily treatment and patient response shall be documented and provided to the payer at least every two (2) weeks.
 - 10. Discharged/exit criteria shall include but not be limited to:
 - a. The appropriate use of medications;
 - b. Decreased intensity of subjective pain;
 - c. Increased ability of the injured worker to manage pain;
 - d. Reduced health care use related to the chronic pain;

- e. Return to work; and/or
 - f. Non-compliance with the program, or failure to obtain meaningful benefit after a reasonable period of time.
- D. Billing. The IDPR program shall be billed using CPT 97799 Unlisted physical medicine/rehabilitation service or procedure, and appended with modifier M5 to indicate chronic pain treatment. The total number of hours shall be indicated in the units column of the bill, or in some other conspicuous place on the bill. CARF accredited providers shall also add M4 as an additional modifier.
- E. Reimbursement. Reimbursement shall be as agreed to by the parties, or a maximum of one hundred dollars (\$100.00) per hour for CARF accredited providers. Providers without CARF accreditation shall be paid eighty percent (80%) of the maximum reimbursement allowance for CARF accredited providers. Units of less than one hour shall be prorated in fifteen (15) minute increments. A single fifteen (15) minute increment shall be reimbursed if the time is equal to or greater than eight (8) minutes and less than twenty-three (23) minutes.

XIII. EXPERIMENTAL OR INVESTIGATIONAL PROCEDURES

Certain procedures or treatments, such as VAX-D therapy, are considered investigational or experimental for purposes of this Fee Schedule, and are not approved for reimbursement.

XIV. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used with therapeutic services are as follows.

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

24 Unrelated Evaluation and Management Services by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period

The physician or other qualified health care professional may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E/M service.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

51 Multiple Procedures

When multiple procedures, other than E/M Services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated “modifier 51 exempt” codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

M3 Physical or Occupational Therapist Assistant (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by either a physical therapist assistant or an occupational therapist assistant.

M4 CARF Accredited (Mississippi Modifier)

This modifier should be used in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered by a CARF accredited provider as part of a pre-approved interdisciplinary pain rehabilitation program.

M5 Chronic Pain Treatment (Mississippi Modifier)

This modifier should be used only in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered as part of a pre-approved interdisciplinary pain rehabilitation program.

Dental

Current Dental Terminology (CDT), codes D0120–D9999, are developed, maintained, and copyrighted by the American Dental Association (ADA). CDT is updated annually. The current edition is *CDT 2016*, which is used in this Fee Schedule.

Decisions regarding the modification, deletion, or addition of CDT codes are made by the ADA and its Code Maintenance Committee.

Billing for dental services should be submitted on the ADA Dental Claim Form.

Durable Medical Equipment (DME), Orthotics, Prosthetics and Other HCPCS Codes

I. DEFINITION

HCPCS is an acronym for CMS's Healthcare Common Procedural Coding System. It is divided into two subsets. HCPCS Level I codes are CPT codes developed and maintained by the AMA. HCPCS Level II codes are developed and maintained by CMS and include codes for procedures, equipment, and supplies not found in the CPT book. This section of the Fee Schedule contains HCPCS Level II codes. (See the Dental section for dental codes.) HCPCS Level II codes that are excluded from the Fee Schedule are Alcohol/Drug Abuse Treatment Services (H0001–H2037), and National Codes for State Medicaid Agencies (T1000–T5999). Code categories included in this section are as follows:

Transportation Services Including Ambulance	A0021–A0999
Medical/Surgical Supplies	A4206–A8004
Administrative, Misc., and Investigational	A9150–A9999
Enteral and Parenteral Therapy	B4000–B9999
Outpatient PPS	C1300–C9899
Durable Medical Equipment (DME)	E0100–E9999
Procedures/Professional Services (Temporary)	G0008–G9186
Drugs and Biologicals	J0120–J9999
K Codes (Temporary)	K0001–K9999
Orthotic Procedures	L0000–L4999
Prosthetic Procedures	L5000–L9999
Medical Services	M0000–M0301
Pathology and Laboratory Services	P0000–P9999
Q Codes (Temporary)	Q0035–Q9980
Diagnostic Radiology Services	R0000–R5999
Temporary National Codes (Non-Medicare)	S0000–S9999
Vision Services	V0000–V2999
Hearing Services	V5000–V5999

II. GUIDELINES

A. Transportation Services Including Ambulance (A0021–A0999)

1. Transportation service codes include ground and air ambulance, non-emergency transportation (taxi, bus, automobile, wheelchair van), and ancillary transportation-related fees.
2. No exemption for air ambulance according to the Airline Deregulation Act (ADA) is allowed based on the rules and regulations of the current 2016 MWCC Fee Schedule.

3. Modifiers are required when reporting transportation services. Modifiers are single digits used to identify origin and destination. The first modifier identifies the transport place of origin and the second modifier the destination. Origin and destination modifiers are as follows:

- D** Diagnostic or therapeutic site other than “P” or “H” when these are used as origin codes
- E** Residential, domiciliary, custodial facility (other than 1819 facility)
- G** Hospital-based ESRD facility
- H** Hospital
- I** Site of transfer (e.g., airport or helicopter pad) between modes of ambulance transport
- J** Free-standing ESRD facility
- N** Skilled nursing facility (SNF)
- P** Physician's office
- R** Residence
- S** Scene of accident or acute event
- X** Intermediate stop at physician's office on way to hospital (includes HMO non-hospital facility, clinic, etc. destination code only).

Note: Modifier X can only be used as a destination code in the second position of a modifier.

4. Transportation codes can also be found in the S codes. See S0207, S0208, S0209, and S0215.

B. Medical and Surgical Supplies (A4206–A8004)

1. These A codes include a wide variety of medical, surgical, and some DME related supplies and services.
2. For rules related to DME supplies, accessories, maintenance, and repair, see F. Durable Medical Equipment below.

C. Administrative, Miscellaneous, and Investigational (A9150–A9999)

1. These A codes include non-prescription drugs, exercise equipment, radiopharmaceutical diagnostic imaging agents, as well as other miscellaneous supplies.

D. Enteral and Parenteral Therapy (B4000–B9999)

1. B codes include supplies, formulae, nutrition solutions and infusion pumps.

E. Outpatient PPS (C1300–C9899)

1. C codes include drugs, biologicals, and devices used by hospitals.

Non-OPPS hospitals, Critical Access Hospitals (CAHs), Indian Health Services Hospitals (IHS), hospitals located in American Samoa, Guam, Saipan, or the Virgin Islands, and Maryland waiver hospitals may report these codes at their discretion.

2. These codes are only used for facility (technical) services.

F. Durable Medical Equipment (DME) (E0100–E8002)

1. E codes include durable medical equipment such as canes, crutches, walkers, commodes, decubitus care, bath and toilet aids, hospital beds, oxygen and related respiratory equipment, monitoring equipment, pacemakers, patient lifts, safety equipment, restraints, traction equipment, fracture frames, wheelchairs, and artificial kidney machines.
2. All durable medical equipment shall have prior authorization from the payer before obtaining the equipment. The payer has the choice of vendor for purchase or rental of DME.
3. If an injured/ill employee is receiving DME items for both compensable and non-compensable medical conditions, only those items that apply to the work related injury should be listed on claims and invoices submitted to the employer.
4. If the rental price for DME exceeds or equals the total purchase price, the employer shall purchase instead of renting equipment. The vendor shall make the payer aware of the price options.
5. When rental payments total the purchase price, the equipment is considered purchased and no additional reimbursement is made.
6. The return of rented equipment is the dual responsibility of the injured worker and the DME supplier. The employer is not responsible for additional rental periods solely due to delay in equipment return.
7. For codes E0676, E0935, and E0936 the Amount listed is per day.

G. Procedures/Professional Services (Temporary) (G0008–G9186)

1. G codes identify professional health care procedures and services that would otherwise be reported using CPT codes.
2. Procedures and professional services identified by G codes may have a corresponding CPT code. When both a G code and CPT code describe the same procedure, the CPT code is required for reporting purposes.
3. G codes also include procedures and professional services that do not currently have a valid CPT code. In such cases, the applicable G code should be used for reporting purposes.

H. Drugs and Biologicals (J0120–J9999)

1. J codes include drugs that ordinarily cannot be self-administered, chemotherapy drugs, immunosuppressive drugs, inhalation solutions, and other miscellaneous drugs and solutions.
2. These codes report only the costs associated with provision of the drug. Administration including injection, infusion, or inhalation is reported separately using the applicable CPT code(s).
3. Additional codes for drugs and biologicals may be found in the Q codes and S codes.

I. Temporary Codes (K0001–K9999)

1. K codes are temporary codes used to report durable medical equipment that do not yet have a permanent national code.
2. For rules related to DME supplies, accessories, maintenance, and repair, see F. Durable Medical Equipment above.

J. Orthotic Procedures and Devices (L0000–L4999) and Prosthetic Procedures (L5000–L9900)

1. L codes include orthotic and prosthetic procedures and devices as well as scoliosis equipment, orthopedic shoes, and prosthetic implants.
2. The payer shall only pay for orthotics and prosthetics prescribed by the treating physician for a compensable injury/illness. Prior authorization must be obtained from the payer.

K. Medical Services (M0000–M0301)

1. M codes include office services, cellular therapy, prolotherapy, intragastric hypothermia, IV chelation therapy, and fabric wrapping of an abdominal aneurysm.
2. These codes are rarely reported and may not be reimbursed as they represent services for which the therapeutic efficacy has not been established, the procedure is considered experimental, or the procedure has been replaced with a more effective treatment modality.

L. Pathology and Laboratory Services (P0000–P9999)

1. P codes include chemistry, toxicology, and microbiology tests, screening Papanicolaou procedures, and various blood products.
2. Blood and blood product codes report the supply of the blood or blood product only.
3. The administration of blood or blood product is reported separately.
4. Code 36430 for transfusion of blood or blood components is reported only once per encounter regardless of the number of units provided.

M. Temporary Codes (Q0035–Q9980)

1. Q codes include temporary codes developed for reporting services and supplies that do not have a permanent national HCPCS code or CPT code. Included in this section are codes for:
 - a. Oral anti-emetic drugs
 - b. Casting supplies
 - c. Splint supplies
 - d. Low osmolar contrast
 - e. High osmolar contrast
 - f. Other supplies/services
2. Cast supplies and splints should be reported with the appropriate code from Q4001–Q4051. These codes report the cost of the supply only.
3. Cast supplies and splints are reported in addition to the CPT code for fracture management.
4. Cast supplies and splints are reported in addition to CPT codes for application of the cast or splint.

5. Refer to the CPT guidelines for rules related to reporting fracture management and cast application.

N. Diagnostic Radiology Services (R0000–R5999)

1. R codes are used for the transportation of portable x-ray and/or EKG equipment.
2. Only a single reasonable transportation charge is allowed for each trip to a single location.
3. When more than one patient receives x-ray or EKG services at the same location, the allowable transport charge is divided among all patients.

O. Temporary National Codes (Non-Medicare) (S0000–S9999)

1. The S codes are used by the private sector to report drugs, services, and supplies for which there are no national codes, but for which codes are needed by the private sector to implement policies, program, or claims processing.
2. See J codes for reporting rules related to drugs and biologicals.

P. Vision Services (V0000–V2999)

1. These V codes include vision-related supplies, including spectacles, lenses, contact lenses, prostheses, intraocular lenses, and miscellaneous lenses.

Q. Hearing Services (V5000–V5999)

1. These V codes include hearing tests and related supplies and equipment, speech-language pathology screenings, and repair of augmentative communicative systems.

R. The Facility Fee for outpatient services is the APC Amount.

III. MODIFIERS

HCPCS modifiers are required for some supplies and services. Commonly reported HCPCS modifiers include:

AU Item Furnished in Conjunction with a Urological, Ostomy, or Tracheostomy Supply

AV Item Furnished in Conjunction with a Prosthetic Device, Prosthetic, or Orthotic

AW Item Furnished in Conjunction with a Surgical Dressing

KC Replacement of Special Power Wheelchair Interface

NU New Equipment

RR Rental (use the RR modifier when DME is to be rented)

Mississippi guideline: Listed amount is the per-month allowance, except codes E0935, E0936, and E0675 which are per-day allowances.

UE Used durable medical equipment

Mississippi guideline: Used to report the purchase of used durable medical equipment.

Inpatient Hospital and Outpatient Facility Payment Schedule and Rules

I. INPATIENT AND OUTPATIENT CARE RULES

- A. **Definition.** For purposes of this schedule, “inpatient” means being admitted to a hospital setting for twenty-four (24) hours or more. An inpatient admission does not require official admission to the hospital.
- B. Health care facilities providing services to workers' compensation claimants must meet requirements of the state of Mississippi.
- C. **Billing and Reimbursement Rules for Inpatient Care.**
 - 1. Facilities must submit the bill for inpatient services within thirty (30) days after discharge. For those cases involving extended hospitalization, interim bills must be submitted every thirty (30) days.
 - 2. Reimbursement for acute inpatient hospital services shall be the maximum reimbursement allowance fixed by the rules set forth in this section of the Fee Schedule, regardless of the total charge.
 - 3. Non-covered charges include but are not necessarily limited to:
 - a. Convenience items;
 - b. Charges for services not related to the work injury/illness;
 - c. Services that were not certified by the payer or their representative as medically necessary.
 - 4. When reviewing surgical claims, including for outlier consideration, the following apply:
 - a. Most operative procedures require cardiopulmonary monitoring either by the physician performing the procedure or an anesthesiologist/anesthetist. Because these services are integral to the operating room environment, they are considered as part of the OR fee and are not separately reimbursed, nor are they included separately in the total charge for outlier consideration:
 - Cardiac monitors
 - Oximetry
 - Blood pressure monitor
 - Lasers
 - Microscopes
 - Video equipment
 - Set up fees
 - Additional OR staff
 - Gowns
 - Gloves
 - Drapes
 - Towels
 - Mayo stand covers
 - On-call or call-back fees
 - After-hours fees
 - b. Billing for surgery packs as well as individual items in the packs is not allowed and shall not be included in the total charge for outlier consideration.
 - c. A majority of invasive procedures requires availability of vascular and/or airway access; therefore, the work associated with obtaining this access is included in the cost of the service, i.e., anesthesia—airway access is associated with general anesthesia and is included in the anesthesia charges.
 - d. Recovery room and ICU rates include the charge for cardiac monitoring and oximeter. It is assumed the patient is placed in these special areas for monitoring and specialized care which is bundled into the special care rate. Call-back fees are not reimbursed for recovery room.
 - e. Separate reimbursement is not allowed for setting up portable equipment at the patient's bedside.

- f. The following items do not qualify for separate reimbursement regardless of inpatient or outpatient status, and are not included in the total charge for outlier consideration:
 - Applicators, cotton balls, band-aides
 - Syringes
 - Aspirin
 - Thermometers, blood pressure apparatus
 - Water pitchers
 - Alcohol preps
 - Ice bags
- g. Separate reimbursement is not allowed for equipment such as compressive devices, or other equipment used during the operative or immediate postoperative period.
5. Maximum reimbursement is set for the following line item charges.
 - a. IV pump/daily – \$50.00
 - b. Venipuncture reimbursement is limited to \$4.25 per collection. A collection fee is not appropriate for finger stick, throat culture, or stool specimen collection
 - c. Pharmacy add-mixture/dispensing fee is limited to \$4.50 per mixture

- D. **Implants, Durable Medical Equipment, and Supplies.** Generally, durable medical equipment and supplies provided or administered in a hospital setting are not separately reimbursed since they are included in the payment reimbursement.

Unless otherwise specifically provided herein, implantables used in the inpatient setting are included in the applicable MS-DRG reimbursement for inpatient treatment, and, therefore, the provider of inpatient services is not required to furnish the payer with an invoice for implantables.

Implantables used in the outpatient setting, are included in the applicable APC payment for outpatient services, and therefore, the provider of outpatient services is not required to furnish the payer with an invoice for implantables.

- E. **Reimbursement Methodology.** The inpatient maximum reimbursement allowable (MRA) totals are provided by MS-DRG in this Fee Schedule. As of the effective date of this publication, the MS-DRG MRA is based upon the 2016 CMS relative weights multiplied by the base rate as determined herein. This methodology includes inpatient psychiatric admissions and Long Term Acute Care (LTAC). Any MS-DRGs outside of this Fee Schedule shall be reimbursed at seventy-five percent (75%) of charges. The lesser of the billed charges or the MS-DRG MRAs represent payment in full, unless the outlier payment is applicable, or unless a contract between the payer and provider governs reimbursement, or unless otherwise specifically stated in this Fee Schedule.

1. MS-DRG Payment is calculated by multiplying the Base Rate times the Relative Weight for the MS-DRG.
2. The Base Rate for Mississippi is the current National Medicare Base Rate in effect as of the date of discharge, multiplied by two (2). This is posted annually on the Mississippi Workers' Compensation Commission (MWCC) website, Fee Schedule section.
3. Common Medicare add-ons, such as for teaching hospitals (GME), DSH and Capital PPS, will not be allowed, and shall be considered as already included in the enhanced MS-DRG Payment under this Fee Schedule.
4. All implantables shall be included in the applicable MS-DRG reimbursement for inpatient treatment, and shall not be reimbursed separately in addition to the MS-DRG payment.
5. Outlier Payments. To provide additional reimbursement for cases where the MS-DRG payment is deemed inadequate by the Commission to cover the costs incurred by the facility, the Commission has established an outlier payment for high-cost cases.

The amount eligible for outlier reimbursement is equal to Total Charges minus MS-DRG Payment minus Implantable Charges minus Non-Covered or Non-Qualified charges (as provided in Part I.B. above) minus the Outlier Threshold. The Outlier Threshold amount shall be specific to each facility and shall be equal to one-half (1/2) of the Medicare MS-DRG outlier threshold in effect for each facility at the time of discharge.

6. Any amount determined to be eligible for additional outlier reimbursement shall be reimbursed at fifteen percent (15%) above the facility's cost for the outlier eligible charges. Cost is determined using the facility's cost-to-charge ratio, as determined by Medicare (CMS), which is in effect at the time of discharge. These cost-to-charge ratios are posted annually on the MWCC website, Fee Schedule section. Outlier payment is figured by multiplying the eligible outlier amount by the cost-to-charge ratio, and then adding fifteen percent (15%) to compute the additional outlier payment due.
- F. **Emergency Room Services.** Emergency room facility fees, supplies, and treatment are reimbursed according to the Ambulatory Payment Classification system, as set forth herein under the heading "Ambulatory Surgery Center/Outpatient Facility Reimbursement." Laboratory and radiology services are reimbursed at the technical amount

listed in the corresponding section of this Fee Schedule. Physician services are to be billed on an appropriate CMS claim form or electronic submission and paid according to the proper section.

G. Observation Services

1. **Definition.** Observation services are those services furnished by a hospital on the hospital's premises, and include use of a bed and periodic monitoring by a hospital's staff. The service must be reasonable and necessary to evaluate a patient's condition or to determine need for inpatient admission. To qualify for observation status, the patient needs observation due to an unforeseen circumstance or has a medical condition with a significant degree of instability.

2. **General Guidelines**

- a. Observation begins when the patient monitoring begins and ends when the order for discharge is written or given verbally by the physician.
- b. On rare occasions, an observation stay may be extended to forty-eight (48) hours. In such cases, medical necessity must be established and pre-authorization must be given for payment by the payer.
- c. Services which are NOT considered necessary for observation are as follows:
 - (1) Services that are not reasonable and necessary for the diagnosis and treatment of the work related injury, but are provided for convenience of the patient, family, or physician
 - (2) Any substitution of an outpatient observation for a medically appropriate inpatient admission
 - (3) Services ordered as inpatient by the physician but billed as outpatient by the facility
 - (4) Standing orders for observation following outpatient surgery
 - (5) Test preparation for a surgical procedure
 - (6) Continued care of a patient who has had a significant procedure as identified with OPPS indicator S or T
- d. Observation is not reimbursable for routine preparation furnished prior to an outpatient service or recovery after an outpatient service. Please refer to the criteria for observation services.

3. **Billing and Reimbursement**

- a. Observation status is billed at an hourly monitoring rate. The hourly rate is all inclusive with the exception of *non-significant ancillary services*.
- b. Observation is billed at the rate of \$300.00 for the first three (3) hours and \$80.00 per hour thereafter. Laboratory and radiology are reimbursed according to the Fee Schedule payment limits.
- c. Revenue code 762 is used to bill observation charges.
- d. Observation services provided to a patient who is subsequently admitted as an inpatient should be included on the inpatient claim.

H. **Stand-alone Services.** When services are provided as an outpatient service, and are not performed as a surgical procedure, medical procedure, or emergency room service, then reimbursement equals the technical amount listed in the corresponding section of this Fee Schedule.

I. Disputed Medical Charges; Abusive or Unfair Billing

- 1. Disputes over charges, fees, services, or other issues related to treatment under the terms of the Workers' Compensation Law shall be resolved in accordance with the Dispute Resolution Rules set forth elsewhere in this Fee Schedule.
- 2. If the Commission determines that the charge amount for items substantially and consistently exceeds the facility's mark-up ratio, or if a facility's charges for other services or MS-DRGs is substantially and consistently higher than the average charges made for the same services or MS-DRGs by other facilities in the State, then the Commission may consider this to be an indication of abusive or unfair billing practices, and may order the facility in question to appear and show cause why penalties and other sanctions as allowed by Law should not be imposed on said facility for such abusive billing practices.

For purposes of this provision, the mark-up ratio shall be the inverse of the facility's cost-to-charge ratio. The average charges by facilities for service or MS-DRGs may be determined by reference to the publicly available MedPAR file for Medicare inpatient admissions, with due consideration being given to the differences between the Medicare inpatient population and the workers' compensation inpatient population.

II. INPATIENT REHABILITATION FACILITIES (IRFs)

A. **Inpatient Rehabilitation Facility Reimbursement Methodology.** MWCC reimbursement for inpatient rehabilitation facilities (IRFs) will be based upon the CMS prospective payment system (PPS).

1. The Fee Schedule MRA for IRFs will be two (2) times the IRF CMS pricer calculation, unless the payer and provider have a separate contract governing the reimbursement of services provided by an IRF, or unless total billed charges are less.
2. The IRF reimbursement due under this Fee Schedule will be calculated using the CMS IRF pricer calculation in effect on the date of discharge.
3. The CMS IRF pricer is used only for facilities that have met the CMS qualifications for IRF.
4. Reimbursement for IRFs is not calculated using the MS-DRG methodology.
5. The CMS IRF pricer is available at: <http://www.cms.hhs.gov/PCPricer>

B. CMS Inpatient Rehabilitation Facility Reimbursement. Medicare regulations define inpatient rehabilitation facilities (IRFs) in the Code of Federal Regulations, Part 412, and subpart B. Medicare payments to IRFs are based on the IRF prospective payment system (PPS) under subpart P of part 412. The IRF must be currently accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF), licensed by the State, and certified by Medicare as an IRF at the time the patient is treated.

The IRF must possess a Medicare/Medicaid provider number, or CMS Certification Number. The provider number consists of six digits. The first two digits indicate the state, 25 is for Mississippi, and the remaining four digits identify the facility as an IRF. The four digit suffix must be in the range of 3025–3099 for rehabilitation facilities, exempt units must have a T in the third position, e.g., 25TXXX.

Unless governed by contract between payer and provider, or unless total billed charges are less, the reimbursement for an IRF under this Fee Schedule shall be the IRF PPS calculated rate multiplied by 1.8. Other inpatient MS-DRG or PPS calculations are not appropriate to use for IRF services. The IRF PPS rate is calculated using the formula for the current fiscal year, including outlier. The final calculation is published in the *Federal Register*, prior to October 1 of each year.

IRF reimbursement is based upon the case mix group (CMG) to which the patient is assigned. MWCC will accept the CMG assigned by the Medicare CMG grouper. The CMG must be reported on the claim with revenue code 0024. This code indicates that this claim is being paid under the PPS and the revenue code can appear on a claim only once.

The *Federal Register* explains the formula for calculating the IRF PPS rate. The rates are calculated on case mix group (CMG) assignment from the combinations of ICD-10-CM codes with additional factors of labor share, wage index, rural adjustment (if applicable) and low income percentage (LIP) for a final adjusted IRF PPS reimbursement.

This calculated IRF PPS reimbursement is multiplied by 1.8 for the MWCC reimbursement rate.

MWCC will use the Medicare Pricer for the appropriate year and based on the date of discharge which is available as a free download from: <http://www.cms.hhs.gov/PCPricer>. The Medicare pricer returns the payment rate specific to the facility.

III. AMBULATORY SURGERY CENTER/OUTPATIENT FACILITY REIMBURSEMENT

- A. Reimbursement for all hospital-based outpatient and freestanding ambulatory surgery center services shall be based on the Ambulatory Payment Classification (APC) system as developed by the Centers for Medicare and Medicaid Services (CMS) using relative weights effective April 1, 2016.
- B. For implantables used in the outpatient setting, reimbursement is included in the Fee Schedule APC Amount as listed.
- C. Coding and Billing Rules
 1. Facility fees for ambulatory surgery must be billed on the UB-04 form.
 2. The CPT®/HCPCS code(s) of the procedure(s) performed determines the reimbursement for the facility fee. Report all procedures performed.
 3. If more than one surgical procedure is furnished in a single operative encounter, the multiple procedure rule applies. The primary procedure is reimbursed at the lesser of the billed charges or one hundred percent (100%) of the MRA. The second and subsequent procedures are reimbursed at the lesser of the billed charges or fifty percent (50%) of the MRA. The primary procedure is the procedure with the highest relative weight.
 4. If the billed total for an outpatient surgical encounter is less than the APC MRA, the lesser of the charge is paid to the facility.
 5. The payment rate for an APC surgical procedure includes all facility services directly related to the procedure performed on the day of surgery. Facility services include:
 - Nursing and technician services
 - Use of the facility

- Drugs, biologicals, surgical dressings, splints, casts and equipment directly related to the provision of the surgical procedure
 - Implantables
 - Materials for anesthesia
 - Administration, record keeping and housekeeping items and services
6. Separate payment is not made for the following services that are directly related to the surgery:
 - Pharmacy
 - Medical/surgical supplies
 - Sterile supplies
 - Laboratory and radiology services with no APC Amount
 - Operating room services
 - Anesthesia
 - Ambulatory surgical care
 - Recovery room
 - Treatment or observation room
 7. Pre-op workup services are included in the APC Amount and do not warrant separate reimbursement regardless of the date of service. Pre-op workup includes: Metabolic Panel, CBC, UA, PT, PTT, EKG CXR (or any of the components). Note: If a surgical procedure is cancelled after the pre-op has been completed, then the pre-op services should be paid according to this Fee Schedule.
 8. The ASC payment rate (APC Amount) has been added to the CPT code listing of fees in the Fee Schedule. The column lists the total approved facility fee for that particular CPT code.
 9. The facility fees will be paid for medically necessary services only. All ambulatory elective procedures must be precertified according to the rules and guidelines of the Fee Schedule.
 10. Procedures not assigned an APC Amount will be reimbursed according to the lesser of total billed charges or usual and customary rate.
 11. Charges for outpatient surgical codes are all inclusive and are reimbursed in total regardless of the amount billed on that line as long as the total reimbursement does not exceed the total billed charges.
- D. If a claim contains a CPT/HCPCS code with a J1 status indicator, then that code should be paid according to the Fee Schedule and all other codes on the claim, with the following exception, are considered bundled and not separately paid. If two or more CPT/HCPCS codes have a J1 status indicator, then the highest valued J1 status indicator CPT/HCPCS code should be paid at one hundred percent (100%) of the Fee Schedule and any secondary (lower valued) J1 status indicator CPT/HCPCS codes shall be paid at fifty percent (50%) of the Fee Schedule.

Other than the multiple procedure surgical discounts as listed in Section III C 3 and the J1 status indicators described in the previous paragraph, no other Medicare status indicator discounts apply. This means no discounts apply to Medicare's Q status indicator codes.

Do not separately reimburse non-implantable orthotic and prosthetic devices when associated with a procedure code that has a status code of J1. Payment is packaged into the allowable for the procedure code.

IV. CRITICAL ACCESS HOSPITALS

- A. A critical access hospital (CAH) is a small, generally geographically remote facility that is certified to provide outpatient and inpatient services.
- B. A CAH may also be granted "swing bed" approval to provide post-hospital skilled nursing facility level care in its inpatient beds.
- C. A list of currently participating Mississippi Critical Access hospitals is posted on the MWCC website at <http://www.mwcc.ms.gov>.
- D. Reimbursement
 1. Critical access hospitals are reimbursed at ninety percent (90%) of billed charges for inpatient services.
 2. Swing bed services are reimbursed according to the Skilled Nursing Facility section.
 3. Outpatient services are reimbursed according to the rules in Inpatient Hospital and Outpatient Facility Payment Schedule and Rules.

V. DRUG AND ALCOHOL TREATMENT

- A. Any admission for drug and alcohol treatment will be reimbursed by DRG according to the facility inpatient rules.
- B. Outpatient partial day treatment will be reimbursed at two hundred fifty dollars (\$250.00) per diem.
- C. Outpatient lab and radiology charges will be reimbursed according to the outpatient stand-alone rules in the facility section.

VI. MODIFIERS APPROVED FOR AMBULATORY SURGERY CENTER (ASC) HOSPITAL OUTPATIENT USE

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

27 Multiple Outpatient Hospital E/M Encounters on the Same Date

For hospital outpatient reporting purposes, utilization of hospital resources related to separate and distinct E/M encounters performed in multiple outpatient hospital settings on the same date may be reported by adding modifier 27 to each appropriate level outpatient and/or emergency department E/M code(s). This modifier provides a means of reporting circumstances involving evaluation and management services provided by physician(s) in more than one (multiple) outpatient hospital setting(s) (eg, hospital emergency department, clinic). **Note:** This modifier is not to be used for physician reporting of multiple E/M services performed by the same physician on the same date. For physician reporting of all outpatient evaluation and management services provided by the same physician on the same date and performed in multiple outpatient setting(s) (eg, hospital emergency department, clinic), see **Evaluation and Management, Emergency Department, or Preventive Medicine Services** codes.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same operative session should be identified by adding modifier 50 to the appropriate 5 digit code.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: a) planned or anticipated (staged); b) more extensive than the original procedure; or c) for therapy following a diagnostic surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For treatment of a problem that requires a return to the operating/procedure room (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M

services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

73 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure Prior to the Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well-being of the patient, the physician may cancel a surgical or diagnostic procedure subsequent to the patient's surgical preparation (including sedation when provided, and being taken to the room where the procedure is to be performed), but prior to the administration of anesthesia (local, regional block(s) or general). Under these circumstances, the intended service that is prepared for but cancelled can be reported by its usual procedure number and the addition of modifier 73. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

74 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure After Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well-being of the patient, the physician may terminate a surgical or diagnostic procedure after the administration of anesthesia (local, regional block(s), general) or after the procedure was started (incision made, intubation started, scope inserted, etc). Under these circumstances, the procedure started but terminated can be reported by its usual procedure number and the addition of modifier 74. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time, reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results

(eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Forms

I. GUIDELINES

- A. Reproduced on the following pages are the forms that should or may be used by providers when billing workers' compensation related services. Instructions are given below.
- B. Bills for services rendered should be sent directly to the party responsible for reimbursement. Do not send bills directly to the Medical Cost Containment Division as this will delay payment.
- C. The most current version of each claim form should be submitted. At the time of publication, the following forms are the most current and should be used for provider reimbursement:
 - CMS-1500 (02/12) (effective April 1, 2014); electronic equivalent 837p
 - UB-04 (effective May 23, 2007) Electronic equivalent 837i
 - J430D Dental Form (effective 2012)
- D. The information to include on each form where appropriate is:
 1. Claimant's full name and address as shown on the employer's record.
 2. Social security number should be entered in the field for insured's ID number; this cuts down on errors and helps correlate the billing to the appropriate file.
 3. Correct date of injury. Some claimants have multiple open files and can only be assigned by date.
 4. Proper name and address of the employer, not just an individual's name.
 5. Name of the insurance payer as registered with the state.
 6. Date the claimant's disability should begin per the attending physician.
 7. Attending physician's diagnoses and claimant's complaints.
 8. Disabilities the claimant has that are not related to this injury.
 9. Description of treatment plan, including any prescriptions.
 10. Indication if the injury/illness appears to be work related.
 11. Indication as to whether the claimant can be released to light or full duty work; full duty is considered to be the work at the time of the accident.
 12. Length of time the claimant should be off work as a result of the injury or illness.
 13. Date of the visit, the service(s) or procedure(s) performed, and charges.
 14. Physician's complete name and address.
 15. Physician and provider group national provider identifier (NPI) for billing group and treating physician.
 16. Physician's or group's federal tax identification number (tax identification number [TIN] or social security number).
 17. Injury/illness as described by the claimant.
- E. The following pages have samples of the CMS-1500 (02/12), UB-04, 2012 American Dental Association Dental Claim Form J430D, Request for Resolution of Dispute, and Utilization Review Request Form.

II. UTILIZATION REVIEW REQUEST FORM

The form entitled Mississippi Workers' Compensation Utilization Review is a communication tool for use between the provider and the utilization review company. The form can be faxed between the provider and payer as applicable.

The utilization review process is mandatory under the *Mississippi Workers' Compensation Medical Fee Schedule*; however, the use of the Utilization Review Request Form is optional. The use of the form is encouraged if it proves helpful in the timely processing of requests for utilization review of medical services.

Introduction

Pursuant to Mississippi Code Annotated (MCA), §71-3-15(3)(Rev. 2000), the following Fee Schedule, including Cost Containment and Utilization Management rules and guidelines, is hereby established in order to implement a medical cost containment program. This Fee Schedule, and accompanying rules and guidelines, applies to medical services rendered after the effective date of November 1, 2013³⁶, and, in the case of inpatient treatment, to services where the discharge date is on or after November 1, 2013³⁶. This Fee Schedule establishes the maximum level of medical and surgical reimbursement for the treatment of work-related injuries and/or illnesses, which the Mississippi Workers' Compensation Commission deems to be fair and reasonable.

Updates and changes before the periodic update can be found by checking the State of Mississippi Workers' Compensation Commission website <http://www.mwcc.state.ms.us/#/home> or the Optum360 website <https://www.optum360coding.com/ProductUpdates/>. Subscribers should regularly check these sites for changes

This Fee Schedule shall be used by the Workers' Compensation Commission, insurance payers, and self-insurers for approving and paying medical charges of physicians, surgeons, and other qualified health care professionals for services rendered under the Mississippi Workers' Compensation Law. This Fee Schedule applies to all medical services provided to injured workers by physicians, and also covers other medical services arranged for by a physician. In practical terms, this means professional services provided by hospital-employed physicians and other qualified health care professionals, as well as those practicing independently, are reimbursed under this Fee Schedule.

The Commission will require the use of the most current CPT®, CDT, and HCPCS codes and modifiers in effect at the time services are rendered. All coding, billing and other issues, including disputes, associated with a claim, shall be determined in accordance with the CPT rules and guidelines in effect at the time service is rendered, unless otherwise provided in this Fee Schedule or by the Commission.

As used in this Fee Schedule, CPT refers to the American Medical Association's Current Procedural Terminology codes and nomenclature. CPT is a registered trademark of the American Medical Association. CDT refers to the American Dental Association's Current Dental Terminology (CDT) codes are developed and maintained by the American Dental Association (ADA). HCPCS is an acronym for the Centers for Medicare and Medicaid Services' (CMS) Healthcare Common Procedure Coding System. HCPCS is divided into two subsets. HCPCS Level I codes are the CPT codes developed and includes maintained by the AMA. HCPCS Level II codes are developed and maintained by CMS and include codes for procedures, equipment, and supplies not found in the CPT book. However, the inclusion of a service, product or supply identified by a CPT, HCPCS, or CDT code does not necessarily imply coverage, reimbursement or endorsement. and are referred to in this fee schedule as HCPCS codes.

The inclusion of a service, product, or supply identified by a CPT, CDT, or HCPCS code does not necessarily imply coverage, reimbursement or endorsement.

I. FORMAT

This Fee Schedule is comprised of the following sections: Introduction; General Rules; Billing and Reimbursement Rules; Medical Records Rules; Dispute Resolution Rules; Utilization Review Rules; Rules for Modifiers and Code Exceptions; Pharmacy Rules; Other Qualified Health Care Professional Rules; Home Health Rules; Skilled Nursing Facility Rules; Evaluation and Management; Anesthesia; Pain Management; Surgery; Radiology; Pathology and Laboratory; Medicine Services; Therapeutic Services; Dental; Durable Medical Equipment (DME), Orthotics, Prosthetics and Other HCPCS Codes; Inpatient Hospital and Outpatient Facility Payment Schedule and Rules; and Forms. Each section listed above has specific instructions (rules/guidelines). The Fee Schedule is divided into these sections for structural purposes only. Providers are to use the specific section(s) that contains the procedure(s) they perform or the service(s) they render. **In the event a rule/guideline contained in one of the specific service sections conflicts with a general rule/guideline, the specific section rule/guideline will supersede, unless otherwise provided elsewhere in this Fee Schedule.**

This Fee Schedule utilizes procedure codes under copyright agreement. The descriptions included are full procedure descriptions. A complete list of modifiers is included in a separate section for easy reference.

II. SCOPE

The *Mississippi Workers' Compensation Medical Fee Schedule* does the following:

- A. Establishes rules/guidelines by which the employer shall furnish, or cause to be furnished, to an employee who suffers a bodily injury or occupational disease covered by the Mississippi Workers' Compensation Law, reasonable and necessary medical, surgical, and hospital services and medicines, supplies or other attendance or treatment as necessary. The employer shall provide to the injured employee such medical or dental surgery, crutches, artificial

limbs, eyes, teeth, eyeglasses, hearing apparatus, and other appliances which are reasonable and necessary to treat, cure, and/or relieve the employee from the effects of the injury/illness, in accordance with MCA §71-3-15 (Rev. 2000), as amended.

- B. Establishes a schedule of maximum reimbursement allowances (MRA) for such treatment, attendance, service, device, apparatus, or medicine.
- C. Establishes rules/guidelines by which a health care provider shall be paid the lesser of (a) the provider's total billed charge, or (b) the maximum reimbursement allowance (MRA) established under this Fee Schedule.
- D. Establishes rules for cost containment to include utilization review of health care and health care services, and provides for the acquisition by an employer/payer, other interested parties, and the Mississippi Workers' Compensation Commission, of the necessary records, medical bills, and other information concerning any health care or health care service under review.
- E. Establishes rules for the evaluation of the appropriateness of both the level and quality of health care and health care services provided to injured employees, based upon medically accepted standards.
- F. Authorizes employers/payers to withhold payment from, or recover payment from, health facilities or health care providers that have made excessive charges or which have provided unjustified and/or unnecessary treatment, hospitalization, or visits.
- G. Provides for the review by the employer/payer or Commission of any health facility or health care provider records and/or medical bills that have been determined not to be in compliance with the schedule of charges established herein.
- H. Establishes that a health care provider or facility may be required by the employer/payer to explain in writing the medical necessity of health care or health care service that is not usually associated with, is longer and/or more frequent than, the health care or health care service usually accompanying the diagnosis or condition for which the patient is being treated.
- I. Provides for medical cost containment review and decision responsibility. The rules and definitions hereunder are not intended to supersede or modify the Workers' Compensation Act, the administrative rules of the Commission, or court decisions interpreting the Act or the Commission's administrative rules.
- J. Provides for the monitoring of employers/payers to determine their compliance with the criteria and standards established by this Fee Schedule.
- K. Establishes deposition/witness fees.
- L. Establishes fees for medical reports.
- M. Provides for uniformity in billing of provider services.
- N. Establishes rules/guidelines for billing.
- O. Establishes rules/guidelines for reporting medical claims for service.
- P. Establishes rules/guidelines for obtaining medical services by out-of-state providers.
- Q. Establishes rules/guidelines for Utilization Review to include pre-certification, concurrent review, discharge planning and retrospective review.
- R. Establishes rules for dispute resolution which includes an appeal process for determining disputes which arise under this Fee Schedule.
- S. Establishes a peer review system for determining medical necessity. Peer review is conducted by professional practitioners of the same specialty as the treating medical provider on a particular case.
- T. Establishes the list of health care professionals who are considered authorized providers to treat employees under the Mississippi Workers' Compensation Law; and who, by reference in this rule, will be subject to the rules, guidelines and maximum reimbursement limits in this Fee Schedule.
- U. Establishes financial and other administrative penalties to be levied against payers or providers who fail to comply with the provisions of the Fee Schedule, including but not limited to interest charges for late billing or payment, percentage penalties for late billing or payment, and additional civil penalties for practices deemed unreasonable by the Commission.

III. MEDICAL NECESSITY

The concept of medical necessity is the foundation of all treatment and reimbursement made under the provision of §71-3-15, Mississippi Code of 1972, as amended. For reimbursement to be made, services and supplies must meet the definition of “medically necessary.” The sole use of extraneous guidelines, including but not limited to the Official Disability Guidelines (“ODG”), to determine the appropriateness or extent of treatment or reimbursement is prohibited. Continuation of treatment shall be based on the concept of medical necessity and predicated on objective or appropriate subjective improvements in the patient’s clinical status. Arbitrary limits on treatment or reimbursement based solely on diagnosis or guidelines outside this Fee Schedule are not permitted.

- A. For the purpose of the Workers’ Compensation Program, any reasonable medical service or supply used to identify or treat a work-related injury/illness which is appropriate to the patient’s diagnosis, is based upon accepted standards of the health care specialty involved, represents an appropriate level of care given the location of service, the nature and seriousness of the condition, and the frequency and duration of services, is not experimental or investigational, and is consistent with or comparable to the treatment of like or similar non-work related injuries, is considered “medically necessary.” The service must be widely accepted by the practicing peer group, based on scientific criteria, and determined to be reasonably safe. It must not be experimental, investigational, or research in nature except in those instances in which prior approval of the payer has been obtained. For purposes of this provision, “peer group” is defined as similarly situated physicians of the same specialty, licensed in the State of Mississippi, and qualified to provide the services in question.
- B. Services for which reimbursement is due under this Fee Schedule are those services meeting the definition of “medically necessary” above and includes such testing or other procedures reasonably necessary and required to determine or diagnose whether a work-related injury or illness has been sustained, or which are required for the remedial treatment or diagnosis of an on-the-job injury, a work-related illness, a pre-existing condition affected by the injury or illness, or a complication resulting from the injury or illness, and which are provided for such period as the nature of the injury or process of recovery may require.
- C. Treatment of conditions unrelated to the injuries sustained in an industrial accident may be denied as unauthorized if the treatment is directed toward the non-industrial condition or if the treatment is not deemed medically necessary for the patient’s rehabilitation from the industrial injury.

D. Services that are experimental or investigational, including but not limited to CPT Category II and Category III codes, are not reimbursable for this Fee Schedule. Please refer to the MWCC website (www.mwcc.ms.gov) for a list of some of these procedures.

IV. DEFINITIONS

Act means Mississippi Workers’ Compensation Law, Mississippi Code Annotated (MCA), §71-3-1 et seq (Rev. 2000 as amended).

Adjust means that a payer or a payer’s agent reduces or otherwise alters a health care provider’s request for payment.

APC means ambulatory payment classification and guidelines as developed by the Centers for Medicare and Medicaid Services (CMS) and adopted in this Fee Schedule.

Appropriate care means health care that is suitable for a particular patient, condition, occasion, or place.

ASA RVG means the American Society of Anesthesiologists (ASA) Relative Value Guide® (RVG), a listing of the anesthesia codes and modifiers and base units used for reporting anesthesia services.

AWP means Average Wholesale Price; a price generally twenty percent (20%) greater than a manufacturer sells to distributors and large customers and is based on data obtained from manufacturers, distributors, and other suppliers.

Bill means a claim submitted by a provider to a payer for payment of health care services provided in connection with a covered injury or illness.

Bill adjustment means a reduction of a fee on a provider’s bill, or other alteration of a provider’s bill.

By report (BR) means that the procedure is new, or is not assigned a maximum fee, and requires a written description included on or attached to the bill. **“By report” (BR²)** procedures require a complete listing/description of the service, the dates of service, the procedure code, and the payment requested. The report is included in the reimbursement for the procedure.

Carrier means any stock company, mutual company, or reciprocal or inter-insurance exchange authorized to write or carry on the business of Workers’ Compensation Insurance in this State, or self-insured group, or third-party payer, or self-insured employer, or uninsured employer.

Case means a covered injury or illness occurring on a specific date and identified by the worker's name and date of injury or illness.

CCI (See National Correct Coding Initiative.)

CDT means Current Dental Terminology, a medical code set maintained and copyrighted by the American Dental Association used for reporting dental services.

CMS-1500 means the CMS-1500 form and instructions that are used by non-institutional providers and suppliers to bill for outpatient services. Use of the most current CMS-1500 form is required.

Commission means the Mississippi Workers' Compensation Commission (MWCC).

Consultation means a service provided by a physician whose opinion or advice regarding evaluation and/or management of a specific problem is requested by another physician or other appropriate source. If a consultant, subsequent to the first encounter, assumes responsibility for management of the patient's condition, that physician becomes a treating physician. The first encounter is a consultation and shall be billed and reimbursed as such. A consultant shall provide a written report of his/her findings. *A second opinion is considered a consultation.*

Controverted claim is a workers' compensation claim which is pending before the Commission and in which the patient or patient's legal representative has filed a Petition to Controvert.

Covered injury or illness means an injury or illness for which treatment is mandated under the Act.

Critical care means care rendered in a variety of medical emergencies that requires the constant attention of the practitioner, such as cardiac arrest, shock, bleeding, respiratory failure, postoperative complications, and is usually provided in a critical care unit or an emergency department.

CPT (Current Procedural Terminology) means a set of codes, descriptions, and guidelines developed by the American Medical Association, intended to describe procedures and services performed by physicians and other health care professionals. The CPT code set is also used by other entities to report outpatient services. Each procedure or service is identified with a five-digit code. CPT codes may also be referred to as HCPCS Level I codes.

Day means a continuous 24-hour period.

Diagnostic procedure means a service that helps determine the nature and causes of a disease or injury.

Durable medical equipment (DME) means specialized equipment designed to stand repeated use, appropriate for home use, and used solely for medical purposes.

Employer Medical Evaluation (EME) means a second opinion evaluation available to the Employer or Carrier pursuant to MCA §71-3-15(1) (Rev. 2000) for the purpose of evaluating temporary or permanent disability, or the medical treatment being rendered to the injured worker.

Expendable medical supply means a disposable article that is needed in quantity on a daily or monthly basis.

Follow-up care means the care which is related to the recovery from a specific procedure and which is considered part of the procedure's maximum reimbursement allowance, but does not include complications.

Follow-up days (FUD) are the days of care following a surgical procedure which are included in the procedure's maximum reimbursement allowance amount, but which do not include complications. The follow-up day period begins on the day of the surgical procedure(s).

HCPCS means Healthcare Common Procedure Coding System, an alpha-numeric medical code set maintained by the Centers for Medicare and Medicaid Services used for reporting services, durable medical equipment, and supplies. HCPCS codes may also be referred to as HCPCS Level II codes.

Health care review means the review of a health care case, bill, or both by the payer or the payer's agent.

Incident-to means that services and supplies are commonly furnished as an integral part of the primary service or procedure and not reimbursed separately.

Incidental surgery means surgery performed through the same incision, on the same day, by the same doctor, not increasing the difficulty or follow-up of the main procedure, or not related to the diagnosis.

~~**Incorrect payment** means the provider was not reimbursed according to the rules/guidelines of the Fee Schedule and the payer has failed to provide any reasonable basis for the adjusted payment.~~

Independent medical examination (IME) means a consultation provided by a physician to evaluate a patient at the request of the Commission. This evaluation may include an extensive record review and physical examination of the patient and requires a written report.

Independent procedure means a procedure that may be carried out by itself, completely separate and apart from the total service that usually accompanies it.

Inpatient services means services rendered to a person who is admitted as an inpatient to a hospital.

Maximum reimbursement allowance (MRA) means the maximum fee amount allowed for medical services as set forth in this Fee Schedule.

Medical only case means a case that does not involve more than five (5) days of disability or lost work time and for which only medical treatment is required.

Medically accepted standard means a measure set by a competent authority as the rule for evaluating quality or quantity of health care or health care services and which may be defined in relation to any of the following:

- Professional performance
- Professional credentials
- The actual or predicted effects of care
- The range of variation from the norm

Medically necessary means any reasonable medical service or supply used to identify or treat a work-related injury/illness which is appropriate to the patient's diagnosis, is based upon accepted standards of the health care specialty involved, represents an appropriate level of care given the location of service, the nature and seriousness of the condition, and the frequency and duration of services, is not experimental or investigational, and is consistent with or comparable to the treatment of like or similar non-work related injuries. Utilization management or review decisions shall not be based on application of clinical guidelines, but must include review of clinical information submitted by the provider and represent an individualized determination based on the worker's current condition and the concept of medical necessity predicated on objective or appropriate subjective improvements in the patient's clinical status.

Medical record means a record in which the medical service provider records the subjective findings, objective findings, diagnosis, treatment rendered, treatment plan, and return to work status and/or goals and impairment rating as applicable.

Medical supply means either a piece of durable medical equipment or an expendable medical supply.

National Correct Coding Initiative means the official list of codes from the Centers for Medicare and Medicaid Services' (CMS) National Correct Coding Policy Manual that identifies services considered an integral part of a comprehensive code.

NCCI (See National Correct Coding Initiative.)

Observation services means services rendered to a person who is designated or admitted to a hospital or facility as observation status.

Operative report means the practitioner's written description of the surgery and includes all of the following:

- A preoperative diagnosis;
- A postoperative diagnosis;
- A step-by-step description of the surgery;
- A description of any problems that occurred in surgery; and
- The condition of the patient upon leaving the operating room.

Optometrist means an individual licensed to practice optometry.

Orthotic equipment means an orthopedic apparatus designed to support, align, prevent, or correct deformities, or improve the function of a moveable body part.

Orthotist means a person skilled in the construction and application of orthotic equipment.

Outpatient service means services provided to patients at a time when they are not hospitalized as inpatients.

Payer means the employer or self-insured group, carrier, or third-party administrator (TPA) who pays the provider billings.

Pharmacy means the place where the science, art, and practice of preparing, preserving, compounding, dispensing, and giving appropriate instruction in the use of drugs is practiced.

Practitioner means a person licensed, registered, or certified as an acupuncturist, audiologist, doctor of chiropractic, doctor of dental surgery, doctor of medicine, doctor of osteopathy, doctor of podiatry, doctor of optometry, massage therapist, nurse, nurse anesthetist, nurse practitioner, occupational therapist, orthotist, pharmacist, physical therapist, physician assistant, prosthetist, psychologist, or other person licensed, registered, or certified as a health care professional or provider.

Primary procedure means the therapeutic procedure most closely related to the principal diagnosis, and in billing, the code with the highest ~~relative value unit (RVU)~~ that is neither an add-on code nor a code exempt from modifier 51 shall be considered the primary procedure. Reimbursement for the primary procedure is not dependent on the ordering or re-ordering of codes.

Procedure means a unit of health service.

Procedure code means a five-digit numerical sequence or a sequence containing an alpha character and preceded or followed by four digits, which identifies the service performed and billed.

Properly submitted bill means a request by a provider for payment of health care services submitted to a payer on the appropriate forms with appropriate documentation and within the time frame established under the guidelines of the Fee Schedule.

Prosthesis means an artificial substitute for a missing body part.

Prosthetist means a person skilled in the construction and application of prostheses.

Provider means a facility, health care organization, or a practitioner who provides medical care or services.

Resequenced code means a code that is printed in the CPT book out of numeric sequence but is printed in this Fee Schedule in the numeric order.

Secondary procedure means a surgical procedure performed during the same operative session as the primary surgery but considered an independent procedure that may not be performed as part of the primary surgery.

Special report means a report requested by the payer to explain or substantiate a service or clarify a diagnosis or treatment plan.

Specialist means a board-certified practitioner, board-eligible practitioner, or a practitioner otherwise considered an expert in a particular field of health care service by virtue of education, training, and experience generally accepted by practitioners in that particular field of health care service.

Usual and customary means that when a payment is designated herein as "usual and customary," the amount of the payment equates to the charge value reported by FAIR Health, Inc. in its FH RV Benchmarks (or other FAIR Health, Inc. Benchmark product available on the date of service) products at the 40th percentile for the applicable geographic area in Mississippi.

V. HOW TO INTERPRET THE FEE SCHEDULE

For each procedure, the Fee Schedule table includes the following columns and details (if applicable):

Code Icons

Add-on Codes

+ denotes procedure codes that are considered "add-on" codes as defined in the CPT book.

Modifier 51 Exempt

⊖ denotes procedure codes that are exempt from the use of modifier 51 and are not designated as add-on procedures/services as defined in the CPT book. Modifier 51 exempt services and procedures can be found in Appendix E of CPT ~~2013. Additional codes that should not be subject to modifier 51 have been identified by Optum based upon CPT guidelines and are included in this Fee Schedule using the same CPT icon.~~ 2016.

Ⓢ denotes additional codes that should not be subject to modifier 51 as identified by Optum360 based upon CPT guidelines.

Moderate (Conscious) Sedation

⦿ denotes procedure codes that include conscious sedation as an inherent part of providing the procedure.

Resequenced Codes

denotes procedure codes that are in numeric order but are considered resequenced and display in a different order within the 20136 CPT book.

APC J Status

J1 applicable to APC payments. See the Inpatient Hospital and Outpatient Facility Payment Schedule and Rules section for more information.

Code

This Fee Schedule uses 2013~~6~~ CPT, CDT, and HCPCS codes.

Modifiers

In the HCPCS section modifiers that affect payment are listed in this column. See the HCPCS section for more information regarding the modifiers.

Description

This Fee Schedule uses 2013~~6~~ full descriptions.

Relative Value

~~This column lists the relative value unit (RVU) assigned to each procedure. There are, however, procedures too variable to accept a set value—these are “by report” procedures and are noted BR in the Amount column. Procedures with a 0.00 in the Relative Value column and a \$0.00 in the Amount column are not covered or are not reimbursed.~~

Amount

This column lists the total ~~reimbursable~~ maximum allowable as a monetary amount. Procedures with a \$0.00 in the Amount column are not covered or are not reimbursed.

PC Amount

Where there is an identifiable professional and technical component to a procedure, the portion considered to be the maximum allowable for the professional component is listed in the PC Amount column. Procedures with a \$0.00 in the PC Amount column are considered one hundred percent (100%) technical. See Rules for Modifiers and Code Exceptions for additional information.

TC Amount

~~Where there is an identifiable professional and technical component to a procedure, the portion considered to be the professional component is listed. The professional component gives the total reimbursable as a monetary amount, maximum allowable for the technical component can be identified as is listed in the TC Amount ~~minus~~ column. Procedures with a \$0.00 in the ~~PGTC~~ Amount column or where the TC column Amount column is blank are considered one hundred percent (100%) professional.~~ See Rules for Modifiers and Code Exceptions for additional information.

FUD

Follow-up days (FUD) included in a surgical procedure's global charge are listed in this column.

Postoperative periods of 0, 10, and 90 days are designated in the Fee Schedule as 000, 010, and 090 respectively. The following special circumstances are also listed in the postoperative period:

- MMM Designates services furnished in uncomplicated maternity care. This includes antepartum, delivery, and postpartum care.
- XXX Designates services where the global concept does not apply.
- YYY Designates services where the payer must assign a follow-up period based on documentation submitted with the claim. Procedures designated as YYY in the fee schedule include unlisted procedure codes.
- ZZZ Designates services that are add-on procedures and as such have a global period that is determined by the primary procedure.

Assist Surg

The assistant surgeon column identifies procedures that are approved for an assistant to the primary surgeon whether a physician, physician assistant (PA), registered nurse first assistant (RNFA, RA), or other individual qualified for reimbursement as an assistant under the Fee Schedule.

APC Amount

Ambulatory Payment Classification (APC) is a payment method for facility outpatient services. The APC system as developed by the Centers for Medicare and Medicaid Services (CMS) includes many of the supplies that have previously been separately billed. These supplies will now be bundled into the APC Amount consistent with CMS guidelines. The APC Amount shall constitute the reimbursement amount for both hospital based and freestanding outpatient facilities.

VI. AUTHORIZED PROVIDERS

The following health care providers are recognized by the Mississippi Workers' Compensation Commission as acceptable to provide treatment to injured workers under the terms of the Act, and must comply with the rules, guidelines, billing and reimbursement policies, and maximum reimbursement allowance (MRA) contained in this Fee Schedule when providing treatment or service under the terms of the Act:

- Acupuncturist (L.A.C.)
- Audiologist
- Certified Registered Nurse Anesthetist (C.R.N.A.)
- Doctor of Chiropractic (D.C.)
- Doctor of Dental Surgery (D.D.S.)/Doctor of Dental Medicine (D.D.M.)
- Doctor of Osteopathy (D.O.)
- Licensed Clinical Social Worker (L.C.S.W.)
- Licensed Nursing Assistant
- Licensed Practical Nurse (L.P.N.)
- Massage Therapist
- Medical Doctor (M.D.)
- Nurse Practitioner (N.P.)
- Occupational Therapist (O.T.)
- Optometrist (O.D.)
- Oral Surgeon (M.D., D.O., D.M.D., D.D.S.)
- Pharmacist (R.Ph.)
- Physical Therapist (P.T.)
- Physical or Occupational Therapist Assistant (P.T.A., O.T.A.)
- Physician Assistant (P.A.)
- Podiatrist (D.P.M.)
- Prosthetist or Orthotist
- Psychologist (Ph.D.)
- Registered Nurse (R.N.)
- Registered Nurse First Assistant (R.N.F.A., R.A.)
- Speech Therapist

All health care providers, as listed herein, are subject to the rules, limitations, exclusions, and maximum reimbursement allowances of this Fee Schedule. Medical treatment under the terms of the Act may be provided by any other person licensed, registered, or certified as a health care professional if approved by the payer or Commission, and in such case, said provider and payer shall be subject to the rules and guidelines, including maximum reimbursement amounts, provided herein.

VII. INFORMATION PROGRAM

The ~~Mississippi~~ Workers' Compensation Commission shall provide ongoing information regarding this Fee Schedule for providers, payers, their representatives and any other interested persons or parties. This information shall be provided primarily through informational sessions and seminar presentations at ~~our~~the Mississippi Workers' Compensation Annual Education Educational Association Conference as well as the distribution of appropriate information materials via the Commission's website (www.mwcc.ms.gov), and by other means as needed. Updates to this Fee Schedule will also be posted to the Optum360 website <https://www.optum360coding.com/ProductUpdates/>.

General Rules

I. CONFIRMATORY CONSULTATION

As provided in §71-3-15(1) of the Act, and in MWCC General Rule 9, a payer/employer may request a second opinion examination or evaluation for the purpose of evaluating temporary or permanent disability or medical treatment being rendered. This examination is considered a confirmatory consultation. The confirmatory consultation is billed using the appropriate level and site-specific consultation code with modifier 32 appended to indicate a mandated service and paid in accordance with the Fee Schedule.

II. CODING STANDARD

- A. The most current version of the American Medical Association's *Current Procedural Terminology* (CPT®) or the American Dental Association's *CDT 2016: Dental Procedure Codes* in effect at the time service is rendered or provided shall be the authoritative coding guide, unless otherwise specified in this Fee Schedule.
- B. The most current version of HCPCS codes developed by CMS in effect at the time service is rendered or provided shall be the authoritative coding guide for durable medical equipment, prosthetics, orthotics, and other medical supplies (DMEPOS), unless otherwise specified in this Fee Schedule.
- C. Services will be coded according to the appropriate code edits. For the purpose of this Fee Schedule, the National Correct Coding Initiative (NCCI) edits are used, and apply to all sections unless an exception is addressed in a particular section.

III. DEPOSITION/WITNESS FEES; MEDICAL RECORDS AFFIDAVIT

- A. Any health care provider who gives a deposition or is otherwise subpoenaed to appear in proceedings pending before the Commission shall be paid a witness fee as provided by MWCC Procedural Rule 18(h) in the amount of \$25.00 per day plus mileage reimbursement at the rate authorized by MWCC General Rule 14. Procedure code 99075 must be used to bill for a deposition.
- B. In addition to the above fee and mileage reimbursement, any health care provider who gives testimony by deposition or who appears in person to testify at a hearing before the Commission shall be paid \$500.00 for the first hour and \$125.00 per quarter hour thereafter. This fee includes necessary preparation time. In the event a deposition is cancelled through no fault of the provider, the provider shall be entitled to a payment of \$250.00 unless notice of said cancellation is given to the provider at least 72 hours in advance. In the event a deposition is cancelled through no fault of the provider within 24 hours of the scheduled time, then, in that event, the provider shall be paid the rate due for the first hour of a deposition. Nothing stated herein shall prohibit a medical provider and a party seeking to take the medical provider's deposition from entering into a separate contract which provides for reimbursement other than as above provided.
- C. Pursuant to Mississippi Workers' Compensation Commission Procedural Rule 9, an examining or treating physician may execute an affidavit in lieu of direct testimony. The Physician's Medical Record Custodian is allowed to sign the affidavit in lieu of the physician's signature. Such charge for execution of the affidavit is limited to a maximum reimbursement of \$25.00. Reimbursement for copies of medical records that are attached to affidavits shall be made as outlined elsewhere in the Fee Schedule.
- D. Any health care provider who gives a deposition or is otherwise subpoenaed to provide information, documents, or other records of any kind may be entitled to make an entry of appearance as a party in the underlying workers' compensation claim for the limited purpose of contesting the subpoena and/or the scope of the requested information or deposition. No part of this section shall be construed to create any additional liability on the part of the health care provider beyond that set forth in Mississippi Code Annotated (MCA) §71-3-59(2) or otherwise set forth in the Mississippi Workers' Compensation Law and/or the Fee Schedule. Pursuant to MCA §71-3-59(2), the Commission may award attorney's fees and expenses to the health care provider in the event the Commission finds the scope of the subpoena, deposition, or other information requested from the health care provider is an institution, continuance, or delay of proceedings without reasonable grounds by the party seeking the information from the health care provider and/or the attorney advising such party. Pursuant to MCA §71-3-59(2), the Commission may also impose a civil penalty not to exceed ten thousand dollars (\$10,000.00) against the party and/or the attorney advising such party seeking the information from the health care provider for each violation. Similarly, the Commission may also award attorney's fees, expenses, and/or the civil penalty against the health care provider and/or their attorney in the event the

Commission finds that the health care provider's challenge to the subpoena, deposition, or other requested information is an institution, continuance, or delay of proceedings without reasonable grounds.

IV. IMPAIRMENT RATING

- A. In determining the extent of permanent impairment attributable to a compensable injury, the provider shall base this determination on the most current edition of the *Guides to the Evaluation of Permanent Impairment*, as published and copyrighted by the American Medical Association which is in effect at the time the service is rendered. Only a medical doctor is entitled under these rules to reimbursement for conducting an impairment rating evaluation.
- B. A provider is entitled to reimbursement for conducting an impairment rating evaluation and determining the extent of permanent impairment, and should bill for such services using CPT code 99455. The maximum reimbursement for CPT code 99455 shall be \$250.00.

V. INDEPENDENT MEDICAL EXAMINATION (IME)

- A. An independent medical examination (IME) may be ordered by the Mississippi Workers' Compensation Commission or its Administrative Judges. A practitioner other than the treating practitioner must do the medical examination, and the Commission or Judge shall designate the examiner.
- B. An independent medical examination (IME) shall include a study of previous history and medical care information, diagnostic studies, diagnostic x-rays, and laboratory studies, as well as an examination and evaluation. An IME can only be ordered by the Workers' Compensation Commission or one of its Administrative Judges. A copy of the report must be sent to the patient, or his attorney if represented, the payer, and the Mississippi Workers' Compensation Commission.
- C. The fee for the IME may be set by the Commission or Judge, or negotiated by the payer and provider prior to setting the appointment, and in such cases, reimbursement shall be made according to the order of the Commission or Judge, or according to the mutual agreement of the parties. In the absence of an agreement or order regarding reimbursement for an IME, the provider shall bill for the IME using the appropriate level and site-specific consultation code appended with modifier 32 to indicate a mandated service, and shall be reimbursed according to the Fee Schedule.

VI. EMPLOYER'S MEDICAL EXAMINATION (EME)

- A. An examination of the claimant by a physician of the employer's/carrier's choosing. If the claimant refuses these services, the claimant's benefits may be suspended. The employer/carrier may not unilaterally suspend benefits based upon the claimant's failure to attend an EME. The statute authorizes only the Commission to suspend benefits for failure to comply with medical treatment.

VII. MAXIMUM MEDICAL IMPROVEMENT

- A. When an employee has reached maximum medical improvement (MMI) for the work related injury and/or illness, the physician should promptly, and at least within fourteen (14) days, submit a report to the payer showing the date of maximum medical improvement (MWCC Form B9,27).
- B. Maximum medical improvement is reached at such time as the patient reaches the maximum benefit from medical treatment or is as far restored as the permanent character of his injuries will permit and/or the current limits of medical science will permit. Maximum medical improvement may be found even though the employee will require further treatment or care.

VIII. OUT-OF-STATE MEDICAL TREATMENT

- A. Each employer shall furnish all reasonable and necessary drugs, supplies, hospital care and services, and medical and surgical treatment for the work-related injury or illness. All such care, services, and treatment shall be performed at facilities within the state when available.
- B. When billing for out-of-state services, supporting documentation is necessary to show that the service being provided cannot be performed within the state, the same quality of care cannot be provided within the state, or more cost-effective care can be provided out-of-state. In determining whether out-of-state treatment is more cost effective, this question must be viewed from both the payer and patient's perspective. Treatment should be provided in an area reasonably convenient to the place of the injury or the residence of the injured employee, in addition to being reasonably suited to the nature of the injury.

- C. Reimbursement for out-of-state services shall be based on one of the following, in order of preference: (1) the workers' compensation fee schedule for the state in which services are rendered; or (2) in cases where there is no applicable fee schedule for the state in which services are rendered, or the fee schedule in said state excludes or otherwise does not provide reimbursement allowances for the services rendered, reimbursement should be paid at the usual and customary rate for the geographical area in which the services are rendered; or (3) reimbursement for out-of-state services may be based on the mutual agreement of the parties. The *Mississippi Workers' Compensation Medical Fee Schedule* coding and billing rules must apply whenever an injured employee is receiving workers' compensation benefits under Mississippi law or would be followed entitled to receive benefits under Mississippi law, whether the treatment is in Mississippi or any other state in order for out-of-state providers to obtain reimbursement.
- D. Prior authorization must be obtained from the payer for referral to out-of-state providers. The documentation must include the following:
1. Name and location of the out-of-state provider,
 2. Justification for an out-of-state provider, including qualifications of the provider and description of services being requested.

VIII. AUTHORIZATION FOR TREATMENT

- A. **Prior Authorization.** Providers must request authorization from the payer before service is rendered for the services and supplies listed below:
1. Non-emergency elective inpatient hospitalization
 2. Non-emergency elective inpatient surgery
 3. Non-emergency elective outpatient surgery
 4. Physical medicine treatments after 15 visits or 30 days, whichever comes first
 5. Rental or purchase of supplies or equipment over the amount of \$300.00 per item
 6. Rental or purchase of TENS
 7. Home health services
 8. Pain clinic/therapy programs, including interdisciplinary pain rehabilitation programs
 9. External spinal stimulators
 10. Pain control programs
 11. Work hardening programs, functional capacity testing, ISO kinetic testing
 12. Referral for orthotics or prosthetics
 13. Referral for acupuncture
 14. Referral for biofeedback
 15. Referral to psychological testing/counseling
 16. Referral to substance abuse program
 17. Referral to weight reduction program
 18. Referral to any non-emergency medical service outside the State of Mississippi
 19. Repeat MRI (more than one per injury)
 20. Repeat CT Scan (more than one per injury)
 21. Intraoperative neurophysiologic monitoring (e.g., SSEP, VEP, DEP, BAEP, MEP)
- B. **Response Time.** The payer must respond within two (2) business days to a request of prior authorization for non-emergency services.
- C. **Federal Facilities.** Treatment provided in federal facilities requires authorization from the payer. However, federal facilities are exempt from the billing requirements and reimbursement policies in this manual.
- D. **Pre-certification for Non-emergency Surgery.** Providers must pre-certify all non-emergency surgery. However, certain catastrophic cases require frequent returns to the operating room (O.R.) (e.g., burns may require daily surgical debridement). In such cases, it is appropriate for the provider to obtain certification of the treatment plan to include multiple surgical procedures. The provider's treatment plan must be specific and agreement must be mutual between the provider and the payer regarding the number and frequency of procedures certified.
- E. **Retrospective Review.** Failure to obtain pre-certification as required by this Fee Schedule shall not, in and of itself, result in a denial of payment for the services provided. Instead, the payer, if requested to do so by the provider within one (1) year of the date of service or discharge, shall conduct a retrospective review of the services, and if the payer determines that the services provided would have been pre-certified, in whole or in part, if pre-certification had been

timely sought by the provider, then the payer shall reimburse the provider for the approved services according to the Fee Schedule, or, if applicable, according to the separate fee agreement between the payer and provider, less a ten percent (10%) penalty for the provider's failure to obtain pre-certification as required by this Fee Schedule. This penalty shall be computed as ten percent (10%) of the total allowed reimbursement. If, upon retrospective review, the payer determines that pre-certification would not have been given, or would not have been given as to part of the requested services, then the payer shall dispute the bill and proceed in accordance with the Billing and Reimbursement Rules as hereafter provided.

- F. **Authorization Provided by Employer or Payer.** When authorization for treatment is sought and obtained from the employer, or payer, whether verbally or in writing, and medical treatment is rendered in good faith reliance on this authorization, the provider is entitled to payment from the employer or payer for the initial visit or evaluation, or in emergency cases, for treatment which is medically necessary to stabilize the patient. Reimbursement is not dependent on, and payment is due regardless of, the outcome of medically necessary services which are provided in good faith reliance upon authorization given by the employer or payer.

IX. RETURN TO WORK

If an employee is capable of some form of gainful employment, it is advisable for the physician to release the employee to light work and make a specific report to the payer as to the date of such release and setting out any restrictions on such light work. It can be to the employee's economic advantage to be released to light or alternative work, since he/she can receive compensation based on sixty-six and two-thirds percent (66 2/3%) of the difference between the employee's earnings in such work and the employee's pre-injury average weekly wage. The physician's judgment in such matters is extremely important, particularly as to whether the patient is medically capable of returning to work in some capacity. Return to work decisions should be based on objective findings, and the physician's return to work assessment should identify, if possible, any alternative duty employment to which the patient may return if return to full duty is not medically advisable.

XI. SELECTION OF PROVIDERS

The selection of appropriate providers for diagnostic testing or analysis, including but not limited to surgical/procedure facilities, CAT scans, MRI, x-ray, ~~and~~ laboratory, physical or occupational therapy, including work hardening, functional capacity evaluations, chronic pain programs, or massage therapy shall be at the direction of the treating or prescribing physician. In the absence of specific direction from the treating or prescribing physician, the selection shall be made by the payer, in consultation with the treating or prescribing physician.

Referral for an electromyogram and/or a nerve conduction study shall be at the discretion and direction of the physician in charge of care, and neither the payer nor the payer's agent may unilaterally or arbitrarily redirect the patient to another provider for these tests. The payer or the payer's agent may, however, discuss with the physician in charge of care appropriate providers for the conduct of these tests in an effort to reach an agreement with the physician in charge as to who will conduct an electromyogram and/or nerve conduction study in any given case.

The selection of providers for the purchase or rental of durable medical equipment shall be at the direction of the payer.

The selection of providers for medical treatment or service, other than as above provided, shall be in accordance with the provisions of MCA §71-3-15 ~~(Rev. 2000).~~

XII. DRUG SCREENING (MCA §71-3-121)

Only one (1) drug screen or drug test result shall be eligible for reimbursement for each drug test conducted on the same patient on the same day, except and unless the initial screening results are deemed by the prescribing provider to be inconsistent or inherently unreliable. In that event, a confirmation screening may be ordered by the prescribing provider and paid for by the payer. In addition, treatment may not be discontinued based on the results of a drug test absent a confirmation test, which shall be reimbursed in addition to the initial screening test. Merely duplicate screenings or tests which are rerun to confirm initial results are not otherwise eligible for reimbursement.

XIII. MILEAGE REIMBURSEMENT (MCA §71-3-15; MISS. WORK COMP. COM. GENERAL RULE 14)

The payer shall reimburse each claimant for all travel to obtain medical treatment which is being obtained under the provisions of the Mississippi Workers' Compensation Law, including travel to a pharmacy to obtain medication or supplies necessary for treatment of a compensable injury, regardless of the number of miles traveled. There is no minimum distance of travel required for reimbursement, and reimbursement shall be made for each mile of round trip travel necessitated by the compensable injury, at the rate adopted by the Commission and in effect at the time of the travel. Only reasonable and necessary miles traveled are subject to reimbursement.

~~XIII.~~ The payer shall notify the claimant in writing of his/her right to receive mileage reimbursement for travel to obtain medical treatment, including travel to a pharmacy to obtain medication or supplies necessary for treatment of a compensable injury,

regardless of the number of miles traveled, as stated in the paragraph above. Mileage must be paid promptly to the claimant without unreasonable delay. In the absence of good cause shown, any failure to pay a claimant's mileage within 14 days after receipt of a request for mileage reimbursement from the claimant may be considered by the Commission to be unreasonable delay and subject the payer to attorney's fees, expenses, and a penalty of up to ten thousand dollars (\$10,000.00) pursuant to Miss. Code Ann. Section 71-3-59. Nothing about this provision shall be construed to diminish the payer's obligation to pre-pay mileage where otherwise applicable under the Mississippi Workers' Compensation Act and/or the Commission's General or Procedural Rules.

XIV. SETTLEMENTS WITH MEDICARE SET-ASIDES

Pursuant to Miss. Code Ann. Section 71-3-15(3), "Any employee receiving treatment or service under the provisions of this chapter may not be held responsible for any charge for such treatment or service, and no doctor, hospital or other recognized medical provider shall attempt to bill, charge or otherwise collect from the employee any amount greater than or in excess of the amount paid by the employer, if self-insured, or its workers' compensation carrier." Therefore, in the event a claimant settles his/her workers' compensation claim and the terms of the settlement include a Medicare Set-Aside (MSA), the fees, charges, and/or amounts for reimbursement set forth in the Medical Fee Schedule shall remain applicable to all medical treatment, services, and supplies, and any and all other aspects of medical treatment provided for the workers' compensation injury to the claimant after the settlement in the exact same manner as if the claim had not been settled.

XV. SALES TAX

All Amounts in the *Mississippi Workers' Compensation Fee Schedule* include any sales tax/shipping charges, etc. Therefore, no additional amount is reimbursed for these items.

XVI. PATIENT'S RIGHT TO HEARING

Nothing provided in this Fee Schedule shall estop or prevent the patient from obtaining legal counsel and/or seeking relief in the form of a request to compel medical treatment before an Administrative Judge.

XVII. INVESTIGATIONAL PROCEDURES

The following procedures are considered investigational, and, therefore, do not presently qualify for reimbursement under the *Mississippi Workers' Compensation Medical Fee Schedule*:

- A. Intradiscal electrothermal therapy (IDET) (22526, 22527) and intradiscal annuloplasty by other method (22899).
- B. Intraventricular administration of morphine.
- C. Pulse radiofrequency, regardless of procedure involved or indication (e.g., medial branch radiofrequency, dorsal root radiofrequency, etc.). If pulsed radiofrequency is used, but not specifically recorded as such in the medical records, the payer may retroactively deny payment for the service and request for reimbursement from the provider.
- D. Intradiscal therapies used in discography, such as percutaneous disc decompression (Dekompressor), fluoroscopic, laser, radiofrequency, and thermal disc therapies.
- E. Percutaneous disc nucleoplasty.
- F. Epidural adhesiolysis, also known as Racz procedure or lysis of epidural adhesions.
- G. X-STOP fusion devices.
- H. MILD (minimally invasive lumbar decompression) procedures.
- I. Non-invasive pain procedure (NIP procedure or NIPP).
- J. Alpha-stim unit.
- K. ReBuilder and low laser treatment.
- L. Botox for the use of musculoskeletal pain.
- M. Ketamine infusion therapy.
- N. Plasma rich protein (PRP) injections

Billing and Reimbursement Rules

I. GENERAL PROVISIONS

- A. **Maximum Reimbursement Allowance (MRA).** Unless the payer and provider have a separate fee contract which provides for a different level of reimbursement, the maximum reimbursement allowance for health care services shall be the lesser of (a) the provider's total billed charge, or (b) the maximum specific fee established by the Fee Schedule. Items or services or procedures which do not have a maximum specific fee established by this Fee Schedule shall be reimbursed at the usual and customary fee as defined in this Fee Schedule, and in such cases, the maximum reimbursement allowance shall be the lesser of (1) the provider's total billed charge, or (2) the usual and customary fee as defined by this Fee Schedule.

If this Fee Schedule does not establish a maximum specific fee for a particular service or procedure, and a usual and customary rate cannot be determined because the FH RV Benchmarks products do not contain a fee for same, then the maximum reimbursement allowance shall be equal to the national Medicare allowance plus thirty percent (30%). In the absence of an established Medicare value, and assuming none of the above provisions apply, the maximum reimbursement allowance shall be eighty percent (80%) of the provider's total billed charge. Any new codes will be assigned values and posted on the MWCC website annually, or as needed.

- B. **Separate Fee Contract.** An employer/payer may enter into a separate contractual agreement with a medical provider regarding reimbursement for services provided under the provisions of the Mississippi Workers' Compensation Law, and if an employer/payer has such a contractual agreement with a provider designed to reduce the cost of workers' compensation health care services, the contractual agreement shall control as to the amount of reimbursement and shall not be subject to the maximum reimbursement allowance otherwise established by the Fee Schedule. However, all other rules, guidelines and policies as provided in this Fee Schedule shall apply and shall be considered to be automatically incorporated into such agreement.
1. **Repricing Agreements.** Payers and providers may voluntarily enter into repricing agreements designed to contain the cost of workers' compensation health care after the medical care or service has been provided, and in such case, the reimbursement voluntarily agreed to by the parties shall control to the exclusion of the Fee Schedule. However, the time spent by the payer and provider attempting to negotiate a post-care repricing agreement does not extend the time elsewhere provided in this Fee Schedule for billing claims, paying claims, requesting correction of an incorrect payment, requesting reconsideration, seeking dispute resolution, or reviewing and responding to requests for correction or reconsideration or dispute resolution. In addition, applicable interest and penalties related to late billing and/or late payment shall continue to accrue as otherwise provided. Efforts to negotiate a post-care repricing agreement do not justify late billing or payment, and either party may seek further relief in accordance with the rules provided herein should billing or payment not be made within the time otherwise due under these rules. No party shall be obligated to negotiate or enter into a repricing agreement of any kind whatsoever.
- No party, in attempting to negotiate a repricing or other post treatment price reduction agreement, shall state or imply that consent to such an agreement is mandatory, or that the failure to enter into any such agreement may result in audit, delay of payment, or other adverse consequence. If the Commission determines that any party, or other person in privity therewith, has made such false or misleading statements in an effort to coerce another party's consent to a repricing or other price reduction agreement outside the Fee Schedule, the Commission may refer the matter to the appropriate authorities to consider whether such conduct warrants criminal prosecution under §71-3-69 of the Law. This statute declares that any false or misleading statement or representation made for the purpose of wrongfully withholding any benefit or payment otherwise due under the terms of the Workers' Compensation Law shall be considered a felony. In addition, the Commission may levy a civil penalty in an amount not to exceed ten thousand dollars (\$10,000.00) if it finds that payment of a just claim has been delayed without reasonable grounds, as provided in §71-3-59(2) of the Law.
- C. **Billing Forms.** Billing for provider services shall be standardized and submitted on the following forms: Providers must bill outpatient professional services on the most recently authorized paper form, CMS-1500, or electronic version, ~~387p~~837p, regardless of the site of service. Health care facilities must bill on the most recently authorized uniform billing form. The electronic version, 837i, or the paper form, UB-04 (CMS-1450) is required. Billing must be submitted using the most current paper or electronic forms which are authorized by CMS.
- D. **Identification Number.** All professional reimbursement submissions by Covered Healthcare Providers as defined under CMS rules for the implementation of the National Provider Identifier (NPI) must include the National Provider Identifier (NPI) field so as to enable the specific identification of individual providers without the need for other unique provider identification numbers. Providers who do not yet have an NPI should use the CMS default identifier until such time as an NPI is obtained. Providers are required to obtain an NPI within the dates specified by CMS in its implementation rules.
- E. **Physician Specialty.** The rules and reimbursement allowances in the *Mississippi Workers' Compensation Medical Fee Schedule* do not address physician specialization within a specialty. Payment is not based on the fact that a

physician has elected to treat patients with a particular/specific problem. Reimbursement to qualified physicians is the same amount regardless of specialty.

- F. **“No Show” Appointments.** When an appointment is made for a physician visit by the employer or payer, and the claimant/patient does not show, the provider is entitled to payment at the rate allowed for a minimal office visit.
- G. **“After Hours” and Other Adjunct Service Codes.** When an office service occurs after a provider’s normal business hours, procedure code 99050 may be billed. Other adjunct service codes (99051–99060) may be billed as appropriate. Typically, only a single adjunct service code is reported per encounter. However, there may be circumstances in which reporting multiple adjunct codes per patient encounter may be appropriate.
- H. **Portable Services.** When procedures are performed using portable equipment, bill the appropriate procedure code. The charge for the procedure includes the cost of the portable equipment.
- I. **Injections.**
 - 1. Reimbursement for injections includes charges for the administration of the drug and the cost of the supplies to administer the drug. Medications are charged separately.
 - 2. The description must include the name of the medication, strength, and dose injected.
 - 3. When multiple drugs are administered from the same syringe, reimbursement will be for a single injection.
 - 4. Reimbursement for anesthetic agents such as Xylocaine and Carbocaine, when used for infiltration, is included in the reimbursement for the procedure performed and will not be separately reimbursed.
 - 5. Reimbursement for intra-articular and intra-bursal injection medications (steroids and anesthetic agents) may be separately billed. The description must include the name of the medication, strength, and volume given.
- J. **Supplies.** Use CPT® code 99070 or specific HCPCS ~~Level II~~ codes to report supplies over and above those usually included with the office visit or service rendered. Do not bill for supplies that are currently included in surgical packages, such as gauze, sponges, and Steri-Strips®. Supplies and materials provided by the physician over and above those usually included with the office visit (drugs, splints, sutures, etc.) may be charged separately and reimbursed at a reasonable rate.

II. INSTRUCTIONS TO PROVIDERS

- A. All bills for service must be coded with the appropriate CPT, CDT, or HCPCS ~~Level II~~ code.
- B. The medical provider must file the appropriate billing form and necessary documentation within thirty (30) days of rendering services on a newly diagnosed work-related injury or illness. Subsequent billings must be submitted at least every thirty (30) days, or within thirty (30) days of each treatment or visit, whichever last occurs, with the appropriate medical records to substantiate the medical necessity for continued services. Late billings will be subject to discounts, not to exceed one and one-half percent (1.5%) per month of the bill or part thereof which was not timely billed, from the date the billing or part thereof is first due until received by the payer. Any bill or part thereof not submitted to the payer within sixty (60) days after the due date under this rule shall be subject to an additional discount penalty equal to ten percent (10%) of the total bill or part thereof. Any bill for services rendered which is not submitted to the payer within one (1) year after the date of service, or date of discharge for inpatient care, will not be eligible or considered for reimbursement under this Fee Schedule, unless otherwise ordered by the Commission or its Cost Containment Division.
- C. Fees in excess of the maximum reimbursement allowance (MRA) must not be billed to the employee, employer, or payer. The provider cannot collect any non-allowed amount (MCA §71-3-15(3) (Rev. 2000)).
- D. If it is medically necessary to exceed the Fee Schedule limitations and/or exclusions, substantiating documentation must be submitted by the provider to the payer with the claim form.
- E. If a provider believes an incorrect payment was made for services rendered, or disagrees for any reason with the payment and explanation of review tendered by the payer, then the provider may request reconsideration pursuant to the rules set forth herein.
- F. If, after the resolution of a reconsideration request or a formal dispute resolution request, or otherwise, the provider is determined to owe a refund to the payer, the amount refunded shall bear interest at the rate of one and one-half percent (1.5%) per month from the date the refunded amount was first received by the provider, until refunded to the payer.

III. INSTRUCTIONS TO PAYERS

- A. An employer’s/payer’s payment shall reflect any adjustments in the bill made through the employer’s/payer’s bill review program. The employer/payer must provide an explanation of review (EOR) to a health care provider whenever reimbursement differs from the amount billed by the provider. This must be done individually for each bill.

- B. In a case where documentation does not indicate the service was performed, the charge for the service may be denied. The EOR must clearly and specifically indicate the reason for the denial.
- C. (1) When a billed service is documented, but the code selected by the provider is not, in the payer's/reviewer's estimation, the most accurate code available to describe the service, the reviewer must not deny payment, but shall reimburse based on the revised code. The EOR must clearly and specifically detail the reason(s) for recoding the service or otherwise altering the claim. No claim shall be recoded or otherwise revised or altered without the payer having actually reviewed the medical records associated with the claim which document the service(s) provided.

 (2) As an alternative to recoding or altering a claim, the payer may treat the matter under rule E(1) and (2) below by paying any undisputed portion of the bill, and notifying the provider by EOR that the remaining parts of the bill are denied or disputed.

 (3) Recoding cannot be used solely for cost containment. Recoding may only be used for the correction of miscoded services. Whenever there is any dispute concerning coding, the provider must be notified immediately and given the opportunity to furnish additional information, although nothing herein suspends the time periods for making payment or giving notice of dispute. Any recoding or so-called "down coding," which is found by the Commission or its Cost Containment Division to be solely for the purpose of cost containment, will subject the party engaging in such conduct to additional penalties as allowed by law.
- D. Properly submitted bills must be paid within thirty (30) days of receipt by the payer. Properly submitted bills not fully paid within thirty (30) days of receipt by the payer shall automatically include interest on the unpaid balance at the rate of one and one-half percent (1.5%) per month from the due date of any unpaid remaining balance until such time as the claim is fully paid and satisfied. Properly submitted bills not fully paid within sixty (60) days of receipt will be subject to an additional penalty equal to ten percent (10%) of the unpaid remaining balance, including interest as herein provided.
- E. (1) When an employer/payer disputes or otherwise adjusts a bill or portion thereof, the employer/payer shall pay the undisputed or unadjusted portion of the bill within thirty (30) days of receipt of the bill. Failure to pay the undisputed portion when due shall subject the payer to interest and penalty as above provided on the undisputed portion of the bill. If the dispute is ultimately resolved in the provider's favor, interest and penalty on the disputed amounts will apply from the original due date of the bill until paid.

 (2) When a payer disputes a bill or portion thereof, the payer shall notify the provider within thirty (30) days of the receipt of the bill of the reasons for disputing the bill or portion thereof, and shall notify the provider of its right to provide additional information and to request reconsideration of the payer's action. The payer shall set forth the clear and specific reasons for disputing a bill or portion thereof on the EOR, and shall provide additional documentation if necessary to provide an adequate explanation of the dispute.
- F. Reimbursement determinations shall be based on medical necessity of services to either establish a diagnosis or treat an injury/illness. Thus, where service is provided in good faith reliance on authorization given by the employer or payer, reimbursement shall not be dependent on the outcome of medically necessary diagnostic services or treatment.

IV. FACILITY FEE RULES

Please refer to the Pain Management section for the state-specific facility reimbursement rules to be used for outpatient pain management procedures.

Please refer to the Inpatient Hospital and Outpatient Facility Payment Schedule and Rules section for the state-specific facility reimbursement rules to be used for ambulatory surgery center (ASC) procedures and hospital based outpatient departments.

- A. **Prepayment Review for Facilities.** The payer must perform a prepayment review on inpatient hospital bills and outpatient surgery bills in order to verify the charges submitted.
 - 1. At a minimum, the pre-payment review should:
 - a. Validate that prior authorization was approved according to Fee Schedule guidelines;
 - b. Validate that the length of stay and the level of service was appropriate for the diagnosis;
 - c. Review the bill for possible overcharges or billing errors;
 - d. Determine if an on-site audit is appropriate;
 - e. Identify over utilization of services;
 - f. Identify those bills and case records that shall be subject to professional review by a physician or appropriate peer.
 - 2. The payer must reimburse the hospital within thirty (30) days of receipt of a valid claim form if prepayment review criteria are met. An exception to the thirty (30) day payment time will be made if additional documentation is requested for prepayment review, and in such cases, payment should be made within thirty (30) days following receipt of this additional documentation if prepayment review criteria are met. If a full audit is scheduled, fifty percent (50%) of the total bill must be paid prior to the audit, and in such event, the payer shall not be liable for interest and penalty as above provided on any additional sums which may be due following

completion of the audit. Failure to pay fifty percent (50%) of the total bill prior to the audit shall result in interest and penalty as above provided being added to the total amount determined to be due, from the original due date until paid.

3. If the hospital does not forward copies of requested medical records to the payer after two (2) consecutive written requests following the initial request, or if it fails to submit necessary or adequate documentation to support the hospital services rendered, the payer should perform a charge audit.

B. Charge Audit. All charge audits must be performed on-site unless otherwise agreed to by the provider and payer.

1. The following information must be provided to the hospital by the payer/auditor when scheduling an audit:
 - a. Patient name
 - b. Account number
 - c. Date(s) of service
 - d. Diagnosis(es)
 - e. Total amount of bill
 - f. Insurance company
 - g. Name of audit requester
 - h. Telephone number and address of requester
2. A hospital must schedule a charge audit within thirty (30) days of a request by a payer/auditor.
3. Hospitals shall be reimbursed an audit fee of fifty dollars (\$50.00) for associated audit costs.
4. When a charge audit is necessary, the auditor must identify additional charges for medically necessary hospital services that were ordered by the authorized physician and were provided, but were not included, on the initial bill.
5. The auditor must review and verify the audit findings with a hospital representative at the conclusion of the audit. The hospital may waive its right to the exit conference.
6. The auditor must provide written explanation of the final reimbursement determination based on the audit findings, whether or not an exit conference is held with the hospital. This written explanation must be provided within thirty (30) days following the conclusion of the audit.

C. When any hospital bill that has been prescreened and found to be correct, or when corrections have been made to the bill as required, or when a hospital bill has been audited and verified as correct, it must be paid within thirty (30) days thereafter.

D. Any hospital bill not paid when due under these rules shall automatically include interest at the rate of one and one-half percent (1.5%) per month from the due date of such bill until paid. Any such bill not paid within sixty (60) days after it is due under these rules will be subject to an additional penalty equal to ten percent (10%) of the total amount due, including interest as herein provided.

E. Implantables. An implantable is an item that is implanted into the body for the purpose of permanent placement, and remains in the body as a fixture. Absorbable items, temporary items, or other items used to help place the implant, are not within the definition of "implantable" and are not reimbursed as such.

Implantables are included in the applicable MS-DRG reimbursement for inpatient treatment, and, therefore, the provider of inpatient services is not required to furnish the payer with an invoice for implantables. For implantables used in the outpatient setting, reimbursement is likewise included in the APC Amount paid to the facility. No separate billing or payment for implants shall be made in either the inpatient or outpatient setting.

V. EXPLANATION OF REVIEW (EOR)

- A. Payers must provide an explanation of review (EOR) to health care providers for each bill whenever the payer's reimbursement differs from the amount billed by the provider, or when an original claim is altered or adjusted by the payer. The EOR must be provided within thirty (30) days of receipt of the bill, and must accompany any payment that is being made.
- B. A payer may use the listed EOR codes and descriptors or may develop codes of their own to explain why a provider's charge has been reduced or disallowed, or why a claim has been altered or adjusted in some other way. In all cases, the payer must clearly and specifically detail the reasons for adjusting or altering a bill, including references to the applicable provisions of the Fee Schedule or CPT book, or other source(s) used as the basis for the EOR. Should the EOR include an alteration in the codes submitted on the original claim, it must be based on a review of the medical records documenting the service.
- C. The EOR must contain appropriate identifying information to enable the provider to relate a specific reimbursement to the applicable claimant, the procedure billed, and the date of service.
- D. Acceptable EORs may include manually produced or computerized forms that contain the EOR codes, written explanations, and the appropriate identifying information.

- E. The following EOR codes may be used by the payer to explain to the provider why a procedure or service is not reimbursed as billed, provided clear and specific detail is included, along with references to the applicable provisions of the Fee Schedule or CPT book, or other source(s) used as the basis for the EOR:

- 001 These services are not reimbursable under the Workers' Compensation Law for the following reason(s): [Provide specific reason(s) why services are not reimbursable under the Workers' Compensation Law]
- 002 Charges exceed maximum reimbursement allowance [Specify]
- 003 Charge is included in the basic surgical allowance [Specify]
- 004 Surgical assistant is not routinely allowed for this procedure. Documentation of medical necessity required [Specify]
- 005 This procedure is included in the basic allowance of another procedure [Specify the other procedure]
- 006 This procedure is not appropriate to the diagnosis [Specify]
- 007 This procedure is not within the scope of the license of the billing provider [Specify]
- 008 Equipment or services are not prescribed by a physician [Specify]
- 009 This service exceeds reimbursement limitations [Specify]
- 010 This service is not reimbursable unless billed by a physician [Specify]
- 011 Incorrect billing form [Specify]
- 012 Incorrect or incomplete identification number of billing provider [Specify]
- 013 Medical report required for payment [Specify]
- 014 Documentation does not justify level of service billed [Specify]
- 015 Place of service is inconsistent with procedure billed [Specify]
- 016 Invalid procedure code [Specify]
- 017 Prior authorization was not obtained [Specify]

VI. REQUEST FOR RECONSIDERATION

- A. When, after examination of the explanation of review (EOR) and other documentation, a health care provider is dissatisfied with a payer's payment or dispute of a bill for medical services, reconsideration may be requested by the provider. Any other matter in dispute between the provider and payer may be subject to reconsideration as herein provided at the request of either party, including, but not limited to, a request by the payer for refund of an alleged over-payment. Alleged over-payments should be addressed through the dispute resolution process, if necessary, and not by way of unilateral recoupment initiated by the payer on subsequent billings.
- B. A provider or payer must make a written request for reconsideration within thirty (30) days from the receipt of the explanation of review (EOR) or other written documentation evidencing the basis for the dispute. A request for reconsideration must be accompanied by a copy of the bill in question, the payers' explanation of review (EOR), and/or any additional documentation to support the request for reconsideration.
- C. The payer or provider, upon receipt of a request for reconsideration, must review and re-evaluate the original bill and accompanying documentation, and, must notify the requesting party thirty (30) days thereafter of the results of the reconsideration. The response must adequately explain the reason(s) for the decision, and cite the specific basis upon which the final determination was made. If the payer finds the provider's request for reconsideration is meritorious, and that additional payment(s) should be made, or if the provider finds the payer's request for refund or other payment is meritorious, the additional payment should be made within the above thirty (30) day period. Any additional payment(s) made in response to a provider's or payer's request for reconsideration shall include interest from the original due date of the bill or payment, and an additional ten percent (10%) penalty if applicable.
- D. If the dispute is not resolved within the above time after a proper request for reconsideration has been served by the provider or payer, then either party may request further review by the Commission pursuant to the Dispute Resolution Rules set forth hereafter.
- E. Failure to seek reconsideration within the time above provided shall bar and prohibit any further reconsideration or review of the bill or other issue in question unless, for good cause shown, the Commission or its representative extends the time for seeking reconsideration or review under these rules. In no event shall the time for seeking reconsideration hereunder be extended by more than an additional thirty (30) days, and any such request for additional time in which to seek reconsideration or further review must be made in writing to the Commission within the initial thirty (30) day period set forth in paragraph B. above.

- F. Requests by either provider or payer for refunds, or for additional payment, or other requests related to the billing or payment of a claim, must be sought in accordance with the specific rules set forth herein. No retrospective audits or dispute requests shall be allowed beyond the time otherwise provided herein for seeking reconsideration and/or review.

Medical Records Rules

I. MEDICAL RECORDS

- A. The medical record, which documents the patient's course of treatment, is the responsibility of the provider and is the basis for determining medical necessity and for substantiating the service(s) rendered; therefore, failure to submit necessary or adequate documentation to support the services rendered may result in the services being disallowed.
- B. A medical provider may not charge any fee for completing a medical report or form required by the Workers' Compensation Commission which is part of the required supporting documentation which accompanies a request for payment. The supporting documentation that is required to substantiate the medical treatment is included in the fee for service and does not warrant a separate fee as it is incidental to providing medical care. CPT® code 99080 is appropriate for billing special reports beyond those required by this Fee Schedule and requested by the payer or their representatives.
- C. Medical records must be legible and include, as applicable:
 - 1. Initial office visit notes which document a history ~~and~~, physical examination, assessment and plan appropriate to the level of service indicated by the presenting injury/illness or treatment of the ongoing injury/illness;
 - 2. Progress notes which reflect patient complaints, objective findings, assessment of the problem, and plan of care or treatment;
 - 3. Copies of lab, x-ray, or other diagnostic tests that reflect current progress of the patient and/or response to therapy or treatment;
 - 4. Physical medicine/occupational therapy progress notes that reflect the patient's response to treatment/therapy;
 - 5. Operative reports, consultation notes with report, and/or dictated report; and
 - 6. Impairment rating (projected and actual) and anticipated maximum medical improvement (MMI) date.
- D. A plan of care should be included in the medical record and should address, as applicable, the following:
 - 1. The disability;
 - 2. Degree of restoration anticipated;
 - 3. Measurable goals;
 - 4. Specific therapies to be used;
 - 5. Frequency and duration of treatments to be provided;
 - 6. Anticipated return to work date;
 - 7. Projected impairment.
- E. Health care providers must submit copies of records and reports to payers upon request. Providers can facilitate the timely processing of claims and payment for services by submitting appropriate documentation to the payer when requested. Only those records for a specific date of injury are considered non-privileged as it relates to a workers' compensation injury. The employer/payer is not privileged to non-work related medical information.
- F. Providers must submit documentation for the following:
 - 1. The initial office visit;
 - 2. A progress report if still treating after thirty (30) days;
 - 3. Evaluation for therapy services/treatment (P.T., O.T., C.M.T., O.M.T.);
 - 4. A progress report every thirty (30) days for therapy services/treatment (P.T., O.T., C.M.T., O.M.T.);
 - 5. An operative report or office note (if done in the office) for a surgical procedure;
 - 6. A consultation;
 - 7. The anesthesia record for anesthesia services;
 - 8. A functional capacity or work hardening evaluation;
 - 9. When billing "By Report" (BR), a description of the service is required; this description should include an adequate definition or description of the nature, extent, and need for the procedure and the time, effort, and equipment necessary to provide the service;
 - 10. Whenever a modifier is used to describe an unusual circumstance;
 - 11. Whenever the procedure code descriptors include a written report.
- G. Hospitals and other inpatient facilities must submit required documentation with the appropriate billing forms as follows:

1. Admission history and physical;
 2. Discharge summary;
 3. Operative reports;
 4. Pathology reports;
 5. Radiology reports;
 6. Consultations;
 7. Other dictated reports;
 8. Emergency room records.
- H. The Health Insurance Portability & Accountability Act (HIPAA) makes important exceptions concerning the disclosure of protected health information for workers' compensation purposes. For additional information, refer to the MWCC website (mwcc.ms.gov), or consult an attorney and/or the HIPAA resource site maintained by the U. S. Department of Health and Human Services (<http://www.hhs.gov/ocr/privacy/>).

II. COPIES OF RECORDS

- A. **Outpatient Records.** The payer may request additional records or reports from the provider concerning service or treatment provided to a patient other than on an inpatient basis. These additional records and reports will be reimbursed as follows:

~~1-5~~ \$20.00 for first 20 pages ~~— \$15.00—~~
~~— 6+~~ \$1.00 per page for pages ~~— \$21-100~~
~~— \$0.50 per page in addition to the above fee for everything thereafter~~

This applies to copies of microfiche and other electronic media or storage systems.

As provided by MCA §11-1-52(1) (Supp. 2006), as amended, the provider may add ten percent (10%) of the total charge to cover the cost of postage and handling, and may charge an additional fifteen dollars (\$15.00) for retrieving records stored off the premises where the provider's facility or office is located.

- B. **Inpatient Records.** The payer may request additional records or reports from a facility concerning inpatient service or treatment provided to a patient. Such reports or records requested by the payer will be reimbursed as follows:

~~1-5 pages — \$15.00~~
~~— 6+ pages — \$50 per page in addition to the above fee~~
\$20.00 for first 20 pages
\$1.00 per page for pages 21-100
\$0.50 per page for everything thereafter

This applies to copies of microfiche and other electronic media or storage systems.

There is a maximum reimbursement allowance of ~~fifty~~ one hundred dollars (~~\$50~~ \$100.00) for a particular inpatient medical record, exclusive of postage, handling and retrieval charges as set forth below. This is per admission.

As provided by MCA §11-1-52(1) (Supp. 2006), as amended, the provider may add ten percent (10%) of the total charge to cover the cost of postage and handling, and may charge an additional fifteen dollars (\$15.00) for retrieving records stored off the premises where the provider's facility or office is located.

- C. Copies of records requested by the patient and/or the patient's attorney or legal representative will be reimbursed by the requesting party according to the provisions of this section on additional reports and records.
- D. Documentation submitted by the provider which has not been specifically requested will not be subject to reimbursement.
- E. Health care providers may charge up to ten dollars (\$10.00) per ~~film~~ image for copying x-rays or for providing copies of x-rays via electronic or other magnetic media. (Copies of film do not have to be returned to the provider.)
- F. Payers, their representatives, and other parties requesting records and reports must be specific in their requests so as not to place undue demands on provider time for copying records.
- G. Providers should respond promptly (within fourteen (14) working days) to requests for additional records and reports.
- H. Records requested by the Mississippi Workers' Compensation Commission will be furnished by the provider without charge to the Commission.

- I. Any additional reimbursement, including copy service vendors, other than ~~is~~ specifically set forth above, is not required, and providers or their vendors will not be paid any additional amounts.

III. HEALTH INSURANCE PORTABILITY & ACCOUNTABILITY ACT (HIPAA) AND WORKERS' COMPENSATION

HIPAA makes important exceptions concerning the disclosure of protected health information (PHI) for workers' compensation purposes. The United States Department of Health and Human Services, through its Office for Civil Rights, enforces the HIPAA Law and maintains an informative website with information on HIPAA and its application to workers' compensation claims. See, for example: <http://www.hhs.gov/ocr/privacy/>.

Dispute Resolution Rules

I. GENERAL PROVISIONS

- A. Unresolved disputes over the amount charged for services rendered under the provisions of the Fee Schedule or over the amount of reimbursement for services rendered under the Fee Schedule may be appealed to and resolved by the Mississippi Workers' Compensation Commission. Regardless of the date of service, all changes to the dispute resolution procedures found in this edition of this section of the Fee Schedule shall be applied retroactively to all Requests for Resolution of Dispute or other documents filed on or after the effective date of this Fee Schedule.
- B. Reconsideration must be sought by the provider or payer prior to a request for resolution of a dispute being sent to the Commission. This provides the payer and provider an opportunity to resolve most concerns in a timely manner.
- C. All communication between parties in dispute will be handled by the Mississippi Workers' Compensation Commission, Cost Containment Division. In addition, there will be no communication between the parties in dispute and any Peer Reviewer who might be called upon to assist the Commission in the resolution of a dispute.
- D. As stated in Miss. Code Ann. Section 71-3-63(3), "Representation of one other than himself or herself before the commission shall be considered the practice of law, and all statutes applying to and regulating the practice in all other courts of law in this state shall likewise apply to practice before the commission, insofar as the qualifications of those practicing before the commission are concerned." Therefore, Requests for Resolution of Dispute, Responses to such Requests, and all other filings made in Resolution of Dispute before the Cost Containment Division of the Commission must be filed by attorneys authorized to practice law in MS or attorneys properly admitted pro hac vice pursuant to the Mississippi Rules of Appellate Procedure. See Miss. Code Ann. Section 73-3-55. In other words, payers and providers shall be represented by attorneys in all aspects of Dispute Resolution before the Cost Containment Division of the Commission, as well as the Commission itself in the event of an appeal. The only exception to this rule is if the payer or provider is a patient/claimant or sole proprietor representing himself or herself in that capacity only. See *Brandon Allen Dillard v. Roy Rodriguez and Jim Grieshaber*, 2012 WL 3792047 at 2 (Miss. Work. Comp. Com. August 9, 2012).
- Further, the Commission shall not allow any discovery between the parties in Dispute Resolution unless such discovery is specifically requested, accompanied by a detailed explanation regarding the information sought and the specific reason why such discovery is relevant and necessary for resolution of the dispute. Such requests for discovery shall be granted or denied at the sole discretion of the Cost Containment Division and/or the Commission. Otherwise, the Commission's incorporation of deposition and other discovery procedures as provided by Miss. Work. Comp. Com. Procedural Rule 9 and/or subpoena procedures provided by Miss. Work. Comp. Com. Procedural Rule 18 does not extend or apply to Requests for Resolution of Dispute under the Fee Schedule.
- E. In the absence of any agreement between the parties submitted to the Commission in writing, Requests for Resolution of Dispute shall not be ruled upon in claims for which the compensability of the underlying injury is currently disputed or denied by the payer. In the event the parties submit such an agreement, it shall be subject to the review and approval of the Cost Containment Division, and such agreement shall be recognized or denied in the sole discretion of the Cost Containment Division and/or the Commission. Otherwise, Cost Containment Decisions for Requests for Resolution of Dispute may be held in abeyance pending a final adjudication and/or admission of compensability by the payer for the underlying injury in the dispute.

II. FORMS AND DOCUMENTATION

- A. Valid requests for resolution of a dispute must be submitted on the "Request for Resolution of Dispute" form (see the Forms section or <http://www.mwcc.state.ms.us/services/feeschedule.asp> <http://www.mwcc.ms.gov/#/medicalFeeSchedule>) along with the following:
1. Copies of the original and resubmitted bills in dispute that include dates of service, procedure codes, charges for services rendered and any payment received, and an explanation of any unusual services or circumstances;
 2. EOR including the specific reimbursement;
 3. Supporting documentation and correspondence;
 4. Specific information regarding contact with the payer; and
 5. Any other information deemed relevant by the applicant for dispute resolution.

- B. A Request for Resolution of Dispute must be submitted to:

Mississippi Workers' Compensation Commission
Cost Containment Division
1428 Lakeland Drive
P.O. Box 5300
Jackson, MS 39296-5300

- C. A party, whether payer, provider, ~~or patient, or any representative of such parties,~~ shall certify that a copy of the Request for Resolution of Dispute ~~and/or the Response to such Request,~~ and any supporting documentation, being filed with the Commission has been provided to the other interested parties or their representatives by ~~personal delivery, United States mail, facsimile or other electronic submission guaranteed to accomplish receipt,~~ certified mail simultaneously with the filing to the Commission. This requirement shall also apply when a party files a request seeking review of a dispute by the Commission, ~~or when enforcement of a final decision of the Cost Containment Director is sought.~~

III. TIME FOR FILING

A Request for Resolution of Dispute must be filed with the Commission within thirty (30) days following the payer's or provider's response to a request for reconsideration of any matter in dispute, or, in cases where the payer or provider fails to respond to a request for reconsideration, within thirty (30) days of the expiration of the time in which said response should have been provided. Failure to file a Request for Resolution of Dispute within this time shall bar any further action on the disputed issue(s) unless, for good cause shown, the Commission or its Cost Containment Director extends the time for filing said request. In no event will ~~the time for filing a Request for Resolution of Dispute be extended more than once or more than an additional twenty (20) days from the time said request was first due to be filed, provided the request for additional time in which to file a Request for Resolution of Dispute is filed within the initial thirty (30) day period provided herein; and, absent compelling circumstances, a dispute resolution request will not be~~ considered by the Cost Containment Division if submitted more than one (1) year after the date of service. The decision to extend the time for filing a Request for Resolution of Dispute based on "good cause" shall be entirely at the discretion of the Commission or its Cost Containment Director. Mere neglect will not constitute "good cause."

IV. PROCEDURE BY COST CONTAINMENT DIVISION

- A. Requests for dispute resolution will be reviewed and decided by the Cost Containment Division of the Commission after all required and requested information has been received. Additional time may be required to accommodate a Peer Review. The payer and/or provider may be contacted by telephone or other means for additional information if necessary; however, both parties to a dispute may submit in writing any information or argument they deem relevant to the issue in dispute, if not already submitted with the request for dispute resolution, and this information shall be considered by the Cost Containment Division when rendering a decision. Any written information or argument submitted for consideration by a party to a dispute, without a request from the Commission, must be received by the Cost Containment Division within ~~fourteen (14)~~ twenty-three (23) days after filing the ~~request for dispute resolution~~ Request for Resolution of Dispute in order to merit consideration. Unlike the Request for Resolution of Dispute Form, there is no specific prescribed form for a Response to such Request.
- B. Every effort ~~will~~ should be made by the parties to resolve disputes between themselves by telephone or in writing even after the filing of a Request for Resolution of Dispute. The payer and provider may be requested to attend an informal hearing conducted by a Commission representative. Failure to appear at an informal hearing may result in dismissal of the ~~request for dispute resolution~~ Request for Resolution of Dispute. However, no formal hearing or oral argument shall be allowed unless requested by the Cost Containment Division and/or the Commission. Otherwise, Requests for Resolution of Dispute shall be heard and considered solely on the record provided by the parties in the documentation they have submitted to the Cost Containment Division and any arguments they have made therein, without any oral argument or formal hearing.
- C. Following review of all documentation submitted for dispute resolution and/or following contact with the payer and/or provider for additional information and/or negotiation, the Cost Containment Division shall render an administrative decision on the request for dispute resolution, and forward it to the involved parties.
- D. Cases involving medical care determination may be referred for peer review, but only on request of the Commission. The peer review consultant will render an opinion and submit same to the Commission representative within the time set by the Cost Containment Division. The Commission representative will notify the parties in dispute if a Peer Review has been requested, and of the peer review consultant's determination.

V. COMMISSION REVIEW OF A DISPUTE

- A. Any party aggrieved by the decision of the Cost Containment Division shall have twenty (20) days from the date of said decision to request review by the Commission. Failure to file a written request for review with the Commission within this twenty (20) day period shall bar any further review or action with regard to the issue(s) presented. A decision of the

Cost Containment Division that is not timely appealed shall constitute a final decision of the Full Commission, with all findings and determinations of the Cost Containment Director, including the award of penalties, interest, and attorney's fees and/or expenses, to be considered as having been awarded by the Full Commission itself, including any penalty under Miss. Code Ann. Section 71-3-59. No extension of time within which to file for Commission review of a dispute under these Rules shall be allowed. In the event a request for review is not filed with the Commission within twenty (20) days ~~or within the time allowed by any extension which has been granted~~, the parties to the dispute shall have fourteen (14) days thereafter in which to comply with the final decision of the Cost Containment Division.

~~4.—A party to a dispute may, when a written request for review has not been timely filed with the Commission, file with the Commission a written request to compel compliance with the final administrative decision of the Cost Containment Division. The Commission may consider such a request with or without a hearing. A request to compel compliance with the final decision of the Cost Containment Division may be filed at any time following fourteen (14) days after the decision of the Cost Containment Division becomes final, and must be submitted on the form approved by the Commission for this purpose. No such request to compel or enforce compliance with a final decision of the Cost Containment Director shall be considered if filed more than one (1) year after the date of the Cost Containment Director's decision. seek enforcement of payment of that decision pursuant to the terms and time period set forth in Miss. Code Ann. Section 71-3-49. A Final Decision of the Cost Containment Division and/or the Commission shall be considered sufficient to allow the payer and/or provider to pursue any and all remedies available to it for enforcement of payment in default pursuant to Miss. Code Ann. Section 71-3-49. No further action to enforce payment shall be made by the Commission, nor shall any other document be issued regarding the dispute unless the Commission finds the issuance of such document to be necessary. The payer and/or provider shall be solely responsible for calculating the interest and penalty owed to it pursuant to the terms of the Fee Schedule, and any dispute regarding enforcement of payment in default and/or the amount of interest or penalty due shall be determined by the Court wherein the payer or provider has sought enforcement pursuant to Miss. Code Ann. Section 71-3-49. The same procedure for enforcement above shall also be applicable to all final decisions of the Commission in the event the decision of the Cost Containment Division was timely appealed to the Commission and a final decision of the Commission has been issued.~~

~~The party seeking relief hereunder shall certify that a copy of the request for relief and any supporting documentation being filed with the Commission has been provided to the other interested parties or their representatives by personal delivery, United States mail, facsimile or other electronic submission guaranteed to accomplish receipt, simultaneously with the filing to the Commission.~~

- B. The request for review by the Commission shall be filed with the Cost Containment Division of the Mississippi Workers' Compensation Commission, ~~and~~ shall be in writing, and shall state the grounds on which the requesting party relies. All documentation submitted to and considered by the Cost Containment Division, including the Request for Resolution of Dispute form, along with a copy of the decision of the Cost Containment Division, shall be attached to the request for review which is filed with the Commission. The party seeking relief hereunder shall certify that a copy of the request for review and any supporting documentation being filed with the Commission has been provided to the other interested parties or their representatives by certified mail, personal delivery, United States mail, facsimile or other electronic submission guaranteed to accomplish receipt, simultaneously with the filing to the Commission. Unlike the Request for Resolution of Dispute Form, there is no specific prescribed form for a Request for Commission Review.
- C. The Commission shall review the issue(s) solely on the basis of the documentation submitted to the Cost Containment Division. No additional documentation not presented to and considered by the Cost Containment Division shall be considered by the Commission on review, unless specifically requested by the Commission, and no hearing or oral argument shall be allowed, unless specifically requested by the Commission.
- D. The Commission shall consider the request for review and issue a decision.
- E. Following the decision of the Commission, or following the conclusion of the dispute resolution process at any stage without an appeal to the Commission, no further audit, adjustment, refund, review, consideration, reconsideration or appeal with respect to the claim in question by the Commission may be sought by either party.
- F. The costs incurred in seeking Commission review, or in seeking compliance with an Administrative Decision rendered by the Cost Containment Director, including reasonable attorney fees, if any, ~~shall~~ may be assessed to the party who requested review if that party's position is not sustained by the Commission and to the party who has failed to comply with a prior decision if compliance therewith is ordered by the Commission. Otherwise, each party shall bear their own costs, including attorney's fees.
- G. If Cost Containment Director and/or the Commission determines that a dispute is based on or arises from a billing error, a payment adjustment or error, including but not limited to improper bundling of service codes, unbundling, downcoding, code shifting, or other action by either party to the dispute, or if the Commission determines that a provider or payer has unreasonably refused to comply with the Law, the Rules of the Commission, including this Fee Schedule, or with any decision of the Commission or its representatives, and that this causes proceedings with respect to the billing and/or payment for covered medical services to be instituted or continued or delayed without reasonable grounds, then the Commission may require the responsible party or parties, and/or the attorney advising such party or parties, to pay the reasonable expenses, including attorney's fees, if any, to the opposing party; and, in addition, the Commission may levy against the responsible party or parties a civil penalty not to exceed the sum of ten thousand dollars (\$10,000.00), payable to the Commission, as provided in §71-3-59(2) of the Law. The award of costs and penalties as herein provided shall be in addition to interest and penalty charges which may apply under other provisions of this Fee Schedule.

Utilization Review Rules

The Mississippi Workers' Compensation Commission (MWCC) requires mandatory utilization review of certain medical services associated with the provision of medical treatment covered under the Act and subject to the Fee Schedule. "Utilization review" refers to a system for reviewing proposed medical services to make sure that such procedures are medically necessary and represent the most efficient and appropriate use of medical resources given the nature of the injury to the patient and the process of his or her recovery, and that such services are properly and timely reimbursed. These rules are set forth to encourage efficient and timely communication between payers and providers (including agents of either) in order to make sure that medically necessary services are provided and timely reimbursed, and to curtail the use of unnecessary or unreasonable treatment. The provisions herein set forth regarding utilization review are in addition to the requirements of Mississippi Code Annotated (MCA) §41-83-1 et seq. (Rev. 2005), as amended, and any regulations adopted pursuant thereto by the State Department of Health or the State Board of Medical Licensure. In the event of conflict between this Fee Schedule and the above statutes, and any implementing regulations adopted by the Health Department or Board of Medical Licensure, the provisions in this Fee Schedule or other applicable rules of the MWCC shall control.

A payer may provide for utilization review by using personnel or units in-house, by contracting with a third party utilization review agent properly licensed by the MS Department of Health, or by contracting with a Nurse Case Manager or similar person to monitor the care being provided in person working with the patient and provider. An injured worker and/or his or her attorney and any case manager assigned by the payer shall strive to cooperate with one another for the purpose of ensuring the injured worker receives all of the medically necessary care needed for the treatment of the injury and the process of recovery. A payer also may exercise their statutory right to an Employer Medical Evaluation (EME) as provided for in MCA §71-3-15(1) (Rev. 2000) in conjunction with, or in lieu of, ongoing utilization review.

NO DECISION OR DETERMINATION ADVERSE TO A PATIENT OR HEALTH CARE PROVIDER WHICH MAY RESULT IN THE DENIAL OF PAYMENT, OR IN THE DENIAL OF PRE-CERTIFICATION FOR TREATMENT IN THIS STATE, SHALL BE MADE WITHOUT THE PRIOR EVALUATION AND CONCURRENCE IN THE ADVERSE DETERMINATION BY A PHYSICIAN CURRENTLY LICENSED TO PRACTICE MEDICINE IN THE STATE OF MISSISSIPPI, AND PROPERLY TRAINED IN THE SAME SPECIALTY OR SUB-SPECIALTY AS THE REQUESTING PROVIDER WHO IS SEEKING APPROVAL FOR TREATMENT OR SERVICES.

THIS ADVERSE DETERMINATION MUST BE PROVIDED WITHIN TWO (2) BUSINESS DAYS EITHER BY TELEPHONE OR FACSIMILE OR EMAIL, AND IN WRITING WITHIN ONE (1) BUSINESS DAY THEREAFTER, TO THE REQUESTING PROVIDER. ANY SUCH ADVERSE DETERMINATION MUST INCLUDE WRITTEN DOCUMENTATION CONTAINING THE SPECIFIC EVALUATION, FINDINGS AND CONCURRENCE OF THE MISSISSIPPI LICENSED PHYSICIAN TRAINED IN THE RELEVANT SPECIALTY OR SUB-SPECIALTY, AND MUST REFERENCE ANY SPECIFIC PROVISIONS OF THE MISSISSIPPI WORKERS' COMPENSATION MEDICAL FEE SCHEDULE WHICH ALLEGEDLY JUSTIFIES THE ADVERSE DETERMINATION.

ANY ADVERSE DETERMINATION WHICH DOES NOT COMPLY WITH THIS PROVISION SHALL HAVE NO FORCE OR EFFECT AND SHALL NOT PREVENT THE PROVIDER FROM PROCEEDING WITH THE PROPOSED TREATMENT AND ULTIMATELY BEING REIMBURSED AS THOUGH THE PROPOSED TREATMENT OR SERVICE HAD BEEN TIMELY APPROVED IN ADVANCE.

IF A PAYER ELECTS TO SEEK AN EME IN LIEU OF A UTILIZATION REVIEW, THE INJURED WORKER AND THE PROVIDER MUST BE NOTIFIED OF THIS ELECTION WITHIN THE SAME TWO (2) DAY PERIOD APPLICABLE TO ADVERSE DETERMINATIONS STATED ABOVE.

I. SERVICES REQUIRING UTILIZATION REVIEW

Mandatory utilization review is required for the following:

- A. All admissions to inpatient facilities of any type.
- B. All surgical procedures, inpatient and outpatient. (All surgical or other invasive procedures which are administered in the context of pain management treatment shall be regulated by the specific guidelines set forth in the Pain Management section of the Fee Schedule. Only in the event a surgically invasive pain management procedure is not specifically addressed in the Pain Management guidelines shall the provisions in this section control.)
- C. Repeat MRI scans, repeat CT Scans, repeat EMG/NCS studies, and repeat myelograms (meaning more than one such diagnostic procedure which is being prescribed for the same injury) are subject to mandatory utilization review, except that where surgery has been performed following proper approval, the treating physician is entitled to obtain one repeat of the aforementioned diagnostic procedures post-surgery without having to obtain separate approval for each such procedure. In other words, surgical cases merit two diagnostic procedures of the kind listed herein without

the necessity of pre-certification provided one procedure occurs prior to surgical treatment and one procedure occurs post-surgical treatment. The two diagnostic procedures selected by the treating provider hereunder may be the same two diagnostic procedures, or any two of the aforementioned procedures.

- D. Work hardening programs, pain management programs, massage therapy, acupuncture, and biofeedback. Biofeedback therapy shall not exceed ten (10) visits or sessions, unless otherwise agreed to by the payer and provider. Back schools are no longer covered under this Fee Schedule. Pain management programs include but are not limited to a "chronic pain inter-disciplinary pain rehabilitation program" for which specific guidelines are set forth in the Therapeutic Services section.

1. Work Hardening Program Guidelines

- a. Work hardening is an interdisciplinary, individualized, job or goal-specific program of activity with the goal of returning an injured patient to work. Work hardening programs use real or simulated work tasks and progressively graded conditioning exercises that are based on the individual's measured tolerances. Work hardening provides a transition between acute care and successful return to work and is designed to improve the bio-mechanical, neuromuscular, and cardiovascular functioning of the worker. Approval or certification must be based on whether the proposed work hardening program appears reasonably tailored to accomplish the stated goals.

(1) A work hardening program must, at a minimum, have the following components:

- Development of strength and endurance of the individual in relation to the return to work goal;
- Equipment and methods that quantify and measure strength and conditioning levels, i.e., ergometers, dynamometers, treadmills, measured walking tolerances;
- Commercial strength and exercise devices, free weights, circuit training. Goals for each worker are dependent on the demands of their respective jobs;
- Simulation of the critical work demands, the tasks and the environment of the job to which the worker will return. Job simulation tasks that provide for progression in frequency, load, and duration are essential. They must be related to the work goal and include a variety of work stations that offer opportunities to practice work related positions and motions, i.e., clerical, plumbing, electrical;
- Education that stresses body mechanics, work pacing, safety and injury prevention and that promotes worker responsibility and self-management. The education component requires direct therapist and worker interaction;
- Assessment of the need for job modifications. Focus on whether the worker can return to the stated job goal but only with changes, i.e., added equipment, changes in work position or ergonomics, changes at the work site;
- An individualized written plan that identifies observable and measurable goals, the methodology being used to reach these goals, the projected time necessary to accomplish the goal, and the expected outcomes. This plan must be signed by both the provider and the patient;
- This plan needs to be based on a functional capacity (baseline) evaluation and must be completed within the first two (2) days of the program and compared to the critical demands as stated on the job analysis. A comparative analysis (re-evaluation) is done prior to discharge to determine job readiness;
- A reporting system that includes:
 - Documentation of the initial plan;
 - Documentation of progress or lack of progress and future goals;
 - A discharge summary that includes an assessment of the functional capacity level and the achievement of the individual's program goals;
 - A record of the worker's daily attendance including number of days and number of hours per day in the program.

b. Criteria for admission:

- (1) The worker must have reached a point in his or her recovery where no further active or invasive treatment intervention is being anticipated;
- (2) Physical recovery sufficient to allow participation for a minimum of 4 hours a day for three to five days a week;
- (3) Worker's current levels of functioning interfere with his/her ability to carry out specific tasks required in the work place;
- (4) A defined return to work goal which includes:
 - A documented specific job to which the patient can return, along with a specific job analysis; and
 - A return to work goal agreed to by the employer and the patient/employee;
 - The facts must show how the worker must be able to benefit from the program;

- The facts must show the worker is motivated to return to work. A worker whose primary limitation is psychological or clouded by significant illness behavior (i.e., significant self-imitation on F.C.E.) is typically not going to be motivated and will not likely benefit.
- c. Criteria for discharge from a work hardening program:
 - The worker has reached the goal stated in the plan;
 - The worker has not progressed according to the program plan;
 - The worker has not reached interim goals and is not benefitting from the program, or;
 - Number of absences exceeds those allowed by the program (a maximum of two (2) absences is recommended);
 - Worker does not adhere to the schedule;
 - Completion of the program (the program should take 2 to 4 weeks to complete);
 - The previously identified job is no longer available.

2. Massage therapy requires prior authorization of the payer before treatment can be rendered. Medical necessity must be established prior to approval. Reimbursement must be arranged between the payer and provider.

E. External spinal stimulators.

F. Therapeutic treatments, exclusive of chiropractic treatments, after fifteen (15) visits or thirty (30) days, whichever comes first. If, however, the patient undergoes properly approved surgical intervention, he or she shall be entitled to one round of pre-surgical therapeutic treatment up to fifteen (15) treatments or thirty (30) days, whichever first occurs, as provided immediately above; and, in the discretion of the treating physician, to one additional round of therapeutic treatment following surgery for an additional period of fifteen (15) visits or thirty (30) days, whichever first occurs, both of which treatment rounds may be administered without the necessity for seeking pre-certification or pre-approval. The authorization contained herein for a first and second round of limited therapy treatment following surgery shall apply to all reasonable physical and/or occupational therapy treatments, but does not include chiropractic manipulative treatment which is addressed separately below.

G. Chiropractic manipulative treatments are allowed for up to fifteen (15) visits or thirty (30) days, whichever first occurs, without any need to seek pre-certification or authorization. However, chiropractic manipulative treatments which are proposed beyond the first fifteen (15) visits or thirty (30) days, under any circumstances, must be pre-certified or pre-approved.

Like any other service, a spinal manipulation includes pre-evaluation and post-evaluation that would make it inappropriate to bill with an E/M service. However, if the patient's condition has deteriorated or an injury to another site has occurred, reimbursement can be made for an E/M service if documentation substantiates the additional service. Modifier 25 is added to an E/M service when a significant, separately identifiable E/M service is provided and documented as medically necessary.

H. Psychiatric treatment, whether inpatient or outpatient treatment.

I. Retrospective review of services after they have been provided when properly requested by the patient, patient representative, or provider.

J. Any proposed treatment, procedure or service which is more specifically addressed in another section of this Fee Schedule, such as certain pain management procedures, shall be regulated first by the specific guidelines in place in those sections. These utilization review rules apply only where no other, more specific guidelines are set forth in the individual treatment sections of the Fee Schedule; or, where possible, to supplement more specific treatment guidelines spelled out elsewhere in the Fee Schedule.

II. DEFINITIONS

Case Management. The clinical and administrative process in which timely, individualized, and cost effective medical rehabilitation services are implemented, coordinated, and evaluated, by a nurse, other case manager, or other utilization reviewer employed by the payer, on an ongoing basis for patients who have sustained an injury or illness. Use of case management is optional in Mississippi. Use Mississippi-specific code 9936M for a conference with workers' compensation medical case manager/claims manager.

Certification. A determination by a payer and/or its utilization review organization or agent that an admission, extension of stay, or other health care service has been reviewed and, based on the information provided, meets the standard of medical necessity as defined elsewhere in this Fee Schedule.

Clinical Peer. A health professional that holds an unrestricted medical or equivalent license and is qualified to practice in the same or similar specialty as would typically manage the medical condition, procedures, or treatment under review. Generally, as a peer in a similar specialty, the individual must be in the same profession (i.e., the same licensure category as the ordering provider).

Clinical Rationale. A statement or other documentation that taken together provides additional clarification of the clinical basis for a non-certification determination. The clinical rationale should relate the non-certification determination to the worker's condition or treatment plan, and must include a detailed basis for denial or non-certification of the proposed treatment so as to give the provider or patient a sufficient basis for a decision to pursue an appeal. Clinical rationale must include specific reference to any applicable provisions of the *Mississippi Workers' Compensation Medical Fee Schedule* which allegedly support the determination of the reviewer, or a statement attesting to the fact that no such provision(s) exists in the Fee Schedule.

Concurrent Review. Utilization management or review which is conducted during a worker's hospital stay or course of treatment, sometimes called continued stay review.

Discharge Planning. The process of assessing a patient's need for medically appropriate treatment after hospitalization including plans for an appropriate and timely discharge.

Expedited Appeal. An expedited appeal is a request to reconsider a prior determination not to certify imminent or ongoing services, an admission, an extension of stay, or other medical services of an emergency, imminent, or ongoing nature. Also sometimes referred to as a reconsideration request.

First Level Clinical Review. Review conducted by a registered nurse, nurse case manager, or other appropriate licensed or certified health professional. First level clinical review staff may approve requests for admissions, procedures, and services that meet the standard of medical necessity as defined elsewhere in the Fee Schedule, but must refer requests that do not meet this medical necessity standard, in their opinion, to second level clinical peer reviewers for approval or denial.

Notification. Correspondence transmitted by mail, telephone, facsimile, email, and/or other reliable electronic means.

Pre-certification. The review and assessment of proposed medical treatment or services before they occur to determine if such treatment or services meet the definition of medical necessity as set forth elsewhere in this Fee Schedule. The appropriateness of the site or level of care is assessed along with the duration and timing of the proposed services.

Provider. A licensed health care facility, program, agency, or health professional that delivers health care services.

Retrospective Review. Utilization review conducted after services have been provided to the worker.

Second Level Clinical Review. Peer review conducted by appropriate clinical peers when the First Level Clinical Reviewer is unable to determine whether a request for an admission, procedure, or service satisfies the standard of medical necessity as defined elsewhere in this Fee Schedule. A decision to deny, or not certify, proposed treatment or services, must be supported by the express written evaluation, findings and concurrence of a physician licensed to practice medicine in the State of Mississippi and properly trained in the same specialty or sub-specialty as the requesting provider.

Standard Appeal. A request by or on behalf of the patient or provider to reconsider a prior decision by the payer or its utilization review agent to deny proposed medical treatment or service, including but not limited to, a determination not to certify an admission, extension of stay, or other health care service.

Third Level Clinical Review. Medical necessity review conducted by appropriate clinical peers who were not involved in the first or second level review when a decision not to certify a requested admission, procedure, or service has been appealed. The third level peer reviewer must be in the same or like specialty as the requesting provider. A decision to deny, or not certify, proposed treatment or services, must be supported by the express written evaluation, findings and concurrence of a physician licensed to practice medicine in the State of Mississippi and properly trained in the same specialty or sub-specialty as the requesting provider.

Utilization Review. Evaluation of the medical necessity and appropriateness of proposed health care services. It includes both prospective and concurrent review, and shall include retrospective review under certain circumstances.

Utilization Reviewer. An entity, organization, or representative thereof, or other person performing utilization review activities or services on behalf of an employer, payer or third-party claims administrator.

Variance. A deviation from a specific standard.

III. STANDARDS

Payers and their utilization review organizations or programs or agents are required to meet the following standards:

- A. The payer's utilization reviewer or agent must comply with the licensing and certification requirements of MCA §41-83-1 et seq. (Rev. 2005), as amended, and any regulations adopted pursuant thereto by the State Department of Health or the State Board of Medical Licensure, and shall have utilization review personnel, agents or representatives who are properly qualified, trained, supervised, and supported by explicit clinical review criteria and review procedures. In no event shall proposed treatment or services be denied except in accordance with the express provisions stated elsewhere in these Rules and in accordance with MCA §41-83-31 (Rev. 2009).

- B. The first level review is performed if the claims adjuster or manager has not already approved the treatment in question, and is performed by individuals who are health care professionals, who possess a current and valid professional license, and who have been trained in the principles and procedures of utilization review.
- C. The first level reviewers are required to be supported by a doctor of medicine who has an unrestricted license to practice medicine, and in cases where treatment is being denied or withheld by a utilization reviewer, this determination must be supported in writing by a physician licensed in Mississippi and trained in the relevant specialty or sub-specialty, as previously set forth in these Rules.
- D. The second and third level review is performed by clinical peers who hold a current, unrestricted Mississippi license to practice in the same or like specialty as the treating physician whose recommendation is under review, and are oriented in the principles and procedures of utilization review. The second level review shall be conducted for all cases where a clinical determination to certify has not already been made by the payer or payer's agent, and the determination of medical necessity cannot be made by first level clinical reviewers. Second and third level clinical reviewers shall be available within one (1) business day by telephone or other electronic means to discuss the determination with the attending physicians or other ordering providers. In the event more information is required before a determination can be rendered by a second or third level reviewer, the attending/ordering provider must be notified immediately of the delay and given a specific time frame for determination, and a specific explanation of the additional information needed. A requesting provider shall not be required to participate in further discussions where the payer or its agents have unilaterally scheduled such a conference. Further, a request for treatment or service may not be denied solely on grounds the requesting provider fails to participate in a conference which has been unilaterally scheduled by the payer or their agent. Follow-up conferences must be arranged by joint agreement.
- E. The payer's utilization reviewer shall maintain all licensing applications, certificates, and other supporting information, including any and all reports, data, studies, etc., along with written policies and procedures for the effective management of its utilization review activities, which shall be made available to the provider, or the Commission, upon request.
- F. The payer maintains the responsibility for the oversight of the delegated functions if the payer delegates utilization review responsibility to a vendor. The vendor or organization to which the function is being delegated must be currently certified by the Mississippi Board of Health, Division of Licensure and Certification to perform utilization management in the State of Mississippi. A copy of the license or certification held by the utilization review agent shall be furnished to the provider, or to the Commission, upon request. The payer who has another entity perform utilization review functions or activities on its behalf maintains full responsibility for compliance with the rules.
- G. The payer's utilization reviewer shall maintain a telephone review service that provides access to its review staff at a toll free number from at least 9:00 a.m. to 5:00 p.m. CST each normal business day. There should be an established procedure for receiving or redirecting calls after hours or receiving faxed requests. Reviews should be conducted during hospitals' and health professionals' reasonable and normal business hours.
- H. The payer's utilization reviewer shall collect only the information necessary to certify the admission procedure or treatment, length of stay, frequency, and duration of services. The utilization reviewer should have a process to share all clinical and demographic information on individual workers among its various clinical and administrative departments to avoid duplicate requests to providers. (Providers may use the Mississippi Workers' Compensation Commission Utilization Review Request Form.)

IV. PROCEDURES FOR REVIEW DETERMINATIONS

The following procedures are required for effective review determination.

- A. Initial review determinations must be made within two (2) business days of receipt of the necessary information on a proposed non-emergency admission or service requiring a review determination. Receipt of the necessary information may necessitate a discussion with the attending physician or may involve a completed second level clinical review. (For further information, see 15 Mississippi Administrative Code, Pt. 16, Sub. Pt. 1, Ch. 82, Sub. Ch. 7, R. 82.7.5(2); see also the Commission's "Notice Regarding Utilization Review Rules" dated August 13, 2015, which is hereby incorporated by reference and applicable to this edition of the Fee Schedule as well.) The Mississippi Workers' Compensation Utilization Review Request Form may be used to request pre-certification.
- B. When an initial determination is made to certify, notification shall be provided promptly, at least within one (1) business day or before the service is scheduled, whichever first occurs, either by telephone or by written or electronic notification to the provider or facility rendering the service. If an initial determination to certify is provided by telephone, a written notification of the determination shall be provided within two (2) business days thereafter. The written notification shall include the number of days approved, the new total number of days or services approved, and the date of admission or onset of services.
- C. When a determination is made not to certify, notification to the attending or ordering provider or facility must be provided by telephone or electronic means within one (1) business day followed by a written notification within one (1)

business day thereafter. The written notification must include the principal reason/clinical rationale for the determination not to certify, including specific reference to any provision of this Fee Schedule relied upon by the reviewer, and instructions for initiating an appeal and/or reconsideration request.

- D. The payer or its review agent shall inform the attending physician and/or other ordering provider of their right to initiate an expedited appeal in cases involving emergency or imminent care or admission, or a standard appeal, as the case may permit, of a determination not to certify, and the procedure to do so.
1. Expedited appeal—When an initial determination not to certify a health care service is made prior to or during an ongoing service requiring imminent or expedited review, and the attending physician believes that the determination warrants immediate appeal, the attending physician shall have an opportunity to appeal that determination over the telephone or by electronic mail or facsimile on an expedited basis within one (1) business day.
 - a. Each private review agent shall provide for prompt and expeditious access to its consulting physician(s) for such appeals.
 - b. Both providers of care and private review agents should attempt to share the maximum information by phone, fax, or otherwise to resolve the expedited appeal (sometimes called a reconsideration request) satisfactorily.
 - c. Expedited appeals, which do not resolve a difference of opinion, may be resubmitted through the standard appeal process, or submitted directly to the Commission's Medical Cost Containment Division as a Request for Resolution of Dispute. A disagreement warranting expedited review or reconsideration does not have to be resubmitted to the payer or utilization review agent through the standard appeal process unless the requesting provider so wishes.
 2. Standard appeal—A standard appeal will be considered as a request for reconsideration, and notification of the appeal decision given to the provider, not later than twenty (20) calendar days after receiving the required documentation for the appeal.
 - a. An attending physician who has been unsuccessful in an attempt to reverse a determination not to certify treatment or services must be provided the clinical rationale for the determination along with the notification of the appeal decision.
 3. Retrospective review—For retrospective review, the review determination shall be based on the medical information available to the attending or ordering provider at the time the medical care was provided, and on any other relevant information regardless of whether the information was available to or considered by the provider at the time the care or service was provided. Retrospective review is not optional or conducted solely at the discretion of the review agent. A request for review and approval of services already provided must be handled by the payer or its utilization reviewer in the same manner any other request for approval of services is handled.
 - a. When there is retrospective determination not to certify an admission, stay, or other service, the attending physician or other ordering provider and hospital or facility shall receive written notification, or notification by facsimile or electronic mail, within twenty (20) calendar days after receiving the request for retrospective review and all necessary and supporting documentation.
 - b. Notification should include the principal reasons for the determination and a statement of the procedure for standard appeal if the determination is adverse to the patient.
 4. Emergency admissions or surgical procedures—Emergency admissions or surgical procedures must be reported to the payer by the end of the next business day. Post review activities will be performed following emergency admissions, and a continued stay review may be initiated.
 - a. If a licensed physician certifies in writing to the payer or its agent or representative within seventy-two (72) hours of an admission that the injured worker admitted was in need of emergency admission to hospital care, such shall constitute a prima facie case for the medical necessity of the admission. An admission qualifies as an emergency admission if it results from a sudden onset of illness or injury which is manifested by acute symptoms of sufficient severity that the failure to admit to hospital care could reasonably result in (1) serious impairment of bodily function(s), (2) serious or permanent dysfunction of any bodily organ or part or system, (3) permanently placing the person's health in jeopardy, or (4) other serious medical consequence.
 - b. To overcome a prima facie case for emergency admission as established above, the utilization reviewer must demonstrate by clear and convincing evidence that the patient was not in need of an emergency admission.
- E. Failure of the health care provider to provide necessary information for review, after being specifically requested to do so by the payer or its review agent in detail, may result in denial of certification and/or reimbursement.
- F. When a payer and provider have completed the utilization review appeals process and cannot agree on a resolution to a dispute, either party, or the patient, can appeal to the Cost Containment Division of the Mississippi Workers' Compensation Commission, and should submit this request on the Request for Dispute Resolution Form adopted by the Commission. A request for resolution of a utilization review dispute should be filed with the Commission within twenty (20) calendar days following the conclusion of the underlying appeal process provided by the payer or its utilization reviewer. The Commission shall consider and decide a request for resolution of a utilization review dispute in accordance with the Dispute Resolution Rules provided elsewhere in this Fee Schedule.
- G. Failure of a payer or its utilization review agent to timely notify the provider of a decision whether to certify or approve an admission, procedure, service or other treatment shall be deemed to constitute approval by the payer of the requested treatment, and shall obligate the payer to reimburse the provider in accordance with other applicable provisions of this Fee Schedule should the provider elect to proceed with the proposed treatment or service. Timely notification means notification by mail, facsimile, electronic mail, or telephone, followed by written notification, to the provider, within the applicable time periods set forth in these Utilization Review Rules.
- H. Upon request of the provider, or the Commission, a payer and/or the review agent must furnish a copy of the license or certification obtained from the State Department of Health, along with all supporting documentation, reports, data,

studies, etc., which authorizes the reviewer to engage in utilization review activities in the State of Mississippi. The Commission may, likewise, obtain this information unilaterally from the Mississippi Department of Health pursuant to an agreement with that Agency.

- I. Upon a finding by the Commission or an Administrative Judge that a payer, and/or their review agent, has unreasonably delayed a claim without reasonable grounds within the meaning of §71-3-59 of the Law, penalties pursuant to MCA §71-3-59 (Rev. 2000) may be assessed against the payer.

Any payer electing to obtain an Employer Medical Evaluation (EME) pursuant to MCA §71-3-15(1) must do so without unreasonable delay. With respect to an EME sought after the filing of a motion to compel medical treatment by a claimant, failure by the payer to obtain and submit the EME report to the claimant and the Commission within 45 days of the claimant's filing of a motion to compel may be deemed an unreasonable delay. Counsel for both parties may agree to extend the forty-five-day (45-day) limitation, or the Administrative Judge may extend the forty-five-day (45-day) limitation at his or her discretion. The forty-five-day (45-day) limitation does not apply to experts selected by the agreement of both parties to render a second opinion. If an Administrative Judge or the Commission finds that a payer has demonstrated unreasonable delay in seeking or obtaining an EME, regardless of whether a motion to compel medical treatment has been filed, such a finding may result in the imposition of penalties and/or attorney's fees or expenses pursuant to MCA §71-3-59 and/or waiver of the payer's right to an EME.

- J. Regardless of the outcome of a dispute arising hereunder regarding certification or approval of a proposed treatment or service, in no event shall the injured worker/patient be held liable for the payment of any portion of a bill related thereto. As provided in §71-3-15(1) of the Law, any dispute over the amount due a medical provider for any reason shall be resolved between the payer and provider, with each holding the claimant harmless from payment of same, regardless of whether the treatment has been provided inside or outside the State of Mississippi.
- K. Nothing provided herein shall estop or prevent the patient from obtaining legal counsel and/or seeking relief in the form of a request to compel medical treatment before an Administrative Judge.

SEE: Utilization Review Notice document <http://www.mwcc.state.ms.us/pdf/utilizationreviewnotice.pdf>

Rules for Modifiers and Code Exceptions

Please see the modifier rules in each section of the *Mississippi Workers' Compensation Medical Fee Schedule* for a complete listing of appropriate modifiers for each area.

- A. Modifiers must be used by providers to identify procedures or services that are modified due to specific circumstances.
- B. When modifier 22 is used to report an increased service, a report explaining the medical necessity of the situation must be submitted with the claim to the payer. It is not appropriate to use modifier 22 for routine billing. When appropriate, the *Mississippi Workers' Compensation Medical Fee Schedule* reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.
- C. The use of modifiers does not imply or guarantee that a provider will receive reimbursement as billed. Reimbursement for a modified service or procedure is based on documentation of medical necessity and determined on a case-by-case basis.
- D. Modifiers allow health care providers to indicate that a service was altered in some way from the stated description without actually changing the definition of the service.

I. MODIFIERS FOR CPT® ~~(HCPCS LEVEL I)~~ CODES

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow.

This section contains a list of modifiers used with CPT codes. Also consult each practice-area section of the Fee Schedule for applicable modifiers.

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

23 Unusual Anesthesia

Occasionally, a procedure, which usually requires either no anesthesia or local anesthesia, because of unusual circumstances must be done under general anesthesia. This circumstance may be reported by adding modifier 23 to the procedure code of the basic service.

24 Unrelated Evaluation and Management Services by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period

The physician or other qualified health care professional may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E/M service.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately

identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPCS-Level II Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is ~~calculated by subtracting~~ listed in the ~~PGTC~~ Amount ~~from~~ column of the ~~Amount for the reimbursement~~ Fee Schedule.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

47 Anesthesia by Surgeon

Regional or general anesthesia provided by the surgeon may be reported by adding modifier 47 to the basic service. (This does not include local anesthesia.) **Note:** Modifier 47 would not be used as a modifier for the anesthesia procedures.

Mississippi guideline: Reimbursement is made for base units only.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same session, should be identified by adding modifier 50 to the appropriate 5 digit code.

Mississippi guideline: This modifier is reimbursed at fifty percent (50%) of the allowed amount.

51 Multiple Procedures

When multiple procedures, other than E/M Services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated “modifier 51 exempt” codes as specified in the Fee Schedule. Services with modifier 51 are reimbursed at fifty percent (50%) of the allowed amount.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

54 Surgical Care Only

When 1 physician or other qualified health care professional performs a surgical procedure and another provides preoperative and/or postoperative management, surgical services may be identified by adding modifier 54 to the usual procedure number.

55 Postoperative Management Only

When 1 physician or other qualified health care professional performed the postoperative management and another performed the surgical procedure, the postoperative component may be identified by adding modifier 55 to the usual procedure number.

56 Preoperative Management Only

When 1 physician or other qualified health care professional performed the preoperative care and evaluation and another performed the surgical procedure, the preoperative component may be identified by adding modifier 56 to the usual procedure number.

57 Decision for Surgery

An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: (a) planned or anticipated (staged); (b) more extensive than the original procedure; or (c) for therapy following a surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For treatment of a problem that requires a return to the operating/procedure room, (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25. [See also Level II \(HCPCS/National\) Modifiers listing.](#)

62 Two Surgeons

When two surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated add-on code(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. If additional procedure(s) (including add-on procedure(s)) are performed during the same surgical session, separate code(s) may also be reported with modifier 62 added. **Note:** If a co-surgeon acts as an assistant in the performance of additional procedure(s), other than those reported with the modifier 62, during the

same surgical session, those services may be reported using separate procedure code(s) with modifier 80 or modifier 82 added, as appropriate.

Mississippi guideline: This modifier is reimbursed at one hundred fifty percent (150%) of the allowed amount divided equally between the two co-surgeons.

66 Surgical Team

Under some circumstances, highly complex procedures (requiring the concomitant services of several physicians or other qualified health care professionals, often of different specialties, plus other highly skilled, specially trained personnel, various types of complex equipment) are carried out under the "surgical team" concept. Such circumstances may be identified by each participating individual with the addition of modifier 66 to the basic procedure number used for reporting services.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

80 Assistant Surgeon

Surgical assistant services may be identified by adding modifier 80 to the usual procedure number(s).

Mississippi guideline: Reimbursement is twenty percent (20%) of the maximum reimbursement allowance.

81 Minimum Assistant Surgeon

Minimum surgical assistant services are identified by adding modifier 81 to the usual procedure number.

Mississippi guideline: Physician reimbursement is ten percent (10%) of the maximum reimbursement allowance.

82 Assistant Surgeon (when qualified resident surgeon not available)

The unavailability of a qualified resident surgeon is a prerequisite for use of modifier 82 appended to the usual procedure code number(s).

90 Reference (Outside) Laboratory

When laboratory procedures are performed by a party other than the treating or reporting physician or other qualified health care professional, the procedure may be identified by adding modifier 90 to the usual procedure number.

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time, reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results (eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

92 Alternative Laboratory Platform Testing

When laboratory testing is being performed using a kit or transportable instrument that wholly or in part consists of a single use, disposable analytical chamber, the service may be identified by adding modifier 92 to the usual laboratory procedure code (HIV testing 86701–86703, and 87389). The test does not require permanent dedicated space; hence by its design may be hand carried or transported to the vicinity of the patient for immediate testing at that site, although location of the testing is not in itself determinative of the use of this modifier.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

AA Anesthesia Services Performed Personally by Anesthesiologist (HCPCS ~~Level II~~ Modifier)

Report modifier AA when the anesthesia services are personally performed by an anesthesiologist.

AD Medical Supervision by a Physician: More Than 4 Concurrent Anesthesia Procedures (HCPCS ~~Level II~~ Modifier)

Report modifier AD when the anesthesiologist supervises more than 4 concurrent anesthesia procedures.

AS Physician Assistant, Nurse Practitioner, or Clinical Nurse Specialist Services for Assistant at Surgery (HCPCS ~~Level II~~ Modifier)

Assistant at surgery services provided by another qualified individual (e.g., physician assistant, nurse practitioner, clinical nurse specialist, registered nurse first assistant) and not another physician are identified by adding modifier AS to the listed applicable surgical procedures. Modifier AS may be appended to any code identified as appropriate for surgical assistance in this Fee Schedule.

Mississippi guideline: AS reimbursement is ten percent (10%) of the maximum reimbursement allowance. For assistant at surgery services provided by a physician, see modifiers 80, 81, and 82.

M1 Nurse Practitioner (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by a nurse practitioner.

M2 Physician Assistant (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by a physician assistant.

M3 Physical or Occupational Therapist Assistant (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by either a physical therapist assistant or an occupational therapist assistant.

M4 CARF Accredited (Mississippi Modifier)

This modifier should be used in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered by a CARF accredited provider as part of a pre-approved interdisciplinary pain rehabilitation program.

M5 Chronic Pain Treatment (Mississippi Modifier)

This modifier should be used only in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered as part of a pre-approved interdisciplinary pain rehabilitation program.

QK Medical Direction of 2, 3, or 4 Concurrent Anesthesia Procedures Involving Qualified Individuals (HCPCS ~~Level II~~ Modifier)

Report modifier QK when the anesthesiologist supervises 2, 3, or 4 concurrent anesthesia procedures involving qualified individuals.

QX Qualified Non-Physician Anesthetist with Medical Direction by a Physician (HCPCS ~~Level II~~ Modifier)

Regional or general anesthesia provided by a qualified non-physician anesthetist with medical direction by a physician may be reported by adding modifier QX.

QY Medical Direction of One Qualified Non-Physician Anesthetist by an Anesthesiologist (HCPCS ~~Level II~~ Modifier)

Report modifier QY when the anesthesiologist supervises one qualified non-physician anesthetist.

QZ CRNA Service without Medical Direction by a Physician (HCPCS ~~Level II~~ Modifier)

Regional or general anesthesia provided by the CRNA (certified registered nurse anesthetist) or AA (anesthesiologist assistant) without medical direction by a physician may be reported by adding modifier QZ.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

II. MODIFIERS APPROVED FOR AMBULATORY SURGERY CENTER (ASC) HOSPITAL OUTPATIENT USE

This section contains a list of modifiers used with ambulatory surgery center and hospital-based outpatient services. Also consult each practice-area section of the Fee Schedule for additional modifiers.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

27 Multiple Outpatient Hospital E/M Encounters on the Same Date

For hospital outpatient reporting purposes, utilization of hospital resources related to separate and distinct E/M encounters performed in multiple outpatient hospital settings on the same date may be reported by adding modifier 27 to each appropriate level outpatient and/or emergency department E/M code(s). This modifier provides a means of reporting circumstances involving evaluation and management services provided by physician(s) in more than one (multiple) outpatient hospital setting(s) (eg, hospital emergency department, clinic). **Note:** This modifier is not to be used for physician reporting of multiple E/M services performed by the same physician on the same date. For physician reporting of all outpatient evaluation and management services provided by the same physician on the same date and performed in multiple outpatient setting(s) (eg, hospital emergency department, clinic), see **Evaluation and Management, Emergency Department, or Preventive Medicine Services** codes.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same session, should be identified by adding modifier 50 to the appropriate five-digit code.

Mississippi guideline: This modifier is reimbursed at fifty percent (50%) of the allowed amount.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: (a) planned or anticipated (staged); (b) more extensive than the original procedure; or (c) for therapy following a diagnostic surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For treatment of a problem that requires a return to the operating/procedure room (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25. See also Level II (HCPCS/National) Modifiers listing.

73 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure Prior to the Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well being of the patient, the physician may cancel a surgical or diagnostic procedure subsequent to the patient's surgical preparation (including sedation when provided, and being taken to the room where the procedure is to be performed), but prior to the administration of anesthesia (local, regional block(s) or general). Under these circumstances, the intended service that is prepared for but cancelled can be reported by its usual procedure number and the addition of modifier 73. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

74 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure After Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well-being of the patient, the physician may terminate a surgical or diagnostic procedure after the administration of anesthesia (local, regional block(s), general) or after the procedure was

started (incision made, intubation started, scope inserted, etc). Under these circumstances, the procedure started but terminated can be reported by its usual procedure number and the addition of modifier 74. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time, reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results (eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

III. MODIFIERS FOR HCPCS ~~Level II~~ CODES

This section contains a list of commonly used modifiers with HCPCS ~~Level II~~ DME codes. Other HCPCS ~~Level II~~ modifiers, including those which can be used with CPT codes, are acceptable modifiers.

AU Item Furnished in Conjunction with a Urological, Ostomy, or Tracheostomy Supply

AV Item Furnished in Conjunction with a Prosthetic Device, Prosthetic, or Orthotic

AW Item Furnished in Conjunction with a Surgical Dressing

KC Replacement of Special Power Wheelchair Interface

NU New Equipment

RR Rental (use the RR modifier when DME is to be rented)

Mississippi guideline: Listed amount is the per month allowance—, except codes E0935, E0936, and E0675 which are per-day allowances.

UE Used Durable Medical Equipment

Mississippi guideline: Used to report the purchase of used durable medical equipment.

IV. CODE EXCEPTIONS

- A. **Unlisted Procedure Codes.** If a procedure is performed that is not listed in the Fee Schedule, the provider must bill with the appropriate “Unlisted Procedure” code and submit a narrative report to the payer explaining why it was medically necessary to use an unlisted procedure code.

The CPT book contains codes for unlisted procedures. Use these codes only when there is no procedure code that accurately describes the service rendered. A report is required as these services are reimbursed by report (see below).

- B. **By Report (BR) Codes.** By report (BR) codes are used by payers to determine the reimbursement for a service or procedure performed by the provider that does not have an established maximum reimbursement allowance (MRA).
1. Reimbursement for procedure codes listed as “BR” must be determined by the payer based on documentation submitted by the provider in a special report attached to the claim form. The required documentation to substantiate the medical necessity of a procedure does not warrant a separate fee. Information in this report must include, as appropriate:
 - a. A complete description of the actual procedure or service performed;
 - b. The amount of time necessary to complete the procedure or service performed;
 - c. Accompanying documentation that describes the expertise and/or equipment required to complete the service or procedure.
 2. Reimbursement of “BR” procedures should be based on the usual and customary rate.
- C. **Category II Codes.** This Fee Schedule does not include Category II codes as published in the CPT book. Category II codes are supplemental tracking codes that can be used for performance measurements. These codes describe clinical components that are typically included and reimbursed in other services such as evaluation and management (E/M) or laboratory services. These codes do not have an associated ~~relative value or fee~~.
- D. **Category III Codes.** This Fee Schedule does not include Category III codes published in the CPT book. If a provider bills a Category III code, payment may be denied.
- E. **Add-On Codes.** The CPT book identifies procedures that are always performed in addition to the primary procedure and designates them with a + symbol. Add-on codes are never reported for stand-alone services but are reported secondarily in addition to the primary procedure. Specific language is used to identify add-on procedures such as “each additional” or “(List separately in addition to primary procedure).”

The same physician or other qualified health care provider that performed the primary service/procedure must perform the add-on service/procedure. Add-on codes describe additional intra-service work associated with the primary service/procedure (e.g., additional digit(s), lesions(s), neurotomy(s), vertebral segment(s), tendon(s), joint(s)).

Add-on codes are always performed in addition to the primary service/procedure, and must never be reported as a stand-alone code. All add-on codes found in the CPT book are exempt from the multiple procedure concept (see modifier 51 definition in this section). Add-on codes are reimbursed at one hundred percent (100%) of the maximum reimbursement allowance or the provider’s charge, whichever is less.

Refer to the most current version of the CPT book for a complete list of add-on codes.

- F. **Codes Exempt From Modifier 51.** This symbol  denotes procedure codes that are exempt from the use of modifier 51 and are not designated as add-on procedures/services as defined in the CPT book. Modifier 51 exempt services and procedures can be found in Appendix E of *CPT 2013*⁶. Additional codes that should not be subject to modifier 51 have been identified by Optum360 based upon CPT guidelines and are included in this Fee Schedule using the  **same-CPT** icon.

Codes exempt from modifier 51 are reimbursed at one hundred percent (100%) of the maximum reimbursement allowance or the provider’s charge, whichever is less.

- G. **Moderate (Conscious) Sedation.** To report moderate (conscious) sedation provided by the physician also performing the diagnostic or therapeutic service for which conscious sedation is being provided, see codes 99143–99145. It is not appropriate for the physician performing the sedation and the service for which the conscious sedation is being provided to report the sedation separately when the code is listed with the conscious sedation symbol . The conscious sedation symbol identifies services that include moderate (conscious) sedation. A list of codes for services that include moderate (conscious) sedation is also included in the most current CPT book.

For procedures listed with , when a second physician other than the health care professional performing the diagnostic or therapeutic services provides moderate (conscious) sedation in the facility setting (e.g., hospital, outpatient hospital/ambulatory surgery center, skilled nursing facility), the second physician reports the associated moderate sedation procedure/service using codes 99148–99150.

Moderate sedation codes are not used to report minimal sedation (anxiolysis), deep sedation, or monitored anesthesia care.

Pharmacy Rules

I. SCOPE

This section provides specific rules for the dispensing of and payment for medications and other pharmacy services prescribed to treat work-related injury/illness under the terms of the Act.

II. DEFINITIONS

- A. **Medications** are defined as drugs prescribed by a licensed health care provider and include name brand and generic drugs as well as patented or over-the-counter drugs, compound drugs and physician-dispensed or repackaged drugs.
- B. **Average Wholesale Price** means the AWP based on the most current edition of the *Drug Topics Red Book* in effect at the time the medication is dispensed.

III. RULES

- A. Generic Equivalent Drug Products. Unless otherwise specified by the ordering physician, all prescriptions will be filled under the generic name.

When the physician writes "brand medically necessary" on the prescription, the pharmacist will fill the order with the brand name. When taking telephone orders, the pharmacist will assume the generic brand is to be used unless "brand medically necessary" is specifically ordered by the treating physician. Without exception, the treating physician has the authority to order a brand name medication if he/she feels the trademark drug is substantially more effective.
- B. A payer or provider may not prohibit or limit any person from selecting a pharmacy or pharmacist of his/her choice, and may not require any person to purchase pharmacy services, including prescription drugs, exclusively through a mail-order pharmacy or program, or to obtain medication dispensed by the physician or in the physician's office, provided the pharmacy or pharmacist selected by the claimant has agreed to be bound by the terms of the Workers' Compensation Law and this Fee Schedule with regard to the provision of services and the billing and payment therefor.
- C. Dietary supplements, including but not limited to minerals, vitamins, and amino acids are not reimbursable unless a specific compensable dietary deficiency has been clinically established as related to the work injury.
- D. Not more than one dispensing fee shall be paid per drug within a ~~ten (10)~~thirty (30) day period.

IV. REIMBURSEMENT

- A. Reimbursement for pharmaceuticals ordered for the treatment of work-related injury/illness is as follows:
 - 1. Brand/Trade Name Medications: Average Wholesale Price (AWP) plus a five dollar (\$5.00) dispensing fee.
 - 2. Generic Medications: Average Wholesale Price (AWP) plus a five dollar (\$5.00) dispensing fee.
 - 3. Over-the-counter medications are reimbursed at usual and customary rates.
 - 4. Dispensing fees are payable only if the prescription is filled under the direct supervision of a registered pharmacist. If a physician dispenses medications from his/her office, a dispensing fee is not allowed.
- ~~B.~~ Supplies and equipment used in conjunction with medication administration should be billed with the appropriate HCPCS codes and shall be reimbursed according to the Fee Schedule. Supplies and equipment not listed in the Fee Schedule will be reimbursed at the usual and customary rate.
- C. Mail-order pharmaceutical services are subject to the rules and reimbursement limitations of this Fee Schedule when supplying medications to Mississippi Workers' Compensation claimants. Shipping for mail-order pharmaceutical services is not separately reimbursed.

V. SPECIAL PRICING

- A. **Repackaged and/or Physician Dispensed Medication:** If the National Drug Code (NDC) for the drug product as dispensed is a repackaged drug, the maximum allowable fee shall be the lesser of AWP using a) the NDC for the underlying drug product from the original labeler, or b) the therapeutic equivalent drug product from the original labeler NDC.

For purposes of this provision, “therapeutically equivalent drugs” means drugs that have been assigned the same Therapeutic Equivalent Code starting with the letter “A” in the Food and Drug Administration’s publication “Approved Drug Products with Therapeutic Equivalence Evaluations” (Orange Book). The Orange Book may be accessed through the Food and Drug Administration website at: <http://www.accessdata.fda.gov/scripts/cder/ob/default.cfm>.

National Drug Code “for the underlying drug product from the original labeler” means the NDC of the drug product actually utilized by the repackager in producing the repackaged product.

- ~~6. Compound Medications:~~ **B. Compound Medications: A compound medication is any customized formulation of medication prepared by a compounding pharmacist that is not commercially available.** Compound drugs or medications shall be billed by listing each drug and its NDC number included in the compound and calculating the charge for each drug separately. Payment shall be based on the sum of the fee for each ingredient, plus a single dispensing fee of five dollars (\$5.00). If the NDC for any ingredient is a repackaged drug, reimbursement for the repackaged ingredient(s) shall be as above provided. Reimbursement for a compound cream medication is limited to a maximum total reimbursement of three hundred dollars (\$300.00) for one hundred twenty (120) grams per month. Any additional quantity over and above this one hundred twenty (120) gram limit requires further documentation and prior authorization (pre-certification).

- ~~7C.~~ If information pertaining to the original labeler of the underlying drug product used in repackaged or compound medications is not provided or is otherwise unknown or unavailable, the payer shall reimburse using the lowest priced generic therapeutic equivalent drug product.

D. Other Special Pricing:

The following medications have maximum reimbursement allowables as follows:

<u>Lidopro patch</u>	<u>\$5.45 each patch</u>
<u>Lidopro cream</u>	<u>\$40.26 up to 4 oz</u>
<u>Terocin patch</u>	<u>\$5.45 each patch</u>
<u>Terocin lotion</u>	<u>\$40.26 up to 4 oz</u>
<u>Intraarticular joint kit</u>	<u>\$27.36</u>

Please refer to the MWCC website

(<http://www.mwcc.state.ms.us/#/medicalFeeSchedule>) for any additions or changes to the special pricing list.

- ~~B. Supplies and equipment used in conjunction with medication administration should be billed with the appropriate HCPCS codes and shall be reimbursed according to the Fee Schedule. Supplies and equipment not listed in the Fee Schedule will be reimbursed at the usual and customary rate.~~
- ~~C. Mail order pharmaceutical services are subject to the rules and reimbursement limitations of this Fee Schedule when supplying medications to Mississippi Workers' Compensation claimants.~~

Other Qualified Health Care Professional Rules

I. ANY QUALIFIED HEALTH CARE PROFESSIONAL

Any qualified health care professional who is licensed in Mississippi, practices within state guidelines, and is listed within this Fee Schedule as an authorized provider is reimbursed for services based on this Fee Schedule.

II. NURSE PRACTITIONER

- A. Modifier M1 should be attached to the appropriate CPT® code when billing services rendered by the nurse practitioner. The nurse practitioner must use his/her unique identifier to bill for all services. Nurse practitioners must comply with the requirements for a National Provider Identifier (NPI) as specified in the Billing and Reimbursement Rules of this Fee Schedule.
- B. The nurse practitioner is reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure.
- C. There is only one fee allowed for each CPT code. It is the decision of the physician or the nurse practitioner as to who will bill for a service when both have shared in the provision of the service. Incorrect billing of the service may cause a delay or improper payment by the payer. The medical doctor (MD) must be on-site on the date of service and provide additional documentation and review of services in order for physician reimbursement to ~~apply~~ be applied.

III. PHYSICIAN ASSISTANT

- A. Mississippi-specific modifier M2 should be attached to the appropriate CPT code(s) when billing services rendered by the physician assistant.
- B. The physician assistant is reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure.
- C. The same rules as apply to the nurse practitioners with regard to billing and reimbursement, shall apply to the physician assistant.

IIIIV. PHYSICAL THERAPIST ASSISTANT OR OCCUPATIONAL THERAPIST ASSISTANT

- A. Mississippi-specific modifier M3 should be attached to the appropriate CPT code(s) when billing services rendered by a physical therapist assistant or an occupational therapist assistant.
- B. The physical therapist assistant or occupational therapist assistant is reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure.

IVV. PSYCHOLOGY

When a provider other than a psychiatrist provides psychology services, the reimbursement amount for the CPT code is paid at eighty-five percent (85%) of the maximum reimbursement allowance. This applies to psychologists, social workers, counselors, etc.

Home Health Rules

I. SCOPE

This section of the Fee Schedule pertains to home health services provided to patients who have a work-related injury/illness.

- A. The determination that the injury/illness or condition is work related must be made by the payer and home health services shall be pre-certified as medically necessary by the payer's Utilization Management Program.
- B. All nursing services and personal care services shall have prior authorization by the payer.
- C. A description of needed nursing or other attendant care must accompany the request for authorization.

II. REIMBURSEMENT

- A. If a payer and provider have a mutually agreed upon contractual arrangement governing the payment for home health services to injured/ill employees, the payer shall reimburse under the contractual agreement and not according to the Fee Schedule.
- B. In the absence of a mutually agreed upon contractual arrangement governing payment for home health service, reimbursement shall be made as in other cases (see Billing and Reimbursement Rules) in an amount equal to billed charges, or the maximum reimbursement allowance (MRA), whichever is less. Billing for home health services is appropriate using the applicable billing form for other institutional providers or facilities.
- C. A visit made simultaneously by two or more workers from a home health agency to provide a single covered service for which one supervises or instructs the other shall be counted as one visit.
- D. A visit is defined as time up to and including the first two hours.
- E. The maximum reimbursement allowances (MRA) listed herein are inclusive of mileage and other incidental travel expenses, unless otherwise agreed to by the payer and provider.
- F. The hourly rates set forth in this section of the Fee Schedule apply to all hours worked. No additional reimbursement is allowed for overtime hours, unless otherwise agreed to by the parties in a separate fee contract.

III. RATES

- A. The following MRAs and codes apply to services provided by or through a home health agency:

Service	Fee Per Visit	Billing Code
RN Skilled Nursing Care	\$110 125.00	G01 54 62
Physical Therapy	\$120 5 .00	G0151
Speech Therapy	\$125.00	G0153
Occupational Therapy	\$125.00	G0152
Medical Social Services	\$125.00	G0155
Home Health Aide	\$60 55.00	G0156

For services that exceed two (2) hours, reimbursement for time in excess of the first two (2) hours shall be pro-rated and based on an hourly rate equal to fifty percent (50%) of the above visit fee. For home health services rendered in two (2) hours or less, reimbursement shall be made for a visit as above provided.

Note: In addition to the Skilled Nursing Care fees above, an additional sum of seven dollars and sixteen cents (\$7.16) per visit shall be added to cover the cost of medical supplies, provided the billing form adequately specifies what supplies were utilized.

B. The following Private Duty Rates shall apply:

Skilled Nursing Care – R.N.	\$44.00 per hour
Skilled Nursing Care – L.P.N.	\$37.00 per hour
Certified Nurse Assistant	\$20.00 per hour
Sitter/Attendant	\$15.00 per hour

- C. Any reimbursement to persons not working under a professional license, such as a spouse or relative, will be at the rate of eight dollars (\$8.00) per hour unless otherwise negotiated by the payer and caregiver or provider.
- D. Professional providers not assigned a MRA for home health services and who have not negotiated their rates with the payer prior to provision of home health care, shall be reimbursed at the usual and customary rate, or the total billed charge, whichever is less.

IV. PARENTERAL/ENTERAL/HOME INFUSION THERAPY IN THE HOME SETTING

- A. The MRA for this therapy provided in the home setting is a per diem amount and includes necessary supplies for the safe and effective administration of the prescribed therapy. Supplies include set(s), needles, syringes, saline, tubing, dressing kits, saline, heparin, alcohol pads, start kits, catheters, adapters, tape, gauges, pump, poles, and other supplies.

B. Per diem amounts are as follows:

Parenteral therapy/home infusion (with or without antibiotics)

Daily – \$165.00

Twice a day – \$ 190.00

Three times a day – \$ 215.00

Four times a day – \$ 265.00

Five or more times a day – \$ 335.00

Total Parental Nutrition (TPN):

1-1.6 Liters per day – \$280.00

1.7-2.4 Liters per day – \$350.00

More than 2.4 liters per day – \$385.00

LIPIDS:

10% – \$75.00

20% – \$95.00

Enteral Therapy:

\$24.00 per day

- C. Medications for Parenteral/Enteral Therapy are reimbursed at AWP.

V. HOSPICE

- A. Hospice reimbursement is a per diem amount that is all inclusive for services provided.

B. Daily Per Diem amounts are as follows:

Routine Home Care – \$373.68

Continuous Home Rate – \$1,889.58

Inpatient Care – \$1,440.22

Skilled Nursing Facility Rules

I. REIMBURSEMENT

The maximum reimbursement allowance for medical care provided within the confines of a freestanding skilled nursing facility, a hospital based skilled nursing facility, or a swing bed facility, shall be four hundred dollars (\$400.00) per day. This rate covers and includes all routine and ancillary health care services provided to a claimant during each day of a covered skilled nursing facility stay.

II. EXCLUDED SERVICES

The following services are excluded from the daily skilled nursing facility rate, and shall be reimbursed separately and in addition to the above daily rate:

- Cardiac catheterization
- Angiography
- Magnetic resonance imaging (MRI) and computerized axial tomography (CT) scans
- Radiation therapy and chemotherapy
- Emergency services, which are defined as an admission or services necessitated by a sudden onset of illness or injury which is manifested by acute symptoms of sufficient severity that the failure to provide services could reasonably result in:
 - serious impairment of bodily function(s)
 - serious or permanent dysfunction of any bodily organ or part or system
 - permanently placing the person's health in jeopardy, or
 - other serious medical consequence
- Outpatient services when provided in a hospital or other free standing outpatient facility separate from the skilled nursing facility
- Customized prosthetic services
- Ambulance transportation related to any of the above services
- Services provided independent of the facility by physicians, and other qualified health care professionals (e.g., NP, PA, CRNA, psychologist).

III. EXCLUSIONS

As in other cases, the above provisions shall not apply to any mutual agreement or contract entered into by the payer and provider which sets forth the terms for the provision of skilled nursing facility services and reimbursement therefor.

Evaluation and Management

This section contains rules and codes used to report evaluation and management (E/M) services. Rules and Guidelines follow the current CPT® Guidelines as stated.

Note: Rules used by all physicians in reporting their services are presented in the General Rules section.

I. DEFINITIONS AND RULES

Definitions and rules pertaining to E/M services are as follows:

- A. **Consultations.** The CPT book defines a consultation as “a type of evaluation and management service provided at the request of another physician or appropriate source to either recommend care for a specific condition or problem or to determine whether to accept responsibility for ongoing management of the patient's entire care or for the care of a specific condition or problem.” (This includes referrals for a second opinion.) Consultations are reimbursable only to physicians with the appropriate specialty for the services provided.

In order to qualify as a consultation the following criteria must be met:

- The verbal or written request for a consult must be documented in the patient's medical record;
- The consultant's opinion and any services ordered or performed must be documented by the consulting physician in the patient's medical record;
- The consulting physician must provide a written report to the requesting physician or other appropriate source.

A payer/employer may request a second opinion examination or evaluation for the purpose of evaluating temporary or permanent disability or medical treatment being rendered, as provided in MCA §71-3-15(1) (Rev. 2000). This examination is considered a confirmatory consultation. The confirmatory consultation is billed using the appropriate level and site-specific consultation codes 99241–99245 for office or other outpatient consultations and 99251–99255 for inpatient consultations, with modifier 32 appended to indicate a mandated service.

Evaluation and management consultation services will continue to be reported with CPT codes 99241–99245 for outpatient consultation services and codes 99251–99255 for inpatient consultation services. The rules and guidelines regarding the definition, documentation, and reporting of consultation services as contained in the CPT book will apply unless superseded by these guidelines. Consultation services will be reimbursed at the lesser of the Fee Schedule maximum reimbursable amount (MRA) or the billed amount.

- B. **Referral.** Subject to the definition of “consultation” provided in this Fee Schedule, a referral is the transfer of the total or specific care of a patient from one physician to another and does not constitute a consultation. (Initial evaluations and subsequent services are designated as listed in the Evaluation and Management section).
- C. **New and Established Patient Service.** Several code subcategories in the Evaluation and Management section are based on the patient's status as new or established. The new versus established patient guidelines also clarify the situation in which a physician is on call or covering for another physician. In this instance, classify the patient encounter the same as if it were for the physician who is unavailable.
- **New Patient.** A new patient is one who has not received any professional services from the physician, or another physician of the same specialty who belongs to the same group practice, for this same injury or within the past three years.
 - **Established Patient.** An established patient is a patient who has been treated for the same injury by any physician, of the same specialty, who belongs to the same group practice.
- D. **E/M Service Components.** The first three components of history, examination, and medical decision making are the keys to selecting the correct level of E/M codes, and all three components must be met or exceeded in the documentation of an initial evaluation or consultation. However, in established, subsequent, and follow-up categories, only two of the three must be met or exceeded for a given code.
1. The history component is categorized by four levels:
 - a. **Problem Focused.** Chief complaint; brief history of present illness or problem.
 - b. **Expanded Problem Focused.** Chief complaint; brief history of present illness; problem-pertinent system review.
 - c. **Detailed.** Chief complaint; extended history of present illness; problem-pertinent system review extended to include a review of a limited number of additional systems; pertinent past, family medical and/or social history directly related to the patient's problems.

- d. *Comprehensive*. Chief complaint; extended history of present illness; review of systems that is directly related to the problem(s) identified in the history of the present illness, plus a review of all additional body systems; **complete** past, family, and social history.
2. The physical exam component is similarly divided into four levels of complexity:
 - a. *Problem Focused*. A limited examination of the affected body area or organ system.
 - b. *Expanded Problem Focused*. A limited examination of the affected body area or organ system and other symptomatic or related organ system(s).
 - c. *Detailed*. An extended examination of the affected body area(s) and other symptomatic or related organ system(s).
 - d. *Comprehensive*. A general multi-system examination or a complete examination of a single organ system.

The CPT book identifies the following body areas:

- Head, including the face
- Neck
- Chest, including breasts and axilla
- Abdomen
- Genitalia, groin, buttocks
- Back
- Each extremity

The CPT book identifies the following organ systems:

- Eyes
- Ears, nose, mouth, and throat
- Cardiovascular
- Respiratory
- Gastrointestinal
- Genitourinary
- Musculoskeletal
- Skin
- Neurologic
- Psychiatric
- Hematologic/lymphatic/immunologic

3. Medical decision making is the final piece of the E/M coding process. Medical decision making refers to the complexity of establishing a diagnosis or selecting a management option that can be measured by the following:
 - a. The number of possible diagnoses and/or the number of management options that must be considered.
 - b. The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be obtained, reviewed, and analyzed.
 - c. The risk of significant complications, morbidity, mortality, as well as co-morbidities associated with the patient's presenting problem(s), the diagnostic procedure(s), and/or the possible management options.

E. Contributory Components.

1. Counseling, coordination of care, and the nature of the presenting problem are not major considerations in most encounters, so they generally provide contributory information to the code selection process. The exception arises when counseling or coordination of care dominates the encounter (more than fifty percent (50%) of the time spent). Document the exact amount of time spent to substantiate the selected code and what was clearly discussed during the encounter. Counseling is defined in the CPT book as a discussion with a patient and/or family concerning one or more of the following areas:
 - a. Diagnostic results, impressions, and/or recommended diagnostic studies;
 - b. Prognosis;
 - c. Risks and benefits of management (treatment) options;
 - d. Instructions for management (treatment) and/or follow-up;
 - e. Importance of compliance with chosen management (treatment) options;
 - f. Risk factor reduction;
 - g. Patient and family education.
2. E/M codes are designed to report actual work performed, not time spent. But when counseling or coordination of care dominates the encounter, time overrides the other factors and determines the proper code. For office encounters, count only the time spent face-to-face with the patient and/or family. For hospital or other inpatient encounters, count the time spent rendering services for that patient while on the patient's unit, on the patient's floor, or at the patient's bedside.

F. Interpretation of Diagnostic Studies in the Emergency Room

1. Only one fee for the interpretation of an x-ray or EKG procedure will be reimbursed per procedure.
2. The payer is to provide reimbursement to the provider that directly contributed to the diagnosis and treatment of the individual patient.
3. It is necessary to provide a signed report in order to bill the professional component of a diagnostic procedure. The payer may require the report before payment is rendered.
4. If more than one bill is received, physician specialty should not be the deciding factor in determining which physician to reimburse.

Example: In many emergency departments (EDs), an emergency room (ER) physician orders the x-ray on a particular patient. If the ER physician interprets the x-ray making a notation as to the findings in the chart and then treats the patient according to these radiological findings, the ER physician should be paid for the interpretation and report. There may be a radiologist on staff at the particular facility with quality control responsibilities at that particular facility. However, the fact that the radiologist reads all x-rays taken in the ED for quality control purposes is not sufficient to command a separate or additional reimbursement from the payer.

5. A review alone of an x-ray or EKG does not meet the conditions for separate payment of a service, as it is already included in the ED visit.

II. GENERAL GUIDELINES

The E/M section is divided into broad categories such as office visits, hospital visits, and consultations. Most of the categories are further divided into two or more subcategories of E/M services. Keep the following in mind when coding each service setting:

- A patient is considered an outpatient at a health care facility until formal inpatient admission occurs.
- All physicians use codes 99281–99285 for reporting emergency department services, regardless of hospital-based or non-hospital-based status.
- Admission to a hospital or nursing facility includes E/M services provided elsewhere on the same day.
- Not more than one hospital visit per day shall be payable except when documentation describes the medical necessity of more than one visit by a particular practitioner. Hospital visit codes shall be combined into the single code that best describes the service rendered.
- Only one provider is reimbursed for a patient visit, except where wound care evaluation is provided in an established wound care center.

III. OFFICE OR OTHER OUTPATIENT SERVICES (99201–99215)

Use the Office or Other Outpatient Services codes to report evaluation and management services provided in the office or in an outpatient or other ambulatory facility. A patient is considered an outpatient until inpatient admission to a health care facility occurs.

IV. HOSPITAL OBSERVATION SERVICES (99217–99226)

CPT codes 99217 through 99226 report E/M services provided to patients designated/admitted as “observation status” in a hospital. It is not necessary that the patient be located in an observation area designated by the hospital.

V. OBSERVATION CARE DISCHARGE SERVICES (99217)

- A. CPT code 99217 is used only if discharge from observation status occurs on a date other than the initial date of observation. The code includes final examination of the patient, discussion of the hospital stay, instructions for continuing care, and preparation of discharge records.
- B. If a patient is admitted to and subsequently discharged from observation status on the same date, see codes 99234–99236 as appropriate.
- C. Do not report observation care discharge CPT code 99217 in conjunction with a hospital admission.

VI. HOSPITAL INPATIENT SERVICES (99221–99239)

Codes 99221–99239 are used to report evaluation and management services provided to hospital inpatients. Hospital inpatient services include those services provided to patients in a “partial hospital” setting. These codes are to be used to report these partial hospitalization services.

VII. CONSULTATIONS (99241–99255)

Consultations in CPT 2013~~36~~ fall under two subcategories: Office or Other Outpatient Consultations, and Inpatient Consultations. If counseling dominates the encounter, time determines the correct code.

Most requests for a consultation come from the attending physician, the employer, an attorney, or other appropriate source. Include the name of the requesting physician or other source on the claim form or electronic billing. Confirmatory consultations may be requested by the patient and/or family or may result from a second (or third) opinion. When requested by the patient and/or family the service is not reported with consultation codes, but may be reported using the office, home service, or domiciliary/rest home care codes. When required by the attending physician or other appropriate source, report the service with a consultation code for the appropriate site of service, 99241–99245 for office or other outpatient consultation or 99251–99255 for inpatient consultation.

The consultant may initiate diagnostic and/or therapeutic services, such as writing orders or prescriptions and initiating treatment plans.

The opinion rendered and services ordered or performed must be documented in the patient's medical record and a report of this information communicated to the requesting entity.

Report separately any identifiable procedure or service performed on, or subsequent to, the date of the initial consultation.

When the consultant assumes responsibility for the management of any or all of the patient's care subsequent to the consultation encounter, consult codes are no longer appropriate. Depending on the location, identify the correct subsequent or established patient codes.

VIII. EMERGENCY DEPARTMENT SERVICES (99281–99288)

Emergency department (ED) service codes do not differentiate between new and established patients and are used by hospital-based and non-hospital-based physicians. An emergency department is defined as "an organized hospital-based facility for the provision of unscheduled episodic services to patients who present for immediate medical attention. The facility must be available 24 hours a day." This guideline indicates that care provided in the ED setting for convenience should not be coded as an ED service. Also note that more than one ED service can be reported per calendar day if medically necessary.

Codes 99281–99288 are used to report services provided in a medical emergency. If, however, the physician sees the patient in the emergency room out of convenience for either the patient or physician, the appropriate office visit code should be reported (99201–99215) and reimbursement will be made accordingly.

IX. CRITICAL CARE SERVICES (99291–~~99300~~99292)

Critical care is the direct delivery by a physician(s) of medical care for a critically ill or critically injured patient. A critical illness or injury acutely impairs one or more vital organ systems such that there is a high probability of imminent or life threatening deterioration in the patient's condition. Critical care involves high complexity decision making to assess, manipulate, and support vital system function(s) to treat single or multiple vital organ system failure and/or to prevent further life threatening deterioration of the patient's condition. Examples of vital organ system failure include, but are not limited to: central nervous system failure, circulatory failure, shock, renal, hepatic, metabolic, and/or respiratory failure. Although critical care typically requires interpretation of multiple physiologic parameters and/or application of advanced technology(s), critical care may be provided in life threatening situations when these elements are not present. Critical care may be provided on multiple days, even if no changes are made in the treatment rendered to the patient, provided that the patient's condition continues to require the level of physician attention described above.

Providing medical care to a critically ill, injured, or postoperative patient qualifies as a critical care service only if both the illness or injury and the treatment being provided meet the above requirements. Critical care is usually, but not always, given in a critical care area, such as the coronary care unit, intensive care unit, pediatric intensive care unit, respiratory care unit, or the emergency care facility.

Services for a patient who is not critically ill but happens to be in a critical care unit are reported using other appropriate E/M codes.

Critical care and other E/M services may be provided to the same patient on the same date by the same individual.

The following services are included in reporting critical care when performed during the critical period by the physician(s) providing critical care: the interpretation of cardiac output measurements (93561, 93562), chest x-rays (71010, 71015, 71020), pulse oximetry (94760, 94761, 94762), blood gases, and information data stored in computers (e.g., ECGs, blood pressures, hematologic data (99090)); gastric intubation (43752, ~~94405~~43753); temporary transcutaneous pacing (92953); ventilatory management (94002–94004, 94660, 94662); and vascular access procedures (36000, 36410, 36415, 36591, 36600). Any services performed which are not listed above should be reported separately when performed in conjunction with critical services reported with code 99291–99292.

The critical care codes 99291 and 99292 are used to report the total duration of time spent in provision of critical care services to a critically ill or critically injured patient, even if the time spent providing care on that date is not continuous. For any given period of time spent providing critical care services, the individual must devote his or her full attention to the patient and, therefore, cannot provide services to any other patient during the same period of time.

X. NURSING FACILITY SERVICES (99304–99318)

Codes 99304–99318 are used to report evaluation and management services to patients in nursing facilities (skilled nursing facilities (SNFs)) intermediate care facilities (ICFs), or long-term care facilities (LTCFs).

These codes should also be used to report evaluation and management services provided to a patient in a psychiatric residential treatment center (a facility or a distinct part of a facility for psychiatric care, which provides a 24-hour therapeutically planned and professionally staffed group living and learning environment). If procedures such as a medical psychotherapy are provided in addition to evaluation and management services, these should be reported in addition to the evaluation and management services provided.

XI. DOMICILIARY, REST HOME (E.G., BOARDING HOME), OR CUSTODIAL CARE SERVICES (99324–99340)

The evaluation and management codes are used to report evaluation and management services in a facility that provides room, board, and other personal assistance services generally on a long-term basis. They also are used to report evaluation and management services in an assisted living facility.

XII. HOME SERVICES (99341–99350)

Services and care provided in a private residence are coded from this subcategory.

XIII. PROLONGED SERVICES (99354–99359, 99415–99416)

Codes 99354–99357 are used when a physician or other qualified health care professional provides prolonged service involving direct patient contact that is provided beyond the usual service in either the inpatient or outpatient setting. Codes 99358–99359 are used when a physician or other qualified health care professional provides prolonged service for patient management where face-to-face services have or will occur on another date of service.

Codes 99415–99416 are used when a physician or other qualified health care professional provides prolonged service involving direct patient contact that is provided beyond the usual service in either an office or outpatient setting.

XIV. PHYSICIAN STANDBY SERVICES (99360)

Code 99360 is used to report physician or other qualified health care professional standby service that is requested by another individual and that involves prolonged attendance without direct (face-to-face) patient contact. Care or services may not be provided to other patients during this period. This code is not used to report time spent proctoring another individual. It is also not used if the period of standby ends with the performance of a procedure subject to a “surgical” package by the individual who was on standby.

XV. CASE MANAGEMENT SERVICES (99363–99368)

Case management is a process in which a physician or other qualified health care professional is responsible for direct care of a patient, and, additionally, for coordinating, managing access to, initiating, and/or supervising other health care services needed by the patient.

Mississippi guideline: Use Mississippi-specific code 9936M for a conference with workers’ compensation medical case manager/claims manager.

XVI. CARE PLAN OVERSIGHT SERVICES (99339–99340, 99374–99380)

Care plan oversight services are reported separately from codes for office/outpatient, hospital, home, nursing facility, domiciliary, or non-face-to-face services. The complexity and the approximate time of the care plan oversight services provided within a thirty (30) day period determine code selection.

Only one individual may report care plan oversight services for a given period of time, to reflect the sole or predominant supervisory role with a particular patient. These codes should not be used for supervision of patients in nursing facilities or under the care of home health agencies unless they require recurrent supervision of therapy.

XVII. SPECIAL EVALUATION AND MANAGEMENT SERVICES (99450–99456)

These codes are used to report evaluations performed to establish baseline information prior to life or disability insurance certificates being issued.

XVIII. OTHER EVALUATION AND MANAGEMENT SERVICES (99499)

This is an unlisted code to report E/M services not specifically defined in the CPT book.

XIX. PRACTICE OF TELEMEDICINE

- A. Telemedicine is the practice of medicine using electronic communication, information technology, or other means between a physician in one location and a patient in another location with or without intervening health care provider. This does not include the practice of medicine through postal or courier services.
- B. Teleemergency medicine is a unique combination of telemedicine and the collaborative/consultative role of a physician, board certified in emergency medicine and an appropriate skilled health professional.
- C. The practice of medicine is deemed to occur in the location of the patient. Therefore, only physicians holding a valid Mississippi license are allowed to practice telemedicine in Mississippi. However, a valid Mississippi license is not required where the evaluation, treatment, and/or medicine given to be rendered by a physician outside of Mississippi is requested by a physician duly licensed to practice medicine in Mississippi, and the physician who has requested such evaluation, treatment and/or medical opinion has already established a doctor/patient relationship with the patient to be evaluated and/or treated.

~~XIX~~ XX. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used with E/M procedures are as follows:

24 Unrelated Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period

The physician or other qualified health care professional may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E/M service.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

57 Decision for Surgery

An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

Anesthesia

I. INTRODUCTION

~~The base units in this section have been determined on an entirely different basis from the relative values in other sections. A conversion factor applicable to this section is not applicable to any other section.~~

The 2013/2016 American Society of Anesthesiologists' (ASA) *Relative Value Guide*® is recognized as an appropriate assessment of current relative values for specific anesthesiology procedures. It is the basis for the assigned base units for CPT® codes in the Anesthesia section of the Fee Schedule.

The conversion factor for anesthesia services only has been designated at \$50.00 per unit.

Total anesthesia value is defined in the following formula:

$$(\text{Base units} + \text{time units} + \text{modifying units}) \times \text{conversion factor} = \text{reimbursement}$$

II. BASE UNITS

Base units are listed for most procedures. This value is determined by the complexity of the service and includes all usual anesthesia services except the time actively spent in anesthesia care and the modifying factors. The base units include preoperative and postoperative visits, the administration of fluids and/or blood incident to the anesthesia care, and interpretation of non-invasive monitoring (ECG, temperature, blood pressure, oximetry, and other usual monitoring procedures). The basic anesthesia unit includes the routine follow-up care and observation (including recovery room observation and monitoring). When multiple surgical procedures are performed during the same period of anesthesia, only the highest base unit allowance of the various surgical procedures will be used.

III. TIME UNITS

Anesthesia time begins when the anesthesiologist starts the preparation of the patient for anesthesia in the preoperative area, the operating room or a similar area, and ends when the injured employee is placed under postoperative care, such as transfer to the recovery room.

The anesthesia time units will be calculated in 15-minute intervals, or portions thereof, equaling one (1) time unit. No additional time units are allowed for recovery room time and monitoring.

IV. SPECIAL CIRCUMSTANCES

A. **Physical Status Modifiers.** Physical status modifiers are represented by the initial letter P followed by a single digit from one (1) to six (6) defined below:

Status	Description	Base Units
P1	A normal healthy patient	0
P2	A patient with mild systemic disease	0
P3	A patient with severe systemic disease	1
P4	A patient with severe systemic disease that is a constant threat to life	2
P5	A moribund patient who is not expected to survive without the operation	3
P6	A patient declared brain-dead whose organs are being removed for donor purposes	0

The above six levels are consistent with the American Society of Anesthesiologists' (ASA) ranking of patient physical status. Physical status is included in the CPT book to distinguish between various levels of complexity of the anesthesia service provided. Documentation submitted with the billing must include the indicators that justify physical status for P3, P4, and P5.

B. Qualifying Circumstances

- Many anesthesia services are provided under particularly difficult circumstances, depending on factors such as extraordinary condition of patient, notable operative condition, and/or unusual risk factors. These procedures would not be reported alone but would be reported as additional procedure numbers qualifying an anesthesia procedure or service.

CPT	Description	Units
99100	Anesthesia for patient of extreme age, younger than 1 year and older than 70 (List separately in addition to code for primary anesthesia procedure)	1
99116	Anesthesia complicated by utilization of total body hypothermia (List separately in addition to code for primary anesthesia procedure)	5
99135	Anesthesia complicated by utilization of controlled hypotension (List separately in addition to code for primary anesthesia procedure) <u>Mississippi guideline: Documentation must include maintaining BP at 100 for one hour or more.</u>	5
99140	Anesthesia complicated by emergency conditions (specify) (List separately in addition to code for primary anesthesia procedure)	2

- Payers must utilize their medical consultants when there is a question regarding modifiers and/or special circumstances for anesthesia charges.

V. MONITORED ANESTHESIA CARE

Monitored anesthesia care occurs when the attending physician requests that an anesthesiologist be present during a procedure. This may be to ensure compliance with accepted procedures of the facility. Monitored anesthesia care includes pre-anesthesia exam and evaluation of the patient. The anesthesiologist must participate or provide medical direction for the plan of care. The anesthesiologist, resident, or nurse anesthetist must be in continuous physical presence and provide diagnosis and treatment of emergencies. This will also include non-invasive monitoring of cardiocirculatory and respiratory systems with administration of oxygen and/or intravenous administration of medications. Reimbursement will be the same as if general anesthesia had been administered (time units + base units).

VI. REIMBURSEMENT FOR ANESTHESIA SERVICES

A. Criteria for Reimbursement. Anesthesia services may be billed for any one of the three following circumstances:

- An anesthesiologist provides total and individual anesthesia service.
- An anesthesiologist directs a Certified Registered Nurse Anesthetist (CRNA) ~~or Anesthesiology Assistant (AA).~~
- Anesthesia provided by a CRNA ~~or AA~~ working independent of an anesthesiologist's supervision is covered under the following conditions:
 - The service falls within the CRNA's ~~or AA's~~ scope of practice and scope of license as defined by law.
 - The service is supervised by a licensed health care provider who has prescriptive authority in accordance with the clinical privileges individually granted by the hospital or other health care organization.

B. Reimbursement

- The maximum reimbursement allowance (MRA) for anesthesia is calculated by adding the base unit value, the number of time units, any applicable modifier and/or unusual circumstances units, and multiplying the sum by a dollar amount (conversion factor) allowed per unit.

2. Reimbursement includes the usual pre- and postoperative visits, the care by the anesthesiologist during surgery, the administration of fluids and/or blood, and the usual monitoring services. Unusual forms of monitoring, such as central venous, intra-arterial, and Swan-Ganz monitoring, may be reimbursed separately.
3. When an unlisted service or procedure is provided, the value should be substantiated with a report. Unlisted services are identified in this Fee Schedule as by report (BR).
4. When it is necessary to have a second anesthesiologist, the necessity should be substantiated by report. The second anesthesiologist will receive five base units + time units (calculation of total anesthesia value).
5. Payment for covered anesthesia services is as follows:
 - a. When the anesthesiologist provides an anesthesia service directly, payment will be made in accordance with the Billing and Reimbursement Rules of this Fee Schedule.
 - b. When an anesthesiologist provides medical direction to the CRNA ~~or AA~~ providing the anesthesia service, then the reimbursement will be divided between the two ~~of them~~ providers (anesthesiologist and CRNA) at fifty percent (50%).
 - c. When the CRNA ~~or AA~~ provides the anesthesia service directly, then payment will be the lesser of the billed charge or eighty percent (80%) of the maximum allowable listed in the Fee Schedule for that procedure.
6. Anesthesiologists, and CRNAs, ~~and AAs~~ must bill their services with the appropriate modifiers to indicate which one provided the service. Bills NOT properly coded may cause a delay or error in reimbursement by the payer. Application of the appropriate modifier to the bill for service is the responsibility of the provider, regardless of the place of service. Modifiers are as follows:
 - AA Anesthesia services performed personally by anesthesiologist
 - AD Medical supervision by a physician: more than 4 concurrent anesthesia procedures
 - QK Medical direction of 2, 3, or 4 concurrent anesthesia procedures involving qualified individuals
 - QX Qualified non-physician anesthetist with medical direction by a physician
 - QY Medical direction of one qualified non-physician anesthetist by an anesthesiologist
 - QZ CRNA service without medical direction by a physician

VII. ANESTHESIA MODIFIERS

All anesthesia services are reported by using the anesthesia five-digit procedure codes. The basic value for most procedures may be modified under certain circumstances as listed below. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code separated by a hyphen in the appropriate field of the CMS-1500 or electronic format 837p. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in anesthesia are as follows:

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred and twenty percent (120%) of the maximum reimbursement allowance.

23 Unusual Anesthesia

Occasionally, a procedure, which usually requires either no anesthesia or local anesthesia, because of unusual circumstances must be done under general anesthesia. This circumstance may be reported by adding modifier 23 to the procedure code of the basic service.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

53 Discontinued Procedure

Under certain circumstances the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that

threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

59 Distinct Procedural Service

Under certain circumstances, the physician may need to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

AA Anesthesia Services Performed Personally by Anesthesiologist (HCPCS ~~Level II~~ Modifier)

Report modifier AA when the anesthesia services are personally performed by an anesthesiologist.

AD Medical Supervision by a Physician: More Than 4 Concurrent Anesthesia Procedures (HCPCS ~~Level II~~ Modifier)

Report modifier AD when the anesthesiologist supervises more than 4 concurrent anesthesia procedures.

QK Medical Direction of 2, 3, or 4 Concurrent Anesthesia Procedures Involving Qualified Individuals (HCPCS ~~Level II~~ Modifier)

Report modifier QK when the anesthesiologist supervises 2, 3, or 4 concurrent anesthesia procedures involving qualified individuals.

QX Qualified Non-Physician Anesthetist with Medical Direction by a Physician (HCPCS ~~Level II~~ Modifier)

Regional or general anesthesia provided by a qualified non-physician anesthetist with medical direction by a physician may be reported by adding modifier QX.

QY Medical Direction of One Qualified Non-Physician Anesthetist by an Anesthesiologist (HCPCS ~~Level II~~ Modifier)

Report modifier QY when the anesthesiologist supervises one qualified non-physician anesthetist.

QZ CRNA Service without Medical Direction by a Physician (HCPCS ~~Level II~~ Modifier)

Regional or general anesthesia provided by the CRNA (certified registered nurse anesthetist) or AA (anesthesiologist assistant) without medical direction by a physician may be reported by adding modifier QZ.

Pain Management

I. INTRODUCTION

In addition to the General Rules, this section provides specific rules for Pain Management services. NCCI edits or other bundle/unbundle edits do not apply to the CPT codes in the Pain Management section, other than the stated rules provided in this section.

~~Utilization review (UR) is expected and welcomed as part of the process in which Interventional Pain Management (IPM) procedures are performed. The objectives to this IPM portion of the Fee Schedule are to minimize or eliminate unnecessary, ineffective or inappropriate treatment, while at the same time facilitating the performance of appropriate, effective and necessary treatment. Rendering unnecessary treatment less costly via lowered reimbursement fails to meet these objectives, as the payer still reimburses for unnecessary treatment, and the patient is still subjected to the risks, however diminutive, inherent in all treatment. Delaying or even denying necessary treatment is equally undesirable. It is well documented that the chances of returning the injured worker with back-related pain to their initial level of work activity—or even any level of work—decrease significantly with increasing time off work. Therefore, expedience of appropriate care is as desirous as elimination of unnecessary—and potentially injurious—care.~~

~~To these ends, this portion of the Fee Schedule has been developed to give practitioners maximum flexibility in proceeding with demonstrably effective care, by decreasing or even eliminating some aspects of UR, while giving payers means to more objectively evaluate the effectiveness of care, project the cost of future IPM treatment, and avoid having to evaluate unnecessary and inappropriate care and unproven new technologies.~~

~~To be effective, these rules adopt the following strategies:~~

1. Providers must restrict treatment to indications recognized by established medical practice and adequately supported by the relevant medical literature.
2. Providers must demonstrate more objectively the effectiveness of previously provided treatment in order to repeat or continue it. This includes the use of pain diagrams and numerical pain scores where appropriate.
- ~~3. Providers must give detailed descriptions of the specific treatment provided, and must archive images of that treatment that can be provided upon request of the payers.~~
- ~~4.3.~~ Payers/URs must approve or deny treatment within the rules provided by the IPM portion of the Fee Schedule, and not involve extraneous outside guidelines.
- ~~5.4.~~ Any UR personnel involved in the denial of care must cite the specific section of the IPM Fee Schedule used as a basis for that denial. Failure to do so will result in automatic adjudication in favor of the provider.

II. REIMBURSEMENT FOR PAIN MANAGEMENT SERVICES

- A. **Use of Fluoroscopy.** Reimbursement for the use of fluoroscopy (CPT® codes 77002 and 77003) is based on the Fee Schedule, regardless of the number of procedures performed, and may only be billed once per date of service.

CPT code 77002 is to be used for fluoroscopic guidance for needle placement for CPT code 64510 Cervical (stellate ganglion) sympathetic block, or CPT code 64520 Thoracic or lumbar blocks.

CPT code 77003 is to be used for fluoroscopic guidance and localization of needle or catheter tip for spine or paraspinal diagnostic or therapeutic injection procedures (e.g., cervical epidural or sacroiliac joint), and including facet nerve neurolytic agent destruction.

All procedures performed fluoroscopically MUST have stored images (hard copy or digital) showing final needle placement in at least two (2) views (typically PA, lateral or oblique) demonstrating final needle placement AND disbursement of contrast (when not contraindicated). These images must be available upon request (with appropriate HIPAA compliance) by payers, or reimbursement may be denied. As noted in the APC amount columns, there is no reimbursement to the facility for use of fluoroscopy. However, the provider may bill the fluoroscopy and be reimbursed for the service when reporting modifier 26 for the professional component.

- B. **Reimbursement for Injection/Destruction Procedures**

- ~~1. The current CPT codes for Pain Management typically have separate codes for injections that may involve additional levels (e.g., 64490 is for injection of cervical facet single or first level, and 64491 and 64492 are used for additional levels).~~

21. Facet injections and medial branch blocks are reimbursed at a maximum of three (3) total anatomic joint levels. Additional level or bilateral modifiers may be used to allow up to a maximum of two (2) additional service levels (but not more) for facet or medial branch blocks in the cervical/thoracic (64491 and 64492) or lumbar (64494 and 64495) for a maximum of three (3) procedure levels reimbursed per treatment session or day. Additional injected site levels, beyond the first three (3), will not be reimbursed. These procedures are unilateral by definition. Bilateral modifiers may be used when nerves are treated bilaterally. Reimbursement of the bilateral modifier is fifty percent (50%) of the base amount for the second or contralateral side.
2. Nerve destructive procedures are only reimbursed for a maximum of two (2) anatomical levels. A higher number of diagnostic injections are allowed because some providers may want to block a larger anatomical level with the initial block to determine what, if any, response is noted to the initial diagnostic injection. This prevents adding further levels during additional diagnostic injections. The likelihood of true three (3) level involvement is exceedingly rare, such that further localization of the involved levels is expected prior to destructive lesioning.
3. Reimbursement for injection/destruction procedure codes is made on the basis of joint levels, not nerves treated (e.g., destruction by neurolytic agent of the L4–L5 facets counts as one (1) level/nerve and should be billed as 64622 (first level/nerve)). There are two nerves supplying each joint but reimbursement is based upon joint(s) treated, not the nerves treated. This applies to CPT codes 64622, 64623 (lumbar), and 64626, 64627 (cervical/thoracic). These procedures are unilateral by definition. ~~Additionally, therefore,~~ bilateral modifiers may be used when nerves are treated bilaterally. Reimbursement of the bilateral modifier is fifty percent (50%) of the base amount for the second or contralateral side.
4. Multiple Epidural Injections in a Single Treatment Day/Session. In order to obtain reimbursement for more than one epidural injection in a single treatment day/session (either multiple levels or bilateral injections) there must be appropriate documentation in the medical records of a medical condition for which multiple injections would be appropriate. ~~For bilateral injections, this includes the presence of significant bilateral radiating/radicular pain. For multiple level injections, this includes conditions for which an additional injected level could be anticipated to result in improved clinical outcomes.~~ These conditions would include:
 - Disc pathology (e.g., protrusion) at one level with a dermatomal pain distribution of an adjacent level (e.g., disc affects the traversing nerve root, such as an L4/5 disc herniation affecting the traversing L5 nerve root).
 - Multiple dermatomal nerve root involvement.

A maximum of two (2) levels of transforaminal epidural steroid injections are reimbursable for a given date of service. This applies to codes 64479, 64480, 64483, and 64484.

Reimbursement is still limited to two epidural procedures (either two levels, or one level bilaterally) per date of service.
5. A maximum of one (1) interlaminar epidural steroid injection is reimbursable for a given date of service. This applies to codes 62310 and 62311.
6. A maximum of three (3) facet level procedures are reimbursable for a given date of service. This maximum applies to facet joint injections and nerve blocks, codes 64490–64495. Nerve destruction procedures, codes 64622–64627, are limited to two (2) facet levels (three (3) nerve branches), unilateral and bilateral, per given date of service.
7. If a patient with bilateral pain receives only unilateral treatment on a given date of service, any similar procedures (same CPT codes) performed on the contralateral side within ninety (90) days of the initial procedure will be subject to reimbursement reductions related to modifiers for bilateral treatment on the same date of service. For example, if a person undergoes a right sided medial branch block or neurotomy on a given date of service, any similar procedure on the left side will be subject to the reductions in reimbursement related to use of the bilateral modifier if this treatment is provided within ninety (90) days of the date of service of the right sided procedures. This rule will also apply to facility charges.

- C. **Multiple Procedure Reimbursement.** Only one (1) type of pain management procedure is reimbursable on a given date of service, unless otherwise approved by the payer. This rule does not include multiple level injections or bilateral procedures of the same type, with appropriate modifiers. ~~This also does not include separate procedures performed as part of a single primary service, such as implantation of a spinal cord stimulator.~~

“Type” is defined as any procedure code involving an anatomically different structure (e.g., spinal nerve, facet joint, sacroiliac joint, trigger point, etc.). Joints and nerves in different anatomical regions (cervical, thoracic, lumbar, sacral) are considered to be different “types” and are limited to two (2) procedures per given day. Additional level or bilateral injections of a single procedure in the same area are not considered different “types,” and for the purpose of this rule, are considered to be the same “type.” However, the multiple level restrictions, as detailed herein, still apply. Diagnostic injections of more than one type in the same anatomic area on the same date of service are prohibited, and will not be reimbursed without prior authorization. Reimbursement of the multiple procedure modifier (51) is twenty-five percent (25%) of the base amount for the second or additional procedure.

~~Example: A three-level lumbar facet injection would be billed as 64493 for the first level, 64494 for the second level, and 64495 for the third level.~~

- D. Repeat epidural injections would typically occur two to four (2-4) weeks after the initial treatment, contingent upon some degree of continuing radiating pain. Repeat injections cannot be performed within two (2) weeks of the previous epidural injection.
- E. Sacroiliac arthroscopy (CPT code 73542) assumes the use of a fluoroscope and is considered an integral part of the procedure(s). Therefore, an additional fee for the fluoroscopy (CPT code 77002) is not warranted and will not be reimbursed. This code may only be used once per twelve (12) month period.
- F. Epidurography (CPT code 72275) is no longer reimbursable under this Fee Schedule.

- G. CPT code 62318 includes needle placement, catheter infusion, and subsequent injections. Code 62318 should be used for multiple solutions injected by way of the same catheter, or multiple bolus injections during the initial procedure. The epidural needle or catheter placement is inherent to the procedure, and, therefore, no additional charge for needle or catheter placement is allowed.
- H. In order to be eligible for reimbursement under this Fee Schedule, pain management procedures or services which are specifically governed by the rules in this Pain Management section of the Fee Schedule must be performed by a licensed physician holding either an M.D. or D.O. degree. Pain management procedures specifically governed herein which are performed by any other person, such as a Certified Registered Nurse Anesthetist (CRNA), shall not be reimbursed under this Fee Schedule.
- I. The following procedures must be performed fluoroscopically in order to qualify for reimbursement:
1. Facet injections (64490–64495) (fluoroscopy is included in the procedure code).
 2. Sacroiliac (SI) injections (27096).
 3. Transforaminal epidural steroid injections (64479, 64480, 64483, 64484).
 4. Cervical translaminar/interlaminar epidural injections (62310).
- J. Any analgesia/sedation used in the performance of the procedures in this section is considered integral to the procedure, and will not be separately reimbursed. This rule applies whether or not the person administering the analgesia/sedation is the physician who is performing the pain management injection. Administration of analgesia/sedation by a different person from the physician performing the injection, including an RN, PA, CRNA, or MD/DO, does not allow for separate billing of analgesia/sedation.
- K. Anatomical descriptions of the procedures performed must accompany the bill for service in order for reimbursement to be made. These descriptions must include landmarks used in determining needle positioning, needles used, and the type and quantity of drugs injected. Unless there is a contraindication to contrast media (e.g., documented allergy) it is expected that contrast injection AND a written description of the contrast spread pattern be included in the procedure report. Generic descriptions such as “the procedure was performed in the usual fashion,” “the needle was placed on (next to, by, etc.) the nerve/joint/target,” “the needle was placed in the correct anatomical location,” or similar wording, which was templated or otherwise lacking an actual detailed anatomical description of needle placement or contrast pattern (where appropriate), is inadequate and subsequent cause for denial of payment. Tolerance to the procedure, and side effects or lack thereof should be included in this documentation.
- L. Radiographic Codes in Pain Management.
- Fluoroscopic imaging is reported with codes 77002 and 77003
 - Codes 72020–72220 which apply to radiographic examination of the spine are not reimbursed concurrent with the pain management procedures in this section or with fluoroscopy services
 - Code 27096 is not separately reimbursed with facet or sacroiliac joint injections
- M. When a joint injection is performed at the end of a surgical procedure for pain control, whether done by the surgeon or by anesthesia, reimbursement is allowed according to the Multiple Procedure rule. This rule applies to facility reimbursement as well as provider reimbursement.
- N. Reimbursement of the bilateral modifier is twenty-five percent (25%) of the base amount for the second or contralateral side.

III. REIMBURSEMENT FOR REFILL OF PAIN PUMPS

- A. **Code 95990.** This CPT code, which applies to refilling and maintenance of an implantable pump or reservoir for drug delivery spinal (intrathecal, epidural) or brain (intraventricular), is reimbursed at the specified MRA listed in the Medicine section of the Fee Schedule.
- B. **Evaluation and Management Services.** Refilling and maintenance of implantable pump or reservoir for pain management drug delivery is a global service. An evaluation and management service is not paid additionally unless significant additional or other cognitive services are provided and documented. To report a significant, separately identifiable evaluation and management service, append modifier 25 to the appropriate evaluation and management code. Documentation is required and payment will be allowed if supported by the documentation.
- C. **Drugs.** Those drugs used in the refill of the pain pump shall be reimbursed in accordance with the Pharmacy Rules contained in the Pharmacy Rules section of this Fee Schedule.
- D. **Compounding Fee.** If the drugs used in the refill of the pain pump must be compounded, the compounding service shall be reimbursed at \$157.44 per individual refill. Report the compounding service with code S9430, Pharmacy compounding and dispensing services.
- E. Non-FDA-approved drugs for intra-thecal use will NOT be reimbursed.

- F. Intrathecal Drug Delivery.** This method of delivery is not generally recommended and requires prior authorization. Due to conflicting studies in this population and complication rate for long-term use, it may be considered only in very rare occasions when dystonia and spasticity are dominant features or when pain is not able to be managed using any other non-operative treatment. Specific brands of infusion systems have been FDA approved for the following: chronic intraspinal (epidural and intrathecal) infusion of preservative-free morphine sulfate sterile solution in the treatment of chronic intractable pain, chronic infusion of preservative-free ziconotide sterile solution for the management of severe chronic pain, and chronic intrathecal infusion of baclofen for the management of severe spasticity.
1. Description: This mode of therapy delivers small doses of medications directly into the cerebrospinal fluid.
 2. Complications: Intrathecal delivery is associated with significant complications, such as infection, catheter disconnects, CSF leak, arachnoiditis, pump failure, nerve injury, and paralysis. Typical adverse events reported with opioids (i.e., respiratory depression, tolerance, and dependence), or spinal catheter-tip granulomas that might arise during intrathecal morphine or hydromorphone treatment have not currently been recorded for ziconotide.
 3. Indications: Clinical studies are conflicting, regarding long-term, effective pain relief in patients with non-malignant pain. The Division does not generally recommend the use of intrathecal drug delivery systems in injured workers with chronic pain. Due to the complication rate for long-term use, it may be considered only in very rare occasions when dystonia and spasticity are dominant features or when pain is not able to be managed using any other non-operative treatment. This treatment must be prior authorized and have the recommendation of at least one physician experienced in chronic pain management in consultation with the primary treating physician. The procedure should be performed by physicians with documented experience. This small eligible sub-group of patients must meet all of the following indications:
 - a. A diagnosis of a specific physical condition known to be chronically painful has been made on the basis of objective findings;
 - b. All reasonable surgical and non-surgical treatment has been exhausted including failure of conservative therapy including active and/or passive therapy, medication management, or therapeutic injections;
 - c. Pre-trial psychiatric or psychological evaluation has been performed (as for SCS) and has demonstrated motivation and long-term commitment without issues of secondary gain. Significant personality disorders must be taken into account when considering a patient for spinal cord stimulation and other major procedures;
 - d. There is no evidence of current addictive behavior. (Tolerance and dependence to opioid analgesics are not addictive behaviors and do not preclude implantation); and
 - e. A successful trial of continuous infusion by a percutaneous spinal infusion pump for a minimum of twenty-four (24) hours. A screening test is considered successful if the patient (a) experiences a fifty percent (50%) decrease in pain, which may be confirmed by VAS, and (b) demonstrates objective functional gains or decreased utilization of pain medications. Functional gains should be evaluated by an occupational therapist and/or physical therapist prior to and before discontinuation of the trial.
 4. Contraindications: Infection, body size insufficient to support the size and weight of the implanted device. Patients with other implanted programmable devices should be given these pumps with caution since interference between devices may cause unintended changes in infusion rates.

IV. DIAGNOSTIC INJECTIONS AND PROCEDURES

- A. Valid diagnostic injections require ~~a reasonably~~ an appropriately alert patient capable of adequately determining the amount or level of pain relieved or produced by the procedure. This requires judicious use of sedatives in the performance of such procedures. Additional analgesic medications such as intravenous narcotics are to be avoided during the procedure and evaluation phase of testing, as these medications can affect the validity of such diagnostic tests. The results of the tests and drugs used during the injection or procedure must be part of the medical records, and available for review by the payer. Failure to document the patient's response to a diagnostic procedure or injection, and the level of alertness following the procedure or injection, could result in denial of reimbursement. Affected diagnostic procedures include but are not limited to discography and medial branch blocks.
- ~~B. Discography requires a reasonably alert patient capable of discriminating the quality and quantity of discomfort during the performance of the procedure in order to provide valid information on concordant or non-concordant pain. The results of the tests and drugs used during the procedure must be part of the medical records, and available for review by the payer. Failure to document the patient's response to the procedure, and level of alertness during discography could result in denial of reimbursement.~~
- ~~C. Medial branch (facet nerve) or diagnostic intra-articular facet injections require an alert patient, free from undue influence of intravenous narcotics in order to more reliably determine the analgesic response to the procedure. Failure to document the patient's response to the procedure or injection, and level of alertness after the procedure for diagnostic facet nerve or facet intra-articular injections could result in denial of reimbursement.~~
- ~~D. B.~~ Diagnostic injections with local anesthetics require documentation of analgesic response through any validated pain measurement test (e.g., numerical pain scale, visual analogue scale). This should be performed in the treatment facility after the procedure during the time that there would be an expected analgesic response (every thirty (30) minutes for at least one (1) hour). This must be documented and the documentation must be available to the payer for review. Subsequent pain scores must be documented at least hourly for two (2) ~~hours after the procedure. The documentation available must also include the drugs used during the procedure, and comments on the patient's level of alertness in the treatment facility at each time period when the pain or response is evaluated.~~ additional hours after the procedure. If

the patient's pre-procedure pain was determined by provocative exam tests or maneuvers, these should be repeated during the evaluation period following the procedure, to differentiate analgesia related to the procedure from positional analgesia, such as, that which may be provided by lying in a recovery bed.

~~E. Intravenous narcotic pain medications are typically to be avoided for diagnostic analgesic injections, such as facet joint or nerve blocks, as they would be expected to provide an analgesic benefit completely independent of the injection itself. Sedatives such as midazolam or propofol can be used judiciously, if necessary, avoiding excessive post-procedure sedation, depending on the experience level of the practitioner ordering or administering the medication. Proper documentation of a lack of undue influence of sedation and analgesics must be provided to support a request for reimbursement for diagnostic procedures.~~

C. Radiofrequency Medial Branch Neurotomy/Facet Rhizotomy. This procedure is allowed one (1) time in twelve (12) months not to exceed three (3) levels. The patient should receive at least six months minimum improvement in order to qualify for repeat procedure with no more than two (2) in the first year and one (1) per year thereafter.

~~F.D.~~ Other injections with both therapeutic and potentially diagnostic benefit, such as selective nerve root or peripheral nerve blocks or therapeutic facet injections, would ideally be performed with minimal sedation and avoidance of intravenous narcotics. However, as these injections also have potential therapeutic benefit, this is not a requirement for reimbursement.

V. THERAPEUTIC SERVICES

In the pain management setting, no more than two (2) modalities and/or procedures may be used on a date of service (e.g., heat/cold, ultrasound, diathermy, iontophoresis, TENS, electrical stimulation, muscle stimulation, etc.). Multiple modalities should be performed sequentially. Only one (1) modality can be reported for concurrently performed procedures.

VI. GENERAL RULES

A. **Epidural Injections.** This Fee Schedule does not recognize a "series" of epidural injections, regardless of number. A trial of epidural injections is permitted provided there is appropriate documentation of a recognized indication for this procedure. Only a single injection can be approved unless there is documentation of analgesic response consistent with response to the injection. Further injections require a positive analgesic response in order to be repeated. For the first injection, the initial analgesic response may be temporary. However, after the second injection, there must be a residual and progressive analgesic benefit in order to perform a third injection. Documentation of a positive patient response will be required to continue epidural treatment. If there is no documented residual pain relief after two (2) injections, no further epidural injections will be considered medically necessary.

1. ~~There is no recognized "series" of epidural injections, and repeat injections are contingent upon proper documentation of clinical responses as stated above.~~ Repeat injections (up to two (2) additional injections, for a total of three (3) per twelve (12) month period), however, do NOT require prior approval as long as the appropriate responses are properly documented. ~~Specifically, the first injection must provide at least a temporary analgesic response independent of any local anesthetic response or from sedatives or analgesics administered to the patient during the procedure. Typically, this means there should have been some benefit that occurred sometime after the first treatment day. Subsequent epidural injections must provide progressive and durable (persistent) relief of the targeted pain.~~

2. Utilization management or review decisions shall not be based solely on the application of clinical guidelines, but must include review of clinical information submitted by the provider and represent an individualized determination based on the worker's current condition and the concept of medical necessity predicated on objective or appropriate subjective improvements in the patient's clinical status.

B. Reimbursement will be limited to three (3) epidural pain injections in a twelve (12) month period unless the payer gives prior approval for more than three (3) such injections. Separate billing for the drug injected is not appropriate and will not be reimbursed.

~~C. Epidural Injections (Transforaminal and Interlaminar):~~

~~Transforaminal epidural injections are used for and are indicated for both diagnostic and therapeutic purposes.~~

~~Diagnostically, they may be used to:~~

- ~~• Determine whether a pain is somatic, visceral, sympathetic or functional.~~
- ~~• Determine which spinal nerve(s) (if any) are involved in the patient's pain process. This information may at times be used to determine the anatomical nerve root(s) involved for the purpose of surgical intervention.~~
- ~~• Determine if there is a component of pain related to involvement of a spinal nerve.~~
- ~~• Determine the source of pain when there is no clear pathology or conflicting pathology on imaging or EMG/NCV.~~
- ~~• Differentiate central from somatic pain following an injury to the central nervous system~~

1. **Diagnostic Epidural Injections.** Diagnostic transforaminal injections are often repeated due to the high incidence (up to forty percent (40%)) of false positive injections. Typically, local anesthetics of different durations of action (e.g., lidocaine and bupivacaine) are used for two consecutive injections to determine an appropriate duration of effect. Some practitioners may also use a placebo injection (typically saline) to further refine the patient's response. In order to be a "successful" ("positive") diagnostic procedure the patient must experience at least seventy-five percent (75%) relief of the index pain (pain suspected as being radicular). Pain levels should be measured during provocative testing pre- and postprocedure, if necessary, to insure that the patient is experiencing their usual discomfort prior to the procedure. The same provocative test should be repeated during each of the subsequent time intervals, and for at least two (2) hours. The provocative test(s) used should be one(s) that the patient is able to perform unassisted and that would not result in injury to the patient.

— As with other diagnostic injections, excessive sedation and any narcotics should be avoided to evade impairing the patient's ability to determine a positive analgesic response to the injection. Diagnostic epidural injections are subject to the "diagnostic injection" rules specified in Section IV, Subsection D.

C. Interlaminar epidural injections are seldom used for diagnostic purposes because the generalized regional spread of local anesthetic with spinal injection makes it impractical if not impossible to selectively block a specific nerve.

2. **Therapeutic Epidural Injections.** Therapeutically, epidural injections may be used (typically with steroids) for the treatment of radiating pain (upper/lower extremity, buttock and rarely dermatomal chest wall or abdominal pain from thoracic nerve root involvement), related to spinal nerve or dorsal root ganglion irritation, inflammation or compression. The pathology causing the radiating pain is often, but not exclusively, caused by pathology involving adjacent intervertebral discs, such as protrusions, herniations or bulges. Degenerative changes within the discs may also result in inflammatory processes that may cause radicular pain. Other causes may involve either central or lateral recess stenosis caused by facet joint pathology, ligamentary hypertrophy and disc pathology.

— Therapeutic injections for pain in the lumbar spine are typically transforaminal as these have been demonstrated by the available medical literature to be more effective than interlaminar injections for radicular pain. An exception would be the patient who is allergic to contrast media, as transforaminal epidural injections must be performed fluoroscopically with contrast. Cervical and thoracic therapeutic epidural injections are most often interlaminar, as this approach is inherently safer and less technically demanding, and the available medical literature does not suggest a clear therapeutic advantage to either a transforaminal or interlaminar technique. However, ¹To be reimbursed, both cervical and interlaminar epidural steroid injections must be performed fluoroscopically, typically with contrast injection, unless there is a documented contrast allergy. The fluoroscopic guidance requirement for lumbar interlaminar epidural injections represents a change from previous Fee Schedules, and is now required to reflect a growing national trend of use of fluoroscopy with all epidural injections. The technical failure rate of non-fluoroscopic ("blind") epidural injections is documented to be as high as twenty-five percent (25%), and considering the benefit of interlaminar epidural injections for radicular pain is suspect at best, there is now the requirement for fluoroscopy with all epidural steroid injections.

Epidural blood patches do not require fluoroscopic guidance, though this is preferred.

The specific cause of radiating pain may not always be obvious on imaging, such as MRI, CT or x-rays. Normal imaging, or even abnormal imaging in which the pathology is on the side opposite the pain, or at a level that would not be expected to cause the patient's particular anatomical pain pattern, can occur. However, the absence of such pathology does not rule out inflammation or irritation of a spinal nerve or dorsal root ganglion. Therefore, the indications for a trial of epidural steroid injections are based on the patient's clinical presentation, not imaging.

All nerve root pain or radiating pain is not caused by damage (nerve or axon loss) to the nerve or dorsal root ganglion. When there is only inflammation or irritation of the nerve, there may be radiating pain in the absence of physical exam findings of nerve damage such as altered or absent motor, sensory, or reflex function. In fact, actual nerve damage is not treated by steroid injections, as the latter does not accelerate the regeneration of new nerve (axon) regeneration. Therefore, EMG/NCV testing demonstrating nerve or axon loss is not necessary as an indication for a trial of epidural steroid injections. EMG testing can be superfluous when there is obvious nerve injury and imaging that demonstrate the etiology of the nerve injury (i.e., large disc herniation with appropriate nerve motor/sensory/reflex pathology). EMG/NCV testing is not capable of detecting co-existing nerve injury and inflammation so positive EMG/NCV is not a contraindication to a trial of epidural steroid injections.

A trial of epidural steroids injections may be indicated when there is radiating pain (extremity or buttock) with or without co-existing back pain. There is no acceptable "series" of epidural steroid injections as repeat injections are indicated based on the response to the preceding epidural injection. Repeat injections would typically occur two to four (2-4) weeks after the initial treatment, contingent upon some degree of continuing radiating pain. Repeat injections cannot be performed within two (2) weeks of the previous epidural injection.

In order to repeat an epidural injection, there must have been a positive analgesic response (pain improvement or functional improvement) to the previous injection. For the first injection, this relief may be temporary, but cannot be attributed solely to a local anesthetic effect or intra-procedural sedation (i.e., relief for the first few hours after injection). Additionally, in order to repeat an epidural injection, there must be continued radiating pain, and not only residual axial (back/neck) pain. After a second epidural injection, there must be some degree of *residual/durable* relief of the radiating component of pain that has persisted to the time of the patient's follow up visit.

— Epidural injections (with or without steroids) may be used for the treatment of sympathetically mediated/maintained pain in the complex of conditions often referred to as "reflex sympathetic dystrophy" (RSD), "causalgia", complex regional pain syndrome type I and II (CRPS). This type of pain is typically distinctive, and does not typically radiate as does radicular pain related to nerve root inflammation or irritation. However, sympathetic pain may occur in the presence of nerve root injury (causalgia, CRPS II) where there is usually a component of radiating pain as well. The frequency of injection for these conditions may be (in rare cases) multiple times per week, and repeated as long as debilitating pain persists. However, as with other effective treatments, a trend towards improvement should be a necessary criterion for continued use of the treatment. It is, however, due to the complexity and variable presentation of these conditions, impractical to define a specific number of permissible injections, and

~~providers and payers must rely on the demonstrable response and durability of relief provided by the treatment to determine the appropriateness of care.~~

- 32. Initiation and Continuation of Epidural Injections.** It is necessary to obtain prior approval by the payer or appropriate utilization reviewer before initiating a trial of epidural injections. It is NOT necessary to obtain prior approval to repeat an injection as long as it is performed according to the rules outlined above. If the appropriate rules are followed, denial of reimbursement for repeated procedures will result in automatic adjudication favorable to the provider and may result in appropriate penalties and/or fines to the payer.

There will be a maximum of three (3) epidural injections per anatomical (cervical/thoracic/lumbar) area allowed within a given one (1) year time period. There may be times when additional injections are indicated (re-injury, intervening surgery, etc.), but this is subject to prior approval by the payer, who has the sole authority to allow more than three (3) injections per one (1) year period.

Repeat trials of epidural injections may be considered after one (1) year if the preceding trial provided several months of demonstrable benefit. In order to be considered effective, this benefit must include greater than thirty percent (30%) improvement in pain scores, and documentation of either 1) significant reduction of daily narcotic consumption, defined as a sustained reduction (several months) of at least thirty percent (30%) of the daily narcotic use prior to initiation of the trial of epidural injections, or 2) ability to work for a sustained period of time (several months) at least at sedentary work level or the work level as determined by a valid Functional Capacity Rating (FCE). Also, no patient can be considered for a repeat trial of epidural steroid injections, if after the preceding trial (in a similar anatomical area) they are unable to reduce narcotic consumption to less than 100 mg morphine equivalent per day.

If, after an initial trial of epidural injections, it is suspected that there is a new nerve injury involving a different anatomical nerve, a trial of epidural injections may be indicated independent of the response to the initial trial of epidural injections. However, as this would represent a separate nerve injury, causation would have to be established prior to initiation of further treatment related to a work injury.

- 43. Documentation Requirements for Epidural Injections (Adopted and Adapted from CMS MLN Matters #SE1102 rev).** Documentation in the medical record must contain the initial evaluation including history and physical examination; diagnosis, pain, and disability of moderate to severe degree; site of injection with name and dosage of drug instilled; and the patient's response to the prior injections.

- Documentation of conservative therapies that were tried and failed except in acute situations such as acute disc herniation with disabling and debilitating pain, reflex sympathetic dystrophy, postoperative and obstetric pain and intractable pain secondary to carcinoma.
- All documentation must be maintained in the patient's medical record and available to the payer upon request.
- The record must be legible and include appropriate patient identification information (e.g., complete name, dates of service(s)). The record must include the physician responsible for and providing the care of the patient.
- The submitted medical record should support the use of the selected ICD-9~~10~~-CM code(s). The submitted CPT/HCPCS code should describe the service performed.
- The patient's record should document an appropriate history and physical examination by the provider or provider's representative specifying the medical indications requiring his/her presence when applicable. The indications should be recorded by the provider performing the injection in their respective notes.

- ~~5. ICD-9 Codes for Epidural Injections. The following ICD-9-CM codes apply to the CPT/HCPCS codes 64479, 64480, 64483, and 64484:~~

Code	Description
337.21	REFLEX SYMPATHETIC DYSTROPHY OF THE UPPER LIMB
337.22	REFLEX SYMPATHETIC DYSTROPHY OF THE LOWER LIMB
337.29	REFLEX SYMPATHETIC DYSTROPHY OF OTHER SPECIFIED SITE
353.0	BRACHIAL PLEXUS LESIONS
353.1	LUMBOSACRAL PLEXUS LESIONS
353.2	CERVICAL ROOT LESIONS NOT ELSEWHERE CLASSIFIED
353.3	THORACIC ROOT LESIONS NOT ELSEWHERE CLASSIFIED
353.4	LUMBOSACRAL ROOT LESIONS NOT ELSEWHERE CLASSIFIED

354.4	CAUSALGIA OF UPPER LIMB
355.0	LESION OF SCIATIC NERVE
355.71	CAUSALGIA OF LOWER LIMB
722.0	DISPLACEMENT OF CERVICAL- INTERVERTEBRAL DISC WITHOUT MYELOPATHY
722.10	DISPLACEMENT OF LUMBAR- INTERVERTEBRAL DISC WITHOUT MYELOPATHY
722.11	DISPLACEMENT OF THORACIC- INTERVERTEBRAL DISC WITHOUT MYELOPATHY
722.2	DISPLACEMENT OF INTERVERTEBRAL DISC SITE UNSPECIFIED WITHOUT MYELOPATHY
722.81	POSTLAMINECTOMY SYNDROME OF CERVICAL REGION
722.82	POSTLAMINECTOMY SYNDROME OF THORACIC REGION
722.83	POSTLAMINECTOMY SYNDROME OF LUMBAR REGION
723.0	SPINAL STENOSIS IN CERVICAL REGION
723.4	BRACHIAL NEURITIS OR RADICULITIS- NOS
724.01	SPINAL STENOSIS OF THORACIC REGION
724.02	SPINAL STENOSIS, LUMBAR REGION, WITHOUT NEUROGENIC CLAUDICATION
724.03	SPINAL STENOSIS, LUMBAR REGION, WITH NEUROGENIC CLAUDICATION
724.3	SCIATICA
724.4	THORACIC OR LUMBOSACRAL NEURITIS OR RADICULITIS- UNSPECIFIED
805.00- 805.08	CLOSED FRACTURE OF CERVICAL VERTEBRA UNSPECIFIED LEVEL -- CLOSED FRACTURE OF MULTIPLE CERVICAL VERTEBRAE
805.2	CLOSED FRACTURE OF DORSAL- (THORACIC) VERTEBRA WITHOUT SPINAL CORD INJURY

805.4	CLOSED FRACTURE OF LUMBAR VERTEBRA WITHOUT SPINAL CORD INJURY
953.0	INJURY TO CERVICAL NERVE ROOT
953.1	INJURY TO DORSAL NERVE ROOT
953.2	INJURY TO LUMBAR NERVE ROOT
953.3	INJURY TO SACRAL NERVE ROOT

- ~~D. Therapeutic and Diagnostic Services.~~ **D. Facet Injections.** Intra-articular joint injections (cervical, thoracic, lumbar), which can have both diagnostic and therapeutic indications, should always be considered primarily therapeutic.

The number of facet injections subject to reimbursement is limited to four (4) dates of service with a maximum of two (2) therapeutic and two (2) diagnostic injections for the initial twelve (12) month period of treatment per anatomical region. This allows for a total of four (4) dates of service, regardless of the number of levels treated, which levels are treated, or which side (left or right or bilateral) is treated, in the same anatomical region. ~~For coding purposes, the spine is divided into three (3) anatomical regions, cervical, thoracic, and lumbar/sacral. If treatment for facet-related pain continues past twelve (12) months, further injections are limited to a total of two (2) dates of service per twelve (12) month period. This limit applies to both therapeutic and diagnostic injections combined, and reimbursement beyond the initial twelve (12) month period is further limited to no more than two (2) injections of either type. This rule applies to cervical, thoracic, and lumbar facet joint and facet joint nerve injections.~~ Facet injections in different anatomical areas are not subject to the above limits, as each different anatomical area would be subject to its own separate limit as described above. Nerve-destructive procedures (e.g. radiofrequency facet nerve neurotomy, codes 64622, 64623, 64626, 64627) do not count as an additional therapeutic procedure for the purpose of this rule.

A "different anatomical area" refers to the lumbar, thoracic, and cervical areas. Injections within the lumbar spine, for example, are considered to be within the same anatomical area regardless of the actual lumbar joint/nerve level, or which side (right or left), is treated, and all limits would apply in this anatomical area. The same rule applies to the thoracic and cervical anatomical areas, regardless of the level or laterality treated within the same anatomical area.

In order to be a "successful" ("positive") diagnostic facet procedure (either intra-articular or medial branch block(s)), the patient must experience at least seventy-five percent (75%) relief of the index pain (pain being treated by the procedure). Additionally, this index pain must be at least fifty percent (50%) of the patient's total pain.

~~Pain levels should be measured during provocative testing pre- and postprocedure. The same provocative test should be repeated during each of the subsequent time intervals as described in these rules. The provocative test(s) used should be one(s) that the patient is able to perform unassisted and that would not result in injury to the patient.~~

Facet nerve (medial branch ablation) for cervical, thoracic or lumbar nerves will only be reimbursed once per seven (7) month period. Repeat (medial branch) ablation is contingent upon documentation of at least six (6) month's measurable (greater than thirty percent (30%) improvement in pain scores, and documentation of either 1) reduction of daily narcotic consumption of at least thirty percent (30%) from the daily use noted prior to the procedure, or 2) ability to work at least at a sedentary work level or work level as determined by a valid Functional Capacity Evaluation (FCE). Also, no patient can be considered for a repeat neuroablative procedure (e.g., neurotomy) if after the preceding neuroablative procedure (at similar anatomical levels) they are unable to reduce narcotic consumption to less than 100 mg morphine equivalent per day.

In order to perform a repeat therapeutic facet joint injection (cervical, thoracic, or lumbar; codes 64490–64495), there must be documentation of a significant analgesic response that persists for at least four (4) weeks. This relief must be at least fifty percent (50%) of the pain in the specific anatomical area targeted by the injection, and there must be documentation of a durable (also four (4) weeks) measurable improvement in the range of motion, or documentation of normal motion, of the involved joint area being treated.

- ~~E. In order to be eligible for reimbursement under this Fee Schedule, pain management procedures or services which are specifically governed by the rules in this Pain Management section of the Fee Schedule must be performed by a licensed physician holding either an M.D. or D.O. degree. Pain management procedures specifically governed herein which are performed by any other person, such as a Certified Registered Nurse Anesthetist (CRNA), shall not be reimbursed under this Fee Schedule.~~

- F. E. Trigger Point Injections.** Trigger point injection is considered one (1) procedure and is reimbursed as such regardless of the number of injection sites. Billing for multiple injections, and multiple regions, falls under the same one-procedure rule. Two codes are available for reporting trigger point injections: use 20552 for injection(s) of single or multiple trigger point(s) in one or two muscles, or 20553 when three or more muscles are involved. When billing for multiple injections, and multiple regions, only code 20552 OR 20553 is allowed per date of service.

1. ~~Trigger Point Injections (Adopted and Adapted from CMS MLN Matters #SE1102 rev.)~~

- ~~▪ Trigger point injection refers to the injection of local anesthetics or anti-inflammatory medications into myofascial trigger points. Trigger points are self-sustaining irritative foci that occur in skeletal muscle in response to strain, as well as mechanical overload phenomena. These trigger points produce a referred pain pattern characteristic for the individual involved muscle.~~
- ~~▪ Trigger point injections are an integral part of comprehensive pain management, and may be used concurrently in support of other conservative modalities. Conservative therapy may include analgesics, physical therapy, ultrasound, range of motion, chiropractic intervention (within the defined limits of the Fee-Schedule benefit) and active exercises. The diagnosis of trigger points requires a detailed history and thorough physical examination.~~
- ~~▪ The following clinical features are consistently present and are helpful in making the diagnosis:~~
 - ~~— History of onset of the painful condition and its presumed cause (e.g., injury or sprain)~~
 - ~~— Distribution pattern of pain consistent with the referral pattern of trigger points~~
 - ~~— Range of motion restriction~~
 - ~~— Muscular deconditioning in the affected area~~
 - ~~— Focal tenderness of a trigger point~~
 - ~~— Palpable taut band of muscle in which trigger point is located~~
 - ~~— Local taut response to snapping palpation~~
 - ~~— Reproduction of referred pain pattern upon stimulation of trigger point~~

The goal is to treat the cause of pain, not just the symptoms. With this intent, ~~it is expected that trigger point injections may be performed as frequently as weekly while in a physical therapy program.~~ in order to be repeated in the same muscle group, there must be at least a fifty percent (50%) persistent benefit from the previous injection. For patients not in therapy, trigger point injections can be performed monthly, as long as there is a documented fifty percent (50%) residual benefit, and progressive relief (pain intensity and duration of relief) with the preceding injection. After six months, if similar pain persists, the patient should be re-evaluated regarding the etiology of the complaint, and the available treatment options reconsidered. The payer may consider payment for additional trigger point injections upon review.

2. ~~ICD-9 Codes for Trigger Point Injections. The following ICD-9 CM codes apply to the CPT/HCPCS codes 20552 and 20553:~~

720.1	SPINAL ENTHESOPATHY
723.9	UNSPECIFIED MUSCULOSKELETAL DISORDERS AND SYMPTOMS REFERABLE TO NECK
726.10	OTHER SPECIFIED DISORDERS OF BURSAE AND TENDONS IN SHOULDER REGION
726.32	LATERAL EPICONDYLITIS
726.39	OTHER ENTHESOPATHY OF ELBOW REGION
726.5	ENTHESOPATHY OF HIP REGION
726.71	ACHILLES BURSITIS OR TENDINITIS
726.72	TIBIALIS TENDINITIS
726.79	OTHER ENTHESOPATHY OF ANKLE AND TARSUS
726.90	ENTHESOPATHY OF UNSPECIFIED SITE
729.0	RHEUMATISM UNSPECIFIED AND FIBROSITIS—MYALGIA AND MYOSITIS

729.1 UNSPECIFIED

729.4 FASCIITIS UNSPECIFIED

G. ~~Sacroiliac arthroscopy (CPT code 73542) assumes the use of a fluoroscope and is considered an integral part of the procedure(s). Therefore, an additional fee for the fluoroscopy (CPT code 77002) is not warranted and will not be reimbursed. This code may only be used once per twelve (12) month period.~~

H. ~~Epidurography (CPT code 72275) is no longer reimbursable under this Fee Schedule.~~

I. ~~CPT code 62318 includes needle placement, catheter infusion and subsequent injections. Code 62318 should be used for multiple solutions injected by way of the same catheter, or multiple bolus injections during the initial procedure. The epidural needle or catheter placement is inherent to the procedure, and, therefore, no additional charge for needle or catheter placement is allowed.~~

J. ~~Investigational Procedures. The following procedures are considered investigational, and, therefore, do not presently qualify for reimbursement under the Mississippi Workers' Compensation Medical Fee Schedule:~~

- ~~1. Intradiscal electrothermal therapy (IDET) (22526, 22527) and intradiscal annuloplasty by other method (22899);~~
- ~~2. Intraventricular administration of Morphine;~~
- ~~3. Pulse radiofrequency, regardless of procedure involved or indication (e.g., medial branch radiofrequency, dorsal root radiofrequency, etc.). If pulsed radiofrequency is used, but not specifically recorded as such in the medical records, the payer may retroactively deny payment for the service and request for reimbursement from the provider;~~
- ~~4. Intradiscal therapies used in discography, such as percutaneous disc decompression (Dekompressor), fluoroscopic, laser, radiofrequency, and thermal disc therapies;~~
- ~~5. Percutaneous disc nucleoplasty;~~
- ~~6. Epidural adhesiolysis, also known as Racz procedure or lysis of epidural adhesions.~~
- ~~7. X-STOP fusion devices.~~
- ~~8. MILD (minimally invasive lumbar decompression) procedures.~~
- ~~9. Non-Invasive Pain Procedure (NIP procedure or NIPP)~~
- ~~10. Alpha-Stim unit~~
- ~~11. ReBuilder and Low-Laser treatment~~

K. ~~The following procedures must be performed fluoroscopically in order to qualify for reimbursement:~~

- ~~1. Facet injections (64490-64495) (fluoroscopy is included in the procedure code)~~
- ~~2. **Sacroiliac (SI)** injections (27096)~~
- ~~3. Transforaminal epidural steroid injections (64479, 64480, 64483, 64484)~~
- ~~4. Cervical translaminar/interlaminar epidural injections (62310)~~
- ~~5. Additional information, adopted and adapted from CMS LCD L27512:~~
 - ~~a. **Facet Joint Block** (Adopted and Adapted from CMS MLN Matters #SE1102 rev.)~~
 - ~~— Paravertebral facet joint nerve block (medial branch) and intraarticular facet joint injections are used to both diagnose and treat lumbar zygapophysial (facet joint) pain. Facet joint pain syndrome is a challenging diagnosis as there are no specific history, physical examination, or radiological imaging findings that point exclusively to the diagnosis. However, this diagnosis is considered if the patient describes nonspecific, usually mechanical low back pain that is located in the paravertebral area of the cervical, thoracic, and lumbar spine. Typically, though certainly not consistently, the pain is aggravated by loading the facets, typically with extension or rotation of the involved area of the spine. A detailed physical examination of the spine should be performed on all patients. Radiological imaging is often done as part of the workup of persistent chronic back pain to exclude other diagnoses.~~
 - ~~— Facet joint or nerve block is one method used to diagnose a suspected component of pain related to the facet joints of the cervical, thoracic, and lumbar spine. Often the patient presents with chronic neck, thoracic, or back pain of a mechanical nature that lacks a strong radicular component, has no associated neurologic deficits, and is often aggravated by hyperextension, lateral bending or rotation of the spine.~~
 - ~~— A local anesthetic is injected to temporarily denervate the facet joint. After a satisfactory block has been obtained, the patient is asked to repeat the maneuver or activities that produced their pain on exam. Temporary or prolonged abolition of the spinal pain suggests that facet joints were a source of the symptoms.~~
 - ~~— A detailed pain history and appropriate exam is essential. Response to previous treatment should also be documented.~~
 - ~~— Imaging guidance must be used for both diagnostic and therapeutic injections to assure that the needle is properly placed, and the injected substance reaches the intended target zone. Imaging also helps determine aberrant injection patterns such as intravascular injections.~~

—The following ICD-9-CM codes are considered indications for facet interventions and apply to the CPT/HCPCS codes 64490, 64491, 64492, 64493, 64494 and 64495:

Code	Description
721.0	CERVICAL SPONDYLOSIS WITHOUT MYELOPATHY
721.1	CERVICAL SPONDYLOSIS WITH MYELOPATHY
721.2	THORACIC SPONDYLOSIS WITHOUT MYELOPATHY
721.3	LUMBOSACRAL SPONDYLOSIS WITHOUT MYELOPATHY
721.41	SPONDYLOSIS WITH MYELOPATHY THORACIC REGION
721.42	SPONDYLOSIS WITH MYELOPATHY LUMBAR REGION
723.1	CERVICALGIA
724.2	LUMBAGO

b.—Sacroiliac (SI) Joint

—The following ICD-9-CM codes apply to the CPT/HCPCS codes 27096

Code	Description
720.0	ANKYLOSING SPONDYLITIS
720.2	SACROILIITIS NOT ELSEWHERE CLASSIFIED
724.6	DISORDERS OF SACRUM
846.0	LUMBOSACRAL (JOINT) (LIGAMENT)
846.9	SPRAIN—UNSPECIFIED SITE OF SACROILIAC REGION SPRAIN

—Injections of the sacroiliac joint may be used to diagnose the cause of or to treat low back pain:

—Pain arising from the SI joint may mimic pain originating from the lumbar disc, lumbar facet, or hip joint. Pain is typically a mechanical axial back pain below the L5 level, and is usually unilateral. There may be associated somatic referred leg pain involving the posterior thigh. The pain may also be experienced anteriorly, in the area of the anterior iliac spine. Except in the presence of clear pathology (tumor, fracture, infection), clinical diagnosis of SI joint pain is difficult and often one of exclusion.

—The differential diagnosis of SI joint pain requires a detailed history and thorough physical exam. Imaging with radiographs, MRI, bone scans and CT scans do not consistently differentiate symptomatic from asymptomatic individuals.

SI joint injection can be done diagnostically or therapeutically. These are defined as follows:

- **Diagnostic injections**—either an anesthetic is injected for immediate pain relief or contrast media is injected into the joint for evaluation of the integrity (or lack thereof) of the articular cartilage and morphologic features of the joint space and capsule.
- **Therapeutic injections**—a steroid and/or anesthetic is injected into the SI joint for immediate and potentially lasting pain relief.

Both therapeutic and diagnostic sacroiliac joint injections require the use of image guidance. Injections performed without the use of image guidance, should be billed, and will be reimbursed, as a trigger point injection. CPT code 27096 requires the use of imaging confirmation of intra-articular needle positioning.

~~L. Any analgesia/sedation used in the performance of the procedures in this section is considered integral to the procedure, and will not be separately reimbursed. This rule applies whether or not the person administering the analgesia/sedation is the physician who is performing the pain management injection. Administration of analgesia/sedation by a different person from the physician performing the injection, including an RN, PA, CRNA, or MD/DO, does not allow for separate billing of analgesia/sedation.~~

~~M. Anatomical descriptions of the procedures performed must accompany the bill for service in order for reimbursement to be made. These descriptions must include landmarks used in determining needle positioning, needles used, and the type and quantity of drugs injected. Unless there is a contraindication to contrast media (e.g., documented allergy) it is expected that contrast injection AND a written description of the contrast spread pattern be included in the procedure report. Generic descriptions such as "the procedure was performed in the usual fashion," "the needle was placed on (next to, by, etc.) the nerve/joint/target," "the needle was placed in the correct anatomical location," or similar wording, which was templated or otherwise lacking an actual detailed anatomical description of needle placement or contrast pattern (where appropriate), is inadequate and subsequent cause for denial of payment. Tolerance to the procedure, and side effects or lack thereof should be included in this documentation.~~

F. **Soft Tissue Injections.** "Myofascial, myoneural, and trigger point injections" are synonymous and are to be reimbursed with code 20552 or 20553. Modifiers for additional injections are not allowed with these codes. Reimbursement will be made for 20552 or 20553 but not both on the same date.

Codes 20550 and 20551 are used for the injections of tendon origins and are not to be used for "myofascial, myoneural or trigger point" injections. Failure to observe this rule could result in denial of service on retrospective review and/or request for reimbursement.

Code 20612 is to be used for the aspirations/injection of a ganglion cyst and not for "myofascial, myoneural, or trigger point" injections. Failure to observe this rule could result in denial of service on retrospective review and/or request for reimbursement.

G. **Investigational Procedures.** Refer to the General Rules section.

H. **Sacroiliac (SI) Joint.** Injections of the sacroiliac joint may be used to diagnose the cause of or to treat low back pain.

SI joint injection can be done diagnostically or therapeutically.

Both therapeutic and diagnostic sacroiliac joint injections require the use of image guidance. Injections performed without the use of image guidance, should be billed, and will be reimbursed, as a trigger point injection. CPT code 27096 requires the use of imaging confirmation of intra-articular needle positioning.

Sacroiliac joint injections (code 27096) require documentation of at least a four (4) week durable analgesic benefit of at least fifty percent (50%) pain relief in the anatomical area being targeted by the injection. A maximum of two (2) therapeutic sacroiliac joint injections is allowed per twelve (12) month period. This rule is limited only to the joint injected, and not the contralateral joint (i.e., right or left sided joint).

~~NJ. **Discography.** Discography is a diagnostic test to identify (or rule out) painful intervertebral discs. Discography is appropriate only in patients for whom no other treatment options remain except for possible surgical stabilization (spinal fusion). Discography is then used on these patients to determine which discs, if any, are painful and abnormal, so that a surgical correction (fusion) can be performed. If a patient is not considered to be a candidate for surgery (fusion), then a discogram is not considered medically necessary. Investigational intradiscal therapies such as percutaneous disc decompression (Dekompressor), fluoroscopic, laser, radiofrequency, **plasma rich protein (PRP), stem cells** and **all other therapeutic disc injections or** thermal disc therapies are **considered investigational and are not reimbursable.**~~ an indication for a discography.

The radiographic interpretation codes 72285 and 72295 can only be used ONCE per treatment session and additional level modifiers are not allowed.

When reporting the radiological supervision and interpretation professional components for discography (72285, 72295), the anatomical localization for needle placement is inclusive with the procedure and code 77003 should not be additionally reported.

Radiographic interpretation codes 72285 and 72295 must include a thorough description of radiographic findings available in a separate report with hard copy radiographs or other media, such as digital, that will allow review of images (AP and lateral at a minimum).

~~QJ. **BOTOX.** BOTOX is not indicated for the relief of musculoskeletal pain, and its use as such is not covered by the Fee Schedule. An exception is made when BOTOX treatment is indicated for spasticity or other indications and requires prior approval.~~

~~PK. **Implantation of Spinal Cord Stimulators.**~~

~~1. The following conditions must be met for consideration of spinal cord stimulators.~~

- Patient must have a medical condition for which spinal cord stimulation (SCS) is a recognized and accepted form of treatment.
 - There must be a trial stimulation that includes a minimum seven (7) day home trial with the temporary stimulating electrode.
 - During the trial stimulation, the patient must report functional improvement, decreased use of medications, and at least fifty percent (50%) pain reduction and some functional gains during the last four (4) days of the stimulation trial.
 - Psychological screening must be used to determine if the patient is free from:
 - Substance abuse issues
 - Untreated psychiatric conditions
 - Major psychiatric illness that could impair the patient's ability to respond appropriately to the trial stimulation
2. Reimbursement for implantation is limited to a maximum of two (2) leads and a maximum of sixteen (16) electrodes, regardless of the number used.
3. Neurostimulation
- a. Description: As of the time of this guideline writing, spinal cord stimulation devices have been FDA approved as an aid in the management of chronic intractable pain of the trunk and/or limbs, including unilateral and bilateral pain associated with the following: failed back surgery syndrome, intractable low back pain and leg pain. There is limited evidence that supports its use for spinal axial pain. SCS may be most effective in patients with CRPS I or II who have not achieved relief with oral medications, rehabilitation therapy, or therapeutic nerve blocks, and in whom the pain has persisted for longer than six (6) months. Surgical procedures should be performed by surgeons, usually with a neurosurgical or spinal background.
 - b. Surgical Indications: Patients with established CRPS I or II or a failed spinal surgery with persistent functionally limiting radicular pain greater than axial pain who have failed conservative therapy including active and/or passive therapy, pre-stimulator trial psychiatric evaluation and treatment, medication management, and therapeutic injections. SCS is not recommended for patients with the major limiting factor of persistent axial spine pain. SCS may be indicated in a subset of patients who have a clear neuropathic radicular pain (radiculitis). The extremity pain should account for at least fifty percent (50%) or greater of the overall back and leg pain experienced by the patient. Prior authorization is required. Patients with severe psychiatric disorders, and issues of secondary gain are not candidates for the procedure.
 - c. A comprehensive psychiatric or psychological evaluation prior to the stimulator trial has been performed. This evaluation should include a standardized detailed personality inventory with validity scales (such as MMPI-2, MMPI-2-RF, or PAI) pain inventory with validity measures (for example, BHI 2, MBMD); clinical interview and complete review of the medical records. Before proceeding to a spinal stimulator trial the evaluation should find the following:
 - No indication of falsifying information, or of invalid response on testing;
 - No primary psychiatric risk factors or "red flags" (e.g., psychosis, active suicidality, severe depression, or addiction). (Note that tolerance and dependence to opioid analgesics are not addictive behaviors and do not preclude implantation);
 - A level of secondary risk factors or "yellow flags" (e.g., moderate depression, job dissatisfaction, dysfunctional pain conditions) judged to be below the threshold for compromising the patient's ability to benefit from neurostimulation;
 - The patient is cognitively capable of understanding and operating the neurostimulation control device;
 - The patient is cognitively capable of understanding and appreciating the risks and benefits of the procedure
 - The patient has demonstrated a history of motivation in and adherence to prescribed treatments.
 - d. The psychologist or psychiatrist performing these evaluations should not be an employee of the physician performing the implantation. This evaluation must be completed, with favorable findings, before the screening trial is scheduled. Significant personality disorders must be taken into account when considering a patient for spinal cord stimulation and other major procedures.
 - e. All reasonable surgical and non-surgical treatment has been exhausted.
 - f. The topography of pain and its underlying pathophysiology are amenable to stimulation coverage (the entire painful extremity area has been covered).
 - g. Successful neurostimulation screening test: For a spinal cord neurostimulation screening test, a temporary lead is implanted at the level of pain and attached to an external source to validate therapy effectiveness. A screening test is considered successful if the patient meets both of the following criteria:
 - Experiences a fifty percent (50%) decrease radicular or CRPS in pain, which may be confirmed by visual analogue scale (VAS) or Numerical Rating Scale (NRS)
 - Demonstrates objective functional gains or decreased utilization of pain medications.Objective, measurable, functional gains should be evaluated by an occupational therapist and/or physical therapist and the primary treating physician prior to and before discontinuation of the trial.
 - h. Reimbursement of the bilateral modifier is twenty-five percent (25%) of the base amount for the second or contralateral side.
- L. All Interventional Pain Management (IPM) procedures must be billed with the appropriate CPT codes and modifiers (where applicable) using accepted ICD-10-CM codes as the indications for the procedures. Providers MUST use acceptable codes in order to initiate or maintain treatment. Failure to do so is cause for denial of treatment until the proper appropriate codes are submitted.

Payers/URs must use the rules of this Fee Schedule to deny requested treatment. Failure to cite the specific section of the IPM portion of the *Mississippi Workers' Compensation Medical Fee Schedule* will result in automatic adjudication for the provider without appeal. "Specific" refers to citing the actual section, and appropriate subsections directly from the guidelines. Failure to have the Fee Schedule available during the review would obviously make such citation unachievable, resulting in automatic adjudication for the provider. **No outside guidelines can be used to deny IPM care requested in accordance with the Fee Schedule.**

M. Topical Drug Delivery

1. **Description:** Topical medications, such as lidocaine and capsaicin, may be an alternative treatment for neuropathic disorders and is an acceptable form of treatment in selected patients.
2. **Indications:** Neuropathic pain for most agents. Episodic use of NSAIDs and salicylates for joint pain. Patient selection must be rigorous to select those patients with the highest probability of compliance. Many patients do not tolerate the side effects for some medication or the need for frequent application.
3. **Dosing and Time to Therapeutic Effect:** All topical agents should be prescribed with strict instructions for application and maximum number of applications per day to obtain the desired benefit and avoid potential toxicity. There is no evidence that topical agents are more or less effective than oral medications. For most patients, the effects of long-term use are unknown and thus may be better used episodically.
4. **Side Effects:** Localized skin reactions may occur, depending on the medication agent used vs. Topical Agents.
 - a. **Capsaicin.** At the time of this guideline writing, formulations of capsaicin have been FDA approved for management of pain associated with post-herpetic neuralgia. Capsaicin offers a safe and effective alternative to systemic NSAID therapy. There is also good evidence that a high dose (8%) capsaicin patch applied for 60 minutes can decrease post herpetic neuralgic pain for three (3) months.
 - b. **Ketamine and Tricyclics.** Topical medications, such as the combination of ketamine and amitriptyline have been proposed as an alternative treatment for neuropathic disorders including CRPS. However, at the time of this guideline writing, neither tricyclic nor ketamine topicals are FDA approved for topical use in neuropathic pain. Continued use of these agents beyond the initial prescription requires documentation of effectiveness, including functional improvement, and/or decreased use of other medications, particularly decreased use of opiates or other habituating medications.
 - c. **Lidocaine.** At the time of this guideline writing, formulations of lidocaine (patch form) have been FDA approved for pain associated with post-herpetic neuralgia.
 - d. **Topical Salicylates and Non-salicylates.** These have been shown to be effective in relieving pain in acute musculoskeletal conditions and single joint osteoarthritis. Topical salicylate and non-salicylates achieve tissue levels that are potentially therapeutic, at least with regard to Cyclooxygenase (COX) inhibition. There is good evidence that diclofenac gel reduces pain and improves function in mild-to-moderate hand osteoarthritis. Diclofenac gel has been FDA approved for acute pain due to minor strains, pains, and contusions; and for relief of pain due to osteoarthritis of the joints amenable to topical treatment, such as those of the knees and hands.
 - e. **Other Compounded Topical Agents.** At the time this guideline was written, no studies identified evidence for the effectiveness of compounded topical agents other than those recommended above. Therefore, other compounded topical agents are not recommended.
5. Prior authorization is required for all agents that have not been recommended above. Continued use requires documentation of effectiveness including functional improvement and/or decrease in other medications.

VII. USE OF CONTROLLED SUBSTANCES

Use of Opioids or Other Controlled Substances for Management of Chronic (Non-Terminal) Pain. It is recognized that optimal or effective treatment for chronic pain may require the use of opioids or other controlled substances. The proper and effective use of opioids or other controlled substances has been specifically addressed by the Mississippi Board of Medical Licensure. Unless otherwise directed by the Commission, reimbursement for prescriptions for opioids or other controlled substances used for the management or treatment of chronic, non-terminal pain shall not be provided under this Fee Schedule unless treatment is sufficiently documented and complies with the following Rules and Regulations, as promulgated by the Mississippi State Board of Medical Licensure, and supplemented by the Commission accordingly.

1. **Definitions:** For the purpose of this provision, the following terms have the meanings indicated:
 - a. **Chronic Pain.** A pain state in which the cause of the pain cannot be removed or otherwise treated and which in the generally accepted course of medical practice, no relief or cure of the cause of the pain is possible or none has been found after reasonable efforts including, but not limited to, evaluation by the attending physician and one or more physicians specializing in the treatment of the area, system, or organ of the body perceived as the source of the pain. Further, if a patient is receiving controlled substances for the treatment of pain for a prolonged period of time (more than six (6) months), then they will be considered for the purposes of this regulation to have "de facto" chronic pain and subject to the same requirements of this regulation. "Terminal Disease Pain" should not be confused with "Chronic Pain." For the purpose of this section, "Terminal Disease Pain" is pain arising from a medical condition for which there is no possible cure and the patient is expected to live no more than six (6) months.
 - b. **Acute Pain.** The normal, predicted physiological response to an adverse chemical, thermal, or mechanical stimulus and is associated with surgery, trauma and acute illness. It is generally time limited and is responsive to therapies, including controlled substances as defined by the U.S. Drug Enforcement Administration. Title 21 CFR Part 1301 Food and Drugs.

- e. **Addiction.** A neurobehavioral syndrome with genetic and environmental influences that results in psychological dependence on the use of substances for their psychic effects and is characterized by compulsive use despite harm. Physical dependence and tolerance are normal physiological consequences of extended opioid therapy for pain and should not be considered addiction.
 - d. **Physical Dependence.** A physiological state of neuroadaptation to a substance which is characterized by the emergence of a withdrawal syndrome if the use of the substance is stopped or decreased abruptly, or if an antagonist is administered. Withdrawal may be relieved by re-administration of the substance. Physical dependence is a normal physiological consequence of extended opioid therapy for pain and should not be considered addiction.
 - e. **Substance Abuse.** The use of any substance(s) for non-therapeutic purposes; or use of medication for purposes other than those for which it is prescribed.
 - f. **Tolerance.** A physiological state resulting from regular use of a drug in which an increased dosage is needed to produce the same effect or a reduced effect is observed with a constant dose. Tolerance occurs to different degrees for various drug effects, including sedation, analgesia and constipation. Analgesic tolerance is the need to increase the dose of opioid to achieve the same level of analgesia. Such tolerance may or may not be evident during treatment and does not equate with addiction.
2. Notwithstanding any other provisions of these rules and regulations, a physician may prescribe, administer, or dispense controlled substances in Schedules II, IIN, III, IIIN, IV and V, or other drugs having addiction-forming and addiction-sustaining liability to a person in the usual course of treatment of that person for a diagnosed condition causing chronic pain.
3. Notwithstanding any other provisions of these rules and regulations, as to the prescribing, administration, or dispensation of controlled substances in Schedules II, IIN, III, IIIN, IV and V, or other drugs having addiction-forming and addiction-sustaining liability, use of said medications in the treatment of chronic pain should be done with caution. A physician may administer, dispense or prescribe said medications for the purpose of relieving chronic pain, provided that the following conditions are met:
- a. Before initiating treatment utilizing a Schedules II, IIN, III, IIIN, IV or V controlled substance, or any other drug having addiction-forming and addiction-sustaining liability, the physician shall conduct an appropriate risk/benefit analysis by reviewing his own records of prior treatment, or review the records of prior treatment which another treating physician has provided to the physician, that there is an indicated need for long term controlled substance therapy. Such a determination shall take into account the specifics of each patient's diagnosis, past treatments and suitability for long term controlled substance use either alone or in combination with other indicated modalities for the treatment of chronic pain. This shall be clearly entered into the patient medical record, and shall include consultation/referral reports to determine the underlying pathology or cause of the chronic pain.
 - b. Documentation in the patient record shall include a complete medical history and physical examination that indicates the presence of one or more recognized medical indications for the use of controlled substances.
 - c. Documentation of a written treatment plan which shall contain stated objectives as a measure of successful treatment and planned diagnostic evaluations, e.g., psychiatric evaluation or other treatments. The plan should also contain an informed consent agreement for treatment that details relative risks and benefits of the treatment course. This should also include specific requirements of the patient, such as using one physician and pharmacy if possible, and urine/serum medication-level monitoring when requested, but no less than once every twelve (12) months.
 - d. Periodic review and documentation of the treatment course is conducted at reasonable intervals (no less than every six months) with modification of therapy dependent on the physician's evaluation of progress toward the stated treatment objectives. This should include referrals and consultations as necessary to achieve those objectives.
4. No physician shall administer, dispense or prescribe a controlled substance or other drug having addiction-forming and addiction-sustaining liability that is non-therapeutic in nature or non-therapeutic in the manner the controlled substance or other drug is administered, dispensed or prescribed.
5. No physician shall administer, dispense or prescribe a controlled substance for treatment of chronic pain to any patient who has consumed or disposed of any controlled substance or other drug having addiction-forming and addiction-sustaining liability other than in strict compliance with the treating physician's directions. These circumstances include those patients obtaining controlled substances or other abusable drugs from more than one physician and those patients who have obtained or attempted to obtain new prescriptions for controlled substances or other abusable drugs before a prior prescription should have been consumed according to the treating physician's directions. This requirement will not be enforced in cases where a patient has legitimately temporarily escalated a dose of their pain medication due to an acute exacerbation of their condition but have maintained a therapeutic dose level, however, it will be required of the treating physician to document in the patient record that such increase in dose level was due to a recognized indication and was within appropriate therapeutic dose ranges. Repetitive or continuing escalations should be a reason for concern and a re-evaluation of the present treatment plan shall be undertaken by the physician.
6. No physician shall prescribe any controlled substance or other drug having addiction-forming or addiction-sustaining liability to a patient who is a drug addict for the purpose of "detoxification treatment," or "maintenance treatment," and no physician shall administer or dispense any narcotic controlled substance for the purpose of "detoxification treatment" or "maintenance treatment" unless they are properly registered in accordance with MCA §303(g) 21 U.S.C. 823(g). Nothing in this paragraph shall prohibit a physician from administering narcotic drugs to a person for the purpose of relieving acute withdrawal symptoms when necessary while arrangements are being made for referral for treatment. Not more than one (1) day's medication may be administered to the person or for the person's use at one time. Such emergency treatment may be carried out for not more than three (3) days. Nothing in this paragraph shall prohibit a physician from administering or dispensing narcotic controlled substances in a hospital to maintain or detoxify a person as an incidental adjunct to medical or surgical treatment of conditions other than addiction.
7. In addition to the specific Rules and Regulations promulgated by the Mississippi State Board of Medical Licensure as set forth above and incorporated herein, the payer may, as in other cases, obtain a second opinion from an appropriate and qualified physician to determine the appropriateness of the treatment being rendered, including but not limited to the appropriateness of the continuing use of opioids or other controlled substances for treatment of the patient's chronic pain.

However, any such second opinion shall not be used as the basis for abrupt withdrawal of medication or payment therefor. Nothing in this paragraph shall prohibit a physician from administering narcotic drugs to a person for the purpose of relieving acute withdrawal symptoms when necessary while arrangements are being made for referral or discontinuance of treatment, and the payer shall provide reimbursement in accordance with this Fee Schedule, as follows: not more than one (1) day's medication may be administered to the person or for the person's use at one time. Such emergency treatment may be carried out for not more than three (3) days. Discontinuance of treatment or reimbursement of prescriptions based on a second opinion obtained hereunder shall be subject to review by the Commission pursuant to the Dispute Resolution Rules set forth in the Dispute Resolution Rules section in this Fee Schedule.

~~Q.—Radiographic Codes in Pain Management. Fluoroscopic imaging is reported with codes 77002 and 77003.~~

~~—Codes 72010–72220 which apply to radiographic examination of the spine are not reimbursed concurrent with the pain management procedures in this section or with fluoroscopy services.~~

~~—Code 73542 is not separately reimbursed with facet or sacroiliac joint injections.~~

~~RS.—Implantation of Spinal Cord Stimulators.—~~

~~1.—The following conditions must be met for consideration of spinal cord stimulators.~~

- ~~▪—Patient must have a medical condition for which spinal cord stimulation (SCS) is a recognized and accepted form of treatment.~~
- ~~▪—There must be a trial stimulation that includes a minimum seven (7)-day home trial with the temporary stimulating electrode.~~
- ~~▪—During the trial stimulation, the patient must report functional improvement, decreased use of medications, and at least fifty percent (50%) pain reduction during the last four (4) days of the stimulation trial.~~
- ~~▪—Psychological screening must be used to determine if the patient is free from:~~
 - ~~—Substance abuse issues~~
 - ~~—Untreated psychiatric conditions~~
 - ~~—Major psychiatric illness that could impair the patient's ability to respond appropriately to the trial stimulation~~

~~2.—Reimbursement for implantation is limited to a maximum of two (2) leads and a maximum of sixteen (16) electrodes, regardless of the number used.~~

~~T.—Sacroiliac joint injections (code 27096) require documentation of at least a four (4) week durable analgesic benefit of at least fifty percent (50%) pain relief in the anatomical area being targeted by the injection. A maximum of two (2) therapeutic sacroiliac joint injections is allowed per twelve (12) month period. This rule is limited only to the joint injected, and not the contralateral joint (i.e., right or left sided joint).~~

~~U.—All Interventional Pain Management (IPM) procedures must be billed with the appropriate CPT codes and modifiers (where applicable) using accepted ICD-9 codes as the indications for the procedures. Providers MUST use acceptable codes in order to initiate or maintain treatment. Failure to do so is cause for denial of treatment until the proper appropriate codes are submitted.~~

~~—Payers/URs must use the rules of this Fee Schedule to deny requested treatment. Failure to cite the specific section of the IPM portion of the *Mississippi Workers' Compensation Medical Fee Schedule* will result in automatic adjudication for the provider without appeal. "Specific" refers to citing the actual section, and appropriate subsections directly from the guidelines. Failure to have the Fee Schedule available during the review would obviously make such citation unachievable, resulting in automatic adjudication for the provider. **No outside guidelines can be used to deny IPM care requested in accordance with the Fee Schedule.**~~

~~—Any analgesia/sedation used in the performance of the IPM procedures in this section is considered integral to the procedure, and will not be separately reimbursed. This rule applies whether or not the person administering the analgesia/sedation is the physician who is performing the pain management injection. Administration of analgesia/sedation by a different person from the physician performing the injection, including an RN, PA, CRNA, or MD/DO, does not allow for separate billing of analgesia/sedation.~~

~~VII.~~**VIII. MODIFIERS**

Please see the appropriate section (e.g., Surgery, Radiology) for applicable modifiers.

Surgery

I. GENERAL GUIDELINES

- A. **Global Reimbursement.** The reimbursement allowances for surgical procedures are based on a global reimbursement concept that covers performing the basic service and the normal range of care required after surgery. The State of Mississippi follows the surgical package definition from *CPT@2013* [36](#).

- B. **Normal, Uncomplicated Follow-Up (FU) Care.** Normal, uncomplicated follow-up (FU) care for the time periods indicated in the follow-up days (FUD) column for each procedure code. The number in that column establishes the days during which no additional reimbursement is allowed for the usual care provided following surgery, absent complications or unusual circumstances.

The maximum reimbursement allowance (MRA) covers all normal postoperative care, including the removal of sutures by the surgeon or associate. Follow-up days are specified by procedure. Follow-up days listed are for 0, 10, or 90 days and are listed in the Fee Schedule as 000, 010, or 090. Follow-up days may also be listed as:

MMM	indicating that services are for uncomplicated maternity care,
XXX	indicating that the global surgery concept does not apply,
YYY	indicating that the follow-up period is to be set by the payer (used primarily with BR procedures), or
ZZZ	indicating that the code is related to another service and is treated in the global period of the other procedure (used primarily with add-on and exempt from modifier 51 codes).

The day of surgery is day one when counting follow-up days. Hospital discharge day management is considered to be normal, uncomplicated follow-up care.

- C. **Follow-up for Diagnostic Procedures.** When a procedure is done for diagnostic purposes, the follow-up does not include care of the condition itself, only recovery/recovery care for the procedure itself.
- D. **Follow-up Care for Therapeutic Surgical Procedures.** When a procedure is therapeutic in nature, the follow-up care includes routine post-op care and recovery. Any care needed for complications, care needed that is not part of routine post-op recovery, or any care that is not due to the procedure itself, may warrant additional charges.
- E. **Separate Procedures.** Separate procedures are commonly carried out as an integral part of another procedure. They should not be billed in conjunction with the related procedure. These procedures may be billed when performed independently by adding modifier 59 [or X{EPSU}](#) to the specific “separate procedure” code.
- F. **Additional Surgical Procedure(s).** When an additional surgical procedure(s) is carried out within the listed period of follow-up care for a previous surgery, the follow-up periods will continue concurrently to their normal terminations.
- G. **Microsurgery, Operating Microscope, and Use of Code 69990.** When an operating microscope is used during an operative procedure, it should be billed with code 69990. Modifier 51 is not reported with this code. This code is not reimbursed for use of corrective vision apparatus or magnifying devices. CPT code 69990 should not be billed with the following codes that include the use of the operating microscope: 15756–15758, 15842, 19364, 19368, 20955–20962, 20969–20973, 22551, 22552, 22856–22861, 26551–26554, 26556, 31526, 31531, 31536, 31541, 31545, 31546, 31561, 31571, 43116, [43180](#), 43496, [46601](#), [46607](#), 49906, 61548, 63075–63078, 64727, 64820–64823, 65091–68850. For purposes of clarification, if microsurgery technique is employed and the primary procedure code is not contained in the aforementioned list, it is appropriate to report 69990 with the primary procedure performed and reimbursement is required for said services. (For example, code 63030 is not included in the aforementioned list and, as such, it is appropriate for providers to report 69990 along with 63030 to describe microsurgical technique.) Reimbursement for 69990 is required provided operative documentation affirms microsurgical technique and not just visualization with magnifying loupes or corrected vision.
- H. **Unique Techniques.** A surgeon is not entitled to an extra fee for a unique technique. It is inappropriate to use modifier 22 unless the procedure is significantly more difficult than indicated by the description of the code.
- I. **Surgical Destruction.** Surgical destruction is part of a surgical procedure, and different methods of destruction (e.g., laser surgery) are not ordinarily listed separately unless the technique substantially alters the standard management of a problem or condition. Exceptions under special circumstances are provided for by separate code numbers.

- J. **Incidental Procedure(s).** An additional charge for an incidental procedure (e.g., incidental appendectomy, incidental scar excisions, puncture of ovarian cysts, simple lysis of adhesions, simple repair of hiatal hernia, etc.) is not customary and does not warrant additional reimbursement.
- K. **Endoscopic Procedures.** When multiple endoscopic procedures are performed by the same practitioner at a single encounter, the major procedure is reimbursed at one hundred percent (100%). If a secondary procedure is performed through the same opening/orifice, fifty percent (50%) is allowable as a multiple procedure. However, diagnostic procedures during the same session and entry site are incidental to the major procedure.
- L. **Biopsy Procedures.** A biopsy of the skin and another surgical procedure performed on the same lesion on the same day must be billed as one procedure.
- M. **Repair of Nerves, Blood Vessels, and Tendons with Wound Repairs.** The repair of nerves, blood vessels, and tendons is usually reported under the appropriate system. Normal wound repair is considered part of the nerve, blood vessel and/or tendon repair. Additional reimbursement for wound repair is only warranted if it is a complex wound, and modifier 59 or X(EPSU) should be used to identify such.
- N. **Suture Removal.** Billing for suture removal by the operating surgeon is not appropriate as this is considered part of the global fee.
- O. **Joint Manipulation Under Anesthesia.** There is no charge for manipulation of a joint under anesthesia when it is preceded or followed by a surgical procedure on that same day by that surgeon. However, when manipulation of a joint is the scheduled procedure and it indicates additional procedures are necessary and appropriate, the lesser of the billed amount or fifty percent (50%) of the MRA for manipulation may be allowed.
- P. **Supplies and Materials.** Supplies and materials provided by the physician (e.g., sterile trays/drugs) over and above those usually included with the office visit may be listed separately using CPT code 99070 or specific HCPCS Level II codes.
- ~~Q. **Plastic and Metallic Implants.** Plastic and metallic implants or non-autogenous graft materials supplied by the physician are to be reimbursed at cost.~~

RQ. **Aspirations and Injections**

1. Puncture of a cavity or joint for aspiration followed by injection of a therapeutic agent is one procedure and should be billed as such.
2. When joint injections/trigger point injections are performed, ultrasound and/or Doppler guidance is considered integral to the procedure and will not be separately reimbursed.
- S3. When a joint injection is performed at the end of a surgical procedure for pain control, whether done by the surgeon or by anesthesia, reimbursement is allowed according to the Multiple Procedure Billing rule. This rule applies to facility reimbursement as well as provider reimbursement.

R. **Surgical Assistant**

1. Physician Surgical Assistant — For the purpose of reimbursement, a physician who assists at surgery is reimbursed as a surgical assistant. Assistant surgeons should use modifier 80 and are allowed the lesser of the billed amount or twenty percent (20%) of the maximum reimbursement allowance (MRA) for the procedure(s).
2. Registered Nurse Surgical Assistant or Physician Assistant
 - a. A physician assistant, or registered nurse who has completed an approved first assistant training course, may be allowed a fee when assisting a surgeon in the operating room (O.R.).
 - b. The maximum reimbursement allowance for the physician assistant or the registered nurse first assistant (RNFA) is ten percent (10%) of the surgeon's fee for the procedure(s) performed.
 - c. Under no circumstances will a fee be allowed for an assistant surgeon and a physician assistant or RNFA at the same surgical encounter.
 - d. Registered nurses on staff in the O.R. of a hospital, clinic, or outpatient surgery center do not qualify for reimbursement as an RNFA.
 - e. CPT codes with modifier AS or modifier 81 should be used to bill for physician assistant or RNFA services on a CMS-1500 form or electronic claim and should be submitted with the charge for the surgeon's services.
3. The Fee Schedule includes a column indicating which procedures are approved for assistant services with Y (yes) or N (no). If a surgical procedure is approved/precertified for a code with a Y in the "Assist Surg" column, the assistant is implied and does not require separate approval/precertification for reimbursement.

TS. **Operative Reports.** An operative report must be submitted to the payer before reimbursement can be made for the surgeon's or assistant surgeon's services, and should document the use of assistant services.

UT. **Needle Procedures.** Needle procedures (lumbar puncture, thoracentesis, jugular or femoral taps, etc.) should be billed in addition to the medical care on the same day.

- | **WU. Therapeutic Procedures.** Therapeutic procedures (injecting into cavities, nerve blocks, etc.) (CPT codes 20526–20610, 64400–64450) may be billed in addition to the medical care for a new patient. (Use appropriate level of service plus injection.)

In follow-up cases for additional therapeutic injections and/or aspirations, an office visit is only indicated if it is necessary to re-evaluate the patient. In this case, a minimal visit may be listed in addition to the injection. Documentation supporting the office visit charge must be submitted with the bill to the payer. Reimbursement for therapeutic injections will be made according to the multiple procedure rules.

Trigger point injection is considered one procedure and reimbursed as such regardless of the number of injection sites. Two codes are available for reporting trigger point injections. Use 20552 for injection(s) of single or multiple trigger point(s) in one or two muscles or 20553 when three or more muscles are involved.

- | **WV. Anesthesia by Surgeon.** In certain circumstances it may be appropriate for the attending surgeon to provide regional or general anesthesia. Anesthesia by the surgeon is considered to be more than local or digital anesthesia. Identify this service by adding modifier 47 to the surgical code. Only base anesthesia units are allowed. See the Anesthesia section.

- | **XW. Therapeutic/Diagnostic Injections.** Injections are considered incidental to the procedure when performed with a related invasive procedure.

- | **YX. Intervertebral Biomechanical Device(s) and Use of Code 22851.** Code 22851 describes the application of an intervertebral biomechanical device to a vertebral defect or interspace. Code 22851 should be listed in conjunction with a primary procedure without the use of modifier 51. The use of 22851 is limited to one instance per single interspace or single vertebral defect regardless of the number of devices applied and infers additional qualifying training, experience, sizing, and/or use of special surgical appliances to insert the biomechanical device. Qualifying devices include manufactured synthetic or allograft biomechanical devices, or methyl methacrylate constructs, and are not dependent on a specific manufacturer, shape, or material of which it is constructed. Qualifying devices are machine cut to specific dimensions for precise application to an intervertebral defect. (For example, the use of code 22851 would be appropriate during a cervical arthrodesis (22554) when applying a synthetic alloy cage, a threaded bone dowel, or a machine cut hexahedron cortical, cancellous, or corticocancellous allograft biomechanical device. Surgeons utilizing generic non-machined bony allografts or autografts are referred to code sets 20930–20931, 20936–20938 respectively.)

- | **ZY. Intra-operative Neurophysiologic Monitoring (e.g., SSEP, MEP, BAEP, TES, DEP, VEP).** All intra-operative neurophysiologic monitoring requires pre-authorization. This service does not require separate precertification when it meets these guidelines. Reimbursement for intra-operative neurophysiologic monitoring will not be allowed in the following cases, unless mutually agreed to by the payer and the provider:

1. Neuromuscular junction testing of each nerve during intraoperative monitoring;
2. Intraoperative monitoring during peripheral nerve entrapment releases, such as carpal release, ulnar nerve transposition at the elbow, and tarsal tunnel release;
3. During decompression of cervical nerve roots without myelopathy;
4. During placement of cervical instrumentation absent evidence of myelopathy;
5. During lumbar discectomy for radiculopathy; or
6. During lumbar decompression for treatment of stenosis without the need for instrumentation.

II. MULTIPLE PROCEDURES

- A. **Multiple Procedure Reimbursement Rule.** Multiple procedures performed during the same operative session at the same operative site are reimbursed as follows:

- One hundred percent (100%) of the allowable fee for the primary procedure
- Fifty percent (50%) of the allowable fee for the second and subsequent procedures

- B. **Bilateral Procedure Reimbursement Rule.** Physicians and staff are sometimes confused by the definition of bilateral. Bilateral procedures are identical procedures (i.e., use the same CPT code) performed on the same anatomic site but on opposite sides of the body. Furthermore, each procedure should be performed through its own separate incision to qualify as bilateral. For example, open reductions of bilateral fractures of the mandible treated through a common incision would not qualify under the definition of bilateral and would be reimbursed according to the multiple procedure rule. Medicare's accepted method of billing bilateral services is to list the procedure once and add modifier 50. Mississippi is adopting this same policy. Refer to the example below:

69300 50 Otoplasty, protruding ear, with or without size reduction

Place a "2" in the UNITS column of the CMS-1500 claim form so that payers are aware that two procedures were performed. List the charge as one hundred fifty percent (150%) of your normal charge. Reimbursement shall be at one

hundred fifty percent (150%) of the amount allowed for a unilateral procedure(s). For example, if the allowable for a unilateral surgery is one hundred dollars (\$100.00) and it is performed bilaterally, reimbursement shall be one hundred fifty dollars (\$150.00). However, if the procedure description states “bilateral,” reimbursement shall be as listed in the Fee Schedule since the fee was calculated for provision of the procedure bilaterally.

- C. **Multiple Procedures—Different Areas Rule.** When multiple surgical procedures are performed in different areas of the body during the same operative sessions and the procedures are unrelated (e.g., abdominal hernia repair and a knee arthroscopy), the multiple procedure reimbursement rule will apply independently to each area. Modifier 51 must be added.

D. **Multiple Procedure Billing Rules**

1. The primary procedure, which is defined as the procedure with the highest RVU, must be billed with the applicable CPT code.
2. The second or lesser or additional procedure(s) must be billed by adding modifier 51 to the codes, unless the procedure(s) is exempt from modifier 51 or qualifies as an add-on code.

III. REPAIR OF WOUNDS

- A. Wound classifications of simple, intermediate, or complex are expected to be consistent with current CPT descriptions/definitions/guidelines.

B. **Reporting**

1. The use of appropriate codes should be consistent with the current CPT guidelines.
2. Wound exploration codes should not be billed with codes that specifically describe a repair to major structure or major vessel. The specific repair code supersedes the use of a wound exploration code.

IV. MUSCULOSKELETAL SYSTEM

- A. **Casting and Strapping.** This applies to severe muscle sprains or strains that require casting or strapping.

1. Initial (new patient) treatment for soft tissue injuries must be billed under the appropriate office visit code.
2. When a cast or strapping is applied during an initial visit, supplies and materials (e.g., stockinet, plaster, fiberglass, ace bandages) may be itemized and billed separately using the appropriate HCPCS [Level II](#) code.
3. When initial casting and/or strapping is applied for the first time during an established patient visit, reimbursement may be made for the itemized supplies and materials in addition to the appropriate established patient visit.
4. Replacement casts or strapping provided during a follow-up visit (established patient) include reimbursement for the replacement service as well as the removal of casts, splints, or strapping. Follow-up visit charges may be reimbursed in addition to replacement casting and strapping only when additional significantly identifiable medical services are provided. Office notes should substantiate medical necessity of the visit. Cast supplies may be billed using the appropriate HCPCS [Level II](#) code and reimbursed separately.

B. **Fracture Care**

1. Fracture care is a global service. It includes the examination, restoration or stabilization of the fracture, application of the first cast, and cast removal. Casting material is not considered part of the global package and may be reimbursed separately. It is inappropriate to bill an office visit since the reason for the encounter is for fracture care. However, if the patient requires surgical intervention, additional reimbursement can be made for the appropriate E/M code to properly evaluate the patient for surgery. Use modifier 57 with the E/M code.
2. Reimbursement for fracture care includes the application and removal of the first cast or traction device only. Replacement casting during the period of follow-up care is reimbursed separately.
3. The phrase “with manipulation” describes reduction of a fracture.
4. Re-reduction of a fracture performed by the primary physician may be identified by the addition of modifier 76 to the usual procedure code to indicate “repeat procedure” by the same physician.
5. The term “complicated” appears in some musculoskeletal code descriptions. It implies an infection occurred or the surgery took longer than usual. Be sure the medical record documentation supports the “complicated” descriptor to justify reimbursement.

C. **Bone, Cartilage, and Fascia Grafts**

1. Reimbursement for obtaining autogenous bone, cartilage or fascia grafts, or other tissue through separate incisions is made only when the graft is not described as part of the basic procedure.
2. Tissue obtained from a cadaver for grafting must be billed using code 99070 and accompanied by a report in order to ensure an equitable reimbursement by the payer.

D. **Arthroscopy**

Note: Diagnostic arthroscopy is considered to be included in a surgical arthroscopy. Only in the most unusual case is an increased fee justified because of increased complexity of the intra-articular surgery performed.

1. Diagnostic arthroscopy should be billed at fifty percent (50%) when followed by open surgery.
2. Diagnostic arthroscopy is not billed when followed by arthroscopic surgery.
3. If there are only minor findings that do not confirm a significant preoperative diagnosis, the procedure should be billed as a diagnostic arthroscopy.

- E. **Arthrodesis Procedures.** Many revisions have occurred in CPT coding for arthrodesis procedures. References to bone grafting and fixation are now procedures which are listed and reimbursed separately from the arthrodesis codes.

To help alleviate any misunderstanding about when to code a discectomy in addition to an arthrodesis, the statement "including minimal discectomy" to prepare interspace has been added to the anterior interbody technique. If the disk is removed for decompression of the spinal cord, the decompression should be coded and reimbursed separately.

F. **External Spinal Stimulators Post Fusion**

1. The following criteria are established for the medically accepted standard of care when determining applicability for the use of an external spinal stimulator. However, the medical necessity should be determined on a case-by-case basis.
 - a. Patient has had a previously failed spinal fusion, and/or
 - b. Patient is scheduled for revision or repair of pseudoarthrosis, and/or
 - c. The patient smokes greater than a pack of cigarettes per day and is scheduled for spinal fusion
2. The external spinal stimulator is not approved by the Mississippi Workers' Compensation Commission for use in primary spinal fusions.
3. The external spinal stimulator will be reimbursed ~~by report (BR)~~ according to the allowables in the Fee Schedule.
4. Precertification is required for use of the external spinal stimulator.

- G. **Carpal Tunnel Release.** The following intraoperative services are included in the global service package for carpal tunnel release and should not be reported separately and do not warrant additional reimbursement:

- Surgical approach
- Isolation of neurovascular structures
- Video imaging
- Stimulation of nerves for identification
- Application of dressing, splint, or cast
- Tenolysis of flexor tendons
- Flexor tenosynovectomy
- Excision of lipoma of carpal canal
- Exploration of incidental release of ulnar nerve
- Division of transverse carpal ligament
- Use of endoscopic equipment
- Placement and removal of surgical drains or suction device
- Closure of wound

V. **BURNS, LOCAL TREATMENT**

A. **Degree of Burns**

1. Code 16000 must be used when billing for treatment of first degree burns when no more than local treatment of burned surfaces is required.
2. Codes 16020–16030 must be used when billing for treatment of partial-thickness burns only.
3. The claim form must be accompanied by a report substantiating the services performed.
4. Major debridement of foreign bodies, grease, epidermis, or necrotic tissue may be billed separately under codes 11000–11001. Modifier 51 does not apply.

B. **Percentage of Total Body Surface (TBS) Area.** The following definitions apply to codes 16020–16030:

1. "Small" means a burn that encompasses five percent (5%) of TBS area or less.
2. "Medium" means a burn that encompasses five percent to ten percent (5%–10%) of TBS or that involves the whole face, or a whole extremity.
3. "Large" means a burn that encompasses greater than ten percent (10%) TBS area.

C. Reimbursement

1. To identify accurately the proper procedure code and substantiate the descriptor for billing, the exact percentage of the body surface involved and the degree of the burn must be specified on the claim form submitted or by attaching a special report. Claims submitted without this specification will be returned to the physician for this additional information.
2. Hospital visits, emergency room visits, or critical care visits provided by the same physician on the same day as the application of burn dressings will be reimbursed as a single procedure at the highest level of service.

VI. NERVE BLOCKS

A. Diagnostic or Therapeutic

1. Please refer to the Pain Management section for guidelines and reimbursement of nerve blocks.
2. Medications such as steroids, pain medication, etc., may be separately billed using the appropriate HCPCS [Level II](#) code.
 - a. The name of the medication(s), dosage, and volume must be identified.
 - b. Medication will be reimbursed according to fees listed in the HCPCS section. If not listed in HCPCS, reimbursement will be according to the Pharmacy section in the General Guidelines.

- B. **Anesthetic.** When a nerve block for anesthesia is provided by the operating room surgeon, the procedure codes listed in the Anesthesia section must be followed.

VII. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in surgery are as follows:

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPCS [Level II](#) Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is ~~calculated by subtracting~~ listed in the [PGTC](#) Amount ~~from column of the~~ [Amount for the reimbursement Fee Schedule](#).

32 Mandated Services

Services related to mandated consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

47 Anesthesia by Surgeon

Regional or general anesthesia provided by the surgeon may be reported by adding modifier 47 to the basic service. (This does not include local anesthesia.) **Note:** Modifier 47 would not be used as a modifier for the anesthesia procedures.

Mississippi guideline: Reimbursement is made for base units only.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed during the same operative session should be identified by adding modifier 50 to the appropriate five-digit code.

51 Multiple Procedures

When multiple procedures, other than E/M services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated "add-on" codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated "modifier 51 exempt" codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances, the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

54 Surgical Care Only

When 1 physician or other qualified health care professional performs a surgical procedure and another provides preoperative and/or postoperative management, surgical services may be identified by adding modifier 54 to the usual procedure number.

55 Postoperative Management Only

When 1 physician or other qualified health care professional performed the postoperative management and another performed the surgical procedure, the postoperative component may be identified by adding modifier 55 to the usual procedure number.

56 Preoperative Management Only

When 1 physician or other qualified health care professional performed the preoperative care and evaluation and another performed the surgical procedure, the preoperative component may be identified by adding modifier 56 to the usual procedure number.

57 Decision for Surgery

An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: (a) planned or anticipated (staged); (b) more extensive than the original procedure; or (c) for therapy following a surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For

treatment of a problem that requires a return to the operating/procedure room (eg, an unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures or services other than E/M services, that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25. See also Level II (HCPCS/National) Modifiers listing.

62 Two Surgeons

When two surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated add-on code(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. If an additional procedure(s) (including an add-on procedure(s)) are performed during the same surgical session, separate code(s) may also be reported with modifier 62 added. **Note:** If a co-surgeon acts as an assistant in the performance of an additional procedure(s), other than those reported with the modifier 62, during the same surgical session, those services may be reported using separate procedure code(s) with modifier 80 or modifier 82 added, as appropriate.

Mississippi guideline: This modifier is reimbursed at one hundred fifty percent (150%) of the allowed amount divided equally between the two co-surgeons.

66 Surgical Team

Under some circumstances, highly complex procedures (requiring the concomitant services of several physicians or other qualified health care professional, often of different specialties, plus other highly skilled, specially trained personnel, various types of complex equipment) are carried out under the "surgical team" concept. Such circumstances may be identified by each participating individual with the addition of modifier 66 to the basic procedure number used for reporting services.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

80 Assistant Surgeon

Surgical assistant services may be identified by adding modifier 80 to the usual procedure number(s).

Mississippi guideline: Reimbursement is twenty percent (20%) of the maximum reimbursement allowance.

81 Minimum Assistant Surgeon

Minimum surgical assistant services are identified by adding modifier 81 to the usual procedure number.

Mississippi guideline: Physician reimbursement is ten percent (10%) of the maximum reimbursement allowance.

82 Assistant Surgeon (when qualified resident surgeon not available)

The unavailability of a qualified resident surgeon is prerequisite for use of modifier 82 appended to the unusual procedure code number(s).

90 Reference (Outside) Laboratory

When laboratory procedures are performed by a party other than the treating or reporting physician or other qualified health care professional, the procedure may be identified by adding modifier 90 to the usual procedure number.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

AS Physician Assistant, Nurse Practitioner, or Clinical Nurse Specialist Services for Assistant at Surgery (HCPCS Level II Modifier)

Assistant at surgery services provided by another qualified individual (e.g., physician assistant, nurse practitioner, clinical nurse specialist, registered nurse first assistant) and not another physician are identified by adding modifier AS to the listed applicable surgical procedures. Modifier AS may be appended to any code identified as appropriate for surgical assistance in this Fee Schedule.

Mississippi guideline: Modifier AS reimbursement is ten percent (10%) of the maximum reimbursement allowance. For assistant at surgery services provided by a physician, see modifiers 80, 81, and 82.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Radiology

I. SCOPE

The following guidelines apply to radiology services provided in offices, clinics, and under some circumstances in hospital x-ray departments. This section also contains guidelines that include nuclear medicine and diagnostic ultrasound.

II. GUIDELINES

- A. **Total Fee.** A total fee includes both the professional component for the radiologist and the technical component needed to accomplish the procedure. Explanations of the professional component and the technical component are listed below. The values as listed in the Amount column represent the total reimbursement.
- B. **Professional Component.** The professional component represents the reimbursement allowance of the professional radiological services of the physician and is identified by the use of modifier 26. This includes examination of the patient when indicated, performance or supervision of the procedure, interpretation and written report of the examination, and consultation with the referring physician. In the majority of hospital radiology departments, the radiologist submits a separate statement to the patient for professional services rendered, which are listed as the professional component. Values in the PC Amount column are intended for the services of a radiologist for the professional component only and do not include any other charges. To identify a charge for a professional component only, use the five-digit code followed by modifier 26.
- C. **Technical Component.** The technical component includes charges made by the institution or clinic to cover the services of technologists and other staff members, the film, contrast media, chemicals and other materials, and the use of the space and facilities of the x-ray department. To identify a charge for a technical component only, use the five-digit code followed by HCPCS ~~Level II~~ modifier TC. The technical component amount is ~~calculated by subtracting listed in the PC TC Amount from column of the Amount for the total reimbursement~~ Fee Schedule.
- D. **Review of X-rays.** Billing code 76140 is not appropriate in the following circumstances because review of the x-rays is inherent to the evaluation and management code:
- The physician, during the course of an office visit or consultation, reviews an x-ray made elsewhere.
 - The treating or consulting physician reviews x-rays at an emergency room or hospital visit.
 - CPT® code 76140 Consultation on x-ray examination made elsewhere, written report, will only be paid when there is a documented need for the service and when performed by a radiologist or physician certified to perform radiological services.
 - This provision is for payment of a second interpretation under unusual circumstances such as a questionable finding for which the physician performing the initial interpretation requests the expertise of another physician (i.e., expertise of a radiologist). CPT code 76140 is to be used when a second opinion is required for a radiological procedure. Reimbursement is limited to the PC Amount listed in the Fee Schedule for the radiological procedure.
- E. **Additional X-rays.** No payment shall be made for additional x-rays when recent x-rays are available except when supported by adequate information regarding the need to retake x-rays. The use of photographic or digital media and/or imaging is not reported separately, but is considered to be a component of the basic procedure and shall not merit any additional payment.
- F. **Comparison X-rays.** Comparison x-rays are reimbursable when appropriate. Any repeat comparison x-ray requires prior approval and will not be reimbursed without prior approval.

FG. **Contrast Material**

1. Complete procedures, interventional radiological procedures, or diagnostic studies involving injection of contrast media include all usual pre-injection and post-injection services (e.g., necessary local anesthesia, placement of needle catheter, injection of contrast media, supervision of the study, and interpretation of results).
2. Low osmolar contrast material and paramagnetic contrast materials shall only be billed when not included in the descriptor of the procedure. When appropriately billed, the contrast media is reimbursed according to the lesser of the billed charges or the maximum reimbursement allowance (MRA) listed in the HCPCS section of the Fee Schedule. Supplies are considered incidental to the administration of the contrast and are not separately reimbursable.
3. When contrast can be administered orally (upper G.I.) or rectally (barium enema), the administration is included as part of the procedure.
4. When an intravenous line is placed simply for access in the event of a problem with a procedure or for administration of contrast, it is considered part of the procedure and does not command a separate fee.

- GH. Urologic Procedures.** In the case of urologic procedures (e.g., CPT codes 74400–74485), insertion of a urethral catheter is part of the procedure and is not separately billed.
- HI. Separate or Multiple Procedures**
 1. When multiple procedures are performed on the same day or at the same session, it is appropriate to designate them by separate entries. Surgical procedures performed in conjunction with a radiology procedure will be subject to the rules and regulations of the Surgery section.
 2. When x-rays of multiple sections of a body area are billed separately, the total reimbursement must not exceed the maximum reimbursement allowance of the complete body area.
- IJ. Outpatient CT Scans and MRIs.** CT scans and MRIs, when performed on an outpatient basis, are subject to the limitations of the Fee Schedule, regardless of site of service.
- JK. Unlisted Service or Procedure.** A service or procedure may be provided that is not listed in the most recent edition of the CPT book. When reporting such a service, the appropriate unlisted procedure code may be used to indicate the service, identifying it by special report. Unlisted procedure codes are listed in the CPT book.
- KL. Special Report.** Any test/service that is not provided routinely should be reported with the appropriate code designating the service and the billing for that test/service should include a description of the procedure, the process used, and a full report of the findings. Additional information provided should include an acceptable definition or description of the extent and nature of the procedure, as well as information regarding the need for the procedure. Also essential is data regarding the equipment necessary to perform the service, as well as the time and effort required. Special reports to justify the necessity of a service do not warrant a separate fee.
- LM. By Report (BR).** “BR” in the Amount column indicates services that are too new, unusual, or variable in the nature of their performance to permit the assignment of a definable fee. Such services should be substantiated by documentation submitted with the bill. Sufficient information should be included to permit proper identification and a sound evaluation. If the service is justified by the report, the actual charge shall be paid in full, unless the payer has evidence that the actual charge exceeds the usual and customary charge for such service.
- MN. Radiology Supervision and Interpretation Procedures.** There are times when a single physician may perform the procedure and supervise the imaging and interpretation. On other occasions, one physician may perform the procedure, and the imaging supervision with interpretation may be performed by another physician. The appropriate radiology codes are to be used for supervision and interpretation of the imaging. The appropriate surgical codes are to be used for the procedure, including necessary local anesthesia, placement of needle or catheters, injection of contrast media, etc. The surgical codes are subject to the rules and regulations of the Surgery section, and the radiology codes are subject to this section of radiology rules and regulations.
- NO. Written Report(s).** A written report, signed by the interpreting physician, should be considered an integral part of a radiological procedure or interpretation and must be submitted with the billing.
- OP. Facility Fee.** The Facility Fee for outpatient services is the APC Amount.

III. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in radiology (including nuclear medicine and diagnostic ultrasound) are as follows:

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

TC Technical Component (HCPCS Level II Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is ~~calculated by subtracting~~ listed in the PGTC Amount from column of the Amount for the reimbursement Fee Schedule.

32 Mandated Service

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same session, should be identified by adding modifier 50 to the appropriate 5 digit code.

51 Multiple Procedures

When multiple procedures, other than E/M services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated “modifier 51 exempt” codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

Pathology and Laboratory

I. GUIDELINES

- A. **Pathology Services.** Pathology and Laboratory services are provided for evaluating the nature of disease or a change in body tissue and organs due to injury and/or caused by a disease.
- B. **Separate or Multiple Procedures.** When multiple procedures are performed on the same date or at the same session, it is appropriate to designate them by separate entries.
- C. **Unlisted Service or Procedures.** Unlisted codes are used for laboratory/pathology services which do not currently have a CPT® code. All unlisted codes require an explanation and report. A list of unlisted codes may be found in the CPT book. The report must accompany the bill.
- D. **Special Report.** Any test/service that is not provided routinely should be reported with the appropriate code designating the service and the billing for that test/service should include a description of the procedure, the process used and a full report of the findings. Special reports to justify the necessity of a service do not warrant a separate fee.
- E. **By Report (BR).** “BR” in the Amount column indicates services that are too new, unusual, or variable in the nature of their performance to permit the assignment of a definable fee. Such services should be substantiated by documentation submitted with the bill. Sufficient information should be included to permit proper identification and a sound evaluation. If the service is justified by the report, the actual charge shall be paid in full, unless the payer has evidence that the actual charge exceeds the ~~usual and customary charge~~ maximum allowable amount for such service.
- F. **Facility Fee.** The Facility Fee for outpatient services is the APC Amount.

II. GENERAL INFORMATION AND INSTRUCTIONS

- A. **Panel Tests.** The billing for panel tests must include documentation listing the tests in the panel. When billing for panel tests (~~80048–80076~~ 80047–80081), use the code number corresponding to the appropriate panel test. These tests will not be reimbursed separately.

The panel components do not preclude the performance of other tests not listed in the panel. If other laboratory tests are performed in conjunction with a particular panel, the additional tests may be reported separately in addition to the panel.

B. Handling and Collection Process

- 1. In collecting a specimen, the cost for collection is covered by the technical component when the lab test is conducted at that site. No separate collection or handling fee for this purpose will be reimbursed.
- 2. When a specimen must be sent to a reference laboratory, the cost of specimen collection is covered in a collection fee. This charge is only allowed when a reference laboratory is used, and modifier 90 must be used.

- C. **Global, Professional, and Technical Components.** Some procedures in the Pathology and Laboratory section are considered global fees (Amount) and do not qualify for a separate technical (TC) or professional (PC) component. ~~Some procedures are listed with a PC Amount in addition to the Amount. For procedures listed with a PC Amount, the TC reimbursement rate is calculated by subtracting the PC Amount from the Amount. The professional component should be billed with modifier 26. Procedures that do qualify for separate components have separate Fee Schedule amounts for modifiers 26 and TC.~~

Whereas these guidelines are written to be all-inclusive, there are instances when the reviewer must make an informed decision regarding the PC/TC reimbursements. Request for PC reimbursement will only be considered if:

- The physician performs the procedure or reviews the results
- A written report, not a computer generated report, is submitted with the request for payment

D. Occupational Blood Exposure Testing/Treatment

- 1. Work related Blood Exposures should minimally meet the appropriate CDC Guidelines for Management of Occupational Blood Exposures.
- 2. The CDC Guidelines are updated at intervals and the most current guidelines should be used.
- 3. Current information can be obtained at www.cdc.gov.

E. Drug Screens

1. Post-Accident Drug Screens should comply with MCA §71-7-1 and other state and federal regulations with which the employer must comply. Reimbursement will either be made by the payer/carrier or the employer. Reimbursement shall not be dependent on the outcome of the testing results.
2. Other drug screens: The only codes reimbursed by workers' compensation for drug screens other than Post-Accident are ~~G0431 thru G0435~~ 0431M (Mississippi-specific code), with a maximum reimbursement allowable of \$290.38.
3. Testing validity is considered part of the screen and is not separately reimbursed.
4. Reimbursement shall not be dependent on the outcome of the test results.

F. Pharmacogenetic Testing

1. Pharmacogenetics is the testing of a person's DNA for genetic programming for specific enzymes. It is the science of genetic differences between individuals which can affect individual responses to drugs, both in terms of therapeutic effect as well as adverse effect.
2. Testing is covered for the following medications: Alfentanil, Amitriptyline, Bupropion, Carisoprodol, Celecoxib, Citalopram, Clomipramine, Codeine, Cyclobenzaprine, Desipramine, Desvenlafaxine, Doxepin, Duloxetine, Escitalopram, Fentanyl, Fluoxetine, Fluvoxamine, Hydrocodone, Hydromorphone, Ibuprofen, Imipramine, Lidocaine, Maprotiline, Methadone, Mianserin, Mirtazapine, Morphine, Naproxen, Nefazodone, Nortriptyline, Oxycodone, Oxymorphone, Paroxetine, Reboxetine, Ropivacaine, Sertraline, Tizanidine, Tramadol, Trazadone, Trimipramine, Venlafaxine, Vilazodone, Zolmitriptan.
3. Pharmacogenetic testing is limited to once for an individual claimant.
4. Pharmacogenetic testing is limited to a maximum reimbursement of \$500.00 per claim.

III. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in pathology and laboratory are as follows:

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPSC ~~Level II~~ Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is ~~calculated by subtracting~~ listed in the ~~PGTC~~ Amount ~~from column of~~ the ~~Amount for the reimbursement~~ Fee Schedule.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting

reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances, the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate, it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

90 Reference (Outside) Laboratory

When laboratory procedures are performed by a party other than the treating or reporting physician or other qualified health care professional, the procedure may be identified by adding modifier 90 to the usual procedure number.

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time, reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results (eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

92 Alternative Laboratory Platform Testing

When laboratory testing is being performed using a kit or transportable instrument that wholly or in part consists of a single use, disposable analytical chamber, the service may be identified by adding modifier 92 to the usual laboratory procedure code (HIV testing 86701–86703, and 87389). The test does not require permanent dedicated space; hence by its design may be hand carried or transported to the vicinity of the patient for immediate testing at that site, although location of the testing is not in itself determinative of the use of this modifier.

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Medicine Services

In addition to the general rules, this section applies unique guidelines for medicine specialties. Therapeutic services and rehabilitation guidelines, as well as chiropractic and osteopathic services, are listed in a separate section following Medicine Services.

I. GUIDELINES

- A. **Unlisted Services or Procedures.** Unlisted codes are used for medical services which do not currently have a CPT® code. All unlisted codes require an explanation and report. Unlisted codes are listed in the CPT book.
- B. **Multiple Procedures.** It is appropriate to designate multiple procedures rendered on the same date by separate entries.
- C. **Separate Procedures.** Separate procedures are commonly carried out as an integral component of another procedure. They should not be billed in conjunction with the related procedure. These procedures may be billed when performed independently by adding modifier 59 to the specific “separate procedure” code.
- D. **By Report (BR) Procedures.** By report (BR) means that the procedure is new, or is not assigned a maximum fee, and requires a written description included on or attached to the bill. “BR” procedures require a complete listing of the service, the dates of service, the procedure code, and the payment requested. The report is included in the reimbursement for the procedure.
- E. **Special Report.** Any test/service that is not provided routinely should be reported with the appropriate code designating the service and the billing for that test/service should include a description of the procedure, the process used, and a full report of the findings. Special reports to justify the necessity of a service do not warrant a separate fee.
- F. **Materials Supplied by Physician.** Supplies and materials usually included in an office visit are included in the reimbursement for the office visit. Other unusual supplies and materials should be identified with CPT code 99070 or specific HCPCS [Level II](#) code. Reimbursement shall be limited to [the lesser of the billed amount, or](#) the Fee Schedule maximum reimbursement allowance (MRA) or the usual and customary rate for items not listed in this Fee Schedule.
- G. **Audiological Function Tests.** The audiometric tests (92551–92597) are reimbursed based on the AMA CPT Guidelines. All descriptors refer to testing of both ears.
- H. **Psychological Services**
 - 1. Payment for a psychiatric diagnostic interview/evaluation includes history and mental status determination, development of a treatment plan when necessary and the preparation of a written report that must be submitted with the required billing form. Use of an E/M code with a diagnostic interview/evaluation is not appropriate.
 - 2. Psychotherapy codes from the current CPT manual are used regardless of place of service. The CPT code most closely matching the length of the session must be billed.
 - 3. Use of an E/M code with a psychotherapy code should follow the guidelines from the CPT book and the American Psychiatric Association.
 - 4. A service level adjustment factor is used to determine payment for psychotherapy when a provider other than a psychiatrist provides the service. In those instances, the reimbursement amount for the CPT code is paid at eighty-five percent (85%) of the maximum reimbursement allowance. This applies to psychologists, social workers, and counselors, etc.
- I. **Electromyography (EMG).** Payment for EMG services includes the initial set of electrodes and all supplies necessary to perform the service. The physician may be paid for a consultation or new patient visit in addition to the EMG performed on the same day, with supporting documentation required as outlined in the Evaluation and Management section. When an EMG is performed on the same day as a follow up visit, payment may be made for the EMG only unless documentation supports the need for a medical service in addition to the EMG.
 - 1. [Only a licensed physician certified in Neurology/PMR/Electrodiagnostic medicine is entitled to reimbursement for performing an electromyogram \(EMG\) and/or a nerve conduction study \(NCS\).](#)
 - 2. [Reimbursement is not allowed under this Fee Schedule for automated nerve conduction studies.](#)
 - 3. [Referral for an electromyogram and/or a nerve conduction study shall be at the discretion and direction of the physician in charge of care, and neither the payer nor the payer's agent may unilaterally or arbitrarily redirect the patient to another provider for these tests. The payer or the payer's agent may, however, discuss with the physician in charge of care appropriate providers for the conduct of these tests in an effort to reach an agreement with the physician in charge as to who will conduct an electromyogram and/or nerve conduction study in any given case.](#)

- J. **Manipulative Services.** Chiropractic and Osteopathic manipulative services, which are medicine services, will be discussed in the Therapeutic Services section.

II. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used in Medicine Services are as follows:

22 Increased Procedure Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

26 Professional Component

Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.

Mississippi guideline: The allowable is listed in the PC Amount column of the Fee Schedule.

TC Technical Component (HCPCS ~~Level II~~ Modifier)

Certain procedures are a combination of a professional component and a technical component. When the technical component is reported separately, the service may be identified by adding modifier TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.

Mississippi guideline: The technical component is ~~calculated by subtracting~~ listed in the ~~PG~~TC Amount ~~from column of the~~ Amount for the reimbursement ~~Fee Schedule~~.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

51 Multiple Procedures

When multiple procedures, other than E/M services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated "add-on" codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated "modifier 51 exempt" codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

53 Discontinued Procedure

Under certain circumstances, the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 53 to the code reported by the individual for the discontinued procedure. **Note:** This modifier is not used to report the elective cancellation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

54 Surgical Care Only

When 1 physician or other qualified health care professional performs a surgical procedure and another provides preoperative and/or postoperative management, surgical services may be identified by adding modifier 54 to the usual procedure number.

55 Postoperative Management Only

When 1 physician or other qualified health care professional performed the postoperative management and another performed the surgical procedure, the postoperative component may be identified by adding modifier 55 to the usual procedure number.

56 Preoperative Management Only

When 1 physician or other qualified health care professional performed the preoperative care and evaluation and another performed the surgical procedure, the preoperative component may be identified by adding modifier 56 to the usual procedure number.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: a) planned or anticipated (staged); b) more extensive than the original procedure; or c) for therapy following a surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For the treatment of a problem that requires a return to the operating/procedure room (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services, that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the Same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Therapeutic Services

I. SCOPE

- A. **Therapeutic Services.** Therapeutic services are an integral part of the healing process for a variety of injured workers. Recognizing this, the Fee Schedule includes codes for physical medicine, modalities, procedures, tests, and measurements in the Therapeutic Services section representing specific therapeutic procedures performed by licensed physicians, chiropractors, licensed physical therapists, licensed occupational therapists, and speech pathologists.
- B. **Selection of Providers.** Physical or occupational therapy, including work hardening, functional capacity evaluations, chronic pain programs, or massage therapy shall be provided upon referral from a physician. In the absence of specific direction from the treating or prescribing physician, the selection of a provider for these services shall be made by the payer in consultation with the treating or prescribing physician.

No party, in attempting to negotiate a repricing or other post treatment price reduction agreement, shall state or imply that consent to such an agreement is mandatory, or that the failure to enter into any such agreement may result in audit, delay of payment, or other adverse consequence. If the Commission determines that any party, or other person in privity therewith, has made such false or misleading statements in an effort to coerce another party's consent to a repricing or other price reduction agreement outside the Fee Schedule, the Commission may refer the matter to the appropriate authorities to consider whether such conduct warrants criminal prosecution under §71-3-69 of the Law.

C. Physical Medical Assessment

1. An assessment must be performed to determine if a patient will benefit from therapeutic services.
2. When a physician examines a patient and an assessment for therapeutic services is performed, the billing for the office visit includes the therapeutic assessment.
3. Procedure code 97001 is to be used for an initial assessment by physical therapists. Code 97002 is to be used for re-evaluation of a patient by physical therapists. Procedure code 97003 is to be used for an initial assessment by occupational therapists. Code 97004 is to be used for re-evaluation of a patient by occupational therapists. ~~A procedure code 92506~~ from 92521-92523 is to be used for initial assessment by a speech pathologist.

D. Plan of Care

1. An initial plan of care must be developed and filed with the payer regardless of whether therapy is provided by a physician or practicing therapist. The content of the plan of care, at a minimum, should contain:
 - a. The specific therapies to be provided, including the frequency and duration of each
 - b. The estimated duration of the therapeutic regimen
 - c. The potential degree of restoration and measurable goals (e.g., potential restoration is good, poor, low, guarded)
2. The initial plan of care must be signed by the treating physician and submitted to the payer within fourteen (14) days of approval. Physicians are required to sign the plan of care for physical and/or occupational therapy. The physician's signature indicates approval of the therapy the patient is receiving and for the length of time established for the therapy.
3. The physician has the responsibility of providing documentation of medical necessity to the payer whenever there are questions regarding the extent of therapy being provided or the appropriateness of the therapy regimen.
4. A plan of care must be updated at least every thirty (30) days and submitted to the payer.
5. Preparation of a care plan does not warrant a separate fee.

E. Qualifications for Reimbursement

1. The patient's condition must have the potential for restoration of function.
2. The treatment must be prescribed by the authorized attending or treating physician.
3. The treatment must be specific to the injury and have the potential to improve the patient's condition.
4. The physician or therapist must be on-site during the provision of services.

II. REIMBURSEMENT

A. Guidelines

1. Visits for therapy may not exceed one visit per day without prior approval from the payer.
2. Therapy exceeding fifteen (15) visits or thirty (30) days, whichever comes first, must have prior authorization from the payer for continuing care. It must meet the following guidelines:
 - a. The treatment must be medically necessary.

- b. Prior authorization may be made by telephone. Documentation should be made in the patient's medical record indicating the date and name of the payer representative giving authorization for the continued therapy.
3. Reimbursement is limited to no more than four (4) therapies concurrently at the same visit. In the event of multiple treatment areas, an additional four (4) therapies per treatment day may be allowed at the payer's discretion and with pre-authorization. In the event of multiple treatment areas, the second and subsequent areas are subject to the multiple procedure rule.
4. Payment for 97010, which reports application of hot or cold packs, is bundled into payment for other services. Separate reimbursement for hot and cold packs will **not** be allowed in the treatment of work-related injury/illness.
- ~~5. No more than four (4) 15-minute procedures and/or modalities will be reimbursed at each encounter without prior authorization.~~
6. Only one (1) work hardening or work conditioning program is reimbursed per injury.
7. The Physical Therapist Assistant or Occupational Therapist Assistant shall be reimbursed at eighty-five percent (85%) of the maximum allowable for the procedure. Mississippi modifier "M3" should be attached to the appropriate CPT® code(s) when billing services rendered by a Physical Therapist Assistant or an Occupational Therapist Assistant.
8. NCCI edits or other bundle/unbundle edits do not apply to the CPT codes in the Therapeutic Services section, other than the stated rules provided in this section.

B. Treatment Areas

1. Spinal areas are recognized as the following five distinct regions:
 - Cranial
 - Cervical
 - Thoracic
 - Lumbar
 - SacralTransitional areas of the spine are not recognized as distinctly different areas (e.g., cervicothoracic, lumbosacral).
2. Pelvis
3. Upper extremity (either left or right) is recognized as the following six distinct regions:
 - Shoulder
 - Upper arm
 - Elbow
 - Forearm
 - Wrist
 - Hand
4. Lower extremity (either left or right) is recognized as the following eight distinct regions:
 - Hip
 - Thigh
 - Knee
 - Calf
 - Ankle
 - Foot
5. Rib cage
6. Anterior trunk

C. Tests and Measurements

1. When two or more procedures from 95831 through 95852 are performed on the same day, reimbursement may not exceed the lesser of the billed amount or the maximum reimbursement allowance (MRA) for procedure code 95834 Total evaluation of body, including hands.
2. Functional capacity evaluation (FCE) must have pre-authorization from the payer before scheduling the tests.
3. Reimbursement for extremity testing, muscle testing, and range of motion measurements (95831, 95832, 95833, 95834, 95851, 95852) will not be made more than once in a thirty (30) day period for the same body area.

D. Fabrication of Orthotics

1. Procedure code 97760 must be billed for the professional services of a physician or therapist to fabricate orthotics.
2. Orthotics, prosthetics, and related supplies used may be billed under the appropriate HCPCS code. The maximum reimbursement allowance is listed in the Durable Medical Equipment (DME), Orthotics, Prosthetics and Other HCPCS Codes section of the Fee Schedule. For orthotics and supplies not listed in the DME section, use CPT code 99070. Reimbursement may not exceed a twenty percent (20%) mark-up of the provider's cost and an invoice may be required by the payer before reimbursement is made for items without an allowable amount in the Fee Schedule.

E. Re-evaluation of an Established Patient

A physician, physical therapist, occupational therapist, or speech therapist may charge and be reimbursed for a re-evaluation for therapeutic services only if new symptoms present the need for re-examination and evaluation as follows:

1. There is a definitive change in the patient's condition
2. The patient fails to respond to treatment and there is a need to change the treatment plan
3. The patient has completed the therapy regimen and is ready to receive discharge instructions

III. WORK HARDENING RULES

~~Refer to the Utilization Review Rules section for specific requirements related to work hardening.~~

A. Work Hardening Program Guidelines

1. Work hardening is an interdisciplinary, individualized, job or goal-specific program of activity with the goal of returning an injured patient to work. Work hardening programs use real or simulated work tasks and progressively graded conditioning exercises that are based on the individual's measured tolerances. Work hardening provides a transition between acute care and successful return to work and is designed to improve the bio-mechanical, neuromuscular, and cardiovascular functioning of the worker. Approval or certification must be based on whether the proposed work hardening program appears reasonably tailored to accomplish the stated goals.
 - a. A work hardening program must, at a minimum, have the following components:
 - Development of strength and endurance of the individual in relation to the return to work goal;
 - Equipment and methods that quantify and measure strength and conditioning levels, i.e., ergometers, dynamometers, treadmills, measured walking tolerances;
 - Commercial strength and exercise devices, free weights, and circuit training. Goals for each worker are dependent on the demands of their respective jobs;
 - Simulation of the critical work demands, the tasks, and the environment of the job to which the worker will return. Job simulation tasks that provide for progression in frequency, load, and duration are essential. They must be related to the work goal and include a variety of work stations that offer opportunities to practice work related positions and motions, i.e., clerical, plumbing, electrical;
 - Education that stresses body mechanics, work pacing, safety and injury prevention, and that promotes worker responsibility and self-management. The education component requires direct therapist and worker interaction;
 - Assessment of the need for job modifications. Focus on whether the worker can return to the stated job goal but only with changes, i.e., added equipment, changes in work position or ergonomics, changes at the work site;
 - An individualized written plan that identifies observable and measurable goals, the methodology being used to reach these goals, the projected time necessary to accomplish the goal, and the expected outcomes. This plan must be signed by both the provider and the patient;
 - This plan needs to be based on a functional capacity (baseline) evaluation and must be completed within the first two (2) days of the program and compared to the critical demands as stated on the job analysis. A comparative analysis (re-evaluation) is done prior to discharge to determine job readiness;
 - A reporting system that includes:
 - Documentation of the initial plan;
 - Documentation of progress or lack of progress and future goals;
 - A discharge summary that includes an assessment of the functional capacity level and the achievement of the individual's program goals;
 - A record of the worker's daily attendance including number of days and number of hours per day in the program.
2. Criteria for admission:
 - a. The worker must have reached a point in his or her recovery where no further active or invasive treatment intervention is being anticipated;
 - b. Physical recovery sufficient to allow participation for a minimum of four (4) hours a day for three to five days a week;
 - c. Worker's current levels of functioning interfere with his/her ability to carry out specific tasks required in the work place;
 - d. A defined return to work goal which includes:
 - A documented specific job to which the patient can return, along with a specific job analysis; and
 - A return to work goal agreed to by the employer and the patient/employee;
 - The facts must show how the worker must be able to benefit from the program;
 - The facts must show the worker is motivated to return to work. A worker whose primary limitation is psychological or clouded by significant illness behavior (i.e., significant self-imitation on F.C.E.) is typically not going to be motivated and will not likely benefit.

3. Criteria for discharge from a work hardening program:

- The worker has reached the goal stated in the plan;
- The worker has not progressed according to the program plan;
- The worker has not reached interim goals and is not benefitting from the program; or,
- Number of absences exceeds those allowed by the program (a maximum of two (2) absences is recommended);
- Worker does not adhere to the schedule;
- Completion of the program (the program should take two (2) to four (4) weeks to complete);
- The previously identified job is no longer available.

B. Massage therapy requires prior authorization of the payer before treatment can be rendered. Medical necessity must be established prior to approval. Reimbursement must be arranged between the payer and provider.

C. Fees:

1. In all cases, for both voluntary and non-voluntary discharge, payment is for the actual duration of treatment provided.
2. CPT code 97545 (initial two (2) hours) and code 97546 (each additional hour) are to be used to bill work hardening. CPT code 97545 is to be billed for the initial two (2) hours of the work hardening program. This is a one-time charge. CPT code 97546 is to be used for billing each additional hour of the work hardening program after the initial two (2) hours (indicated by code 97545).

IV. FUNCTIONAL CAPACITY EVALUATIONS

A. The functional capacity evaluation (FCE) is utilized for the following purposes:

1. To determine the highest level of safe functionality and of maximal medical improvement.
2. To provide a pre-vocational baseline of functional capabilities to assist in the vocational rehabilitation process.
3. To objectively set restrictions and guidelines for return to work.
4. To determine whether specific job tasks can be safely performed by modification of technique, equipment, or by further training.
5. To determine whether additional treatment or referral to a work hardening program is indicated.
6. To assess outcome at the conclusion of a work hardening program.

B. General Requirements

1. The FCE may be prescribed only by a licensed physician, or may be required by the payer when indicated.
2. The FCE requires prior authorization by the payer.

C. The FCE should be billed using code 97750 Physical performance test or measurement (e.g., musculoskeletal, functional capacity), with written report, each fifteen (15) minutes. Reimbursement of an FCE is limited to a maximum of twenty (20) units. Documentation must include start and stop times for testing.

V. TENS UNITS

A. TENS (transcutaneous electrical nerve stimulation) must be provided under the attending or treating physician's prescription.

B. Authorization from the payer must be sought before purchase or rental arrangements are made for a TENS unit. The payer has sole right of selection of vendors for rental or purchase of equipment, supplies, etc.

VI. SUPPLIES, EQUIPMENT, ORTHOTICS, AND PROSTHETICS

A. Physicians and therapists must obtain authorization from the payer before purchase/rental of supplies, equipment, orthotics, and prosthetics costing more than three hundred dollars (\$300.00) per item for workers' compensation patients. When submitting bills, include the appropriate HCPCS [Level II](#) code. If there is not an appropriate HCPCS code, use CPT code 99070.

B. The payer has sole right of selection of vendors.

VII. OTHER INSTRUCTIONS

A. Charges will not be reimbursed for publications, books, or digital media unless prior approval of the payer is obtained.

B. All charges for services must be clearly itemized by CPT code, and the state professional license number must be on the bill.

- C. The treating physician must approve and sign all physical capability/restriction forms for the work-related injury/illness. This form must be submitted to the payer within fourteen (14) working days of the release to work.
- D. Documentation may be required by the payer to substantiate the necessity for treatment rendered. Documentation to substantiate charges and reports of tests and measurements are included in the fee for the service and do not warrant additional reimbursement.
- E. When patients do not show measurable progress, the payer may request the physician discontinue the treatment or provide documentation to substantiate medical necessity.
- F. When physical medicine therapies are provided to more than one body area, modifier 51 must be added to the procedure code or codes billed for the additional body area and will be reimbursed according to the multiple procedure rule.
- G. Non-surgical debridement should be billed as CPT code 97597, 97598, or 97602.

VIII. BACK SCHOOLS

Back schools are no longer covered services under this Fee Schedule.

IX. MESSAGE THERAPY

Message therapy requires prior authorization of the payer before treatment can be rendered. Medical necessity must be established prior to approval. Reimbursement must be arranged between the payer and provider.

X. CHIROPRACTIC MANIPULATIVE TREATMENT

Chiropractic manipulative treatments are allowed for up to fifteen (15) visits or thirty (30) days, whichever first occurs, without any need to seek pre-certification or authorization. However, chiropractic manipulative treatments which are proposed beyond the first fifteen (15) visits or thirty (30) days, under any circumstance, must be pre-certified or pre-approved.

Like any other service, a spinal manipulation includes pre-evaluation and post-evaluation that would make it inappropriate to bill with an E/M service. However, if the patient's condition has deteriorated or an injury to another site has occurred, reimbursement can be made for an E/M service if documentation substantiates the additional service. Modifier 25 is added to an E/M service when a significant, separately identifiable E/M service is provided and documented as medically necessary.

XI. ELECTROMYOGRAM (EMG) AND NERVE CONDUCTION STUDY (NCS)

- A. Only a licensed ~~physical~~ ~~physician~~ ~~certified in Neurology/PMR/Electrodiagnostic~~ medicine ~~doctor or a neurologist~~ is entitled to reimbursement for performing an electromyogram (EMG) and/or a nerve conduction study (NCS).
- B. Reimbursement is not allowed under this Fee Schedule for automated nerve conduction studies.
- C. Referral for an electromyogram and/or a nerve conduction study shall be at the discretion and direction of the physician in charge of care, and neither the payer nor the payer's agent may unilaterally or arbitrarily redirect the patient to another provider for these tests. The payer or the payer's agent may, however, discuss with the physician in charge of care appropriate providers for the conduct of these tests in an effort to reach an agreement with the physician in charge as to who will conduct an electromyogram and/or nerve conduction study in any given case.

XII. CHRONIC PAIN—INTER-DISCIPLINARY PAIN REHABILITATION PROGRAM

- A. The Inter-Disciplinary Pain Rehabilitation (IDPR) program is based on the bio-psychosocial approach to managing chronic pain, and uses both physical medicine treatments as well as psychological treatments and therapy to manage the chronic pain patient. A goal oriented, team approach is used in an effort to reduce pain, improve functioning, and decrease the dependence on the health care system of persons with chronic pain. This is an outpatient program.
- B. Pre-authorization is required in order to utilize an inter-disciplinary pain rehabilitation program to treat the chronic pain patient. A specific IDPR program plan must be submitted to the payer as part of the pre-authorization process.
- C. The following guidelines shall be used to assist in pre-authorization, and concurrent review:
 - 1. Persons considered suitable candidates for an inter-disciplinary pain rehabilitation program are those:
 - a. Who are likely to benefit from the program design;

- b. Whose symptoms are deemed by a pain management provider to constitute chronic pain syndrome; and
 - c. Whose medical, psychological, or other conditions do not prohibit participation in this program.
2. Mental Health Evaluation: an initial evaluation to determine the injured worker's readiness or suitability for this type of treatment may be performed prior to initiation of treatment. This evaluation is not considered part of the IDPR program and shall be billed separately.
 3. Due to the nature of intensity of the program, both group and individual therapy may be part of the IDPR program. If the program plan for a particular patient includes individual psychotherapy, it shall be billed as part of the program, and not separately. If the program does not include psychotherapy services, such services may be billed separately, if used, subject to applicable pre-authorization requirements.
 4. Psychological treatments which are part of the IDPR program may be rendered by a psychiatrist, psychologist, licensed counselor, or licensed social worker.
 5. The IDPR program shall always include a component designed to reduce the patient's dependence on and/or addiction to pain medications.
 6. An individual plan of treatment shall be supervised by a medical doctor within a therapeutic environment. Although some time is spent with a doctor on a one-to-one basis, more than fifty percent (50%) of the time may be spent in direct care under the supervision of the physical therapist, occupational therapist, mental health provider, or other licensed member of the IDPR team.
 7. Program supervision shall be provided by a medical doctor who is trained and experienced in the treatment of patients with chronic pain syndrome. The program supervisor shall:
 - a. Provide direct, on-site supervision of the daily pain management activities;
 - b. Participate in the initial and final evaluation of the patient;
 - c. Write the treatment plan for the patient, and write changes to the plan based on the patient's documented response to the treatment and/or based on documented changes in the patient's condition;
 - d. Direct the members of the IDPR team and review the patient's progress on a regular and consistent basis, at least bi-weekly.
 8. Participation in an IDPR program requires a minimum attendance of four (4) hours per day during the first week. The program shall not exceed eight (8) hours per day, except that workers who actually have experience working in a job for more than eight (8) hours per day may be allowed to participate for up to ten (10) hours per day, at the discretion of the program supervisor
 9. Daily treatment and patient response shall be documented and provided to the payer at least every two (2) weeks.
 10. Discharged/exit criteria shall include but not be limited to:
 - a. The appropriate use of medications;
 - b. Decreased intensity of subjective pain;
 - c. Increased ability of the injured worker to manage pain;
 - d. Reduced health care use related to the chronic pain;
 - e. Return to work; and/or
 - f. Non-compliance with the program, or failure to obtain meaningful benefit after a reasonable period of time.
- D. Billing. The IDPR program shall be billed using CPT 97799 Unlisted physical medicine/rehabilitation service or procedure, and appended with modifier M5 to indicate chronic pain treatment. The total number of hours shall be indicated in the units column of the bill, or in some other conspicuous place on the bill. CARF accredited providers shall also add M4 as an additional modifier.
- E. Reimbursement. Reimbursement shall be as agreed to by the parties, or a maximum of one hundred ~~twenty-five~~ dollars (\$~~125~~100.00) per hour for CARF accredited providers. Providers without CARF accreditation shall be paid eighty percent (80%) of the maximum reimbursement allowance for CARF accredited providers. Units of less than one hour shall be prorated in fifteen (15) minute increments. A single fifteen (15) minute increment shall be reimbursed if the time is equal to or greater than eight (8) minutes and less than twenty-three (23) minutes.

XIII. EXPERIMENTAL OR INVESTIGATIONAL PROCEDURES

Certain procedures or treatments, such as VAX-D therapy, are considered investigational or experimental for purposes of this Fee Schedule, and are not approved for reimbursement.

XIV. MODIFIERS

Modifiers augment CPT codes to more accurately describe the circumstances of services provided. When applicable, the circumstances should be identified by a modifier code: a two-digit number placed after the usual procedure code, separated by a hyphen. If more than one modifier is needed, place the multiple modifiers code 99 after the procedure code to indicate that two or more modifiers will follow. Modifiers commonly used with therapeutic services are as follows.

22 Increased Procedural Services

When the work required to provide a service is substantially greater than typically required, it may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the

additional work (ie, increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Note:** This modifier should not be appended to an E/M service.

Mississippi guideline: By definition, this modifier would be used in unusual circumstances only. Use of this modifier does not guarantee additional reimbursement. When appropriate, the Fee Schedule reimbursement for modifier 22 is one hundred twenty percent (120%) of the maximum reimbursement allowance.

24 Unrelated Evaluation and Management Services by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period

The physician or other qualified health care professional may need to indicate that an evaluation and management service was performed during a postoperative period for a reason(s) unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E/M service.

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

32 Mandated Services

Services related to *mandated* consultation and/or related services (eg, third-party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 32 to the basic procedure.

51 Multiple Procedures

When multiple procedures, other than E/M Services, Physical Medicine and Rehabilitation services, or provision of supplies (eg, vaccines), are performed at the same session by the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated "add-on" codes (see Appendix D).

Mississippi guideline: This modifier should not be appended to designated "modifier 51 exempt" codes as specified in the Fee Schedule.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC hospital outpatient use).

99 Multiple Modifiers

Under certain circumstances 2 or more modifiers may be necessary to completely delineate a service. In such situations, modifier 99 should be added to the basic procedure and other applicable modifiers may be listed as part of the description of the service.

M3 Physical or Occupational Therapist Assistant (Mississippi Modifier)

This modifier should be added to the appropriate CPT code to indicate that the services being billed were rendered or provided by either a physical therapist assistant or an occupational therapist assistant.

M4 CARF Accredited (Mississippi Modifier)

This modifier should be used in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered by a CARF accredited provider as part of a pre-approved interdisciplinary pain rehabilitation program.

M5 Chronic Pain Treatment (Mississippi Modifier)

This modifier should be used only in conjunction with CPT code 97799 Unlisted physical medicine/rehabilitation service or procedure, to indicate chronic pain treatment being administered as part of a pre-approved interdisciplinary pain rehabilitation program.

Dental

Current Dental Terminology (CDT), codes D0120–D9999, are developed, maintained, and copyrighted by the American Dental Association (ADA). CDT is updated annually. The current edition is *CDT 2013~~6~~*, which is used in this Fee Schedule.

Decisions regarding the modification, deletion, or addition of CDT codes are made by the ADA and its Code Maintenance Committee.

Billing for dental services should be submitted on the ADA Dental Claim Form.

Durable Medical Equipment (DME), Orthotics, Prosthetics and Other HCPCS Codes

I. DEFINITION

HCPCS is an acronym for CMS's Healthcare Common Procedural Coding System. It is divided into two subsets. HCPCS Level I codes are CPT codes developed and maintained by the AMA. HCPCS Level II codes are developed and maintained by CMS and include codes for procedures, equipment, and supplies not found in the CPT book. This section of the Fee Schedule contains HCPCS Level II codes. (See the Dental section for dental codes.) HCPCS Level II codes that are excluded from the Fee Schedule are Alcohol/Drug Abuse Treatment Services (H0001–H2037), and National Codes for State Medicaid Agencies (T1000–T5999). Code categories included in this section are as follows:

Transportation Services Including Ambulance	A0021–A0999
Medical/Surgical Supplies	A4206–A8004
Administrative, Misc., and Investigational	A9150–A9999
Enteral and Parenteral Therapy	B4000–B9999
Outpatient PPS	C1300–C9899
Durable Medical Equipment (DME)	E0100–E9999
Procedures/Professional Services (Temporary)	G0008–G9186
Drugs and Biologicals	J0120–J9999
K Codes (Temporary)	K0001–K9999
Orthotic Procedures	L0000–L4999
Prosthetic Procedures	L5000–L9999
Medical Services	M0000–M0301
Pathology and Laboratory Services	P0000–P9999
Q Codes (Temporary)	Q0035–Q9980
Diagnostic Radiology Services	R0000–R5999
Temporary National Codes (Non-Medicare)	S0000–S9999
Vision Services	V0000–V2999
Hearing Services	V5000–V5999

II. GUIDELINES

A. Transportation Services Including Ambulance (A0021–A0999)

1. Transportation service codes include ground and air ambulance, non-emergency transportation (taxi, bus, automobile, wheelchair van), and ancillary transportation-related fees.
2. No exemption for air ambulance according to the Airline Deregulation Act (ADA) is allowed based on the rules and regulations of the current 2016 MWCC Fee Schedule.

23. Modifiers are required when reporting transportation services. Modifiers are single digits used to identify origin and destination. The first modifier identifies the transport place of origin and the second modifier the destination. Origin and destination modifiers are as follows:

- D** Diagnostic or therapeutic site other than "P" or "H" when these are used as origin codes
- E** Residential, domiciliary, custodial facility (other than 1819 facility)
- G** Hospital-based ESRD facility
- H** Hospital
- I** Site of transfer (e.g., airport or helicopter pad) between modes of ambulance transport
- J** Free-standing ESRD facility
- N** Skilled nursing facility (SNF)
- P** Physician's office
- R** Residence
- S** Scene of accident or acute event
- X** Intermediate stop at physician's office on way to hospital (includes HMO non-hospital facility, clinic, etc. destination code only).

Note: Modifier X can only be used as a destination code in the second position of a modifier.

34. Transportation codes can also be found in the S codes. See S0207, S0208, S0209, and S0215.

B. Medical and Surgical Supplies (A4206–A8004)

1. These A codes include a wide variety of medical, surgical, and some DME related supplies and services.
2. For rules related to DME supplies, accessories, maintenance, and repair, see F. Durable Medical Equipment below.

C. Administrative, Miscellaneous, and Investigational (A9150–A9999)

1. These A codes include non-prescription drugs, exercise equipment, radiopharmaceutical diagnostic imaging agents, as well as other miscellaneous supplies.

D. Enteral and Parenteral Therapy (B4000–B9999)

1. B codes include supplies, formulae, nutrition solutions and infusion pumps.

E. Outpatient PPS (C1300–C9899)

1. C codes include drugs, biologicals, and devices used by hospitals.

Non-OPPS hospitals, Critical Access Hospitals (CAHs), Indian Health Services Hospitals (IHS), hospitals located in American Samoa, Guam, Saipan, or the Virgin Islands, and Maryland waiver hospitals may report these codes at their discretion.

2. These codes are only used for facility (technical) services.

F. Durable Medical Equipment (DME) (E0100–E8002)

1. E codes include durable medical equipment such as canes, crutches, walkers, commodes, decubitus care, bath and toilet aids, hospital beds, oxygen and related respiratory equipment, monitoring equipment, pacemakers, patient lifts, safety equipment, restraints, traction equipment, fracture frames, wheelchairs, and artificial kidney machines.
2. All durable medical equipment shall have prior authorization from the payer before obtaining the equipment. The payer has the choice of vendor for purchase or rental of DME.
3. If an injured/ill employee is receiving DME items for both compensable and non-compensable medical conditions, only those items that apply to the work related injury should be listed on claims and invoices submitted to the employer.
4. If the rental price for DME exceeds or equals the total purchase price, the employer shall purchase instead of renting equipment. The vendor shall make the payer aware of the price options.

5. When rental payments total the purchase price, the equipment is considered purchased and no additional reimbursement is made.

56. The return of rented equipment is the dual responsibility of the injured worker and the DME supplier. The employer is not responsible for additional rental periods solely due to delay in equipment return.

7. For codes E0676, E0935, and E0936 the Amount listed is per day.

G. Procedures/Professional Services (Temporary) (G0008–G9186)

1. G codes identify professional health care procedures and services that would otherwise be reported using CPT codes.
2. Procedures and professional services identified by G codes may have a corresponding CPT code. When both a G code and CPT code describe the same procedure, the CPT code is required for reporting purposes.
3. G codes also include procedures and professional services that do not currently have a valid CPT code. In such cases, the applicable G code should be used for reporting purposes.

H. Drugs and Biologicals (J0120–J9999)

1. J codes include drugs that ordinarily cannot be self-administered, chemotherapy drugs, immunosuppressive drugs, inhalation solutions, and other miscellaneous drugs and solutions.
2. These codes report only the costs associated with provision of the drug. Administration including injection, infusion, or inhalation is reported separately using the applicable CPT code(s).
3. Additional codes for drugs and biologicals may be found in the Q codes and S codes.

I. Temporary Codes (K0001–K9999)

1. K codes are temporary codes used to report durable medical equipment that do not yet have a permanent national code.
2. For rules related to DME supplies, accessories, maintenance, and repair, see F. Durable Medical Equipment above.

J. Orthotic Procedures and Devices (L0000–L4999) and Prosthetic Procedures (L5000–L9900)

1. L codes include orthotic and prosthetic procedures and devices as well as scoliosis equipment, orthopedic shoes, and prosthetic implants.
2. The payer shall only pay for orthotics and prosthetics prescribed by the treating physician for a compensable injury/illness. Prior authorization must be obtained from the payer.

K. Medical Services (M0000–M0301)

1. M codes include office services, cellular therapy, prolotherapy, intragastric hypothermia, IV chelation therapy, and fabric wrapping of an abdominal aneurysm.
2. These codes are rarely reported and may not be reimbursed as they represent services for which the therapeutic efficacy has not been established, the procedure is considered experimental, or the procedure has been replaced with a more effective treatment modality.

L. Pathology and Laboratory Services (P0000–P9999)

1. P codes include chemistry, toxicology, and microbiology tests, screening Papanicolaou procedures, and various blood products.
2. Blood and blood product codes report the supply of the blood or blood product only.
3. The administration of blood or blood product is reported separately.
4. Code 36430 for transfusion of blood or blood components is reported only once per encounter regardless of the number of units provided.

M. Temporary Codes (Q0035–Q9980)

1. Q codes include temporary codes developed for reporting services and supplies that do not have a permanent national HCPCS code or CPT code. Included in this section are codes for:
 - a. Oral anti-emetic drugs
 - b. Casting supplies
 - c. Splint supplies
 - d. Low osmolar contrast
 - e. High osmolar contrast
 - f. Other supplies/services
2. Cast supplies and splints should be reported with the appropriate code from Q4001–Q4051. These codes report the cost of the supply only.
3. Cast supplies and splints are reported in addition to the CPT code for fracture management.
4. Cast supplies and splints are reported in addition to CPT codes for application of the cast or splint.
5. Refer to the CPT guidelines for rules related to reporting fracture management and cast application.

N. Diagnostic Radiology Services (R0000–R5999)

1. R codes are used for the transportation of portable x-ray and/or EKG equipment.
2. Only a single reasonable transportation charge is allowed for each trip to a single location.
3. When more than one patient receives x-ray or EKG services at the same location, the allowable transport charge is divided among all patients.

O. Temporary National Codes (Non-Medicare) (S0000–S9999)

1. The S codes are used by the private sector to report drugs, services, and supplies for which there are no national codes, but for which codes are needed by the private sector to implement policies, program, or claims processing.
2. See J codes for reporting rules related to drugs and biologicals.

P. Vision Services (V0000–V2999)

1. These V codes include vision-related supplies, including spectacles, lenses, contact lenses, prostheses, intraocular lenses, and miscellaneous lenses.

Q. Hearing Services (V5000-V5999)

1. These V codes include hearing tests and related supplies and equipment, speech-language pathology screenings, and repair of augmentative communicative systems.

R. The Facility Fee for outpatient services is the APC Amount.

III. MODIFIERS

HCPCS ~~Level II~~ modifiers are required for some supplies and services. Commonly reported HCPCS ~~Level II~~ modifiers include:

AU Item Furnished in Conjunction with a Urological, Ostomy, or Tracheostomy Supply

AV Item Furnished in Conjunction with a Prosthetic Device, Prosthetic, or Orthotic

AW Item Furnished in Conjunction with a Surgical Dressing

KC Replacement of Special Power Wheelchair Interface

NU New Equipment

RR Rental (use the RR modifier when DME is to be rented)

Mississippi guideline: Listed amount is the per-month allowance, except codes E0935, E0936, and E0675 which are per-day allowances.

UE Used durable medical equipment

Mississippi guideline: Used to report the purchase of used durable medical equipment.

Inpatient Hospital and Outpatient Facility Payment Schedule and Rules

I. INPATIENT AND OUTPATIENT CARE RULES

- A. **Definition.** For purposes of this schedule, “inpatient” means being admitted to a hospital setting for twenty-four (24) hours or more. An inpatient admission does not require official admission to the hospital.

B. Health care facilities providing services to workers' compensation claimants must meet requirements of the state of Mississippi.

BC. Billing and Reimbursement Rules for Inpatient Care.

1. Facilities must submit the bill for inpatient services within thirty (30) days after discharge. For those cases involving extended hospitalization, interim bills must be submitted every thirty (30) days.
2. Reimbursement for acute inpatient hospital services shall be the maximum reimbursement allowance fixed by the rules set forth in this section of the Fee Schedule, regardless of the total charge.
3. Non-covered charges include but are not necessarily limited to:
 - a. Convenience items;
 - b. Charges for services not related to the work injury/illness;
 - c. Services that were not certified by the payer or their representative as medically necessary.
4. When reviewing surgical claims, including for outlier consideration, the following apply:
 - a. Most operative procedures require cardiopulmonary monitoring either by the physician performing the procedure or an anesthesiologist/anesthetist. Because these services are integral to the operating room environment, they are considered as part of the OR fee and are not separately reimbursed, nor are they included separately in the total charge for outlier consideration:
 - Cardiac monitors
 - Oximetry
 - Blood pressure monitor
 - Lasers
 - Microscopes
 - Video equipment
 - Set up fees
 - Additional OR staff
 - Gowns
 - Gloves
 - Drapes
 - Towels
 - Mayo stand covers
 - On-call or call-back fees
 - After-hours fees
 - b. Billing for surgery packs as well as individual items in the packs is not allowed and shall not be included in the total charge for outlier consideration.
 - c. A majority of invasive procedures requires availability of vascular and/or airway access; therefore, the work associated with obtaining this access is included in the cost of the service, i.e., anesthesia—airway access is associated with general anesthesia and is included in the anesthesia charges.
 - d. Recovery room and ICU rates include the charge for cardiac monitoring and oximeter. It is assumed the patient is placed in these special areas for monitoring and specialized care which is bundled into the special care rate. Call-back fees are not reimbursed for recovery room.
 - e. Separate reimbursement is not allowed for setting up portable equipment at the patient's bedside.
 - f. The following items do not qualify for separate reimbursement regardless of inpatient or outpatient status, and are not included in the total charge for outlier consideration:

- Applicators, cotton balls, band-aides
 - Syringes
 - Aspirin
 - Thermometers, blood pressure apparatus
 - Water pitchers
 - Alcohol preps
 - Ice bags
- g. Separate reimbursement is not allowed for equipment such as compressive devices, or other equipment used during the operative or immediate postoperative period.
5. Maximum reimbursement is set for the following line item charges.
- a. IV pump/daily – \$50.00
 - b. Venipuncture reimbursement is limited to \$4.25 per collection. A collection fee is not appropriate for finger stick, throat culture, or stool specimen collection
 - c. Pharmacy add-mixture/dispensing fee is limited to \$4.50 per mixture

CD. Implants, Durable Medical Equipment, and Supplies. Generally, durable medical equipment and supplies provided or administered in a hospital setting are not separately reimbursed since they are included in the payment reimbursement.

Unless otherwise specifically provided herein, implantables used in the inpatient setting are included in the applicable MS-DRG reimbursement for inpatient treatment, and, therefore, the provider of inpatient services is not required to furnish the payer with an invoice for implantables.

Implantables used in the outpatient setting, are included in the applicable APC payment for outpatient services, and therefore, the provider of outpatient services is not required to furnish the payer with an invoice for implantables.

DE. Reimbursement Methodology. The inpatient maximum reimbursement allowable (MRA) totals are provided by MS-DRG in this Fee Schedule. As of the effective date of this publication, the MS-DRG MRA is based upon the 2013³⁶ CMS relative weights multiplied by the base rate as determined herein. (This methodology includes inpatient psychiatric admissions, and Long Term Acute Care (LTAC). Any MS-DRGs outside of this Fee Schedule shall be reimbursed at seventy-five percent (75%) of charges. The lesser of the billed charges or the MS-DRG MRAs represent payment in full, unless the outlier payment is applicable, or unless a contract between the payer and provider governs reimbursement, or unless otherwise specifically stated in this Fee Schedule.

1. MS-DRG Payment is calculated by multiplying the Base Rate times the Relative Weight for the MS-DRG.
2. The Base Rate for Mississippi is the current National Medicare Base Rate in effect as of the date of discharge, multiplied by two (2). This is posted annually on the Mississippi Workers' Compensation Commission (MWCC) website, Fee Schedule section.
3. Common Medicare add-ons, such as for teaching hospitals (GME), DSH and Capital PPS, will not be allowed, and shall be considered as already included in the enhanced MS-DRG Payment under this Fee Schedule.
4. All implantables shall be included in the applicable MS-DRG reimbursement for inpatient treatment, and shall not be reimbursed separately in addition to the MS-DRG payment.
5. Outlier Payments. To provide additional reimbursement for cases where the MS-DRG payment is deemed inadequate by the Commission to cover the costs incurred by the facility, the Commission has established an outlier payment for high-cost cases.

The amount eligible for outlier reimbursement is equal to Total Charges minus MS-DRG Payment minus Implantable Charges minus Non-Covered or Non-Qualified charges (as provided in Part I.B. above) minus the Outlier Threshold. The Outlier Threshold amount shall be specific to each facility and shall be equal to one-half (1/2) of the Medicare MS-DRG outlier threshold in effect for each facility at the time of discharge.
6. Any amount determined to be eligible for additional outlier reimbursement shall be reimbursed at fifteen percent (15%) above the facility's cost for the outlier eligible charges. Cost is determined using the facility's cost-to-charge ratio, as determined by Medicare (CMS), which is in effect at the time of discharge. These cost-to-charge ratios are posted annually on the MWCC website, Fee Schedule section. Outlier payment is figured by multiplying the eligible outlier amount by the cost-to-charge ratio, and then adding fifteen percent (15%) to compute the additional outlier payment due.

EF. Emergency Room Services. Emergency room facility fees, supplies, and treatment are reimbursed according to the Ambulatory Payment Classification system, as set forth herein under the heading "Ambulatory Surgery Center/Outpatient Facility Reimbursement." Laboratory and radiology services are reimbursed at the technical amount ~~calculated from the data~~ listed in the corresponding section of this Fee Schedule. ~~The technical amount is calculated by subtracting the PC Amount from the Amount.~~ Physician services are to be billed on an appropriate CMS claim form, or electronic submission and paid according to the proper section.

FG. Observation Services

1. **Definition.** Observation services are those services furnished by a hospital on the hospital's premises, and include use of a bed and periodic monitoring by a hospital's staff. The service must be reasonable and necessary to evaluate a patient's condition or to

determine need for inpatient admission. To qualify for observation status, the patient needs observation due to an unforeseen circumstance or has a medical condition with a significant degree of instability.

2. General Guidelines

- a. Observation begins when the patient monitoring begins and ends when the order for discharge is written or given verbally by the physician.
- b. On rare occasions, an observation stay may be extended to forty-eight (48) hours. In such cases, medical necessity must be established and pre-authorization must be given for payment by the payer.
- c. Services which are NOT considered necessary for observation are as follows:
 - (1) Services that are not reasonable and necessary for the diagnosis and treatment of the work related injury, but are provided for convenience of the patient, family, or physician
 - (2) Any substitution of an outpatient observation for a medically appropriate inpatient admission
 - (3) Services ordered as inpatient by the physician but billed as outpatient by the facility
 - (4) Standing orders for observation following outpatient surgery
 - (5) Test preparation for a surgical procedure
 - (6) Continued care of a patient who has had a significant procedure as identified with OPPS indicator S or T
- d. Observation is not reimbursable for routine preparation furnished prior to an outpatient service or recovery after an outpatient service. Please refer to the criteria for observation services.

3. Billing and Reimbursement

- a. Observation status is billed at an hourly monitoring rate. The hourly rate is all inclusive with the exception of *non-significant ancillary services*.
- b. Observation is billed at the rate of \$300.00 for the first three (3) hours and \$80.00 per hour thereafter. Laboratory and radiology are reimbursed according to the Fee Schedule payment limits.
- c. Revenue code 762 is used to bill observation charges.
- d. Observation services provided to a patient who is subsequently admitted as an inpatient should be included on the inpatient claim.

GH. Stand-alone Services. When services are provided as an outpatient service, and are not performed as a surgical procedure, medical procedure, or emergency room service, then reimbursement equals the technical amount ~~calculated from the data~~ listed in the corresponding section of this Fee Schedule. ~~The technical amount is calculated by subtracting the PC Amount from the Amount.~~

HI. Disputed Medical Charges; Abusive or Unfair Billing

1. Disputes over charges, fees, services, or other issues related to treatment under the terms of the Workers' Compensation Law shall be resolved in accordance with the Dispute Resolution Rules set forth elsewhere in this Fee Schedule.
2. If the Commission determines that the charge amount for items substantially and consistently exceeds the facility's mark-up ratio, or if a facility's charges for other services or MS-DRGs is substantially and consistently higher than the average charges made for the same services or MS-DRGs by other facilities in the State, then the Commission may consider this to be an indication of abusive or unfair billing practices, and may order the facility in question to appear and show cause why penalties and other sanctions as allowed by Law should not be imposed on said facility for such abusive billing practices.

For purposes of this provision, the mark-up ratio shall be the inverse of the facility's cost-to-charge ratio. The average charges by facilities for service or MS-DRGs may be determined by reference to the publicly available MedPAR file for Medicare inpatient admissions, with due consideration being given to the differences between the Medicare inpatient population and the workers' compensation inpatient population.

II. INPATIENT REHABILITATION FACILITIES (IRFs)

A. **Inpatient Rehabilitation Facility Reimbursement Methodology.** MWCC reimbursement for inpatient rehabilitation facilities (IRFs) will be based upon the CMS prospective payment system (PPS).

1. The Fee Schedule MRA for IRFs will be two (2) times the IRF CMS pricer calculation, unless the payer and provider have a separate contract governing the reimbursement of services provided by an IRF, or unless total billed charges are less.
2. The IRF reimbursement due under this Fee Schedule will be calculated using the CMS IRF pricer calculation in effect on the date of discharge.
3. The CMS IRF pricer is used only for facilities that have met the CMS qualifications for IRF.
4. Reimbursement for IRFs is not calculated using the MS-DRG methodology.
5. The CMS IRF pricer is available at: <http://www.cms.hhs.gov/PCPricer>

B. **CMS Inpatient Rehabilitation Facility Reimbursement.** Medicare regulations define inpatient rehabilitation facilities (IRFs) in the Code of Federal Regulations, Part 412, and subpart B. Medicare payments to IRFs are based on the IRF prospective payment system (PPS) under subpart P of part 412. The IRF must be currently accredited by the

Commission on Accreditation of Rehabilitation Facilities (CARF), licensed by the State, and certified by Medicare as an IRF at the time the patient is treated.

The IRF must possess a Medicare/Medicaid provider number, or CMS Certification Number. The provider number consists of six digits. The first two digits indicate the state, 25 is for Mississippi, and the remaining four digits identify the facility as an IRF. The four digit suffix must be in the range of 3025–3099 for rehabilitation facilities, exempt units must have a T in the third position, e.g., 25TXXX.

Unless governed by contract between payer and provider, or unless total billed charges are less, the reimbursement for an IRF under this Fee Schedule shall be the IRF PPS calculated rate multiplied by ~~two (2)~~ 1.8. Other inpatient MS-DRG or PPS calculations are not appropriate to use for IRF services. The IRF PPS rate is calculated using the formula for the current fiscal year, including outlier. The final calculation is published in the *Federal Register*, prior to October 1 of each year.

IRF reimbursement is based upon the case mix group (CMG) to which the patient is assigned. MWCC will accept the CMG assigned by the Medicare CMG grouper. The CMG must be reported on the claim with revenue code 0024. This code indicates that this claim is being paid under the PPS and the revenue code can appear on a claim only once.

The *Federal Register* explains the formula for calculating the IRF PPS rate. The rates are calculated on case mix group (CMG) assignment from the combinations of ICD-910-CM codes with additional factors of labor share, wage index, rural adjustment (if applicable) and low income percentage (LIP) for a final adjusted IRF PPS reimbursement.

This calculated IRF PPS reimbursement is multiplied by ~~two (2)~~ 1.8 for the MWCC reimbursement rate.

$$\begin{aligned} & \text{Unadjusted IRF PPS (CMG Tier 1, 2, 3, or no} \\ & \text{comorbidities)} \\ \times & \text{ Labor Share (FY 2014 Federal Register Table 4)} \\ = & \text{Labor portion of federal payment} \\ \times & \text{CBSA-Based Wage Index (See Federal Register} \\ & \text{Table I) Jackson, MS} \\ = & \text{Wage-Adjusted Amount} \\ + & \text{Non-labor amount (Unadjusted federal PPS less} \\ & \text{labor portion of federal payment)} \\ = & \text{Wage-adjusted federal payment} \\ \times & \text{Rural Adjustment (See Federal Register)} \\ = & \text{Wage and rural adjusted federal payment} \\ \times & \text{LIP adjustment (low income percentage based} \\ & \text{on disproportionate share hospital (DSH)} \\ & \text{calculation)} \\ = & \text{Wage, rural and LIP adjusted federal PPS} \\ & \text{payment rate} \\ \times & \text{2 (MWCC reimbursement adjustment)} \\ = & \text{MWCC IRF PPS adjusted payment} \end{aligned}$$

MWCC will use the Medicare Pricer for the appropriate year and based on the date of discharge which is available as a free download from: <http://www.cms.hhs.gov/PCPricer>. The Medicare pricer returns the payment rate specific to the facility.

III. AMBULATORY SURGERY CENTER/OUTPATIENT FACILITY REIMBURSEMENT

- A. Reimbursement for all hospital-based outpatient and freestanding ambulatory surgery center services shall be based on the Ambulatory Payment Classification (APC) system as developed by the Centers for Medicare and Medicaid Services (CMS) using relative weights effective April 1, ~~2016~~2013 and a Base Rate of \$92.00.
- B. For implantables used in the outpatient setting, reimbursement is included in the Fee Schedule APC Amount as listed.

C. Coding and Billing Rules

1. Facility fees for ambulatory surgery must be billed on the UB-04 form.
2. The CPT®/HCPCS code(s) of the procedure(s) performed determines the reimbursement for the facility fee. Report all procedures performed.
3. If more than one surgical procedure is furnished in a single operative encounter, the multiple procedure rule applies. The primary procedure is reimbursed at the lesser of the billed charges or one hundred percent (100%) of the MRA. The second and subsequent procedures are reimbursed at the lesser of the billed charges or fifty percent (50%) of the MRA. The primary procedure is the procedure with the highest relative weight.
4. If the billed total for an outpatient surgical encounter is less than the APC MRA, the lesser of the charge is paid to the facility.
5. The payment rate for an APC surgical procedure includes all facility services directly related to the procedure performed on the day of surgery. Facility services include:
 - Nursing and technician services
 - Use of the facility
 - Drugs, biologicals, surgical dressings, splints, casts and equipment directly related to the provision of the surgical procedure
 - Implantables
 - Materials for anesthesia
 - Administration, record keeping and housekeeping items and services
6. Separate payment is not made for the following services that are directly related to the surgery:
 - Pharmacy
 - Medical/surgical supplies
 - Sterile supplies
 - Laboratory and radiology services with no APC Amount
 - Operating room services
 - Anesthesia
 - Ambulatory surgical care
 - Recovery room
 - Treatment or observation room
7. Pre-op workup services are included in the APC Amount and do not warrant separate reimbursement regardless of the date of service. Pre-op workup includes: Metabolic Panel, CBC, UA, PT, PTT, EKG CXR (or any of the components). Note: If a surgical procedure is cancelled after the pre-op has been completed, then the pre-op services should be paid according to this Fee Schedule.
8. The ASC payment rate (APC Amount) has been added to the CPT code listing of fees in the Fee Schedule. The column lists the total approved facility fee for that particular CPT code.
9. The facility fees will be paid for medically necessary services only. All ambulatory elective procedures must be precertified according to the rules and guidelines of the Fee Schedule.
10. Procedures not assigned an APC Amount will be reimbursed according to the lesser of total billed charges or usual and customary rate.
11. Charges for outpatient surgical codes are all inclusive and are reimbursed in total regardless of the amount billed on that line as long as the total reimbursement does not exceed the total billed charges.

~~D. Status code "N" items and services are packaged into APC rates, and are paid under OPPS; payment is packaged into payment for other services including outliers. Therefore, there is no separate APC payment. Status code "P" (partial hospitalization) is also paid under OPPS.~~

~~— Status code "Q" is paid at 100 percent of the APC MRA. Status code "T" is subject to the OPPS multiple procedure reduction.~~

~~E. Outlier Payments: In an effort to target outliers to high cost and complex cases where a very costly service could cause a facility to incur a significant financial loss, the following outlier payment formula is to be used to calculate the appropriate, additional reimbursement:~~

~~Step 1: Reduce charges to cost using the default cost to charge ratio. The current default cost to charge ratio for urban facilities is 0.244; the current default ratio for rural facilities is 0.192;~~

Step 2: Deduct implantable cost.* This is the cost of furnishing the service;

Step 3: Test to see if outlier meets the 1.75 condition. Is the number from Step 2 more than 1.75 times the APC payment rate? If no, no outlier payment is due; if yes, proceed to Step 4;

Step 4: Test to see if outlier meets the \$2,175 threshold test. Add \$2,175 to the APC payment rate; is the total more or less than the figure from Step 2 (the cost of furnishing the service)? If greater than the figure in Step 2, no outlier is due; if less than the figure in Step 2, proceed to Step 5;

Step 5: Determine outlier payment: _____

(Cost — (APC payment x 1.75))/2

OR

(Step 2 Amount — Step 3 Amount)/2

~~Example: Hospital X, an urban facility, bills \$90,000 for CPT code 23470 Reconstruct shoulder joint. Assume there is a \$2,500 cost implantable device used and that the MWCC payment is \$9,601.88.~~

~~Step 1: Reduce charges to cost using the default cost to charge ratio:~~

~~\$90,000 x 0.244 = \$21,960~~

~~Step 2: Deduct implantable cost.*~~

~~\$21,960 — \$2,500 = \$19,460~~

~~Step 3: Test to see if outlier meets the 1.75 condition~~

~~\$9,601.88 x 1.75 = \$16,803.29~~

~~Is \$19,460 ≥ \$16,803.29? Yes, \$19,460 is more than 1.75 times the payment~~

~~Step 4: Test to see if outlier meets the \$2,175 threshold test~~

~~\$9,601.88 + \$2,175 = \$11,776.88~~

~~\$11,776.88 is less than \$19,460, proceed to Step 5.~~

~~Step 5: Determine outlier payment~~

~~(Cost — (APC payment x 1.75))/2~~

~~(\$19,460 — (\$9,601.88 x 1.75))/2 = \$1,328.36~~

~~The outlier payment in this case would be \$1,328.36.~~

- D. If a claim contains a CPT/HCPCS code with a J1 status indicator, then that code should be paid according to the Fee Schedule and all other codes on the claim, with the following exception, are considered bundled and not separately paid. If two or more CPT/HCPCS codes have a J1 status indicator, then the highest valued J1 status indicator CPT/HCPCS code should be paid at one hundred percent (100%) of the Fee Schedule and any secondary (lower valued) J1 status indicator CPT/HCPCS codes shall be paid at fifty percent (50%) of the Fee Schedule.

Other than the multiple procedure surgical discounts as listed in Section III C 3 and the J1 status indicators described in the previous paragraph, no other Medicare status indicator discounts apply. This means no discounts apply to Medicare's Q status indicator codes.

Do not separately reimburse non-implantable orthotic and prosthetic devices when associated with a procedure code that has a status code of J1. Payment is packaged into the allowable for the procedure code.

IV. CRITICAL ACCESS HOSPITALS

- A. A critical access hospital (CAH) is a small, generally geographically remote facility that is certified to provide outpatient and inpatient services.
- B. A CAH may also be granted "swing bed" approval to provide post-hospital skilled nursing facility level care in its inpatient beds.
- C. A list of currently participating Mississippi Critical Access hospitals is posted on the MWCC website at <http://www.mwcc.ms.gov>.
- D. Reimbursement
1. Critical access hospitals are reimbursed at ninety percent (90%) of billed charges for inpatient ~~and outpatient~~ services.
 2. Swing bed services are reimbursed according to the Skilled Nursing Facility section.
 3. Outpatient services are reimbursed according to the rules in Inpatient Hospital and Outpatient Facility Payment Schedule and Rules.

V. DRUG AND ALCOHOL TREATMENT

- A. Any admission for drug and alcohol treatment will be reimbursed by DRG according to the facility inpatient rules.
- B. Outpatient partial day treatment will be reimbursed at two hundred fifty dollars (\$250.00) per diem.

C. Outpatient lab and radiology charges will be reimbursed according to the outpatient stand-alone rules in the facility section.

VI. MODIFIERS APPROVED FOR AMBULATORY SURGERY CENTER (ASC) HOSPITAL OUTPATIENT USE

25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service

It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See **Evaluation and Management Services Guidelines** for instructions on determining level of E/M service). The E/M service may be prompted by the symptom or condition for which the procedure and/or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Note:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57. For significant, separately identifiable non-E/M services, see modifier 59.

27 Multiple Outpatient Hospital E/M Encounters on the Same Date

For hospital outpatient reporting purposes, utilization of hospital resources related to separate and distinct E/M encounters performed in multiple outpatient hospital settings on the same date may be reported by adding modifier 27 to each appropriate level outpatient and/or emergency department E/M code(s). This modifier provides a means of reporting circumstances involving evaluation and management services provided by physician(s) in more than one (multiple) outpatient hospital setting(s) (eg, hospital emergency department, clinic). **Note:** This modifier is not to be used for physician reporting of multiple E/M services performed by the same physician on the same date. For physician reporting of all outpatient evaluation and management services provided by the same physician on the same date and performed in multiple outpatient setting(s) (eg, hospital emergency department, clinic), see **Evaluation and Management, Emergency Department, or Preventive Medicine Services** codes.

50 Bilateral Procedure

Unless otherwise identified in the listings, bilateral procedures that are performed at the same operative session should be identified by adding modifier 50 to the appropriate 5 digit code.

52 Reduced Services

Under certain circumstances a service or procedure is partially reduced or eliminated at the discretion of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by its usual procedure number and the addition of modifier 52, signifying that the service is reduced. This provides a means of reporting reduced services without disturbing the identification of the basic service. **Note:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74.

58 Staged or Related Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

It may be necessary to indicate that the performance of a procedure or service during the postoperative period was: a) planned or anticipated (staged); b) more extensive than the original procedure; or c) for therapy following a diagnostic surgical procedure. This circumstance may be reported by adding modifier 58 to the staged or related procedure. **Note:** For treatment of a problem that requires a return to the operating/procedure room (eg, unanticipated clinical condition), see modifier 78.

59 Distinct Procedural Service

Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services other than E/M services that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should

modifier 59 be used. **Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

73 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure Prior to the Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well-being of the patient, the physician may cancel a surgical or diagnostic procedure subsequent to the patient's surgical preparation (including sedation when provided, and being taken to the room where the procedure is to be performed), but prior to the administration of anesthesia (local, regional block(s) or general). Under these circumstances, the intended service that is prepared for but cancelled can be reported by its usual procedure number and the addition of modifier 73. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

74 Discontinued Out-Patient Hospital/Ambulatory Surgery Center (ASC) Procedure After Administration of Anesthesia

Due to extenuating circumstances or those that threaten the well-being of the patient, the physician may terminate a surgical or diagnostic procedure after the administration of anesthesia (local, regional block(s), general) or after the procedure was started (incision made, intubation started, scope inserted, etc). Under these circumstances, the procedure started but terminated can be reported by its usual procedure number and the addition of modifier 74. **Note:** The elective cancellation of a service prior to the administration of anesthesia and/or surgical preparation of the patient should not be reported. For physician reporting of a discontinued procedure, see modifier 53.

76 Repeat Procedure or Service by Same Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a procedure or service was repeated by the same physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 76 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

77 Repeat Procedure by Another Physician or Other Qualified Health Care Professional

It may be necessary to indicate that a basic procedure or service was repeated by another physician or other qualified health care professional subsequent to the original procedure or service. This circumstance may be reported by adding modifier 77 to the repeated procedure or service. **Note:** This modifier should not be appended to an E/M service.

78 Unplanned Return to the Operating/Procedure Room by the same Physician or Other Qualified Health Care Professional Following Initial Procedure for a Related Procedure During the Postoperative Period

It may be necessary to indicate that another procedure was performed during the postoperative period of the initial procedure (unplanned procedure following initial procedure). When this procedure is related to the first, and requires the use of an operating/procedure room, it may be reported by adding modifier 78 to the related procedure. (For repeat procedures, see modifier 76.)

79 Unrelated Procedure or Service by the Same Physician or Other Qualified Health Care Professional During the Postoperative Period

The individual may need to indicate that the performance of a procedure or service during the postoperative period was unrelated to the original procedure. This circumstance may be reported by using modifier 79. (For repeat procedures on the same day, see modifier 76.)

91 Repeat Clinical Diagnostic Laboratory Test

In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results. Under these circumstances, the laboratory test performed can be identified by its usual procedure number and the addition of modifier 91. **Note:** This modifier may not be used when tests are rerun to confirm initial results; due to testing problems with specimens or equipment; or for any other reason when a normal, one-time, reportable result is all that is required. This modifier may not be used when other code(s) describe a series of test results (eg, glucose tolerance tests, evocative/suppression testing). This modifier may only be used for laboratory test(s) performed more than once on the same day on the same patient.

XE Separate Encounter (HCPCS Modifier)

A service that is distinct because it occurred during a separate encounter.

XP Separate Practitioner (HCPCS Modifier)

A service that is distinct because it was performed by a different practitioner.

XS Separate Structure (HCPCS Modifier)

A service that is distinct because it was performed on a separate organ/structure.

XU Unusual Non-overlapping Service (HCPCS Modifier)

The use of a service that is distinct because it does not overlap usual components of the main service.

Forms

I. GUIDELINES

- A. Reproduced on the following pages are the forms that should or may be used by providers when billing workers' compensation related services. Instructions are given below.
- B. Bills for services rendered should be sent directly to the party responsible for reimbursement. Do not send bills directly to the Medical Cost Containment Division as this will delay payment.
- C. The most current version of each claim form should be submitted. At the time of publication, the following forms are the most current and should be used for provider reimbursement:
 - ~~CMS-1500 (08/05) (effective July 1, 2007 – March 31, 2014)~~ or CMS-1500 (02/12) (effective April 1, 2014); electronic equivalent 837p
 - UB-04 (effective May 23, 2007) Electronic equivalent 837i
 - J430D Dental Form (effective 2012)
- D. The information to include on each form where appropriate is:
 1. Claimant's full name and address as shown on the employer's record.
 2. Social security number should be entered in the field for insured's ID number; this cuts down on errors and helps correlate the billing to the appropriate file.
 3. Correct date of injury. Some claimants have multiple open files and can only be assigned by date.
 4. Proper name and address of the employer, not just an individual's name.
 5. Name of the insurance payer as registered with the state.
 6. Date the claimant's disability should begin per the attending physician.
 7. Attending physician's diagnoses and claimant's complaints.
 8. Disabilities the claimant has that are not related to this injury.
 9. Description of treatment plan, including any prescriptions.
 10. Indication if the injury/illness appears to be work related.
 11. Indication as to whether the claimant can be released to light or full duty work; full duty is considered to be the work at the time of the accident.
 12. Length of time the claimant should be off work as a result of the injury or illness.
 13. Date of the visit, the service(s) or procedure(s) performed, and charges.
 14. Physician's complete name and address.
 15. Physician and provider group national provider identifier (NPI) for billing group and treating physician.
 16. Physician's or group's federal tax identification number (tax identification number [TIN] or social security number).
 17. Injury/illness as described by the claimant.
- E. The following pages have samples of the ~~CMS-1500 (08/05)~~, CMS-1500 (02/12), UB-04, 2012 American Dental Association Dental Claim Form J430D, Request for Resolution of Dispute, and Utilization Review Request Form.

II. UTILIZATION REVIEW REQUEST FORM

The form entitled Mississippi Workers' Compensation Utilization Review is a communication tool for use between the provider and the utilization review company. The form can be faxed between the provider and payer as applicable.

The utilization review process is mandatory under the *Mississippi Workers' Compensation Medical Fee Schedule*; however, the use of the Utilization Review Request Form is optional. The use of the form is encouraged if it proves helpful in the timely processing of requests for utilization review of medical services.
