Part I Procedural and Practice Text

Chapter 01 Applicability, Repealer and Other General Provisions

Rule 1

100 Applicability

These rules shall govern all practice and procedure before the Mississippi Public Service Commission relating to all public utility matters. These rules are not, by their terms, applicable to Commission proceedings concerning pipeline safety matters nor do they define or replace existing substantive rules governing public utility service obligations. Nothing in these rules shall be construed as affecting those matters over which the Commission has no jurisdiction, including but not limited to those specified in Miss. Code Ann. §77-3-1 and §77-3-5.

These rules incorporate procedures governing the Public Utilities Staff, which is a state agency independent of the Public Service Commission. Miss. Code Ann. §77-2-9 provides, in part, that it shall be the duty of the Executive Director to "formulate written policies and procedures for the effective and efficient operation thereof." Since the duties and responsibilities of the Public Utilities Staff are an integral part of the utility regulatory process, appropriate procedures applicable to the Public Utilities Staff are necessarily incorporated herein, upon recommendation by the Executive Director, to achieve cohesive and complete Rules of Practice and Procedure.

101 Statutory Terms Control

Specific statutory provisions which govern the Commission or the Staff which are in conflict with any of the rules herein shall continue to be applied to all proceedings of the Commission or Staff to the extent of such conflict only.

102 Liberal Construction/Deviations From Rules

These rules will be liberally construed to secure just, speedy and economical determination of all issues presented to the Commission. Unless prohibited by statute, the Commission may for good cause shown, permit deviation from these rules when it finds compliance with them is impractical, unnecessary, unreasonably burdensome, impossible or not in the public interest.

103 Waiver of Rights

Except to the extent precluded by applicable law, a person may expressly waive any right conferred upon that person by any rule herein.

104 Effective Date

These rules shall apply to all proceedings filed on or after October 17, 2005.

105 Prior Rules

All prior rules of this Commission in conflict herewith are repealed to the extent of such conflict.

106 Severability

These rules are fully severable so as to provide that should any rule or rules, or any section or paragraph of any rule, be declared unlawful by any court of competent jurisdiction, then, in that event, the remaining rules shall continue to be in force and in effect and shall not be suspended, nullified or affected by such determination of unlawfulness.

107 Citation

In documents submitted to the Commission or issued by the Commission, these rules may be cited as RP. For example, Rule 6 may be cited as RP 6.

108 Amendment of Rules

These rules may be amended, supplemented or repealed at any time by the Commission subject to the provisions of Miss. Code Ann. §77-3-45; §25-43-1.101 et seq; §25-43-2.101 et seq; and 25-43-3.101 et seq.

Chapter 03 Organizational Description

Rule 3

100 General

This rule is adopted in compliance with the Mississippi Administrative Procedures Law. (Miss. Code Ann. §25-43-1.101 et seq; 25-43-2.101 et seq; and 25-43-3.101 et seq).

101 Commission Organization

The Commission consists of a three-member panel, one to be elected from each of the three (3) Supreme Court districts. The Commission exercises exclusive original jurisdiction over the intrastate business and property of public utilities, subject to and in accordance with the Act. The Commission employs an Executive Secretary, attorney, administrative and investigative staff.

The Commission provides a thorough and efficient regulatory process that is fair, open, encourages public participation, and anticipates the demands of an evolving regulatory environment.

The Commission is located in downtown Jackson, Mississippi, at 501 N. West Street, Suite 201A, with access from I-55. Upon entering the building, please see the receptionist or guard to sign in and obtain a visitor's pass. The Commission's hearing room is located on the First floor and the public records room or the office of the Executive Secretary is located on the Second floor. Parking, including special needs parking, is available upon entering the parking garage.

102 Commission Duties

The functions of the Commission are regulatory and quasi-judicial in nature. The Commission may conduct investigations and make determinations, hold such hearings, prescribe such rules and issue such orders with respect to the control and conduct of the utilities coming within its jurisdiction. The Commission may adjudicate all proceedings brought before it in which the violation of any law or rule administered by the Commission is alleged. The Commission is charged by law with the duty and authority to regulate the rates and services of certain public utilities. These public utilities, as defined by the Act, include persons and corporations providing electricity, natural and/or artificial gas, water, sewer and telephone services to or for the public for compensation. The Commission does not provide these services directly but regulates persons and entities who do provide the services. This regulatory authority may be generally described as falling into the following areas:

1. Certificates of Public Convenience and Necessity

The Commission decides questions relating to the granting, revocation, sale, transfer, merger, assignment, leasing or cancellation of certificates.

2. Rate Proceedings

The Commission determines the lawful rates and other authorized charges to be collected by any non-exempt public utility for the rendition of services specified in Miss. Code Ann. §77-3-3. This ratemaking authority does not extend to rates charged for the sale or leasing of appliances by public utilities or their non-regulated or non-jurisdictional activities.

3. Service Obligations

The Commission promulgates rules and regulations governing the manner and terms by which public utilities provide services to the public pursuant to their certificate.

4. General Oversight

The Commission exercises general oversight authority over all regulated phases of public utility operations for the purpose of promoting the public interest consistent with the goals of the Act. The Commission has additional responsibilities concerning the regulation and oversight of gas pipeline safety, but these functions are handled under separate rules and regulations.

103 Staff Organization

The Staff, created pursuant to Miss. Code Ann. §77-2-1, et seq., is completely separate and independent from the Commission. The Staff is under the operational and administrative control of the Executive Director. The Staff consists of professionals in the areas of engineering, administration, economics and planning, finance, accounting, and law; supportive technical personnel, consisting of rate analysts, inspectors and statisticians; and supportive clerical personnel as authorized and appropriated by the Legislature.

104 Staff Duties

The Staff represents the broad interests of the State of Mississippi by balancing the respective concerns of the residential, commercial, or industrial ratepayers, and the State and its agencies and departments, and the public utilities. The primary function of the Staff is investigative and advisory in nature. The employees of the Staff shall perform such duties as are assigned to them by the Executive Director.

The Staff, by and through the Executive Director reviews, investigates and recommends action to the Public Service Commission regarding, among other things: the reasonableness of proposed rates including automatic adjustment clauses; the service furnished by any public utility; certification matters; transfers, mergers, consolidations and combination of public utilities; contracts of public utilities with affiliates or subsidiaries; special contracts; regulations, rules and transactions; miscellaneous filings; and all other types of filings with the Commission.

The Executive Director of the Staff, utilizing the resources of its Staff, furnishes to the Commission, information and reports or conducts investigations and provides such other assistance as may be required in order to enforce the laws providing for the regulation of public utilities.

Except as otherwise ordered, a late intervenor must accept the record of the proceedings as the record was developed prior to the late intervention.

If a filing of opposition is properly made as described herein, a hearing may be conducted regarding the proposed compliance tariff.

9. Effect of Issuance of Order

After the order has been entered by the Executive Secretary of the Commission, the approved rates and other charges may be lawfully collected by the public utility until changed by subsequent order of the Commission.

Chapter 10 Miscellaneous Application Proceedings

Rule 10

100 Definition

A miscellaneous application filing is a proceeding, other than a certificate proceeding, a transfer proceeding, a proceeding seeking to change, modify, alter, or establish rates, a complaint proceeding or a request for a declaratory opinion in which the authority of the Commission to perform some act is requested. All proceedings to change, modify, alter or increase existing rates or for the establishment of initial rates shall be filed under the provisions of RP 9. Proceedings to obtain certificates shall be filed under the provisions of RP 7.

101 Contents of Application

All applications shall be in writing and shall be in compliance with the requirements of RP 6. The application shall set forth:

1. The full name, mailing address and e-mail address of the applicant, and, if the applicant is a corporation, its status as such;

Chapter 11 Complaint Proceedings

Rule 11

100 Informal Complaints

1. Authorized

Informal complaints may be made by letter or other writing addressed to the Commission. If, in the discretion of the Commission, such a complaint warrants it, the matter presented will be taken up with the utility involved in an effort to bring about satisfaction of the complaint without a formal hearing.

2. Form

No specific requirement is made as to the form of an informal complaint, but in substance the letter or other writing should contain the names and addresses of the complainant and the person complained of, a clear and concise statement of the facts involved, and a statement of the relief requested.

3. Remedy Not Exclusive

The informal complaint has been found to be effective in many cases and is recommended. However, in the event of failure to bring about satisfaction of the complaint because of the inability of the parties to agree as to the facts involved, or from other causes, the proceeding is held to be without prejudice to complainant's right to file and prosecute a formal complaint, whereupon the informal proceedings will be discontinued.

101 Formal Complaints

1. Who May Complain

Complaint may be made by the Commission on its own behalf, by the Staff, by any utility, by any municipality, the State of Mississippi, the United States, any federal or state department, subdivision or agency, Chamber of Commerce or trade association, or by any consumer or prospective consumer of any utility service with respect to service, furnishing of service, rates and other charges, any discrimination with respect to any service or rates or regarding any rule or order of the Commission.

A complaint filed by anyone other than the Commission or the Staff must affirmatively show that the complainant has a direct and substantial interest in the subject matter of the complaint that will be determined by the proceeding. A copy of the complaint shall be served on the utility or respondent by the party filing the complaint at the time it is filed in accordance with RP 6.

2. Form of Complaint

Each formal complaint shall be in writing, verified, and shall bear a heading showing the names of the complainant and respondent; and, in addition, shall state (a) the full name, mailing address and e-mail address of complainant; (b) the full name and mailing address of the respondent; (c) fully, clearly and with reasonable certainty, the act or thing done or omitted, of which complaint is made, with a citation, where

practicable, to the statute, rule or order, of which violation is claimed; (d) the interest of the complainant, and how it will be affected; (e) the relief that is sought; (f) the name and address of any attorney representing the complainant; (g) and such other matters of fact, if any, as may be necessary to fully acquaint the Commission with the details of the alleged violation. Complainant shall comply with all applicable provisions of RP 6.

3. Procedure

Upon the filing of such a complaint, the Commission will immediately examine the same to determine whether it alleges a prima facie case and conforms to these rules. If the Commission is of the opinion that the complaint does not allege a prima facie case or does not conform to these rules, it will notify the complainant or his attorney to that effect within seven (7) days of the filing date, and opportunity may be given to amend the complaint within a specified time. If not so amended within such time or such extension thereof as the Commission may, for good cause grant, the complaint will be dismissed. If the Commission is of the opinion that such complaint, either as originally filed or as amended, alleges a prima facie case under the Act and conforms to these rules and the law, the Commission will serve a notice upon the respondent of and under the hand of its secretary and attested by its seal, accompanied by a copy of the complaint, directed to such utility or person, and requiring that the complaint be answered in writing within twenty (20) days from the date of service of such notice, provided that the Commission may, in particular cases, require the answer to be filed within a shorter time, or grant additional time in which to answer.

4. Offer of Satisfaction of Complaint

If the respondent desires to satisfy the complaint, he may file with the Commission, within the time allowed for answer, a statement of the relief which he is willing to give, with Certificate of Service of a copy thereof on the complainant endorsed thereon. The complainant shall have seven (7) days in which to file with the Commission a statement accepting the satisfaction offered, or rejecting it, with Certificate of Service of a copy thereof on the respondent. If the offer of satisfaction is accepted by the complainant and approved by the Commission, no further proceedings will be taken.

5. Answer of Complaint

If satisfaction be not made as aforesaid, the respondent shall, within seven (7) days from service of complainant's statement declining the offer of satisfaction (or within such additional time as the Commission may, for good cause shown, allow) file an answer to the complaint, with Certificate of Service of a copy thereof on the complainant endorsed thereon. The answer must contain a specific admission or denial of the material allegations of the complaint which may be done by reference to designated paragraphs of the complaint or portions thereof, and also a clear statement of any matter constituting a defense. If the respondent has no information or belief upon the subject of any allegation sufficient to enable him to answer the same, he may so state in his answer and base his denial upon that ground.

102 Remedies are Cumulative

The provisions and remedies of this rule governing formal and informal complaints are supplemental to and cumulative of those remedies afforded under the Act, including but not limited to the remedies provided in Miss. Code Ann. §77-3-11(5) and §77-3-21.

103 Dismissals

The Commission may dismiss any complaint without a hearing if in its opinion a hearing is not necessary in the public interest or for the protection of substantial rights.

2. When Hearing Ordered

Dispositive motions or motions seeking a final order in the case shall be the subject of a hearing if the Commission so orders, upon reasonable notice to all parties. The Commission may enter an order of dismissal without a hearing, if in its opinion, a hearing is not necessary in the public interest or for the protection of substantial rights.

3. Disposal of by Executive Secretary

In order to encourage agreement, settlements and stipulations between the parties at the prehearing conference and in order to expedite Commission proceedings, it is a policy of the Commission that if any agreement provides, by its terms, that any provisions thereof are nonseverable, such provisions shall only be adopted in their entirety, if at all, by the Commission.

2. Failure to Stipulate

Parties failing to stipulate to matters agreed upon by the filing utility and the Staff may, in the Commission's discretion, be afforded an opportunity to cross-examine and to submit written briefs, documentation or additional prefiled testimony in opposition to the stipulation or in support of unresolved factual or legal questions.

104 Duties of the Parties

1. Representative Authority

It shall be the duty of all parties to have present at the prehearing conference a representative or attorney who is authorized to enter into stipulations and agreements on behalf of such party. Any person appearing at a prehearing conference in a representative capacity must be authorized to act on behalf of that person's principal with respect to matters to be addressed at the conference.

2. Cooperation

3. Failure to comply

If any party fails to attend the prehearing conference after written notice, such failure shall constitute a waiver by said party of all objections to any order or ruling or stipulation arising out of such conference.

4. Expert Witnesses

To facilitate stipulations and agreements, each party is encouraged, but not required, to have present or available for consultation during the conference, appropriate experts or consultants, if any, that are employed by such party.

The Commission shall hold full or abbreviated public hearings in all matters where:

a. Public hearing is required by law or Commission regulation.

b. In the discretion of the Commission, it is necessary or appropriate to hold such public hearings.

3. Abbreviated Proceedings

Abbreviated proceedings may satisfy a requirement of public hearing if the Commission's order is supported by the data, documentation and exhibits on file in the proceedings. Abbreviated proceedings may include, but shall not be limited to, proceedings wherein factual or procedural determinations are made by order of the Commission upon written stipulations between the utility and the Staff, provided that all parties are afforded an opportunity to submit in writing, argument, evidence and testimony in contravention to the proposed stipulated facts or procedure or in support or opposition to regulatory policymaking.

102 Investigations

1. Commission Investigations

The Commission may, at any time, on its own motion or the motion of the Staff make investigation and order hearings into any act or thing done or omitted to be done by any public utility, which the Commission may believe is in violation of any provision of law or any order or rule of the Commission. It may also through its own experts or employees, or otherwise, obtain and introduce such evidence as it may consider necessary or desirable in any formal proceeding in addition to the evidence presented by other parties. Orders and pleadings initiating investigations shall specify the matters to be investigated, and shall be served upon the person being investigated.

2. Show Cause Orders in Complaint Proceeding

The Commission, either upon its own motion or upon receipt of written complaint, may at any time after appropriate notice has been given, summon any person within the Commission's jurisdiction to appear in a public hearing and show cause why such person should not be compelled to comply with any applicable statute, rule, regulation, or order with which the person is allegedly not in compliance.

3. Continuance of Service

In any case in which an investigation has been instituted herein or where formal complaint has been filed and an allegation is made that a utility or other person is threatening to discontinue a customer's service, the Commission may, after notice and opportunity for hearing, issue an order requiring the utility or other person to continue to provide service during the processing of the complaint. The Commission may issue such an order for good cause, on such terms as may be reasonable to preserve the rights of the parties during the processing of the complaint.

103 Evidence

Rules of evidence at hearings shall conform to the requirements of the courts of record in this State, provided that the Commission, in its discretion, may permit such deviations from said requirements as it deems in the public interest.

1. Rules of Evidence – Evaluation of Evidence

The Commission at hearings is not bound by the Mississippi Rules of Evidence. No informality in any proceeding or in the manner of taking testimony invalidates any order made, approved or confirmed by the Commission. The Commission, with or without objection, may exclude evidence that is irrelevant, unduly repetitious, inadmissible on constitutional or statutory grounds, or inadmissible on the basis of any evidentiary privilege provided by statute or recognized in the courts of Mississippi, and may order the presentation of such evidence to stop. All other evidence may be admitted if it is a type generally relied upon by prudent persons in the conduct of their affairs. The Commission's expertise, technical competence and special knowledge may be used in the evaluation of the evidence.

2. Documentary Evidence – Introduction of Records in the Executive Secretary's Official File

Documentary evidence may be received in the form of copies or excerpts. Upon request, parties shall be given an opportunity to compare the copy with the original if available. However, the Commission may permit photostatic, photographic or other copies of documents, or any part or parts thereof, to be introduced in evidence upon a satisfactory showing of their correctness or upon showing that it would be impractical or inconvenient to introduce the originals. When a party offers in evidence any portion of a transcript, exhibit, or other record from any other proceeding before the Commission, the portion offered must be specifically described and, if admitted, will be made an exhibit.

Where relevant and material matter offered in evidence is embraced in a book, paper or document containing other matter not material or relevant, the party shall plainly designate the matter so offered. If such immaterial matter unnecessarily encumbers the record, such evidence will not be received but may be marked for identification, and, if properly authenticated, the relevant and material matter may be read into the record, or if the Commission so directs, a true copy of such matter in proper form shall be received as an exhibit, and like copies delivered by the party offering the same to

opposing parties who shall be given opportunity to examine same and to offer in evidence any other portions thereof if found to be relevant or material.

3. Official Notice

The Commission may take official notice at hearings and in its orders:

- a. The orders, notices, rules, certificates and permits of any regulatory agency, state or federal;
- b. Technical, financial, or scientific facts established and published in authorities whose accuracy cannot be questioned or within the Commission's specialized knowledge;
- c. Matters judicially noticeable pursuant to Mississippi Rules of Evidence 201; and
- d. Data contained in periodic reports of regulated utilities filed with the Commission or federal regulatory agencies.

4. Procedure for Taking Official Notice

When officially noticing on its own motion, the Commission will give the parties appropriate opportunity to respond or refute such matters noticed.

5. Objections – Offers of Proof

Grounds for objection to the admission or exclusion of evidence must be stated briefly at the time the evidence is offered. An offer of proof may be made for the record which consists of a statement of the substance of the excluded evidence. When a party objects to the admission of evidence, the Commission will rule on the objection or the Commission may receive the evidence.

6. Prefiled Testimony

The Commission may order a witness's prefiled testimony previously distributed to all parties to be incorporated in the transcript as if read if timely filed pursuant to an order, statute, notice or rule requiring its filing before hearing. Without objection, the Commission may direct other prefiled testimony to be incorporated in the transcript as if read. A copy of all prefiled testimony with exhibits shall be provided to the court reporter during the public hearing for inclusion in the transcript of the proceeding. A copy of all prefiled testimony with exhibits shall be provided to each of the Commissioners at the hearing.

7. Exhibits

a. Form of Exhibits

Public exhibits offered at hearing must ordinarily be typed or printed on eight and one half by eleven inch (8 1/2" x 11") white paper, except maps, charts, photographs and non-documentary exhibits may be introduced on the size or kind of paper customarily used for them. Exhibits that are trade secrets, confidential information or otherwise exempt from public review shall be placed in an envelope other than white. When practical, sheets of each exhibit shall be numbered and, if the exhibit consists of two or more sheets, the first sheet or title page shall contain a brief

summary of what the exhibit purports to show and the number of pages in the exhibits. It is desirable that rate comparisons or other similar evidence be condensed into easily readable tables. At the hearing, a copy of each documentary exhibit must be furnished to each party present, to the court reporter, and to each Commissioner except for unusually bulky or voluminous exhibits that have previously been made available for the parties' inspection. Copies must be of good quality.

b. Timely Filing of Exhibits

Exhibits offered as part of a party's direct case (except exhibits offered on redirect examination) must be timely filed. Exhibits filed pursuant to any order, statute, notice or rule requiring their filing before hearing are timely filed. Otherwise, exhibits must be distributed or made available to all parties long enough before their introduction into evidence to allow the parties a reasonable opportunity to review them and to prepare to examine their substance, except those exhibits that update exhibits previously timely filed may be filed so long as fair opportunity is afforded other parties to examine the sponsoring witnesses about the updated material.

c. Objection – Admission

Exhibits identified at hearing are subject to appropriate and timely objection before the close of proceedings. Exhibits to which no objection is made are automatically admitted into evidence without motion of the sponsoring party.

8. Late Filed Evidence

Except as may be expressly permitted and upon good cause shown, the Commission will not receive in evidence or consider as a part of the record any book, paper or other instrument in connection with the proceeding after the close of the testimony.

104 Burden of Proof

The burden of proof shall be carried by the parties in like manner as is required in the courts of record in the state.

105 Stipulations

By stipulation in writing, or dictated into the record, the parties to any proceeding or investigation by the Commission may agree upon the issues or any portion of the issues involved in the controversy, which stipulation shall be regarded and used in evidence at the hearing. Parties are requested to agree upon the issues whenever practicable.

106 Order of Procedure

1. Opening the Evidentiary Hearing

The Commission may open the hearing by making a concise statement of its scope and purposes and by taking appearances of each party or the party's authorized representative.

2. Order of Procedure in Evidentiary Hearings

a. The party with the burden of proof on the whole proceeding shall be entitled to open and to close. Parties may be allowed to make opening statements. Following

opening statements, if any, the party with the burden of proof shall be allowed to proceed with its direct case. Opposing parties shall be allowed to cross-examination each witness, consistent with any order aligning parties. Each party shall then present its case and witnesses will be subjected to cross-examination. Unless otherwise ordered by the Commission for good cause, the Staff shall be the last party to present a direct case and the last party to cross examine witnesses.

- b. Redirect will be limited to matters raised in the round of examination immediately preceding the redirect. The Commission may allow recross examination.
- c. The party with the burden of proof may rebut evidence presented by opposing parties after all parties have presented their direct cases. Rebuttal may be afforded other parties at the Commission's discretion, provided that the party with the burden of proof shall be entitled to make the closing presentation.
- d. After parties have completed the presentation of evidence, and have been afforded the opportunity to cross-examine the other parties' witnesses, closing statements may be allowed.
- e. The Commission may question any witness testifying in a case.

107 Testimony under Oath

All testimony presented in formal hearings will be given under oath. Before testifying each witness must swear or affirm that the testimony the witness will give before the Commission is the truth, the whole truth, and nothing but the truth.

108 Parties and Persons with Similar Interests

If two or more parties or persons have substantially like interests or positions, to expedite the proceeding and avoid duplication, the Commission may limit the number of them who testify, examine witnesses, or make and argue motions and objections.

109 Statements of Position

Except as provided by Miss. Code Ann. §77-3-39 (3)-(8), addressing prehearing conferences and filings required before the hearing, the Commission may request, by order, that the parties furnish a statement of position no later than three (3) working days before the start of a hearing. Unless otherwise provided by order of the Commission, the statement of position shall contain (i) a concise statement of the party's position in the proceeding; (ii) a concise statement of each question of fact, law or policy the party considers at issue; and (iii) a concise statement of the party's position on each issue identified.

110 Final Orders

All final orders of the Commission are indexed by name and subject and are available for public inspection on the Commission's website or at the Commission's office in Jackson, Mississippi.

111 Continuance of Hearing

The Commission may continue proceedings for further hearing.

112 Oral Argument

The Commission may in its discretion, set and hear oral argument on any matter before it on reasonable notice according to the circumstances. Generally, only one attorney will be heard for each of the parties during a proceeding. The time for oral argument will be determined by the Commission in each case.

113 Briefs – Proposed Orders of the Parties – Statements of Position

In any proceeding, the Commission may order, and the Staff or any party may move that parties file briefs, memoranda, or proposed orders of the parties or statements of position. Except as provided in RP 14.102 the Commission will determine in each case the time within which any briefs may be filed. Untimely submitted briefs will not be considered except for good cause shown. Requests for extensions of time for the filing of briefs shall only be granted in cases of unusual merit. Such requests shall be submitted to the Chairman of the Commission.

114 The Hearing Record

The hearing record in a proceeding consists of all transcripts of hearings, conferences, arguments and other proceedings on the record and of all exhibits admitted as part of the record at the hearing. Answers to discovery and other documents filed with the Executive Secretary and served on the parties, whether or not discussed at hearing, are not part of the hearing record unless introduced as exhibits at hearing.

115 The Commission's Record

The Commission's record in a proceeding automatically includes all filed pleadings, prefiled testimony, exhibits, orders, notices, briefs, proposed orders and position papers. The Commission may add documents officially noticed to the Commission's record.

116 The Court Reporter(s)**1. Transcription of Record**

The reporter(s) at all hearings, conferences, arguments and other proceedings on the record records oral proceedings and collects all exhibits identified at hearing. Upon request, the record may be transcribed.

2. Number of Copies

When a proceeding has been transcribed, the reporter(s) shall prepare an original and one (1) copy of the transcript for the Commission and two (2) copies for the Staff.

3. Sealed Transcripts

At the direction of the Commission or the presiding officer, the reporter(s) shall prepare a separate transcript volume(s) of closed proceedings involving trade secrets, confidential information or other matters exempt from public disclosure. The reporter(s) shall file the separate transcript volume(s) under seal. Sealed transcripts shall be

separately stored in a secure location with limited access and safeguarded from unauthorized disclosure.

117 Failure to Appear at Hearing – Defaults

After an applicant's, petitioner's, complainant's or moving party's failure to appear at the time and place set for hearing, the Commission may dismiss the petition, application, complaint or motion. When a respondent that has been properly served fails to answer or appear at hearing, the Commission may order any relief against the respondent authorized by law.

118 Procedures Following Final Orders

1. Rehearing

Proceedings on rehearings shall be governed by the provisions of Miss. Code Ann. §77-3-65.

2. Appeals of Final Orders

Appeals of Commission Final Orders may be taken pursuant to Miss. Code Ann. §77-3-67 and 77-3-72.

3. Stay of Orders Pending Appeal

The pendency of proceedings to review shall not of itself stay or suspend the operation of the order of the Commission. However, a party may seek an order staying the operation of the order of the Commission pursuant to Miss. Code Ann. §77-3-69.

4. Service of Final Orders

The Executive Secretary must indicate on every order the date upon which the order was served on the party or representative of the party.

Chapter 16 Accounts, Records and Reports

Rule 16

100 Systems of Accounts

Each utility shall establish and maintain a system of accounts in accordance with the orders of this Commission. From and after August 1, 1988:

1. All certificated providers of local exchange telecommunication services shall maintain their accounts in accordance with the Uniform System of Accounts prescribed by the Federal Communications Commission.
2. All certificated providers of gas and electric service shall maintain their accounts in accordance with the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission; provided, in the case of any utility that is required to keep a system of accounts prescribed by the Tennessee Valley Authority or the Rural Electrification Administration, such system of accounts shall be deemed sufficient compliance with the system prescribed by the Commission.
3. All certificated providers of water or sewer services shall maintain their accounts in accordance with the requirements of the Uniform System of Accounts prescribed by the National Association of Regulatory Utility Commissioners.

This rule shall not be interpreted so as to prevent the Commission from requiring additional or supplemental accounting in addition to that provided for above where such do not conflict with those prescribed by the applicable federal regulatory agency.

101 Filing of Annual Reports

1. Deadline

Every regulated utility shall file on or before May 1st of each year an annual report on the published form of the Commission or a form approved by the Commission. The annual report form is accessible on the Commission's website or by contacting the Executive Secretary of the Commission. All annual reports are available for public inspection and copying except for information contained therein which is confidential or otherwise exempt from public disclosure pursuant to applicable law.

Utilities making reports to any federal agency may file a copy of such report in lieu of the report herein required if such report contains generally the same information required by the Commission. Such reports shall be filed not later than the date required by the federal agency.

2. Failing to Timely File

Failure to timely file the required annual report may result in appropriate sanctions imposed by the Commission.

Chapter 17 Fuel Adjustment Clauses or Riders

Rule 17

100 Recovery of Cost

Electric utilities shall be permitted to recover the ultimate cost of fuel burned or consumed in electric generating facilities, together with the cost of purchased energy through the filing of fuel adjustment clauses or riders to its schedules of rates and charges.

101 Allowable Cost

The cost of fuel allowable for inclusion in a fuel adjustment clause or rider shall be the cost of fossil and nuclear fuel consumed in the utility's own plants and the utility's share of fossil and nuclear fuel consumed in jointly owned or leased plants.

1. Fossil Fuel

The cost of fossil fuel shall include the following:

- a. Invoice price of fuel less any cash or other discounts.
- b. Freight, switching, demurrage and other transportation charges, not including, however, any charges for unloading from the shipping medium.
- c. Excise taxes, purchasing agent's Commission, insurance and other expenses directly assignable to cost of fuel.
- d. Operating, maintenance and depreciation expenses and ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point.
- e. Lease or rental costs of transportation equipment used to transport fuel from the point of acquisition to the unloading point. In addition thereto, fuel cost may include direct costs associated with burning the fuel at the generating plan such as fuel handling expenses and the cost sampling and analysis.

2. Nuclear Fuel

The cost of nuclear fuel shall include the following items:

- a. The amortization of the net cost of nuclear fuel assemblies used in the production of energy. The net cost of nuclear fuel assemblies subject to amortization shall be the cost of nuclear fuel assemblies plus or less the expected net salvage of uranium, plutonium and other by-products and unburned fuel. The utility shall adopt the necessary procedures to assure that charges to this account are distributed according to the thermal energy produced in such periods.
- b. The cost involved when fuel is leased.
- c. The cost of other fuels, used for ancillary steam facilities, including super heat.

- d. Fuel cost shall be debited or credited as appropriated for significant changes in the amounts estimated as the net salvage value of uranium, plutonium and other by-products and the amount realized upon the final disposition of the materials. Significant declines in the estimated realizable value of such items may be recognized at the time of market price declines. When the declining change occurs while the fuel is recorded in the Nuclear Fuel Assemblies in Reactor Account, the effect shall be amortized over the remaining life of the fuel.
- No expense for fossil fuel which has already been included in the cost of fossil fuel shall be included.

102 Purchased Energy

The cost of purchased energy shall include:

1. The actual identifiable fossil and nuclear fuel costs associated with energy purchased for reasons other than identified in paragraph (2) below.
2. The net energy cost of energy purchased exclusive of capacity or demand charges (irrespective of the designation assigned to such transaction) when such energy is purchased on economic dispatch basis. Included therein may be such costs as the charges for economy energy purchased and the charges as a result of scheduled outages, all such kinds of energy being purchased by the buyer to substitute for its own higher cost energy.
3. All costs, net of costs associated with interconnection or otherwise recovered from a qualifying facility, incurred by an electric utility for purchases of power and/or energy from a qualifying facility pursuant to a standard rate for purchase or other legally enforceable obligations as provided in the rules of the Commission governing cogeneration and small power production, and less.
4. The cost of fossil and nuclear fuel recovered through inter-system sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

103 Excludable Cost

Whenever an electric utility purchases fuel for generation from a corporation or company which is owned in whole or in part by the electric utility or its parent company, the following items of cost, heretofore properly included in fuel adjustment calculations, are ineligible after July 1, 1978, for inclusion in its fuel adjustment clause or rider, even though such items of cost may be included in the invoice price paid for such fuel:

1. Interest costs of financing fuel inventories.
2. Interest in investment and storage facilities.
3. Storage, operating and maintenance expenses (including depreciation; insurance; rentals; repairs and maintenance; and taxes).

4. Fuel handling expenses (loading and unloading) except as described in paragraph B(1) above.
5. Administrative and general: (Salaries; welfare; expenses of officers and employees; franchise tax; office overhead).
6. Miscellaneous expenses (including outside services; insurance on inventory; and other).

104 Total Energy Cost

When application is made by an electric utility proposing to change its schedules of rates and charges and include therein a fuel adjustment clause or rider, its total energy cost, including costs of fuel and purchased energy may be included in its base rates for electric service.

Chapter 18 Purchased Gas Adjustment Provision

Rule 18

100 Allowable Costs

The specified costs which a public utility distributing gas shall be allowed to recover in its purchased gas adjustment clause (PGA) for retail billings include:

1. Any increase or decrease in the cost of gas per unit sold (including but not limited to applicable transportation charges and BTU adjustments) over or under the cost of gas recovered per unit sold under the rate schedules to which such PGA shall apply.
2. Adjustments for municipal franchise tax (gross receipts tax) and other tax adjustments resulting from or arising in connection with any increase or decrease in the utility's cost of gas.
3. Such other costs as may be approved by the Commission. Purchased gas adjustment clauses heretofore approved by the Commission may be continued in full force and effect subject to the provisions of the Act.

Chapter 19 Fuel Procurement and Use

Rule 19

100 Standards for Procurement and Use of Fuel

In procuring and using fuel in the generation of electricity, the utility shall procure such fuel at the lowest and best price available after giving effect to the reliability and ability of the supplier to furnish fuel in adequate quantities and fuel of a quality adequate to meet boiler specifications and environmental requirements over the life of the plant and the adequacy of transportation facilities needed to assure delivery of fuel to the plant site on schedule needed to meet the fuel requirements of efficient and reliable operation of generating plants.

Chapter 20 Advertising Expenses

Rule 20

100 General

For the purpose of this rule "advertising" means the commercial use, by a public utility, of any media, including newspaper, printed matter, radio, television, telephone, telecopier, etc., in order to transmit a message to a substantial number of members of the public or of such utility's customers.

101 Political Advertising

No public utility, excepting utilities excluded from rate regulation pursuant to Miss. Code Ann. §77-3-5, shall be permitted to recover from its ratepayers any direct or indirect expenditure made by such utility for political advertising as defined herein. For the purposes of this paragraph, "political advertising" means any advertising for the purpose of influencing public opinion with respect to legislative, administrative or electoral matters, or with respect to any controversial issue of public importance.

102 Promotional Advertising

Except to the extent authorized by these rules or other orders of this Commission, no utility, excepting utilities excluded from rate regulation pursuant to Miss. Code Ann. §77-3-5, shall be permitted to recover from its ratepayers any direct or indirect expense for promotional or institutional advertising. For the purpose of this rule "promotional advertising" means any advertising for the purpose of encouraging any person to select or use the service or additional service of any utility or the selection or installation of any appliance or equipment designed to use such utility's service; and "institutional advertising" means any advertising for the purpose of promoting the general image of a public utility in the community.

103 Associated Costs

The reasonable cost of the following types of promotional and institutional advertising may be recovered as part of the cost of service:

1. Advertising to acquaint the public with new services and advertising designed to assist customers in making efficient and economical use of existing services.
2. Advertising intended to promote conservation of energy.
3. Advertising required by law or regulation.
4. Advertising regarding service interruptions, safety measures or emergency conditions.
5. Advertising concerning employment opportunities with such utility.
6. Any advertising which has been specifically reviewed and approved by the Commission prior to its release.

The utility shall have the burden of establishing the reasonableness of the amount sought to be allowed for advertising expenses and the prudence of the advertisement programs.

Chapter 21 Rate Base, Operating Expenses and Rate of Return

Rule 21

100 General

In regulating the rates of any public utility subject to the provisions of this rule, the Commission shall, on hearing after reasonable notice, ascertain and fix the rate base of the property of the public utility in such a manner as to be fair both to the public utility and to the consumer, when the same is relevant or material to the exercise of the jurisdiction of the Commission. The Commission shall make readjustments from time to time, and ascertain the cost of all new construction, extensions and additions to the property of every public utility.

101 Rate Base Considerations

In arriving at such a rate base, the Commission shall give due consideration to:

1. The reasonable original costs of the property used and useful, or to be used and useful within a reasonable time after the test period;
2. The portion of the cost which has been consumed by previous use recovered by depreciation expense;
3. The allowance for funds used during construction, not to exceed on borrowed funds the true net interest cost of such funds, computed according to the actuarial method, and, on the equity component thereof, a rate of return granted on common equity in the last rate proceeding of the subject utility before the Commission, or if such rate has not been established within the preceding three (3) years, then the average rate of return actually earned on equity during the preceding three (3) years. In connection with such calculations, compliance with the rules of any federal agency having jurisdiction over the subject utility may be deemed sufficient compliance with this rule;
4. Any other items proposed by the utility in a rate case; and
5. Other elements which are deemed by the Commission to be material in determining the rate base for ratemaking purposes.

102 Test Period

The test period for measuring a public utility's rate base may be the twelve (12) month period beginning with the proposed effective date of the new rates set forth in the Notice of Intent.

103 Inclusions and Exclusions

1. Donated Property

The rate base shall not include property donated to such utility without any consideration nor shall operating expenses include depreciation of such donated property.

2. Operating Expenses

The allowable operating expenses of a utility for ratemaking purposes shall include all necessary, prudent and reasonable expenses incurred or to be incurred in the rendition of the utility's service.

3. Specific Expense Items

The following expenditures are not considered allowable operating expenses:

- a.** Any interest such utility paid, or credited, to its consumers in connection with refunds in a rate proceeding in which its rates were finally determined to be excessive.
- b.** The cost of legislative-advocacy expenses.
- c.** Expenditures for business gifts and entertainment that the Commission determines not to be in the public interest.
- d.** Expenditures of any kind which the Commission determines not to have been prudently incurred or not incurred in the interest of the public.

104 Determination of a Fair Rate of Return

The fair rate of return for a public utility may be arrived at by considering a number of factors, and it cannot be determined by any specific formula, except as provided for in Miss. Code Ann. §77-3-2. However, the basic factors to be considered in arriving at the overall required rate of return are (1) the cost of debt capital, (2) the cost of preferred stock capital and (3) the cost of equity capital. The capital costs of a public utility shall be determined based on evidence of the appropriate costs for the utility's debt capital, preferred stock capital and equity capital. The overall cost of capital may be determined as weighted average of the appropriate costs of these various types of capital.

Chapter 22 Charitable or Civic Contributions

Rule 22

100 General

Reasonable charitable or civic contributions shall be allowed as cost of service; however, the Commission shall not allow as cost of service for rate-making purposes any expenditures which it determines not to be reasonable, prudent or in the public interest. Due to the varied sizes and operations of the utilities regulated by the Commission, contributions will be studied individually to determine allowance as cost of service.

The CLEC shall retain an adequate number of personnel able to process all local service requests received prior to the final discontinuance date.

105 Disconnection of CLEC by ILEC

1. Good Faith Action Required

All ILECs and CLECs must make a good faith effort to work together in determining what portion, if any, of its bill for resale or unbundled network elements provided by the ILEC to the CLEC is disputed and which portion is undisputed. The ILEC shall work with the CLEC to resolve the billing dispute and arrange for payment of the

outstanding charges, pursuant to the Interconnection Agreement entered into between the ILEC and the CLEC.

2. Notice of Intent to Terminate or Deny Service

All ILECs must send to the CLEC a notice of intent to terminate or deny services to the CLEC for non-payment of undisputed charges. A copy of the notice shall be provided to the Executive Secretary of the Commission. The failure of the Commission to receive timely notice shall constitute rebuttable presumption of unlawful termination. All ILECs must state the following in the content of the notice:

- a.** The name and address and account number of the CLEC;
- b.** A plain statement of the grounds upon which the right to disconnect or denial is founded, including the amount owed; and,
- c.** The exact date or range of dates service will be discontinued.

3. Restriction on Disconnection or Denial of Service

ILECs must not disconnect or deny service to the CLEC prior to the date (or range of dates) given on the notice of intent to terminate. In no case shall disconnection be effected less than thirty (30) calendar days from the date the ILEC mails the notice to terminate service to the CLEC. If the last day of the thirty (30) day notice period falls on a Saturday, Sunday or legal holiday, the notice period will expire at the close of the ILEC's next business day. In order to ensure that the interests of customers are adequately protected during the termination of service to a CLEC for non-payment of charges, the Executive Secretary of the Commission shall have the authority, in order to further the public interest, to issue directives to ILECs and CLECs to effectuate the intent of this Rule.

4. Duties of CLEC

Within five (5) business days after the notice from the ILEC is received by the CLEC, the CLEC shall fax and file by certified mail to the Executive Secretary of the Commission, a notarized affidavit (Exhibit A) verifying one (1) of the following:

- a.** The Company can and will pay the undisputed amount owed to the underlying carrier at least five calendar days prior to the disconnect date;
- b.** The Company will mail notice of disconnection, as described herein, to its customers at least twenty (20) calendar days prior to disconnection.

5. Requirement of Spreadsheet

The CLEC shall also file a spreadsheet containing a list of customer names, addresses, and telephone numbers under seal, within (five) 5 business days after the notice to disconnect is received by the CLEC. The list shall specifically identify those end user customers who are public utilities or agencies, governmental agencies, inmate facilities or hospitals. If the CLEC is facilities based, the required list shall also include:

- a.** Circuit ids,

- b. Cable pair identification,
- c. A statement of authorization allowing the new local service provider to complete the number portability migration process required for transfer of local exchange service to another local service provider; and

The required information shall be used to facilitate the transfer of the end user customers to their new local service provider.

6. Administrative Cancellation of Certificates

A CLEC that is found to have ceased providing local exchange telecommunications services to its customers in Mississippi without providing notice to the Commission and to its customers under this Rule shall be in violation of this Rule, and its certificate may be administratively cancelled.

7. Penalties

Any willful or intentional violation of this Rule may subject the telecommunications service provider to a penalty not to exceed \$5,000.00 for each day for each violation. Violations may also constitute grounds for forfeiture of a CLECs Certificate of Operations to provide service in Mississippi.

These sections set forth the Commission's rules governing the form and content of requests for declaratory opinions, and the procedures of the Commission regarding the requests, as required by Miss. Code Ann. §25-43-2.103.

101 Persons Who May Request Declaratory Opinions

Any person having a substantial interest in the subject matter may make a written request of the Commission for a declaratory opinion by complying with these rules.

“Substantial interest in the subject matter” includes but is not limited to, any person which will be substantially and directly affected in the subject matter, its outcome or otherwise possessing a substantial interest.

102 Scope of Declaratory Opinions

The Commission will issue declaratory opinions regarding the applicability to specified facts of: (a) a statute administered or enforceable by the Commission, (b) a rule promulgated by the Commission, or (c) an order issued by the Commission.

The Commission will not issue a declaratory opinion regarding a statute, rule or order which is beyond its jurisdiction.

The Executive Director of the Staff, upon the request of the Commission, may have the Staff prepare declaratory opinions on behalf of and for the Commission.

103 Circumstances in which Declaratory Opinions May Not Be Issued

The Commission may, for good cause, refuse to issue a declaratory opinion. Without limiting the generality of the foregoing, the circumstances in which declaratory opinions may not be issued include, but are not necessarily limited to:

1. Lack of jurisdiction;
2. Lack of sufficient clarity of the issues presented;
3. Pending or anticipated litigation, prosecution, administrative action, or other adjudication which may either answer the question presented by the request or otherwise make an answer unnecessary;
4. The statute, rule, or order on which a declaratory opinion is sought is clear and not in need of interpretation to answer the question presented by the request;
5. The facts presented in the request are not sufficient to answer the question presented;

6. The request fails to contain information required by these rules or the requestor failed to follow the procedures set forth in these rules;
7. The request seeks to resolve issues which have become moot, or are abstract or hypothetical such that the requestor is not substantially affected by the rule, statute or order on which a declaratory opinion is sought;
8. No controversy exists concerning the issue as the requestor is not faced with existing facts or those certain to arise which raise a question concerning the application of the statute, rule, or order;
9. The question presented by the request concerns the legal validity of a statute, rule or order;
10. The requestor has not suffered an injury or threatened injury fairly traceable to the application of the statute, rule or order;
11. The request is not based upon facts calculated to aid in the planning of future conduct, but is instead based on past conduct in an effort to establish the effect of that conduct;
12. No clear answer is determinable;
13. The question presented by the request involves the application of a criminal statute or sets of facts which may constitute a crime;
14. The answer to the question presented would require the disclosure of information which is privileged or otherwise protected by law from disclosure;
15. The question is currently the subject of an Attorney General's opinion request or has been answered by an Attorney General's opinion;
16. The request is speculative or purely hypothetical and does not involve an actual situation;
17. The request is frivolous;
18. Where such opinion may adversely affect the interests of the State, the Commission, or any of their officers or employees in any litigation which is pending or may reasonably be expected to arise;
19. Where a similar request is pending before the Commission or any other agency or a proceeding is pending on the same subject matter before any agency, administrative or judicial tribunal, or where such an opinion would constitute the unauthorized practice of law;

20. The request raises issues involving certification or rate matters as there exists a statutory or regulatory process by which certification and rate matters are determined; and
21. For other good cause stated by the Commission.

104 Questions of Law

Where a request for a declaratory opinion involves a question of law, the Commission may refer the matter to the State Attorney General.

105 Notification of Decision to Decline to Issue a Declaratory Opinion

In the event the Commission declines to issue a declaratory opinion, the requester shall be notified in writing that the request for a declaratory opinion was denied and the reasons therefore shall be specified.

106 Form and Content of Request

1. Number Required

The original and four copies of the request shall be submitted to the Commission.

2. Specifications

The signed request must be printed or typewritten or be in legible handwriting submitted on 8½ by 11 inch paper. The request may be in the form of a letter or may be in the form of a pleading. The request and envelope must clearly designate that a request for a declaratory opinion is sought. Oral, electronic and telephone requests are unacceptable.

107 Methods of Delivery

1. To Commission

A written request of the Commission shall be mailed to the Executive Secretary, Mississippi Public Service Commission, P.O. The Staff shall report the results of its investigation to the Commission in writing. A copy of the Staff report shall be provided to the utility and all parties of record.
