Preface

Secondary Introduction to Agriscience Research Synopsis

Articles, books, Web sites, and other materials listed at the end of each unit were considered during the revision process. Career Cluster Resources for Agriculture, Food, and Natural Resources, Successful Farming, Progressive Farmer, and Journal of Agricultural Education were especially useful in providing insight into trends and issues in the field. These references are suggested for use by instructors and students during the study of the topics outlined.

Industry advisory team members from schools throughout the state were asked to give input related to changes to be made to the curriculum framework. Specific comments related to soft skills needed in this program included punctuality, motivation, communication, leadership, and positive attitude. Occupation-specific skills stated included mechanical reasoning, math, general computer, and welding. Safety practices emphasized included general farm safety.

Instructors from schools throughout the state were also asked to give input on changes to be made to the curriculum framework. Changes suggested for the curriculum included more specificity and less repetition in competencies and objectives, less time spent on the scientific method since students have studied the concepts since elementary school, and covering biotechnology earlier in the program.

Curriculum

The following state/national standards were referenced in each course of the curriculum:

- Mississippi Department of Education Subject Area Testing Program Academic Standards
- 21st Century Skills
- Career Cluster Resources for Agriculture, Food, and Natural Resources as published by the National Association of State Directors of Career and Technical Education

Industry and instructor comments, along with current research, were considered by the curriculum revision team during the revision process; and changes were made as needed and appropriate. Many of the skills and topics noted in the research were already included in the curriculum framework. Specific changes made to the curriculum at the March 6-8, 2006, curriculum revision meeting included:

- Competencies and objectives were reviewed to ensure accuracy and appropriateness. Some were rewritten to provide broader competencies and more specific, measurable objectives. Where appropriate, competencies were combined to ensure clarity and minimize repetition.
- Suggested teaching and assessment strategies were added that incorporate preassessment, introductory and closure material, varied projects, mastery learning, and the use of various forms of technology. The integration of workplace and academic skills including math, science, English, and history was also documented.
- The units Introduction to Agriscience and Opportunities in Agriscience were combined into an introductory unit including information about careers and appropriate soft skills.
- The unit Introduction to Agriscience Lab and Safety was expanded to include a discussion of laboratory safety and the scientific method.
• The unit Principles of Soil Science was expanded to include environmental and natural resources and was renamed Principles of Environmental and Natural Resources.
• The unit Introduction to Biotechnology was moved forward in the curriculum so that the information on biotechnology was covered prior to other topics in agriculture because so much information in these units is related to advances with biotechnology.
• The Recommended Tools and Equipment list was updated.

Assessment
Students will not be assessed with a MS-CPAS2 or licensure test since the program is classified as an enrichment program. Students’ grades will be used to determine mastery in this program.

Professional Learning
It is suggested that instructors participate in professional learning related to the following concepts:
• Demonstration of varied teaching and assessment strategies by other agriculture teachers
• Biotechnology and laboratory technique (including lab specimen production) demonstrations by other agriculture teachers and scientific supply company representatives
• Availability of postsecondary educational programs and employment opportunities for students
• Use of the Mississippi Agriculture Education BRIDGE site on Blackboard®
• Differentiated instruction—To learn more about differentiated instruction, please go to http://www.paec.org/teacher2teacher/additional_subjects.html and click on Differentiated Instruction. Work through this online course and review the additional resources.
Foreword

Secondary vocational-technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of competency as documented through both formative and summative assessments.

The courses in this document reflect the statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, §14; Laws, 1991, ch. 423, §1; Laws, 1992, ch. 519, §4 eff. from and after July 1, 1992; Carl D. Perkins Vocational Education Act III, 1998; and No Child Left Behind Act of 2001).

Each secondary vocational-technical course consists of a series of instructional units which focus on a common theme. All units have been written using a common format which includes the following components:

- **Unit Number and Title**
- **Suggested Time on Task**—An estimated number of clock hours of instruction that should be required to teach the competencies and objectives of the unit. A minimum of 140 hours of instruction is required for each Carnegie unit credit. The curriculum framework should account for approximately 75-80 percent of the time in the course.
- **Competencies and Suggested Objectives**
  - A competency represents a general concept or performance that students are expected to master as a requirement for satisfactorily completing a unit. Students will be expected to receive instruction on all competencies.
  - The suggested objectives represent the enabling and supporting knowledge and performances that will indicate mastery of the competency at the course level.
- **Suggested Teaching Strategies**—This section of each unit indicates strategies that can be used to enable students to master each competency. Emphasis has been placed on strategies which reflect active learning methodologies. Teachers should feel free to modify or enhance these suggestions based on needs of their students and resources available in order to provide optimum learning experiences for their students.
- **Suggested Assessment Strategies**—This section indicates strategies that can be used to measure student mastery. Examples of suggested strategies could include rubrics, class participation, reflection, and journaling. Again, teachers should feel free to modify or enhance these suggested assessment strategies based on local needs and resources.
Integrated Academic Topics, Workplace Skills, Technology Standards, and Occupational Standards - This section identifies related academic topics as required in the Subject Area Assessment Program (SATP) in Algebra I, Biology I, English II, and U.S. History from 1877, which are integrated into the content of the unit. It also identifies the 21st Century Skills, which were developed by the Partnership for 21st Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21st Century Skills addresses learning skills needed in the 21st century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. The need for these types of skills has been recognized for some time and the 21st Century Skills are adapted in part from the 1991 report from the U.S. Secretary of Labor’s Commission on Achieving Necessary Skills (SCANS). Another important aspect of learning and working in the 21st century involves technology skills, and the International Society for Technology in Education, developers of the National Educational Technology Standards (NETS), were strategic partners in the Partnership for 21st Century Skills.

References - A list of suggested references is provided for each unit. The list includes some of the primary instructional resources that may be used to teach the competencies and suggested objectives. Again, these resources are suggested and the list may be modified or enhanced based on needs and abilities of students and on available resources.

Program Description

Introduction to Agriscience serves as an introduction to the science of agriculture and will provide a solid foundation for advanced agriscience classes or for additional agriculture/science classes. Students will be introduced to agricultural science topics including biotechnology, animal science, mechanical technology, food science, plant science, environmental and natural resources, and entomology. These concepts are taught through classroom and laboratory instruction and applications such as the Supervised Agricultural Experience Program (SAE) and FFA Career Development Activities. This program will utilize the problem-solving method of instruction and will rely upon the agricultural information systems, including the Internet. Leadership, citizenship, and cooperation skills are taught through participation in FFA activities. The FFA is an intra-curricular vocational student organization designed to provide a learning laboratory for the implementation of this curriculum.

Introduction to Agriscience is intended to be a one-year course of study. Students completing the course will receive one Carnegie unit for science and an additional 0.5 Carnegie unit for completion of the Supervised Agricultural Experience (SAE).

Industry standards referenced are from the Career Cluster Resources for Agriculture, Food, and Natural Resources, National Association of State Directors of Career and Technical Education.
Course Outline

Introduction to Agriscience
Course CIP Code: 02.9990

Course Description: Introduction to Agriscience is the entry-level course of the secondary Agriscience program. Students in Introduction to Agriscience will gain foundation competencies related to agriscience opportunities and careers, safety and the scientific method, human relations/leadership/FFA activities, supervised agricultural experience (SAE), biotechnology, animal science, mechanical technology, food and fiber science, plant science, environmental and natural resources, and entomology. (1-1½ Carnegie units, depending upon time spent in the course)

## Introduction to Agriscience

### Unit 1: Introduction to Agriscience Opportunities and Careers (10 hours)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
</table>
| 1. Introduce concepts and terms associated with agriculture, science, and agriscience. | **Teaching:**  
  - Introduce the career field, and discuss job requirements (e.g., certifications and education) and occupation-specific and soft skills needed. Lead students in a discussion about what they know about the field, the types of jobs available, and the salaries of those jobs.  
  - Outline the units of the program and how they relate to various jobs in the field.  
  - Use a multiple learning styles inventory to determine students’ learning styles and interests. Share with the students their styles and the impact they have. Throughout the year, provide varied projects to meet the learning styles.  
  - Work with the Special Populations instructor to assess the reading, writing, and math skills of each student and to provide materials that are appropriate for each student. Plan to reassess students at the end of the year.  
  - Divide students into groups based on learning styles, and have them use the Internet or textbooks to research the development of the field, origination of terms, and the terms used in different countries throughout the world. Have students present their findings by developing a dictionary, writing and conducting a mock training session for new employees, or making a videotape or tape recording.  
  - Monitors student participation in group discussions using the Group Participation Assessment Rubric located in Appendix D.  
  - Evaluate each group’s project and presentation for content, clarity, and length. |
| 2. Investigate the major areas of agriculture. a. Examine major areas of agriculture. | **Teaching:**  
  - Use information from the U.S. Department |
agricultural processing, agricultural production, agricultural mechanics, agribusiness/supplies and services, forestry, natural resources, horticulture, entomology, aquaculture, animal science, and plant science.

b. Describe the importance of the areas in society.

c. Discuss the economic impact of the areas in local, state, national, and global economies.

<table>
<thead>
<tr>
<th>3. Connect major sciences supporting agriscience.</th>
<th>of Labor to describe the major areas of agriculture, related occupations and their expected growth, and salaries of a variety of jobs in the field.</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Examine concepts of biology, chemistry, biochemistry, physical sciences, and biotechnology.</td>
<td>Divide students into groups, and have each group construct a presentation such as a poster, collage, role-play, or multimedia presentation outlining assigned area(s). Have each group present their information for peer review.</td>
</tr>
<tr>
<td>b. Relate the use of concepts of pure science to the use of concepts of agriscience.</td>
<td>Have each student develop at least one question for each group based on their presentation.</td>
</tr>
</tbody>
</table>

**Assessment:**
- Evaluate the presentation using the Group Presentation Assessment Rubric located in Appendix D.
- Assess that each student asks questions to the groups.

<table>
<thead>
<tr>
<th>Teaching:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduce the students to the different areas of pure science such as biology, chemistry, and physics. Ask students to describe the concepts taught in pure sciences based on knowledge acquired in their academic courses.</td>
<td></td>
</tr>
<tr>
<td>Describe to the students the different areas of applied sciences in agriculture such as genetics, crop science, soil science, animal science, and biotechnology. Discuss how these applied sciences relate to the pure sciences.</td>
<td></td>
</tr>
<tr>
<td>Have students interview people working in various fields of agriculture to determine which high school and college courses (especially sciences) were most useful to them in their work today and why.</td>
<td></td>
</tr>
<tr>
<td>Have each student summarize the interview and prepare a poster or other visual product. Combine all products to form a collage.</td>
<td></td>
</tr>
</tbody>
</table>

**Assessment:**
- Evaluate the interview activity for conduct and information gathered.
- Evaluate the poster or other product for content and neatness using the Poster...
4. Investigate current trends occurring in agriscience.
   a. Investigate precision agriculture.
   b. Investigate niche farming, such as organic farming and alternative animal agriculture.
   c. Investigate animal tracking.
   d. Investigate country of origin labeling.

<table>
<thead>
<tr>
<th><strong>Teaching:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Discuss new and emerging technologies, practices, trends, and issues associated with the field, using videos and a multimedia presentation if available. Ask students how developments throughout history have impacted how people live and work.</td>
</tr>
<tr>
<td>Take students on a field trip to a local industry to observe the use of various types of technology.</td>
</tr>
<tr>
<td>Have students work in groups based on their learning styles and use the Internet and current publications to research one new and emerging technology, practice, trend, or issue.</td>
</tr>
<tr>
<td>Have students use the research to develop an idea for a new product, prepare, and deliver a presentation according to the preferred learning styles in order to sell the idea to a company (the class). Students may use technology to prepare brochures, posters, or handouts to distribute during a multimedia presentation; create a commercial and act it out; or develop a newspaper advertisement.</td>
</tr>
<tr>
<td>Have the class self-evaluate their own work and peer-evaluate their classmates’ work.</td>
</tr>
<tr>
<td>Have each student select the one product that he or she thinks is most likely to be successful in the market and prepare a brief report justifying the product chosen and explaining the expected impact of the product on the field.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Assessment:</strong></th>

</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>
c. Prepare a job application and cover letter.
d. Participate in a role-play interview.

• Have each student use the Internet or newspapers to choose a job for which they are qualified and prepare a resume and cover letter that can be used to apply for the selected job.
• Discuss appropriate interview techniques and have the students participate in mock interviews with local personnel working in administrative positions. Have students send thank you notes to mock interviewers.
• To provide closure to each unit throughout the year, have students summarize what they have learned about the topic covered and place the summaries in a notebook. Review the notebooks at the end of each unit and reteach as appropriate to ensure mastery.

Assessment:
• Evaluate the resume, cover letter, and mock interview using the Resume Rubric and Interview Rubric located in Appendix D.
• Review summary of unit for understanding of material and reteach as needed.

STANDARDS

Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, Career Cluster Resources for Agriculture, Food, and Natural Resources. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

LEA1 Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2 Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.
ELR1 Know and understand the importance of professional ethics and legal responsibilities.
ELR2 Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.
**Academic Standards**

E1—Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.

E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.

E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.

E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.

E5—Complete oral and written presentations which exhibit interaction and consensus within a group.

E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.

E10—Use language and critical thinking strategies to serve as tools for learning.

H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.

H2—Describe the impact of science and technology on the historical development of the United States in the global community.

H3—Describe the relationship of people, places, and environments through time.

H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).

H5—Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

**21st Century Skills**

CS1—Global Awareness

CS2—Financial, Economic, and Business Literacy

CS3—Civic Literacy

CS4—Information and Communication Skills

CS5—Thinking and Problem-Solving Skills

CS6—Interpersonal and Self-Directional Skills

**SUGGESTED REFERENCES**

**Secondary Introduction to Agriscience**

**Introduction to Agriscience**  
Unit 2: Introduction to Agriscience Lab Safety and the Scientific Method ———— (10 hours)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
</table>
| 1. Analyze the basic rules of safety in the agriscience laboratory.  
  a. Discuss safe and proper use of chemicals, heat and fire, laboratory equipment, specimens and animals, and electrical equipment.  
  b. Utilize procedures for reporting an accident.  
  c. Examine the “Hazardous Communications Acts” and the “Worker Protection Act” as applied to agricultural occupations.  
  d. Illustrate the use of a Materials Safety Data Sheet (MSDS). | Teaching:  
  • Show students videos demonstrating examples of accidents in the workplace. Pre-assess knowledge of safety by having each student write a summary of the safety violations present in the videos.  
  • Have an industry speaker present to the class general safety procedures, the necessity of safety in the work environment, and his or her company’s safety policy, or invite a representative from Farm Bureau to present their safety program.  
  • Lead the class in developing safety policies for the classroom based on industry policies. Discuss and demonstrate terms, rules, and procedures related to laboratory and industry safety, including chemical safety, heat and fire safety, laboratory equipment safety, working safely with specimens and animals, electrical equipment safety, and reporting accidents.  
  • Divide students into groups based on learning styles, and assign each group a guideline for personal and laboratory safety (i.e., chemicals, fire, equipment, animals, and electrical) or general laboratory conduct. Have each group role-play, create a multimedia presentation or a rap song, or write a story to discuss the proper and improper procedures related to the guideline.  
  • Have each student read and summarize the “Hazardous Communications Acts” and “Worker Protection Act.”  
  • Describe the components of a MSDS sheet.  
  • Have each student prepare a MSDS sheet for a chemical whose description you provide. |
<table>
<thead>
<tr>
<th>2. Demonstrate all safety equipment in the agriscience laboratory.</th>
</tr>
</thead>
</table>
| **Assessment:**  
| - Evaluate the pre-assessment for accuracy.  
| - Have students self-evaluate and peer-evaluate guideline project.  
| - Evaluate the summary of the safety acts.  
| - Review the MSDS sheet completion for accuracy and neatness. |
| **Teaching:**  
| - Identify all safety equipment in the agriscience laboratory and demonstrate proper use.  
| - Describe key school and program policies and safety procedures to the class based on industry standards and requirements (may use the school handbook and any program-specific information). Introduce workplace skills (SCANS) and how they will be used to relate the classroom work to meet industry requirements.  
| - Have students work in groups to develop an advertisement for an assigned piece of safety equipment and present the advertisement to the class. Have each student peer-review the advertisements. |
| **Assessment:**  
| - Evaluate the advertisement for creativity, neatness, and accuracy. |

| 3. Practice safety concepts in laboratory activities:  
| a. Use appropriate precautions when working with electrical applications, fire, poisons, and gas.  
| b. Protect hands and eyes.  
| c. Wear proper clothing for protection.  
| d. Safely work with animals and plants.  
<table>
<thead>
<tr>
<th>e. Take steps to prevent explosion danger.</th>
</tr>
</thead>
</table>
| **Teaching:**  
| - Lead the students on a tour of the facilities. Discuss and demonstrate general safety procedures for the facilities.  
| - Lead a class discussion and demonstration on electrical, hand, poison, eye, fire, gas, animal, and plant safety as well as clothing protection and the prevention of explosions. Have the students answer questions on proper procedures for each area.  
| - Emphasize the importance of safety, and explain that the use of safe practices will be assessed throughout the program. |
| **Assessment:**  
| - Observe student participation in class discussions using the Group Participation Assessment Rubric located in Appendix D.  
| - Evaluate students’ demonstration of proper practice. |
4. Examine terms and concepts associated with the scientific method.

**Teaching:**
- Present an interactive lecture on the terms associated with the scientific method, and have students take notes.
- Lead students in a discussion of the importance of the scientific method as it relates to agriculture.
- Place students in cooperative learning groups and have them list at least three agriculture problems that can be solved using the scientific method. They may relate these problems to historical problems by using the Internet to search past problems. Have students present their findings to the class.

**Assessment:**
- Assess student presentations using the Group Presentation Assessment Rubric located in Appendix D.

---

5. Describe each step of the scientific method.
- a. Identify the problem.
- b. Gather data.
- c. Formulate possible solutions.
- d. Implement the preferred solutions.
- e. Evaluate the results.

**Teaching:**
- Give students a laboratory report outlining an actual scientific experiment. Have students identify the steps of the scientific method in order to preassess their knowledge.
- Based on student knowledge, present information about the steps of the scientific method as applied to an agriculture problem.
- Divide students into groups and have them use the Internet and other resources to research the history of the scientific method. Have each group develop a diagram, report, or bulletin board based on their findings.
- Have each student identify a problem in agriculture today that he or she could study and outline the steps needed to investigate the problem.

**Assessment:**
- Assess student identification of steps for accuracy.
- Evaluate history products for content and appearance.
- Assess problem and steps outlined for
6. Apply the scientific method:
   a. Identify the problem or question to be answered.
   b. Gather data related to the problem or question.
   c. Formulate possible solutions.
   d. Implement one or a combination of several solutions.
   e. Evaluate the results and pursue further research as needed.

Teaching:
- Discuss with students people, materials, and other resources available to them for solving a scientific problem.
- Have each student investigate the problem he or she outlined and determine a possible solution. Have each student present their problem, steps, and solution to the class.
- Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

Assessment:
- Evaluate the presentation using the Presentation Checklist located in Appendix D.
- Review notes and summary of unit for understanding of material and reteach as needed.

STANDARDS

Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, Career Cluster Resources for Agriculture, Food, and Natural Resources. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

LEA1 Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2 Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.
ELR1 Know and understand the importance of professional ethics and legal responsibilities.
ELR2 Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.
ANM1 Apply knowledge of anatomy and physiology to produce and/or manage animals in a domesticated or natural environment.
ANM2 Recognize animal behaviors to facilitate working with animals safely.
TET1 Use tools, equipment, machinery, and technology to work in areas related to AFNR.
PWR2 Apply principles of operation and maintenance to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
PWR3 Apply principles of service and repair to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
ENV3 Apply scientific principles to environmental services.
Academic Standards

B1—Utilize critical thinking and scientific problem solving in designing and performing biological research and experimentation.
E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E5—Complete oral and written presentations which exhibit interaction and consensus within a group.
E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10—Use language and critical thinking strategies to serve as tools for learning.
H2—Describe the impact of science and technology on the historical development of the United States in the global community.
H3—Describe the relationship of people, places, and environments through time.
H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).

21st Century Skills

CS1—Global Awareness
CS2—Financial, Economic, and Business Literacy
CS3—Civic Literacy
CS4—Information and Communication Skills
CS5—Thinking and Problem-Solving Skills
CS6—Interpersonal and Self-Directional Skills

SUGGESTED REFERENCES

### Competencies and Suggested Objectives

1. Discuss concepts related to leadership.
   - a. Describe leadership.
   - b. Describe traits of a good leader such as integrity, knowledge, courage, tactfulness, enthusiasm, unselfishness, and loyalty.
   - c. Practice acceptable manners in appropriate places, including introductions, greetings, table manners, and telephone manners.

2. Investigate the FFA organization.
   - a. Describe the history of FFA.
   - b. Contrast degrees of membership.
   - c. State the creed.
   - d. Demonstrate official dress.
   - e. Investigate the emblem and its symbols.

### Suggested Strategies for Competencies

**Teaching:**
- Define the traits of a good leader, including ethics and etiquette as well as related terms, and discuss their importance in the workplace. Include integrity, knowledge, courage, tactfulness, enthusiasm, unselfishness, and loyalty.
- Have a local business owner speak to the class about qualities that an employer looks for in an applicant.
- Have each student score him or herself on a list of personal leadership characteristics as described by the guest speaker or other sources.
- Demonstrate proper greeting of a guest, introductions, table manners, and telephone manners.
- Have students role-play improper manners.
- Have each student identify the improper manners shown and write a summary about how using those manners could affect both the person using improper manners and the person interacting with them.

**Assessment:**
- Review the student list of traits to ensure comprehension.
- Assess student participation in role-play using the Role-Play Rubric in Appendix D.
- Evaluate summaries for content and grammar.

**Teaching:**
- Describe FFA, and provide an overview of opportunities to participate in leadership activities, community service projects, and competitive events.
- Have students work in pairs to explore the FFA website and develop a slide presentation, brochure, or display that includes the motto, creed, emblem, colors, theme, and history of the organization. Also have students research which famous
or successful people were part of the organization.

Discuss with students the election process used in the FFA; compare and contrast this process with the processes used for local, state, and national elections. Emphasize the importance of participating in elections as a part of good citizenship.

Have students participate in local officer elections modeled after the election process. Have officers campaign and prepare posters and a speech. Have members vote by secret ballot.

**Assessment:**
- Evaluate the FFA presentation using the Visual Presentation Checklist in Appendix D.
- Appraise student participation in activities.

### 3. Explain opportunities for leadership development through the FFA.

- Describe contests and awards programs, including proficiency awards and state and American degrees.
- Participate in personal development seminars.
- Participate in leadership activities and/or leadership conferences and conventions.
- Describe national and international exchange programs.
- Plan for educational experience with industry.
- Determine opportunities for participation in personal and community development programs.

<table>
<thead>
<tr>
<th>Teaching</th>
</tr>
</thead>
<tbody>
<tr>
<td>Have students use the FFA Manual, Student Handbook, PowerPoint presentation, FFA organization Web site, Local Program Success Guide, and LifeKnowledge lesson handouts and worksheets to identify and describe the different FFA events, programs, and degrees; explore how each contributes to career advancement and individual achievement.</td>
</tr>
<tr>
<td>Have each student select one or more FFA activities to participate in the coming years(s). Have students keep an ongoing journal of preparation for FFA activities.</td>
</tr>
<tr>
<td>Evaluate the student journal using the Sample Rubric on a Student Journal in Appendix D.</td>
</tr>
</tbody>
</table>

### 4. Participate in parliamentary procedure.

- Define parliamentary terms.
- Introduce a motion.
- Debate amendments.
- Utilize different methods of voting.
- Discuss taps of the gavel.

<table>
<thead>
<tr>
<th>Teaching</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discuss with the students the origin of parliamentary procedure, its purpose in society today, and associated terms.</td>
</tr>
<tr>
<td>Using a chart, electronic presentation, or video, identify and describe the use of the different methods of voting, the procedure for receiving and disposing of a main motion, debating amendments, and taps of</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>
• Have students demonstrate by taking turns in receiving and disposing of a main motion using the different methods for voting.
• Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

Assessment:
• Evaluate the demonstration of parliamentary procedure skill using the Parliamentary Procedure Demonstration Rubric in Appendix D.
• Review summary of unit for understanding of material and reteach as needed.

STANDARDS

Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, Career Cluster Resources for Agriculture, Food, and Natural Resources. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

LEA1—Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2—Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.
ELR1—Know and understand the importance of professional ethics and legal responsibilities.
ELR2—Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.

Academic Standards

E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E5—Complete oral and written presentations which exhibit interaction and consensus within a group.
E6—Explore cultural contributions to the history of the English language and its literature.
E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10—Use language and critical thinking strategies to serve as tools for learning.
H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.
H2—Describe the impact of science and technology on the historical development of the United States in the global community.
H3—Describe the relationship of people, places, and environments through time.
H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).
H5—Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

21st Century Skills

CS1—Global Awareness
CS2—Financial, Economic, and Business Literacy
CS3—Civic Literacy

## Secondary Introduction to Agriscience

### Unit 4: Supervised Agricultural Experience (SAE) in Agriscience (10 hours)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. Describe the purposes and requirements of the SAE:</strong></td>
<td><strong>Teaching:</strong></td>
</tr>
<tr>
<td>a. Establish objectives for the SAE.</td>
<td>• Provide examples of sound and unsound SAEs using PowerPoint presentation or other graphic presentations. Preassess students’ knowledge of SAEs by having them label each example as sound or unsound and describe the strong and weak traits of each.</td>
</tr>
<tr>
<td>b. Determine the availability of time and money to invest.</td>
<td>• Have students conduct research to determine suitable SAE programs.</td>
</tr>
<tr>
<td>c. Select a system of record keeping.</td>
<td>• Have each student complete a plan of activities for their SAE over the coming year to include objectives, time and money, and record keeping.</td>
</tr>
<tr>
<td>d. Determine benefits of participation in an SAE.</td>
<td><strong>Assessment:</strong></td>
</tr>
<tr>
<td>e. Determine types of SAE programs.</td>
<td>• Review the preassessment activity to determine student knowledge.</td>
</tr>
<tr>
<td></td>
<td>• Evaluate the SAE plan using the SAE Plan Rubric in Appendix D.</td>
</tr>
</tbody>
</table>

| **2. Develop a long-range personal plan for the SAE:** | **Teaching:** |
| a. Set long-range goals. | • Discuss with the students the relationship of short-range and long-range goals in planning the SAE and future careers. Provide examples of suitable short-term and long-term goals for different SAEs. |
| | • Identify and discuss the different resources required to conduct each of the different types of SAEs. Also discuss different opportunities commonly found in the school district. |
| | • Provide students with examples of long-range plans for the different types of SAEs. Have students prepare a long-range plan for the rest of the school year. (Note: This plan should relate to the student’s career/educational plan maintained by the school guidance department. A copy of the supervised experience plans may be included in the student’s folder.) |
3. Develop a short-range personal plan.
   a. Set short-range goals.
   
   **Teaching:**
   - Provide students with examples of short-range plans for the different types of SAEs. Have students prepare a short-range plan for the rest of the school year.
   
   **Assessment:**
   - Evaluate the short-range personal plan for content and neatness.

4. Complete a training agreement for an SAE.
   a. Establish requirements of student, parents, supervisor, and/or employer.
   
   **Teaching:**
   - Describe a training agreement for an SAE.
   - Have students examine examples of training agreements and discuss the components.
   - Have each student complete a training agreement, including the requirements of the student, parents, supervisor, and employer as appropriate.
   
   **Assessment:**
   - Evaluate the training agreement for completeness and neatness.

5. Describe agricultural record keeping for an SAE.
   a. Determine types of records to keep.
   b. Describe how to maintain various systems of record keeping.
   
   **Teaching:**
   - For each type of SAE, identify the records that should be maintained by the student. This includes income and expenses, time spent in supervised experience, activities and skills performed, and results of the experience.
   - Have each student maintain necessary records for the SAE. These records should be checked throughout the year.
   - At the end of the year, have students prepare an end of the year summary of their experience(s), including their own evaluation of the effectiveness of each experience and the skills and knowledge learned.
   
   **Assessment:**
   - Evaluate records for accuracy, completeness, and neatness.

6. Maintain agricultural records for an SAE.
   a. Prepare income and expense records.
   b. Prepare inventory records.
   c. Compute enterprise summaries.
   
   **Teaching:**
   - Discuss income and expense records, inventory records, placement records, leadership activity records, and computing
d. Maintain placement records.

e. Summarize the SAE program.

f. Maintain leadership activity records.

g. Compute a net worth statement.

| enterprise summaries and net worth statements. |
| Have the students start filling in their records with their information. |
| Have each student write a summary of the SAE program to add to his or her notebook. |

**Assessment:**

- Make monthly checks on progress in keeping accurate records of SAE experiences.
- Review summary of unit for understanding of material and reteach as needed.

---

**STANDARDS**

**Agriculture, Food, and Natural Resources Standards**

The following standards were adapted from the publication, *Career Cluster Resources for Agriculture, Food, and Natural Resources*. The complete text of this document can be found at [http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf](http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf)

**LEA1** Use leadership skills in collaborating with others to accomplish organizational goals and objectives.

**LEA2** Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.

**ELR1** Know and understand the importance of professional ethics and legal responsibilities.

**ELR2** Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.

**ABS1** Employ leadership skills to accomplish goals and objectives in the AFNR business environment.

**ABS2** Practice good record keeping to accomplish AFNR business objectives.

**ABS3** Apply generally accepted accounting principles and skills to manage budget, credit, and optimal application of AFNR business assets.

**ABS4** Employ AFNR industry concepts and practices to manage inventory.

**ABS5** Utilize technology to accomplish AFNR business objectives.

**ABS6** Use marketing and sales principles to accomplish an AFNR business objective.

---

**Academic Standards**

**A1** Recognize, classify, and use real numbers and their properties.

**A2** Recognize, create, extend, and apply patterns, relations, and functions and their applications.

**A3** Simplify algebraic expressions, solve and graph equations, inequalities and systems in one and two variables.

**A5** Utilize various formulas in problem solving situations.

---

**Secondary Introduction to Agriscience**
A6——Communicate using the language of algebra.
A8——Analyze data and apply concepts of probability.
B1——Utilize critical thinking and scientific problem solving in designing and performing biological research and experimentation.
E1——Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.
E2——Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3——Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4——Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E5——Complete oral and written presentations which exhibit interaction and consensus within a group.
E9——Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10——Use language and critical thinking strategies to serve as tools for learning.

Introduction to Agriscience
Unit 5: Introduction to Biotechnology (9 hours)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
</table>
| 1. Explain the basic principles of heredity.  
a. Describe the role of genes and chromosomes in heredity.  
b. Explain the functions of DNA and RNA in heredity.  
c. Describe the process of cell division in reproduction.  
d. Discuss mutations, genetic disease, and birth defects in the process of inheritance.  
e. Calculate a simple problem demonstrating inheritance of dominant and recessive traits. | **Teaching:**  
• Have students observe and calculate the number of occurrences of a given trait (e.g., widow’s peak, attached earlobes, or dimples) in the class. Ask how these observations relate to heredity.  
• Discuss basic principles of heredity and its role in agriculture now, in the past, and in the future.  
• Have each student use popsicle sticks, assorted colored markers, and tape to model a pair of homologous chromosomes with marks representing genes.  
• Have students work in groups based on multiple intelligences and use models of DNA and RNA nucleotides to demonstrate the formation of a protein via transcription and translation.  
• Have each student scrape the inside of his or her cheek with a toothpick, place the cells on a microscope slide, dye the cells, and observe and draw the cells as seen underneath a microscope (may also use prepared onion tip slides). Have students draw all stages of mitosis.  
• Have students work in groups to design a collage that identifies the results of mutations including genetic diseases and birth defects.  
• Demonstrate use of the Punnett Square, and have each student use it to solve sample problems. |
| 2. Discuss terms and concepts related to biotechnology.  
a. Define terms related to | **Assessment:**  
• Monitor student participation in all activities using the Group Work Assessment Rubric located in Appendix D.  
• Evaluate collage using Group Presentation Assessment Rubric located in Appendix D.  
• Assess problem solutions for accuracy. |
|  | **Teaching:**  
• Lead the students in a discussion about biotechnology concepts using examples |
1. Identify improvements of animals and plants made possible through biotechnology.
   - Describe emerging issues associated with biotechnology.
   - Investigate issues of bio-security which producers of plants and animals should be applying to protect their products from contamination or destruction.
   - Describe the practice of animal and plant integration used in disease and insect control.
   - Such as the development of seedless watermelons and grapes or topics in videos (e.g., *Jurassic Park*).
   - Have each student prepare a reflective writing about whether he or she would support the use of diagnostic tests for predispositions for genetic disorders since these tests may be used by those at risk to modify life-style choices but may also be used by insurance companies and employers to exclude predisposed but otherwise healthy people.
   - Have students research issues of bio-security and present their findings in a written report.
   - Invite a guest speaker to talk to the class about practices of animal and plant integration. Have each student write a summary of the material presented.

**Assessment:**
- Assess writing using the Reflective Writing Rubric located in Appendix D.
- Evaluate the report and summary using the Written Report Assessment Rubric located in Appendix D.

3. Explain historical events in biotechnology.
   - Describe early discoveries before 1800.
   - Describe basic scientific discoveries 1800 to 1900.
   - Describe discoveries in molecular biology.
   - Describe the age of biotechnology (1977 to present).
   - Have students work in groups to research and develop a timeline for historical events in biotechnology.
   - Have each student summarize the discoveries of various time periods and describe how those discoveries allowed for future advances.

**Assessment:**
- Assess timeline for accuracy.
- Evaluate the summary using the Written Report checklist located in Appendix D.

4. Analyze DNA properties.
   - Match DNA to properties.
   - Observe crop varieties engineered to resist insects, disease, and chemical damage.
   - Test crop varieties engineered to resist insects, disease, and chemical damage.
   - Describe properties of DNA using various crops as examples.
   - Have students work in groups to design and conduct experiments with various crops.
   - Have each student prepare a laboratory report indicating the results of the experiments.
Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

**Assessment:**
- Assess experiments for planning and appropriateness.
- Evaluate laboratory reports for content.
- Review summary of unit for understanding of material and reteach as needed.

### STANDARDS

**Agriculture, Food, and Natural Resources Standards**

The following standards were adapted from the publication, *Career Cluster Resources for Agriculture, Food, and Natural Resources*. The complete text of this document can be found at [http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf](http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf)

**LEA1** Use leadership skills in collaborating with others to accomplish organizational goals and objectives.

**LEA2** Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.

**ELR1** Know and understand the importance of professional ethics and legal responsibilities.

**ELR2** Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.

**FPP1** Apply principles of food processing to maintain equipment and facilities.

**FPP2** Apply principles of food science to the food industry.

**FPP3** Plan, implement, manage, and/or provide services for the preservation and packaging of food and food products.

**FPP4** Identify processing, handling, and storage factors to show how they impact product quality and safety.

**PLT1** Apply principles of anatomy and physiology to produce and manage plants in both a domesticated and a natural environment.

**PLT2** Address taxonomic or other classifications to explain basic plant anatomy and physiology.

**PLT3** Apply fundamentals of production and harvesting to produce plants.

**PLT4** Exercise elements of design to enhance an environment (e.g., floral, forest, landscape, and farm).

**ANM1** Apply knowledge of anatomy and physiology to produce and/or manage animals in a domesticated or natural environment.

**ANM2** Recognize animal behaviors to facilitate working with animals safely.

**ANM3** Provide proper nutrition to maintain animal performance.

**ANM4** Know the factors that influence an animal’s reproductive cycle to explain species response.
ANM5 Identify environmental factors that affect an animal’s performance.
TET1 Use tools, equipment, machinery, and technology to work in areas related to AFNR.
PWR1 Apply physical science principles to engineering applications with mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
PWR2 Apply principles of operation and maintenance to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
PWR3 Apply principles of service and repair to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
TEC1 Use a variety of tools available in computer systems to accomplish fast, accurate production in the workplace.
TEC2 Use available power sources to plan and apply control systems.
TEC3 Explain geospatial technology to demonstrate its applications.
NRS1 Recognize importance of resource and human interrelations to conduct management activities in natural habitats.
NRS2 Use effective venues to communicate natural phenomena to the public.
NRS3 Apply scientific principles to natural resource management activities.
NRS4 Employ knowledge of natural resource industries to describe production practices and processing procedures.
NRS5 Practice responsible conduct to protect natural resources.
ENV1 Use analysis procedures to plan and evaluate environmental service impacts.
ENV2 Identify public policies and regulations impacting environmental services to determine their effect on facility operations.
ENV3 Apply scientific principles to environmental services.
ENV4 Operate environmental service systems (e.g., pollution control, water treatment, wastewater treatment, solid waste management, and energy) to manage a facility environment.
ENV5 Use tools, equipment, machinery, and technology to accomplish tasks in environmental services.
ABS1 Employ leadership skills to accomplish goals and objectives in the AFNR business environment.
ABS2 Practice good record keeping to accomplish AFNR business objectives.
ABS3 Apply generally accepted accounting principles and skills to manage budget, credit, and optimal application of AFNR business assets.
ABS4 Employ AFNR industry concepts and practices to manage inventory.
ABS5 Utilize technology to accomplish AFNR business objectives.
ABS6 Use marketing and sales principles to accomplish an AFNR business objective.

Academic Standards

A1 Recognize, classify, and use real numbers and their properties.
A2 Recognize, create, extend, and apply patterns, relations, and functions and their applications.
A3 Simplify algebraic expressions, solve and graph equations, inequalities and systems in one and two variables.
A4 Explore and communicate the characteristics and operations of polynomials.

Secondary Introduction to Agriscience
A5—Utilize various formulas in problem-solving situations.
A6—Communicate using the language of algebra.
A7—Interpret and apply slope as a rate of change.
A8—Analyze data and apply concepts of probability.
B1—Utilize critical thinking and scientific problem-solving in designing and performing biological research and experimentation.
B2—Investigate the biochemical basis of life.
B3—Investigate cell structures, functions, and methods of reproduction.
B4—Investigate the transfer of energy from the sun to living systems.
B5—Investigate the principles, mechanisms, and methodology of classical and molecular genetics.
B6—Investigate concepts of natural selection as they relate to diversity of life.
B7—Investigate the interdependence and interactions that occur within an ecosystem.
E1—Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.
E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E5—Complete oral and written presentations which exhibit interaction and consensus within a group.
E6—Explore cultural contributions to the history of the English language and its literature.
E7—Discover the power and effect of language by reading and listening to selections from various literary genres.
E8—Read, discuss, analyze, and evaluate literature from various genres and other written material.
E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10—Use language and critical thinking strategies to serve as tools for learning.
H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.
H2—Describe the impact of science and technology on the historical development of the United States in the global community.
H3—Describe the relationship of people, places, and environments through time.
H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).
H5—Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
</table>
| 1. Define terms associated with animal science. | **Teaching:**  
• Show students a video clip (e.g., \textit{Farmweek} or televised cattle auction) related to animal science. Have students pick out and define terms associated with animal science to preassess student knowledge.  
• Discuss why animal science is important to the study of agriculture. Have students write down important terms and definitions to develop a dictionary.  
• Have students work in groups to peer review important terms.  
**Assessment:**  
• Assess definitions for accuracy. |
| 2. Investigate major agricultural species of animals and their economic contributions.  
a. Discuss production of beef and dairy cattle, sheep, goats, swine, poultry, horses, and aquatic species.  

b. Examine their economic impact at the local, state, national, and global levels. | **Teaching:**  
• Have students work in groups to research and list the species of animals that are economically important in Mississippi, the United States, and other countries. Have students analyze why different species are important in different areas.  
• Have each student research the market prices of various animals in a certain area of the world and make a poster listing those prices. Lead students in a discussion of the differences found in different areas.  
• Have students work in groups to construct a collage of important products of agricultural animals to include at least two products from each species.  
**Assessment:**  
• Evaluate lists for accuracy and neatness.  
• Assess the poster using the Poster Assessment Rubric located in Appendix D.  
• Evaluate collages for content and appearance. |
### 3. Examine the internal and external body parts of major agricultural species of animals.

**Teaching:**
- Have students work in groups and use anatomy charts of each species to pronounce and identify the body parts.
- Have students self-assess and peer-assess their knowledge.
- Have each student draw the body parts of one species on a poster or other display.
- Lead students to identify parts from preserved specimens (fetal pig, grocery products, or other examples).
- Have students identify external body parts of animals and use scorecards to evaluate them. Have each student present oral reasons for their scores.

**Assessment:**
- Evaluate drawings for accuracy and appearance.
- Assess student participation in identification activity.
- Evaluate student scoring and reasoning for accuracy.

### 4. Investigate economic and practical considerations of livestock production.

- Identify management systems of animal production used with cattle, swine, poultry, and aquacultural animals.
- Describe types and breeds of livestock.
- Describe feeds and feeding practices required for cattle, sheep, swine, horses, and poultry.
- Describe the importance of animal health in livestock production.
- Describe the importance of factors contributing to cost of production of livestock.

**Teaching:**
- Tell students a story or show them a video about a working farm to reveal some of the economic and practical considerations of livestock production. Lead them in a discussion about various management systems.
- Present information related to livestock breeds, and have students take notes on the associated vocabulary.
- Have each student research a breed and prepare a chart or essay.
- Take students on a field trip to a local feed store to investigate various feeds and feeding equipment. Have each student write a summary of what was learned.
- Invite a guest-speaker (e.g., veterinarian, county agent, or farmer) to discuss the importance of animal health. Have each student outline what was said.
- Have each student design an experiment to determine ways to cut costs of production of livestock.
- Have each student summarize what he or
she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

Assessment:
- Monitor student participation in activities throughout the unit.
- Evaluate breed poster or essay for content.
- Assess experiment for proper design and feasibility.
- Review notes and summary of unit for understanding of material and reteach as needed.

STANDARDS

Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, Career Cluster Resources for Agriculture, Food, and Natural Resources. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

LEA1 Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2 Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.
ELR1 Know and understand the importance of professional ethics and legal responsibilities.
ELR2 Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.
ANM1 Apply knowledge of anatomy and physiology to produce and/or manage animals in a domesticated or natural environment.
ANM2 Recognize animal behaviors to facilitate working with animals safely.
ANM3 Provide proper nutrition to maintain animal performance.
ANM4 Know the factors that influence an animal’s reproductive cycle to explain species response.
ANM5 Identify environmental factors that affect an animal’s performance.
TET1 Use tools, equipment, machinery, and technology to work in areas related to AFNR.
ABS2 Practice good record keeping to accomplish AFNR business objectives.
ABS3 Apply generally accepted accounting principles and skills to manage budget, credit, and optimal application of AFNR business assets.
ABS4 Employ AFNR industry concepts and practices to manage inventory.
ABS5 Utilize technology to accomplish AFNR business objectives.
ABS6 Use marketing and sales principles to accomplish an AFNR business objective.

B5—Investigate the principles, mechanisms, and methodology of classical and molecular genetics.
E1—Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.
E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E5—Complete oral and written presentations which exhibit interaction and consensus within a group.
E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10—Use language and critical thinking strategies to serve as tools for learning.
H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.
H2—Describe the impact of science and technology on the historical development of the United States in the global community.
H3—Describe the relationship of people, places, and environments through time.
H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).
H5—Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

**21st Century Skills**

# Secondary Introduction to Agriscience

## Unit 7: Mechanical Technology in Agriscience (8 hours)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
</table>
| **1. Define terms associated with mechanical technology in agriscience:** | **Teaching:**  
  - Ask students what types of fibers their clothes are made from and how the fibers are harvested and processed.  
  - Use the Socratic Method to question students about past and present mechanical technology (e.g., who invented cotton gin, what is automation, what is power machinery, what kind of machinery is used, why is science important).  
  - Present terms associated with mechanical technology; have students take notes about the terms and definitions.  
  - Have each student prepare a collage or chart containing various forms of mechanical technology.  
  
**Assessment:**  
  - Monitor student participation in discussion.  
  - Review student notes for accuracy.  
  - Evaluate collage or chart for content and appearance. |
| **2. Use precision measuring devices to determine mass, weight, and volume:**  
  a. Demonstrate use of a balance.  
  b. Demonstrate use of a scale.  
  c. Demonstrate use of a graduated cylinder.  
  d. Demonstrate use of standard measuring devices including rulers, tape measures, micrometers, dividers, and protractors. | **Teaching:**  
  - Use a five pound bag of sugar, flour, or corn meal and a gallon of milk to show the differences between mass, weight, and volume.  
  - Demonstrate the use of various measuring devices.  
  - Divide students into groups based on their learning styles, and have them weigh and measure common items such as oil, sugar, seeds, feed, and other items using different measuring devices.  
  
**Assessment:**  
  - Assess measurements for accuracy. |
| **3. Identify and calculate mechanical advantages of six simple machines including lever, inclined plane, wheel, fulcrum, pulley, and axle:**  
  a. Describe six simple machines including lever, inclined plane, wheel, fulcrum, pulley, and axle. | **Teaching:**  
  - Show students examples of the six simple machines and describe uses of each.  
  - Have each student select one machine and prepare an oral or written report about its discovery, use, and calculation. |
b. Calculate mechanical advantages of six simple machines including lever, inclined plane, wheel, fulcrum, pulley, and axle.

c. Demonstrate an example of mechanical advantage by using simple machines.

4. Investigate principles of electricity.
   a. Explain the differences between alternating current (AC) and direct current (DC).
   b. Explain the principles of series and parallel circuits.
   c. Explain the characteristics of insulators (rubber, plastic, and ceramic) and conductors (copper and aluminum).

Teaching:
   a. Ask students to recall experiences they have had with electric circuits (lights, radio, television, and video games).
   b. Present information on currents and circuits, and have students define, describe, and draw direct and alternating currents in their notebooks.
   c. Have each student diagram AC and DC series and parallel circuits on a poster.
   d. Have students work in groups to design a DC series or parallel circuit using wire, batteries, and a simple light or socket.
   e. Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

Assessment:
   a. Review student notebooks and reteach as necessary.
   b. Monitor student participation in activities.
   c. Assess poster using the Poster Assessment Rubric located in Appendix D.
   d. Review summary of unit for understanding of material and reteach as needed.
STANDARDS

Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, Career Cluster Resources for Agriculture, Food, and Natural Resources. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

LEA1 Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2 Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.
ELR1 Know and understand the importance of professional ethics and legal responsibilities.
ELR2 Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.
TET1 Use tools, equipment, machinery, and technology to work in areas related to AFNR.
PWR1 Apply physical science principles to engineering applications with mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
PWR2 Apply principles of operation and maintenance to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
PWR3 Apply principles of service and repair to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
STR1 Exercise basic skills in blueprint and design development to create sketches, drawings, and plans.
STR2 Read and relate structural plans to specifications and building codes.
TEC2 Use available power sources to plan and apply control systems.

Academic Standards

A1 Recognize, classify, and use real numbers and their properties.
A2 Recognize, create, extend, and apply patterns, relations, and functions and their applications.
A5 Utilize various formulas in problem-solving situations.
A6 Communicate using the language of algebra.
A7 Interpret and apply slope as a rate of change.
E1 Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.
E2 Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3 Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4 Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E9——Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10——Use language and critical thinking strategies to serve as tools for learning.
H1——Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.
H2——Describe the impact of science and technology on the historical development of the United States in the global community.
H3——Describe the relationship of people, places, and environments through time.
H4——Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).
H5——Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

21st Century Skills

CS1——Global Awareness
CS2——Financial, Economic, and Business Literacy
CS3——Civic Literacy
CS4——Information and Communication Skills
CS5——Thinking and Problem-Solving Skills
CS6——Interpersonal and Self-Directional Skills

### Competencies and Suggested Objectives

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
</table>
| **1. Examine the economic scope of major areas of the food industry:**  
  a. Define terms associated with food science such as producer, harvester, processor, distributor, wholesaler, retailer, and consumer.  
  b. Investigate the effect of various areas of the food industry on the local, state, national, and global economy. | **Teaching:**  
  • Bring a food item to class and ask students to trace the product through a complete cycle from “farmer” to “table.” Describe the processes through which various products go during a cycle.  
  • Have students work in groups to research the effects of the food industry in a given area and write an essay comparing the economic effects of various agriculture companies.  
  **Assessment:**  
  • Evaluate the essay using the Written Report Assessment Rubric located in Appendix D. |
| **2. Investigate processes for harvesting plants and animals for food.** | **Teaching:**  
  • Introduce common techniques for harvesting plants and animals. Show students videos illustrating plant harvesting techniques and humane slaughter procedures.  
  • Have each student prepare a chart listing various methods of harvest.  
  **Assessment:**  
  • Assess chart for content and appearance. |
| **3. Describe techniques used in marketing food for retail sale:**  
  a. Describe the marketing process for food from producer to consumer.  
  b. Demonstrate techniques used in preparing and displaying food for retail sale. | **Teaching:**  
  • Take students on a field trip to view various food marketing techniques or invite a guest speaker to demonstrate techniques for preparing foods for consumer purchase. Have each student write a brief summary.  
  • Have students work in groups to develop marketing plans and displays for a given food item. Have groups peer assess work.  
  **Assessment:**  
  • Assess student summary of field trip or guest speaker.  
  • Evaluate plans for content and displays for appearance. |
| **4. Examine food products and processing:**  
  a. Explain methods of processing. | **Teaching:**  
  • Invite a guest-speaker from the Extension |
### 4. Explain principles of supply and demand in food production.

**Teaching:**
- Discuss principles of supply and demand using the effects of major disasters or public fear of diseases as examples.
- Have students work in groups to research the effect of a given incident on supply and demand of products. Lead students in a panel debate of the response of companies to the increased or decreased demand for the product.
- Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

**Assessment:**
- Monitor student participation in research and panel debate.
- Review summary of unit for understanding of material and reteach as needed.

### 5. Explain principles of supply and demand in food production.

**Teaching:**
- Discuss principles of supply and demand using the effects of major disasters or public fear of diseases as examples.
- Have students work in groups to research the effect of a given incident on supply and demand of products. Lead students in a panel debate of the response of companies to the increased or decreased demand for the product.
- Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

**Assessment:**
- Monitor student participation in research and panel debate.
- Review summary of unit for understanding of material and reteach as needed.
STANDARDS

Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, Career Cluster Resources for Agriculture, Food, and Natural Resources. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

LEA1—Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2—Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.
ELR1—Know and understand the importance of professional ethics and legal responsibilities.
ELR2—Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.
FPP1—Apply principles of food processing to maintain equipment and facilities.
FPP2—Apply principles of food science to the food industry.
FPP3—Plan, implement, manage, and/or provide services for the preservation and packaging of food and food products.
FPP4—Identify processing, handling, and storage factors to show how they impact product quality and safety.
PLT1—Address taxonomic or other classifications to explain basic plant anatomy and physiology.
PLT2—Apply fundamentals of production and harvesting to produce plants.
PLT3—Exercise elements of design to enhance an environment (e.g., floral, forest, landscape, and farm).
ANM1—Apply knowledge of anatomy and physiology to produce and/or manage animals in a domesticated or natural environment.
ANM2—Recognize animal behaviors to facilitate working with animals safely.
TEC1—Use a variety of tools available in computer systems to accomplish fast, accurate production in the workplace.
ENV2—Identify public policies and regulations impacting environmental services to determine their effect on facility operations.
ENV3—Apply scientific principles to environmental services.
ABS6—Use marketing and sales principles to accomplish an AFNR business objective.

Academic Standards

A1—Recognize, classify, and use real numbers and their properties.
A2—Recognize, create, extend, and apply patterns, relations, and functions and their applications.
A3—Simplify algebraic expressions, solve and graph equations, inequalities and systems in one and two variables.
A5—Utilize various formulas in problem-solving situations.

Secondary Introduction to Agriscience
B1—Utilize critical thinking and scientific problem solving in designing and performing biological research and experimentation.
B2—Investigate the biochemical basis of life.
B3—Investigate cell structures, functions, and methods of reproduction.
B4—Investigate the transfer of energy from the sun to living systems.
B5—Investigate the principles, mechanisms, and methodology of classical and molecular genetics.
E1—Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.
E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E5—Complete oral and written presentations which exhibit interaction and consensus within a group.
E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10—Use language and critical thinking strategies to serve as tools for learning.
H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.
H2—Describe the impact of science and technology on the historical development of the United States in the global community.
H3—Describe the relationship of people, places, and environments through time.
H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).
H5—Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

### Introduction to Agriscience

**Unit 9: Principles of Plant Science**

(9 hours)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
<th>Suggested Strategies for Competencies</th>
</tr>
</thead>
</table>
| 1. Examine concepts related to plant science:  
   a. Define terms related to plant science.  
   b. Investigate various factors affecting plant growth. | Teaching:  
   - Ask students to list the ways plants are important in their daily lives.  
   - Present a lecture on plant science terms and the importance of plants.  
   - Have each student use a U.S. map to research the different types of vegetation in different sections of the country and related vegetation distribution to the climate. Have them write a summary relating climate (sun and moisture) of an area to vegetation.  
   - Invite a guest speaker or show a video that addresses the effect that climate has on vegetation and how it determines types of agriculture practiced in the region.  
   Assessment:  
   - Monitor student participation in activities.  
   - Review summary for content. |
| 2. Investigate major structural parts of plants including roots, stems, and leaves:  
   a. Diagram the parts of plants.  
   b. Explain the functions of various parts of plants. | Teaching:  
   - Use a fern, moss, and flowering plant to show the differences in parts of various plants.  
   - Have students work in groups based on their learning styles to draw the parts of a plant and flower, label their functions, and present the information to the class for peer review.  
   Assessment:  
   - Assess diagram for accuracy using Visual Presentation Checklist located in Appendix D. |
3. Explain the important plant growth and food production processes.
   a. Describe photosynthesis.
   b. Describe transpiration.
   c. Describe respiration.
   d. Investigate principles of photosynthesis, transpiration, respiration, and absence of plant nutrients.

   **Teaching:**
   - Discuss the processes by which plants grow. Have students create a drawing to trace the movement of water and nutrients from the roots to the leaves.
   - Use an integration project with the biology teacher to reinforce instruction in growth processes.
   - Lead students to design and conduct experiments in which photosynthesis, transpiration, respiration, and nutrients are altered. Have each student prepare a laboratory report of an experiment.

   **Assessment:**
   - Assess drawing for content and appearance.
   - Monitor participation in integration project and experiments using the Group Participation Assessment Rubric located in Appendix D.
   - Evaluate laboratory report for content.

4. Describe various methods of plant reproduction.
   a. Contrast annual, perennial, and biennial plant life cycles.
   b. Describe the functions of complete and incomplete flowers.
   c. Discuss means of sexual and asexual reproduction.
   d. Describe principles of plant pollination.

   **Teaching:**
   - Show the reproductive parts of flowering plants and discuss their functions. Explain the differences between the life cycles of annual, perennial, and biennial plants and the various means of sexual and asexual reproduction.
   - Have each student diagram and label parts of a complete flower and an incomplete flower and describe their functions.
   - Lead students to design and conduct experiments to demonstrate principles of plant pollination.
   - Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

   **Assessment:**
   - Evaluate flower diagram for accuracy.
   - Monitor student participation in experiments.
   - Review summary of unit for understanding of material and reteach as needed.

</table>
| 1. Define terms related to environmental and natural resources including air, water, and soil. | **Teaching:**  
• Have students browse newspapers, magazines, and other popular media to locate articles related to environmental issues. Have each student define terms from the articles.  
• Lead students in a discussion of terms located and their definitions. Add other terms as needed.  
**Assessment:**  
• Assess definitions for accuracy. |
| 2. Explore the basic concepts of natural resource conservation and management.  
a. Classify renewable and non-renewable natural resources.  
b. Discuss the concept of sustainability as related to natural resources and the environment. | **Teaching:**  
• Define renewable and non-renewable resources. Have students create a list of renewable and non-renewable natural resources in the area.  
• Briefly discuss and define the concept of sustainability and relate this concept of the efficient use of natural resources and protection of the environment. Have students research practices in agriculture that exemplify sustainability and prepare a brochure or poster for exhibit to the class.  
**Assessment**  
• Evaluate list for content.  
• Evaluate student poster or brochure using Sample Poster Rubric located in Appendix D. |
| 3. Investigate properties of soil.  
a. Locate the A, B, and C horizons.  
b. Identify coarse, medium, and fine textured soil.  
c. Conduct soil analysis testing. | **Teaching:**  
• Discuss the study of soils in agriculture and the “father of soils” E. W. Hilgard, a Mississippi native.  
• Show students a diagram of the various horizons. Have them identify the horizons in soil on the school property or a nearby area.  
• Show students examples of various textures of soil, explain how their classification is determined, and have each student collect examples of each type.  
• Explain various properties of soils and methods of measuring these properties.  
• Lead students to conduct a basic soil analysis test. |

4. **Explore issues related to air and water quality, conservation, and preservation.**
   a. Discuss the sources of water and potential threats to each source.
   b. Discuss sources of air pollution and precautions that can be taken to reduce or prevent pollution.
   c. Explore ways in which agricultural enterprises protect and enhance air and water quality.

| Teaching: |
| Invited a representative of the Department of Environmental Quality to discuss with students major threats to air and water quality in the local area. Have students summarize this discussion in their notebook. Follow up with the students to make sure they have recorded important points. |
| Discuss with students various agricultural enterprises and ways they protect and enhance environmental quality. Have students take notes on information. |
| Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery. |
| **Assessment:** |
| • Assess student notebook using the Student Journal Rubric located in Appendix D. |
| • Review summary of unit for understanding of material and reteach as needed. |

**STANDARDS**

**Agriculture, Food, and Natural Resources Standards**

The following standards were adapted from the publication, *Career Cluster Resources for Agriculture, Food, and Natural Resources*. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

**LEA1** Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2—Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.

ELR1—Know and understand the importance of professional ethics and legal responsibilities.

ELR2—Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.

PLT1—Apply principles of anatomy and physiology to produce and manage plants in both a domesticated and a natural environment.

PLT2—Apply fundamentals of production and harvesting to produce plants.

PLT3—Exercise elements of design to enhance an environment (e.g., floral, forest, landscape, and farm).

ANM1—Apply knowledge of anatomy and physiology to produce and/or manage animals in a domesticated or natural environment.

TET1—Use tools, equipment, machinery, and technology to work in areas related to AFNR.

PWR1—Apply physical science principles to engineering applications with mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.

STR5—Plan, implement, manage, and/or provide support services for facility design and construction; equipment design, manufacture, repair, and service; and agricultural technology.

TEC3—Explain geospatial technology to demonstrate its applications.

NRS1—Recognize importance of resource and human interrelations to conduct management activities in natural habitats.

NRS2—Use effective venues to communicate natural phenomena to the public.

NRS3—Apply scientific principles to natural resource management activities.

NRS4—Employ knowledge of natural resource industries to describe production practices and processing procedures.

NRS5—Practice responsible conduct to protect natural resources.

ENV1—Use analysis procedures to plan and evaluate environmental service impacts.

ENV2—Identify public policies and regulations impacting environmental services to determine their effect on facility operations.

ENV3—Apply scientific principles to environmental services.

ENV4—Operate environmental service systems (e.g., pollution control, water treatment, wastewater treatment, solid waste management, and energy) to manage a facility environment.

ENV5—Use tools, equipment, machinery, and technology to accomplish tasks in environmental services.

**Academic Standards**

A1—Recognize, classify, and use real numbers and their properties.

A2—Recognize, create, extend, and apply patterns, relations, and functions and their applications.

A3—Simplify algebraic expressions, solve and graph equations, inequalities and systems in one and two variables.

A4—Explore and communicate the characteristics and operations of polynomials.

A8—Analyze data and apply concepts of probability.
B1—Utilize critical thinking and scientific problem solving in designing and performing biological research and experimentation.

B2—Investigate the biochemical basis of life.

B4—Investigate the transfer of energy from the sun to living systems.

B6—Investigate concepts of natural selection as they relate to diversity of life.

B7—Investigate the interdependence and interactions that occur within an ecosystem.

E1—Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.

E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.

E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.

E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.

E5—Complete oral and written presentations which exhibit interaction and consensus within a group.

E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.

E10—Use language and critical thinking strategies to serve as tools for learning.

H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.

H2—Describe the impact of science and technology on the historical development of the United States in the global community.

H3—Describe the relationship of people, places, and environments through time.

H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).

H5—Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

| 1. Define terms related to entomology. | **Teaching:**  
• Have students brainstorm benefits of various insects and the effects of removing those insects from the environment.  
• List terms related to entomology and have students define those terms to create a dictionary.  
**Assessment:**  
• Evaluate dictionary for content. |
| 2. Describe the importance of entomology to agriculture.  
 a. Identify beneficial insects and their importance.  
 b. Identify harmful insects and their effects. | **Teaching:**  
• Contrast beneficial and harmful insects in society and agriculture. Have students develop a chart contrasting various insects during the lecture.  
• Have each student choose one insect, research, and write a report about its beneficial or harmful effects.  
**Assessment:**  
• Evaluate chart for accuracy.  
• Assess report using the Written Report Checklist located in Appendix D. |
| 3. Classify insects scientifically based on their morphology.  
 a. Identify the parts of an insect including head, antenna, thorax, abdomen, wings, and legs.  
 b. Use scientific classification to identify insects by their order. | **Teaching:**  
• Have each student collect various economically important insects, identify their parts, and use a key to classify them.  
**Assessment:**  
• Evaluate collection for content and appearance. |
| 4. Explain the growth processes of insects.  
 a. Describe gradual (incomplete) metamorphosis.  
 b. Describe complete metamorphosis. | **Teaching:**  
• Show pictures of insects at various stages of growth and describe the differences.  
• Have each student research gradual and complete metamorphosis and prepare a display with pictures and descriptions illustrating the differences.  
**Assessment:**  
• Evaluate the insect display using the Poster Assessment Rubric located in Appendix D. |
| 5. Discuss an integrated pest management plan. | **Teaching:**  
• Show various examples of integrated pest management plans and lead students to discuss components of each. Have each |
Secondary Introduction to Agriscience

Student write a summary of the plans and their advantages and disadvantages.

• Have each student summarize what he or she learned about the unit and place the summary in his or her notebook. Review the notebooks and reteach as appropriate to ensure mastery.

Assessment:
• Evaluate the summary of plans for content.
• Review summary of unit for understanding of material and reteach as needed.

STANDARDS

Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, Career Cluster Resources for Agriculture, Food, and Natural Resources. The complete text of this document can be found at http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf

LEA1 Use leadership skills in collaborating with others to accomplish organizational goals and objectives.
LEA2 Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.
ELR1 Know and understand the importance of professional ethics and legal responsibilities.
ELR2 Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.
FPP2 Apply principles of food science to the food industry.
FPP4 Identify processing, handling, and storage factors to show how they impact product quality and safety.
PLT3 Apply fundamentals of production and harvesting to produce plants.
ANM1 Apply knowledge of anatomy and physiology to produce and/or manage animals in a domesticated or natural environment.
ANM2 Recognize animal behaviors to facilitate working with animals safely.
ANM5 Identify environmental factors that affect an animal’s performance.
TEC3 Explain geospatial technology to demonstrate its applications.
NRS1 Recognize importance of resource and human interrelations to conduct management activities in natural habitats.
NRS5 Practice responsible conduct to protect natural resources.
ENV2 Identify public policies and regulations impacting environmental services to determine their effect on facility operations.
ENV3 Apply scientific principles to environmental services.
**Academic Standards**

A1—Recognize, classify, and use real numbers and their properties.
A2—Recognize, create, extend, and apply patterns, relations, and functions and their applications.
A3—Simplify algebraic expressions, solve and graph equations, inequalities and systems in one and two variables.
A6—Communicate using the language of algebra.
A8—Analyze data and apply concepts of probability.
B1—Utilize critical thinking and scientific problem-solving in designing and performing biological research and experimentation.
B2—Investigate the biochemical basis of life.
B3—Investigate cell structures, functions, and methods of reproduction.
B6—Investigate concepts of natural selection as they relate to diversity of life.
B7—Investigate the interdependence and interactions that occur within an ecosystem.
E1—Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.
E2—Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
E3—Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
E4—Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
E5—Complete oral and written presentations which exhibit interaction and consensus within a group.
E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
E10—Use language and critical thinking strategies to serve as tools for learning.
H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.
H2—Describe the impact of science and technology on the historical development of the United States in the global community.
H3—Describe the relationship of people, places, and environments through time.
H4—Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).
H5—Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

**21st Century Skills**

CS1—Global Awareness
CS2—Financial, Economic, and Business Literacy
CS3—Civic Literacy
CS4—Information and Communication Skills
CS5—Thinking and Problem-Solving Skills

**Secondary Introduction to Agriscience**
CS6—Interpersonal and Self-Directional Skills

SUGGESTED REFERENCES

Recommended Tools and Equipment

CAPITALIZED ITEMS

1. Cabinet (for hazardous chemicals) (1)
2. Computer with Internet access, CD ROM drive, color monitor (10)
3. Greenhouse, 20 feet x 30 feet (with drip pad, fans, heaters, benches, and irrigation system) (Optional) (1)
4. Microscope, student, stereo microscope, binocular (2x to 4x) (5)
5. Microscope, student binocular (with mechanical stage) (10x to 45x) (5)
6. Plant benches (Optional) (10)
7. Refrigerator, 21 cubic feet minimum (1)
8. Table, student laboratory (6)
9. Tissue culture cabinet or incubator (1)

NON-CAPITALIZED ITEMS

1. African violet culture kit (1)
2. Apron, lab (20)
3. Autoclave (Optional) (1)
4. Aquarium, 30-55 gallon (2)
5. Balance, triple beam (3)
6. Blender, food (1)
7. Bowl, mixing (4)
8. Brooder (1)
9. Cabinet and sanitizer (for goggles) (1)
10. Cabinet, storage (4)
11. Calculator (10)
12. Centrifuge (Optional) (1)
13. Colorimeter (Optional, replace with spectrophotometer) (1)
14. Dehydrator (1)
15. Dissecting kit (10)
16. Dissecting pan (10)
17. Engraving tool (1)
18. Eye wash station (installed on water line) (1)
19. First aid kit (adequate for 20 students) (1)
20. Gauge, feeler (5)
21. Gloves, rubber (200 pair)
22. Goggles, splash type (20)
23. Graduated cylinder, 25 ml (4)
24. Ground water simulation kit (1)
25. Hot plate (or some other heat source such as an electric skillet) (1)
26. Incubator, culture (1)
27. Incubator, egg (may replace with large brooder in poultry areas) (2)
28. Increment borer (1)
29. Lab equipment set (1)
30. Label maker (with tape) (1)
31. Mat, propagation (1)
32. Meter, pH (1)
33. Meter, light (1)
34. Meter, dissolved oxygen (necessary with aquaculture system) (1)
35. Micrometer, outside (5)
36. Microwave (1)
37. Nematode study kits (2)
38. Net, dip (1)
39. Net, insect (5)
40. Petri dishes with cover, plastic disposable (100)
41. Pipette stand with clamps (5)
42. Plant flats (100)
43. Plant tissue culture kit (1)
44. Plant tissue test kit (1)
45. Printer, laser (2)
46. Pulley, double (2)
47. Pulley, single (2)
48. Pulley, triple (2)
49. Respirator, chemical (5)
50. Rule, pocket, 1/32" and 1/64" graduations (10)
51. Safety shower (1)
52. Scale, spring (1)
53. Shade cloth (Optional) (1)
54. Slide, microscope (100)
55. Soil tube sampler, 36" with step (1)
56. Soil test kit, comprehensive (5)
57. Spectrophotometer, digital (Optional, may replace with colorimeter) (1)
58. Sprayer, 3 gallon (1)
59. Stool, metal (20)
60. Syringe, 3 cc (10)
61. Syringe, 60 cc (10)
62. Tape measure (10)
63. Thermometer (5)
64. Titration burette, 50 ml (4)
65. Trap, insect (10)
66. Tree scale stick (5)
67. Voltmeter, triple range (5)
68. Water pollution detection kit (Lamotte) (Aquaculture—Replace with Hach Farm Pond Test Kit) (1)
69. Wheelbarrow (1)
70. Wisconsin fast plants light system (1)
71. Wisconsin fast plants classroom growth and development kit (3)
ASSESSMENT

BLUEPRINT

This program is an enrichment program and serves as a feeder program to vocational/technical programs that are assessed by either the MS-CPAS or a certification exam.
Appendix A: Agriculture, Food, and Natural Resources Standards

The following standards were adapted from the publication, *Career Cluster Resources for Agriculture, Food, and Natural Resources*. Each standard represents a pathway knowledge and skill statement as listed in this document. Standards are clustered by career pathway. The complete text of this document can be found at [http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf](http://www.careerclusters.org/ClusterDocuments/agdocuments/AGFinal.pdf)

LEADERSHIP (LEA)

LEA1—Use leadership skills in collaborating with others to accomplish organizational goals and objectives.

a.—Embrace empowerment, risk, communication, focusing on results, decision-making, problem-solving, investment in individuals, and resource use and access to develop premier leadership.

b.—Embrace compassion, service, listening, coaching, developing others, team development, and understanding and appreciating others to develop premier leadership.

c.—Embrace enthusiasm, creativity, the future, conviction, mission, courage, concept, focus, principles, and change to develop premier leadership.

d.—Embrace integrity, courage, values, ethics, humility, perseverance, self-discipline, and responsibility to develop premier leadership.

e.—Include self, community, diversity, environment, global awareness, and knowledge to develop premier leadership.

f.—Embrace innovation, intuition, adaptation, life-long learning, and coachability to develop premier leadership.

LEA2—Use personal growth skills in collaborating with others to accomplish organizational goals and objectives.

a.—Embrace attitude, exercise, goal-setting, planning, self-discipline, sense of balance, persistence, and respect to develop personal growth.

b.—Embrace friendship, integrity, morals, values, etiquette, citizenship, cross-cultural awareness, acceptance/change, and respect for differences to develop personal growth.

c.—Embrace goal setting, planning, decision-making, principles, respect, attitude, dependability, loyalty, trustworthiness, and communication to develop personal growth.

d.—Embrace learning, critical thinking, reasoning, creative thinking, attitude, dependability, decision-making, and problem-solving to develop personal growth.

e.—Embrace attitude, self-discovery, coping, friendship, self-reliance, sense of balance, empathy, compassion, and integrity to develop personal growth.

f.—Embrace ethics, coping, courage, attitude, self-image/worth, values, principles, and sense of balance to develop personal growth.

---

ETHICS AND LEGAL RESPONSIBILITIES (ELR)

ELR1—Know and understand the importance of professional ethics and legal responsibilities.
   a. Apply knowledge of professional and workplace ethics and legal responsibilities to organize guidelines for workplace conduct.
   b. Apply ethical and legal reasoning to workplace situations.
   c. Review appropriate resources to identify national and international rules associated with a desired career.
   d. Identify what ethical issues and concerns affect a desired career field to assist in making career decisions.

ELR2—Demonstrate workplace ethics specific to Agriculture, Food, and Natural Resources (AFNR) occupations.
   a. Evidence interest and concern to demonstrate natural resource stewardship and ethics.
   b. Exercise personal habits and actions to demonstrate workplace ethics.

FOOD PRODUCTS AND PROCESSING SYSTEMS (FPP)

FPP1—Apply principles of food processing to maintain equipment and facilities.
   a. Develop management plans to maintain equipment and facilities.
   b. Interpret and follow, develop, and implement Hazardous Critical Control Point (HACCP) procedures to establish operating parameters.

FPP2—Apply principles of food science to the food industry.
   a. Apply food science principles to enhance product development.

FPP3—Plan, implement, manage, and/or provide services for the preservation and packaging of food and food products.
   a. Analyze product preparation options to prepare products for distribution.
   b. Compare and select food preservation methods to develop food preservation programs.

FPP4—Identify processing, handling, and storage factors to show how they impact product quality and safety.
   a. Develop a “quality factors program” to comply with local, national, and governmental, and international standards.
   b. Develop slaughter/inspection techniques to process foods and analyze food product options.

PLANT SYSTEMS (PLT)

PLTI—Apply principles of anatomy and physiology to produce and manage plants in both a domesticated and a natural environment.
   a. Analyze and evaluate nutritional requirements and environmental conditions to develop and implement a fertilization plan.
   b. Test appropriate materials or examine data to evaluate and manage soil/media nutrients.
   c. Explain and use basic methods for reproducing and propagating plants.
   d. Develop and use a plan for integrated pest management.
PLT2—Address taxonomic or other classifications to explain basic plant anatomy and physiology.
   a. Examine unique plant properties to identify/describe functional differences in plant structures including roots, stems, flowers, leaves, and fruit.
   b. Classify plants on physiology for taxonomic or other classifications.
PLT3—Apply fundamentals of production and harvesting to produce plants.
   a. Apply fundamentals of plant management to develop a production plan.
   b. Apply fundamentals of plant management to harvest, handle, and store crops.
PLT4—Exercise elements of design to enhance an environment (e.g., floral, forest, landscape, and farm).
   a. Apply basic design elements and principles to create a design using plants.

ANIMAL SYSTEMS (ANM)

ANM1 Apply knowledge of anatomy and physiology to produce and/or manage animals in a domesticated or natural environment.
   a. Use classification systems to explain basic functions of animal anatomy and physiology.
   b. Recognize the anatomy of animal species to understand how the body structures interact and affect animal health.
   c. Analyze a subject animal to determine the nature of its health status.
ANM2 Recognize animal behaviors to facilitate working with animals safely.
   a. Develop a safety plan for working with a specific animal.
ANM3 Provide proper nutrition to maintain animal performance.
   a. Examine animal developmental stages to comprehend why nutrient requirements are different throughout an animal’s life cycle.
   b. Analyze a feed ration to determine whether or not it fulfills a given animal’s nutrient requirements.
   c. Record and compare feed variations to assess whether the nutritional requirements of an animal are being met.
ANM4 Know the factors that influence an animal’s reproductive cycle to explain species response.
   a. Analyze elements in the reproductive cycle to explain differences in the male and female reproductive systems.
   b. Discuss reproductive cycles to show how they differ from species to species.
   c. Evaluate an animal to determine its breeding soundness.
ANM5 Identify environmental factors that affect an animal’s performance.
   a. Recognize optimum performance for a given animal species.
   b. Create a program to develop an animal to its highest potential performance.
   c. Assess an animal to determine if it has reached its optimum performance level.
   d. Develop efficient procedures to produce consistently high-quality animals, well-suited for their intended purposes.
TOOLS, EQUIPMENT, TECHNOLOGY, AND SAFETY (TET)

TET1—Use tools, equipment, machinery, and technology to work in areas related to AFNR.
   a.—Select the appropriate tool to perform a given task.
   b.—Keep tools in good working order for efficient work use.
   c.—Wear protective equipment and handle natural resource tools and equipment with skill to demonstrate safe use of tools and equipment.

POWER SYSTEMS (PWR)

PWR1—Apply physical science principles to engineering applications with mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
   a.—Relate power generation to energy sources.
   b.—Apply principles of lubricants to sort and classify lubricants.

PWR2—Apply principles of operation and maintenance to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
   a.—Perform scheduled service routines to maintain machinery and equipment.
   b.—Observe rules of the road to operate machinery and equipment.

PWR3—Apply principles of service and repair to mechanical equipment, structures, biological systems, land treatment, power utilization, and technology.
   a.—Troubleshoot problems and evaluate performance to service and repair components of internal combustion engines.
   b.—Follow manufacturer’s guidelines to service and repair power transmission systems.
   c.—Evaluate performance and check maintenance manuals to service and repair hydraulic lines.
   d.—Troubleshoot from schematics to service vehicle electrical systems.
   e.—Use company diagrams and scenarios to service vehicle heating and air conditioning systems.
   f.—Check performance parameters to service and repair steering, suspension, traction, and vehicle performance systems.
   g.—Use tools in the workplace to demonstrate safe and proper skills with construction/fabrication hand tools.

STRUCTURAL SYSTEMS (STR)

STR1—Exercise basic skills in blueprint and design development to create sketches, drawings, and plans.
   a.—Use computer skills to develop simple sketches and plans.

STR2—Read and relate structural plans to specifications and building codes.
   a.—Examine blueprints and local codes to develop a logical construction plan.

STR3—Examine structural requirements to estimate project costs.
   a.—Use bids and billing information to develop a complete materials list and project cost estimate.
STR4—Develop skills required to use construction/fabrication equipment and tools.
   a. Use tools in the workplace to demonstrate safe and proper skills with construction/fabrication hand tools.

STR5—Plan, implement, manage, and/or provide support services for facility design and construction; equipment design, manufacture, repair, and service; and agricultural technology.
   a. Design machinery and equipment including vehicles, implements, buildings, and facilities (e.g., feeding, feed storage).
   b. Follow architectural and mechanical plans to construct buildings and facilities.

TECHNICAL SYSTEMS (TEC)

TEC1—Use a variety of tools available in computer systems to accomplish fast, accurate production in the workplace.
   a. Identify and explain the various types of hardware systems to show their applications and potentials.

TEC2—Use available power sources to plan and apply control systems.
   a. Measure with selective instruments to demonstrate knowledge of basic electricity.
   b. Reference electrical drawings to design, install, and troubleshoot control systems.

TEC3—Explain geospatial technology to demonstrate its applications.
   a. Employ appropriate techniques to demonstrate application of GPS/GIS systems principles.
   b. Use computer applications to produce maps that reflect surveying and mapping principles.
   c. Select an area of personal expertise to demonstrate knowledge of end applications.

NATURAL RESOURCE SYSTEMS (NRS)

NRS1—Recognize importance of resource and human interrelations to conduct management activities in natural habitats.
   a. Identify resource management components to establish relationships in natural resource systems.
   b. Apply cartographic skills to natural resource activities.
   c. Monitor natural resource status to obtain planning data.
   d. Employ environmental and wildlife knowledge to demonstrate natural resource enhancement techniques.
   e. Examine weather and other criteria to recognize dangers related to work in an outdoor environment.
   f. Learn applicable rules or laws to demonstrate natural resource mitigation techniques.

NRS2—Use effective venues to communicate natural phenomena to the public.
   a. Communicate natural resources information to the general public.
   b. Personally interpret natural resource phenomena to natural resource users.

NRS3—Apply scientific principles to natural resource management activities.
   a. Use science concepts, processes, and research techniques to examine natural resource topics.
b. Examine biological and physical characteristics to identify and classify natural resources.

c. Examine natural cycles and related phenomena to describe ecologic concepts and principles.

NRS4—Employ knowledge of natural resource industries to describe production practices and processing procedures.

a. Prepare presentations to describe how natural resource products are produced, harvested, processed, and used.

NRS5—Practice responsible conduct to protect natural resources.

a. Employ techniques and equipment needed to prevent wildfire.

b. Use wildfire suppression techniques to demonstrate abilities in firefighting and control.

c. Recognize symptoms of animal and plant diseases and use appropriate techniques to prevent their spread.

d. Recognize insect types and available controls to prevent insect infestation.

e. Use acceptable pesticides to treat insect infestation.

f. Know law enforcement procedures to manage public gatherings and to gain entry into secure, closed, or restricted areas.

ENVIRONMENTAL SERVICE SYSTEMS (ENV)

ENV1—Use analysis procedures to plan and evaluate environmental service impacts.

a. Use instrumentation to monitor samples.

b. Calibrate and service instruments on a timely schedule to maintain environmental instrumentation.

c. Apply statistics, charts, and scattergrams to measure and monitor operations.

ENV2—Identify public policies and regulations impacting environmental services to determine their effect on facility operations.

a. Consult reliable resources or training to identify the major laws impacting environmental services.

ENV3—Apply scientific principles to environmental services.

a. Apply meteorological knowledge to recognize weather systems and weather patterns.

b. Describe soil composition and properties to demonstrate knowledge of soil science.

c. Explain well design and groundwater supplies to demonstrate knowledge of hydrology.

d. Discuss properties, classifications, and functions in order to understand wetland principles.

e. Discuss properties, classifications, and functions in order to understand watershed principles.

f. Use chemical analysis to conduct tests.

g. Apply sampling techniques and other assessments to demonstrate background knowledge of microbiology.
ENV4—Operate environmental service systems (e.g., pollution control, water treatment, wastewater treatment, solid waste management, and energy) to manage a facility environment.
   a. Use pollution control measures to maintain a safe facility environment.
   b. Apply principles of solid waste management (landfill) to manage safe disposal of all categories of waste.
   c. Apply drinking water treatment principles to assure safe drinking water at a facility.
   d. Apply wastewater treatment operations principles to manage wastewater disposal in keeping with rules and regulations.
   e. Apply hazardous materials management principles to assure a safe facility and to comply with applicable regulations.
   f. Explore conventional and alternative supplies to define energy sources.
ENV5—Use tools, equipment, machinery, and technology to accomplish tasks in environmental services.
   a. Use technology tools to map land, facilities, and infrastructure.

AGRIBUSINESS SYSTEMS (ABS)

ABS1—Employ leadership skills to accomplish goals and objectives in the AFNR business environment.
   a. Develop a mission statement to guide business activities effectively.
   b. Apply leadership skills to accomplish general business activities from production to public relations.
   c. Apply management skills to accomplish general business activities from production to public relations.
ABS2—Practice good record keeping to accomplish AFNR business objectives.
   a. Prepare and maintain all files as needed to accomplish effective record keeping.
ABS3—Apply generally accepted accounting principles and skills to manage budget, credit, and optimal application of AFNR business assets.
   a. Use key accounting fundamentals to accomplish dependable bookkeeping and associated files.
ABS4— Employ AFNR industry concepts and practices to manage inventory.
   a. Monitor inventory levels to accomplish practical inventory control.
ABS5—Utilize technology to accomplish AFNR business objectives.
   a. Use technology and information technology strategies for business improvement.
ABS6—Use marketing and sales principles to accomplish an AFNR business objective.
   a. Conduct market research.
   b. Develop a marketing plan.
   c. Implement a marketing plan.
   d. Merchandise products and services.
Appendix B: Academic Standards

Algebra I

Competencies and Suggested Objective(s)

A1——Recognize, classify, and use real numbers and their properties.
   a.——Describe the real number system using a diagram to show the relationships of
      component sets of numbers that compose the set of real numbers.
   b.——Model properties and equivalence relationships of real numbers.
   c.——Demonstrate and apply properties of real numbers to algebraic expressions.
   d.——Perform basic operations on square roots excluding rationalizing denominators.

A2——Recognize, create, extend, and apply patterns, relations, and functions and their
      applications.
   a.——Analyze relationships between two variables, identify domain and range, and
      determine whether a relation is a function.
   b.——Explain and illustrate how change in one variable may result in a change in
      another variable.
   c.——Determine the rule that describes a pattern and determine the pattern given the
      rule.
   d.——Apply patterns to graphs and use appropriate technology.

A3——Simplify algebraic expressions, solve and graph equations, inequalities and systems in
      one and two variables.
   a.——Solve, check, and graph linear equations and inequalities in one variable,
      including rational coefficients.
   b.——Graph and check linear equations and inequalities in two variables.
   c.——Solve and graph absolute value equations and inequalities in one variable.
   d.——Use algebraic and graphical methods to solve systems of linear equations and
      inequalities.
   e.——Translate problem-solving situations into algebraic sentences and determine
      solutions.

A4——Explore and communicate the characteristics and operations of polynomials.
   a.——Classify polynomials and determine the degree.
   b.——Add, subtract, multiply, and divide polynomial expressions.
   c.——Factor polynomials using algebraic methods and geometric models.
   d.——Investigate and apply real number solutions to quadratic equations algebraically
      and graphically.
   e.——Use convincing arguments to justify unfactorable polynomials.
   f.——Apply polynomial operations to problems involving perimeter and area.

A5——Utilize various formulas in problem-solving situations.
   a.——Evaluate and apply formulas (e.g., circumference, perimeter, area, volume,
      Pythagorean Theorem, interest, distance, rate, and time).
   b.——Reinforce formulas experimentally to verify solutions.

http://www.mde.k12.ms.us/curriculum/index_1.htm
e. Given a literal equation, solve for any variable of degree one.
d. Using the appropriate formula, determine the length, midpoint, and slope of a segment in a coordinate plane.
e. Use formulas (e.g., point-slope and slope-intercept) to write equations of lines.

A6 — Communicate using the language of algebra.
a. Recognize and demonstrate the appropriate use of terms, symbols, and notations.
b. Distinguish between linear and non-linear equations.
c. Translate between verbal expressions and algebraic expressions.
d. Apply the operations of addition, subtraction, and scalar multiplication to matrices.
e. Use scientific notation to solve problems.
f. Use appropriate algebraic language to justify solutions and processes used in solving problems.

A7 — Interpret and apply slope as a rate of change.
a. Define slope as a rate of change using algebraic and geometric representations.
b. Interpret and apply slope as a rate of change in problem-solving situations.
c. Use ratio and proportion to solve problems including direct variation (y=kx).
d. Apply the concept of slope to parallel and perpendicular lines.

A8 — Analyze data and apply concepts of probability.
a. Collect, organize, graph, and interpret data sets, draw conclusions, and make predictions from the analysis of data.
b. Define event and sample spaces and apply to simple probability problems.
c. Use counting techniques, permutations, and combinations to solve probability problems.

**Biology I3**

**Competencies and Suggested Objective(s)**

B1 — Utilize critical thinking and scientific problem solving in designing and performing biological research and experimentation.
a. Demonstrate the proper use and care for scientific equipment used in biology.
b. Observe and practice safe procedures in the classroom and laboratory.
c. Apply the components of scientific processes and methods in the classroom and laboratory investigations.
d. Communicate results of scientific investigations in oral, written, and graphic form.

B2 — Investigate the biochemical basis of life.
a. Identify the characteristics of living things.
b. Describe and differentiate between covalent and ionic bonds using examples of each.
c. Describe the unique bonding and characteristics of water that makes it an essential component of living systems.

---

d. Classify solutions using the pH scale and relate the importance of pH to organism survival.

e. Compare the structure, properties and functions of carbohydrates, lipids, proteins and nucleic acids in living organisms.

f. Explain how enzymes work and identify factors that can affect enzyme action.

B3 Investigate cell structures, functions, and methods of reproduction.

a. Differentiate between prokaryotic and eukaryotic cells.

b. Distinguish between plant and animal (eukaryotic) cell structures.

c. Identify and describe the structure and basic functions of the major eukaryotic organelles.

d. Describe the way in which cells are organized in multicellular organisms.

e. Relate cell membrane structure to its function in passive and active transport.

f. Describe the main events in the cell cycle and cell mitosis including differences in plant and animal cell divisions.

g. Relate the importance of meiosis to sexual reproduction and the maintenance of chromosome number.

h. Identify and distinguish among forms of asexual and sexual reproduction.

B4 Investigate the transfer of energy from the sun to living systems.

a. Describe the structure of ATP and its importance in life processes.

b. Examine, compare, and contrast the basic processes of photosynthesis and cellular respiration.

c. Compare and contrast aerobic and anaerobic respiration.

B5 Investigate the principles, mechanisms, and methodology of classical and molecular genetics.

a. Compare and contrast the molecular structures of DNA and RNA as they relate to replication, transcription, and translation.

b. Identify and illustrate how changes in DNA cause mutations and evaluate the significance of these changes.

c. Analyze the applications of DNA technology (forensics, medicine, agriculture).

d. Discuss the significant contributions of well known scientists to the historical progression of classical and molecular genetics.

e. Apply genetic principles to solve simple inheritance problems including monohybrid crosses, sex linkage, multiple alleles, incomplete dominance, and codominance.

f. Examine inheritance patterns using current technology (gel electrophoresis, pedigrees, karyotypes).

B6 Investigate concepts of natural selection as they relate to diversity of life.

a. Analyze how organisms are classified into a hierarchy of groups and subgroups based on similarities and differences.

b. Identify characteristics of kingdoms including monerans, protists, fungi, plants and animals.

c. Differentiate among major divisions of the plant and animal kingdoms (vascular/non-vascular; vertebrate/invertebrate).

d. Compare the structures and functions of viruses and bacteria relating their impact on other living organisms.
e. Identify evidence of change in species using fossils, DNA sequences, anatomical and physiological similarities, and embryology.

f. Analyze the results of natural selection in speciation, diversity, adaptation, behavior and extinction.

B7 Investigate the interdependence and interactions that occur within an ecosystem.

a. Analyze the flow of energy and matter through various cycles including carbon, oxygen, nitrogen and water cycles.

b. Interpret interactions among organisms in an ecosystem (producer/consumer/decomposer, predator/prey, symbiotic relationships and competitive relationships).

c. Compare variations, tolerances, and adaptations of plants and animals in major biomes.

d. Investigate and explain the transfer of energy in an ecosystem including food chains, food webs, and food pyramids.

e. Examine long and short-term changes to the environment as a result of natural events and human actions.

English II

Competencies and Suggested Objective(s)

E1 Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.

a. Produce individual and/or group compositions and/or projects to persuade, tell a story, describe, create an effect, explain or justify an action or event, inform, entertain, etc.

b. Produce writing typically used in the workplace such as social, business, and technical correspondence; explanation of procedures; status reports; research findings; narratives for graphs; justification of decisions, actions, or expenses; etc.

c. Write a response, reaction, interpretation, analysis, summary, etc., of literature, other reading matter, or orally presented material.

d. Revise to ensure effective introductions, details, wording, topic sentences, and conclusions.

E2 Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.

a. Listen to determine the main idea and supporting details, to distinguish fact from opinion, and to determine a speaker's purpose or bias.

b. Speak with appropriate intonation, articulation, gestures, and facial expression.

c. Speak effectively to explain and justify ideas to peers, to inform, to summarize, to persuade, to entertain, to describe, etc.

E3 Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.

a. Read, view, and listen to distinguish fact from opinions and to recognize persuasive and manipulative techniques.

b. Access both print and non-print sources to produce an I-Search paper, research paper, or project.

c. Use computers and audio-visual technology to access and organize information for purposes such as resumes, career search projects, and analytical writings, etc.

d. Use reference sources, indices, electronic card catalog, and appropriate research procedures to gather and synthesize information.

E4 Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.

a. Interact with peers to examine real world and literary issues and ideas.

b. Show growth in critical thinking, leadership skills, consensus building, and self-confidence by assuming a role in a group, negotiating compromise, and reflecting on individual or group work.

E5 Complete oral and written presentations which exhibit interaction and consensus within a group.

a. Share, critique, and evaluate works in progress and completed works through a process approach.

b. Communicate effectively in a group to present completed projects and/or compositions.

c. Edit oral and written presentations to reflect correct grammar, usage, and mechanics.

E6 Explore cultural contributions to the history of the English language and its literature.

a. Explore a variety of works from various historical periods, geographical locations, and cultures, recognizing their influence on language and literature.

b. Identify instances of dialectal differences which create stereotypes, perceptions, and identities.

c. Recognize root words, prefixes, suffixes, and cognates.

d. Relate how vocabulary and spelling have changed over time.

E7 Discover the power and effect of language by reading and listening to selections from various literary genres.

a. Listen to and read aloud selected works to recognize and respond to the rhythm and power of language to convey a message.

b. Read aloud with fluency and expression.

c. Analyze the stylistic devices, such as alliteration, assonance, word order, rhyme, onomatopoeia, etc., that make a passage achieve a certain effect.

d. Demonstrate how the use of language can confuse or inform, repel or persuade, or inspire or enrage.

e. Analyze how grammatical structure or style helps to create a certain effect.

E8 Read, discuss, analyze, and evaluate literature from various genres and other written material.

a. Read and explore increasingly complete works, both classic and contemporary, for oral discussion and written analysis.

b. Read, discuss, and interpret literature to make connections to life.

c. Read from a variety of genres to understand how the literary elements contribute to the overall quality of the work.
d.—Identify qualities in increasingly complex literature that have produced a lasting impact on society.

e.—Read for enjoyment, appreciation, and comprehension of plot, style, vocabulary, etc.

E9—Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.

a.—Infuse the study of grammar and vocabulary into written and oral communication.

b.— Demonstrate, in the context of their own writing, proficient use of the conventions of standard English, including, but not limited to, the following: complete sentences, subject-verb agreement, plurals, spellings, homophones, possessives, verb forms, punctuation, capitalization, pronouns, pronoun-antecedent agreement, parallel structure, and dangling and misplaced modifiers.

c.— Give oral presentations to reinforce the use of standard English.

d.— Employ increasingly proficient editing skills to identify and solve problems in grammar, usage, and structure.

E10—Use language and critical thinking strategies to serve as tools for learning.

a.—Use language to facilitate continuous learning, to record observations, to clarify thought, to synthesize information, and to analyze and evaluate language.

b.—Interpret visual material orally and in writing.

U. S. History from 18775

Competencies and Suggested Objective(s)

H1—Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.

a.—Apply economic concepts and reasoning when evaluating historical and contemporary social developments and issues (e.g., gold standard, free coinage of silver, tariff issue, laissez faire, deficit spending, etc.).

b.—Explain the emergence of modern America from a domestic perspective (e.g., frontier experience, Industrial Revolution and organized labor, reform movements of Populism and Progressivism, Women’s Movement, Civil Rights Movement, the New Deal, etc.).

c.—Explain the changing role of the United States in world affairs since 1877 through wars, conflicts, and foreign policy (e.g., Spanish-American War, Korean conflict, containment policy, etc.).

d.—Trace the expansion of the United States and its acquisition of territory from 1877 (e.g., expansionism and imperialism).

H2—Describe the impact of science and technology on the historical development of the United States in the global community.

a.—Analyze the impact of inventions on the United States (e.g., telephone, light bulb, etc.).

b.—Examine the continuing impact of the Industrial Revolution on the development of our nation (e.g., mass production, computer operations, etc.).

Describe the effects of transportation and communication advances since 1877.

Describe the relationship of people, places, and environments through time.

Analyze human migration patterns since 1877 (e.g., rural to urban, the Great Migration, etc.).

Analyze how changing human, physical, geographic characteristics can alter a regional landscape (e.g., urbanization, Dust Bowl, etc.).

Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).

Interpret special purpose maps, primary/secondary sources, and political cartoons.

Analyze technological information on graphs, charts, and timelines.

Locate areas of international conflict (e.g., Caribbean, Southeast Asia, Europe, etc.).

Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.

Examine various reform movements (e.g., Civil Rights, Women’s Movement, etc.).

Examine the government’s role in various movements (e.g., arbitration, 26th Amendment, etc.).

Examine the role of government in the preservation of citizens’ rights (e.g., 19th Amendment, Civil Rights Act of 1964).

Examine individuals’ duties and responsibilities in a democratic society (e.g., voting, volunteerism, etc.).
Appendix C: 21st Century Skills

CS1—Global Awareness
• Using 21st century skills to understand and address global issues
• Learning from and working collaboratively with individuals representing diverse cultures, religions, and lifestyles in a spirit of mutual respect and open dialogue in personal, work, and community contexts
• Promoting the study of non-English language as a tool for understanding other nations and cultures

CS2—Financial, Economic, and Business Literacy
• Knowing how to make appropriate personal economic choices
• Understanding the role of the economy and the role of business in the economy
• Applying appropriate 21st century skills to function as a productive contributor within an organizational setting
• Integrating oneself within and adapting continually to our nation’s evolving economic and business environment

CS3—Civic Literacy
• Being an informed citizen to participate effectively in government
• Exercising the rights and obligations of citizenship at local, state, national, and global levels
• Understanding the local and global implications of civic decisions
• Applying 21st century skills to make intelligent choices as a citizen

CS4—Information and Communication Skills
• Information and media literacy skills: Analyzing, accessing, managing, integrating, evaluating, and creating information in a variety of forms and media; understanding the role of media in society
• Communication skills: Understanding, managing, and creating effective oral, written, and multimedia communication in a variety of forms and contexts

CS5—Thinking and Problem-Solving Skills
• Critical thinking and systems thinking: Exercising sound reasoning in understanding and making complex choices, understanding the interconnections among systems
• Problem identification, formulation, and solution: Ability to frame, analyze, and solve problems
• Creativity and intellectual curiosity: Developing, implementing, and communicating new ideas to others, staying open and responsive to new and diverse perspectives

CS6—Interpersonal and Self-Directional Skills
• Interpersonal and collaborative skills: Demonstrating teamwork and leadership, adapting to varied roles and responsibilities, working productively with others, exercising empathy, respecting diverse perspectives
• Self-direction: Monitoring one’s own understanding and learning needs, locating appropriate resources, transferring learning from one domain to another
• Accountability and adaptability: Exercising personal responsibility and flexibility in personal, workplace, and community contexts; setting and meeting high standards and goals for one’s self and others; tolerating ambiguity

---

Social responsibility: Acting responsibly with the interests of the larger community in mind; demonstrating ethical behavior in personal, workplace, and community contexts.
Appendix D: Rubrics

Field Trip Participation Checklist

1. The student arrived at the designated meeting place on time with all materials and supplies required for the field trip.
2. The student observed all safety rules and policies while traveling to and participating in the field trip.
3. The student demonstrated interest in the content of the field trip by paying attention to the exhibits and speakers, asking pertinent questions, and taking notes.
4. The student exhibited a positive attitude toward the events and activities of the field trip.
5. The student remained on task throughout the field trip.
6. The student exhibited cooperative workplace skills with other students throughout the field trip.
