GOVERNOR

BY THE GOVERNOR:

SECRETARY OF STATE
WHEREAS, The United States does not have a comprehensive national energy policy; and

WHEREAS, the United States uses an estimated twenty million barrels of oil per day, of which approximately one-half comes from foreign sources; and

WHEREAS, the world demand for oil is about fifty-eight million barrels per day, thereby causing all petroleum consuming nations to compete for a limited supply of oil at inflationary prices set by the OPEC Countries. OPEC is continuing to raise these prices periodically, in fact, almost on a monthly basis, and the price per barrel of oil has risen from $5.75 in 1973 to $14.75 currently and on spot markets as much as $28.00; and

WHEREAS, no country has been able to survive for any length of time a high rate of inflation. The American people and people around the world have suffered and will continue to suffer and will even suffer more as the price resulting from this monopolistic action of the OPEC Countries continues. It is now time for Mississippi and America to take the lead and tighten our belts in the energy consumption so that we can control inflation and reduce our dependence on foreign petroleum; and

WHEREAS, we, as a Nation, are addicted to petroleum as a drug addict is addicted to drugs. Seventy-five percent (75%) of our energy is produced from petroleum and natural gas and until we recognize this problem, the OPEC Countries can charge $50 or more a barrel for oil and we will still buy gasoline at the price of $2 to $2.50 per gallon. This would not only mean doubling the price we are paying for gasoline but also for all other forms of energy, such as utility bills. The working men and women of this State and Nation cannot afford this high-priced energy; and

WHEREAS, The President of the United States has authorized each Governor to establish a system of conservation of gasoline and other forms of energy in order to prevent the long lines at gasoline pumps and skyrocketing of prices of both gasoline and other petroleum products; and

WHEREAS, The President of the United States directed the attention of the public to the consequences of an acute shortage of usable energy resources, including the depletion of stocks of crude oil, gasoline, heating oil and distillate and the impending possibility of spot shortages of gasoline and other fuels and the need for both public and private conservation measures to deal with it; and

WHEREAS, an individual conservation effort on a voluntary basis by all Mississippian led by the examples set by state and local governments in operating energy conservation measures in buildings, vehicles, and all other means of conservation is the most effective means of reducing the Nation's and Mississippi's dependence on foreign oil and petroleum products.
NOW, THEREFORE, I, Cliff Finch, Governor of the State of Mississippi, pursuant to the authority vested in me by the President and the Constitution and applicable statutes of the State of Mississippi, for the general welfare and in the best interest of the people of the State, do hereby request of the general public and direct every state agency and institution to do the following:

SECTION 1. Conserve twenty-five percent (25%) of all energy consumed by each homeowner, industry and other consumers in the State of Mississippi. The Governor will set the example by reducing 25% of the energy used in the Governor's Mansion. Hot water heaters and air conditioners will be turned off between 6 a.m. and 12 noon or at 12 noon and 6 p.m. State agencies and institutions shall develop an energy conservation plan no later than Thursday, June 14, 1979, for the operation of buildings in which they are housed that sets a minimum goal of 25% reduction in the use of energy. All office buildings will cut off the air conditioner at 4 o'clock in the afternoon and it shall not be turned back on until 8 o'clock the next morning. All lights will be turned off no later than 6 p.m. in the evening except for the offices that are being used. All thermostats shall be set no lower than 80 degrees in the summer months and no higher than 65 degrees in the winter months.

SECTION 2. All agencies and institutions shall develop a carpool or vanpool program which shall promote the voluntary use of ride-sharing with their neighbors and friends to work or to the grocery store or whatever it might be. The program shall also promote the use of mass transit. A copy of the plan and monthly operating reports shall be filed in the Governor's Office.

SECTION 3. I am asking that all of our citizens voluntarily reduce their automobile speed limit to a maximum of 55 mph. All state and local law enforcement officials shall strictly enforce the 55 mph speed limit within their respective jurisdictions.

SECTION 4. Each family is encouraged to set aside one day and not use his or her family automobile for at least one work day out of each week. The Governor and each member of his family will not use a car one work day a week. Each agency shall develop a plan whereby they will not use a vehicle for one work day a week.

SECTION 5. The President has delegated to the Governor of each state the authority to set up a conservation program that is applicable to his or her state, and I hereby delegate similar authority from the Governor to each of the Mayors and each of the members of the Boards of Supervisors and all other county agency officials to implement a plan similar, but not inconsistent, to the conservation plan as presented above.

SECTION 6. It shall be the duty of every department, board, commission, agency, institution and office, and the officers thereof, to cooperate in the implementation of this Order and to file the documents as required herein.
WHEREAS, the record-breaking, severe flooding during the Spring of 1979, declared by The President in accordance with the Disaster Relief Act of 1974 to be a "major disaster", has had and is having such a tremendous economic impact upon the State of Mississippi that it is essential for the State Government to take action to promote the general welfare of the State; and

WHEREAS, the responsibility is reposed in the Governor as Chief Executive of the State Government to continue to cope with the problems resulting therefrom and connected therewith; and

WHEREAS, it is essential that an orderly, diligent and objective study be made as expeditiously as feasible to ascertain what avenues may be open to the people of Mississippi in seeking achievement of their goals; and

WHEREAS, it is the purpose of this Order and the policy of the State that all present plans and future programs involving the revitalization of a stricken area of our State be coordinated with comparable functions of the Federal Government, State Government, local governments and private agencies in order that the most effective, efficient and productive participation may be made by the State of Mississippi for the economic recovery and replacement of essential facilities and services. These programs should complement Public Law 93-288 Recovery Programs, and not delay the restoration of damaged facilities in each affected area:

BY THE GOVERNOR:

SECRETARY OF STATE
WHEREAS, the boards, commissions, departments, offices and administrative bodies in the Executive Branch of Mississippi State Government have during the years of their existence required various forms to be printed, distributed and completed for the purported purpose of assisting in the administration of the law and the delivery of governmental services; and

WHEREAS, the multiplicity of those forms, with the attendant information required by them, has now resulted in an avalanche of "red tape" which is seriously impairing the ability of State employees to render effective service, imposing an unnecessary burden on our municipalities, counties, school districts and other units of local government, as well as creating a burdensome, time-consuming and costly responsibility on our citizens, businesses and organizations which are required to fill out and file an endless number of forms; and

WHEREAS, this administration is determined to achieve efficiency, eliminate duplication, effect economy and improve service to the public; and

WHEREAS, unnecessary and duplicating forms now required by the various boards, commissions, departments, offices and administrative bodies of State Government can only be immediately and effectively eliminated by abolishing all such forms and then reissuing only those forms as are absolutely necessary in the administration of the laws and the rendering of services;

NOW, THEREFORE, I, Cliff Finch, Governor of the State of Mississippi, pursuant to the authority vested in me by the Constitution and applicable statutes of the State of Mississippi, for the purpose of effectuating improved efficiency, economy and public service, do hereby order as follows:

SECTION 1. It is the declared policy of the State of Mississippi that the people of this State have a fundamental interest in improving the efficiency, economy and services of State Government.

SECTION 2. All forms now in existence and utilized by the various State boards, commissions, departments, offices and administrative bodies subject to the Governor's jurisdiction are abolished effective June 30, 1979.

SECTION 3. Pursuant to the procedure herein set forth, those forms found to have a valid purpose and to be in the interest of efficient government shall be reissued effective July 1, 1979.

SECTION 4. The executive head of each board, commission, department, office or administrative body shall immediately catalog all forms presently in use thereby, indicate the purported purpose of each such form and submit the same to the Governor on or before January 1, 1979, including a negative report from each executive head not utilizing any forms.

SECTION 5. The executive head of each board, commission, department, office or administrative body wherein forms are utilized shall immediately establish, respectively, a "Form Review Committee". The Committee should be composed of a representative of each division within said agency, a representative of any user agency and members of the public including those whose interests are directly affected by those forms, and such other members
SECTION 6. After each executive head has completed cataloging all forms presently in use by said agency, he shall determine which forms can be eliminated, consolidated or reissued with their present or altered content. Those forms which each such agency recommends be reissued, or new forms consolidating information previously required by other forms, shall be submitted to the Governor's Form Review Committee for approval.

SECTION 7. There is hereby created and established within the Office of the Governor a Committee known as the "Governor's Form Review Committee" composed of seven members to be appointed by the Governor, which shall be representative of form issuers and form users, to review all reports herein required submitted to the Governor.

SECTION 8. It is fully recognized that in many instances forms are necessary to comply with existing statutes and administrative regulations. As a result, if it is determined during the process of this review that statutes should be amended or repealed, or administrative regulations changed, the appropriate action shall be commenced to accomplish the same.

SECTION 9. Simplicity, conciseness and the use of "plain English" shall be the overriding considerations in the formulation of forms to be reissued pursuant to the procedure herein outlined. No form shall be reissued unless it is proven to be necessary, and no form shall be reissued if it duplicates another.

SECTION 10. In the event it is found by the Governor's Form Review Committee that forms in one agency duplicate forms required by another agency, the fact shall be made known to the respective executive heads, and the said Committee shall resolve the duplication by requiring the reporting of the information in such way so as to avoid the duplication.
