

## STATEWIDE VOTER FILE WEEKLY DISTRIBUTION PROGRAM

The Mississippi Secretary of State's Office will provide a statewide voter file and statewide voter history file on a weekly basis to those who sign-up to receive such a file at [Statewide Voter File Distribution List](#) at no cost. Those who sign-up will receive an email each week with a Sharefile link to access a statewide voter file and statewide voter history file. This will be the same type of file provided when a statewide voter file is requested through a public records request and will include active and inactive voters.

The Mississippi Secretary of State's Office will not resend or forward any emails of the weekly distribution list for any reason and any request outside of the weekly distribution will be required to go through the public records request process.

The statewide voter file, which will just contain voter registration information, will provide the following information:

Mapping Value, First Name, Middle Name, Suffix, Residential Address, House Number, Street Name, Street Type, Pre-Direction, Post-Direction, Residence City, Residence State, Residential Zip Code, Residential County, Precinct Code, Precinct Name, Mailing Address, Mailing City, Mailing State, Mailing Zip Code, Effective Voter Registration Date, Voter Status, and Date Last Voted. (After date last voted, the file will provide all of the various district and what districts the voter belongs to.)

The voting history file will provide the headers below in the provided order:

Mapping Value, First Name, Middle Name, Last Name, Suffix, Election Name, Election Type, and Political Party.

Each election the voter has voted in will be displayed in the Voting History file with the above information and will be displayed in its own row.

The information will be provided in a .csv file. However, due to the number of rows on the file, it will need to be uploaded into a separate database to view all entries.
